PLANS and Speculations

Western YOLO COUNTY has assurance from the State Highway Commission that $456,00 will be made available immediately for the construction of 5.7 miles of the Vacaville - Winters - Dunnigan cutoff.

oOo

One acre of the land next to the Masonic Temple in CONCORD was sold last week to John G. and Clara Johnson, owners of Quality Bakery. Mr. and Mrs. Johnson plan to build a theatre on the site costing between $60,000 and $70,000.

oOo

Professor Raymond W. Jeans, who heads the University School of Architecture, is preparing plans for the new Grace Episcopal church and parish hall in MARTINEZ. The site is a 100 by 150 foot lot at Pine and Haven streets.

oOo

Foundation work has started for the new Galen Company, Inc., plant at 1141 S. 14th St., RICHMOND. Transfer of operations, including headquarters, from the firm's present location at 2148 Fourth Street, Berkeley, is expected to begin in March.

FIRST UNIT NEW S. F AIRPORT TO GO OUT TO BIDS

James H. Turner, Manager of Utilities, has announced that plans and specifications for the first unit of work under the new $20,000,000 San Francisco airport bond issue will go out to bids in about ten days.

Work will involve a fill of approximately 6,00,000 yards.

Henry J. Kaiser, chairman of the Board of the Kaiser - Frazer Corporation, has revealed plans for an addition to the FONTANA plant, which will cost between $10,000,000 and $15,000,000. The new mill will produce strip steel.

oOo

Sears, Roebuck has announced plans for a $5,000,000 store at Masonic Avenue and Geary Blvd., in SAN FRANCISCO. The two-story structure is scheduled for completion early in 1947. The parking lot in conjunction with the store will accommodate approx. 900 cars.

oOo

The Oakland Canning Company has taken out a permit for a $210,000 plant, and the Pacific Can Company has been issued a permit for a $290,000 factory. Both are being constructed on the Pacific Can Company's 25-acre site at West Avenue and Menlo Street in SAN LEANDRO.

POWER STUDY PLANNED FOR NORTHWEST

Announcement of a Department of the Interior study of the power market and supply of the basins of the Snake River and tributaries down to and including the Salmon River, to be conducted jointly by the Bureau of Reclamation and the Bonneville Power Administration, was made today by R. J. Newell, Regional Director for the Bureau, and Paul J. Raver, Bonneville Power Administrator.

The objective of the survey, according to a directive issued to both agencies by Secretary of the Interior Harold L. Ickes, is to provide for the maximum over-all development of this area "through the construction of the multiple-purpose water conservation projects planned by the Bureau of Reclamation and through the availability of the low cost electric power from the Columbia River system."

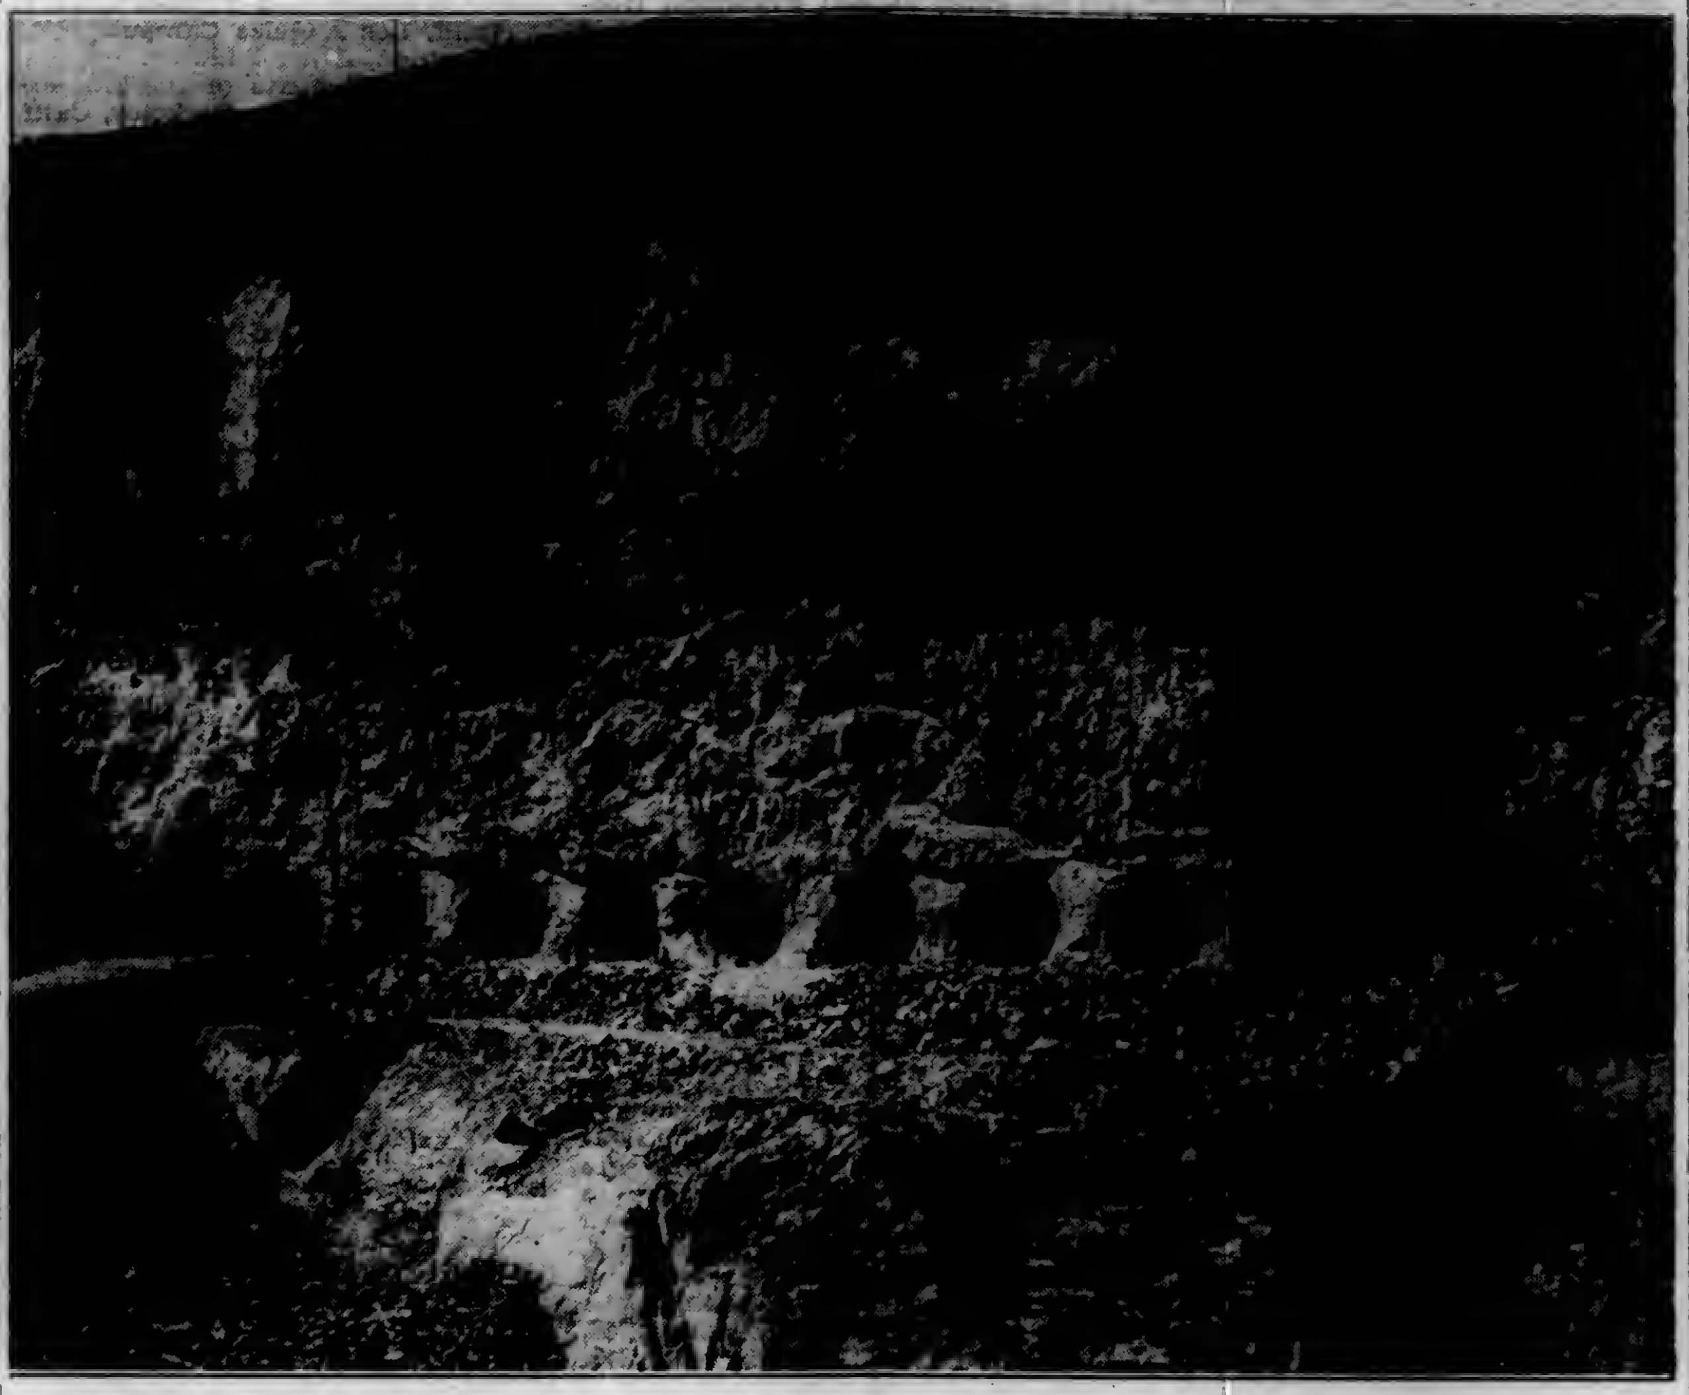
The agencies will submit recommendations leading to the most effective power construction program for the Basin consistent with the full development of the area, including dams, generating and transmission facilities as well as proper wholesale rates to be charged for power in the area by the Department of the Interior, the announcement stated.

The region to be covered in the study will include part of eastern Oregon, all of southwestern and southeastern Idaho, and small portions of Wyoming, Utah and Nevada.

CHARLES C. HANNAH LAST RITES TODAY

Funeral services for Charles C. Hannah, President of Firemans Fund Insurance Company and member of the San Francisco Builders' Exchange, who passed away Sunday, will be held today, January 24, at 2:00 p. m., at St. Matthew's Episcopal Church, San Mateo. Interment will be at Cypress Lawn Memorial Park. Friends may call at the chapel of Crosby-N. Gray & So., 221 Park Rd., Burlingame, until 12 noon Thursday.

GRAND COULEE TUNNELS



COULEE DAM, Wash.—Driven through solid granite by the Bureau of Reclamation, these tunnels at Grand Coulee Dam will carry water for the extensive Columbia Basin Project in south-central Washington. Varying from 487 feet to 530 feet in length, the bores will be fitted with steel pipes 12 feet in diameter and will be served by the world's largest pumps forcing water from nearby Lake Roosevelt. The pipes will emerge from the hill in the background and lead to a feeder canal which will empty into the Grand Coulee Equalizing Reservoir about 2 miles away. The Bureau recently called for bids on the gigantic pumps.

J. G. LINDLEY APPOINTED TO BUREAU POST

Appointment of James G. Lindley as Chief of the Regional Branch of Operation and Maintenance, U. S. Bureau of Reclamation, was announced today by Richard L. Boke, Regional Director at Sacramento.

Chief among the duties of this branch that lie immediately ahead are the prosecution of the repayment contracts with irrigation districts that are to be served water by the Central Valley Project, and completion of the Bureau's plans for opening to homestead entry about 7,000 acres of the Klamath Project, Oregon-California.

Prior to this appointment, and since 1942, Lindley was Project Director of the War Relocation Center at Amache, Colo., in charge of the activities of 8,000 evacuees. Before that he was manager of the Gila River District, Arizona, of the Soil Conservation Service, and later was Regional Engineer for that agency with headquarters at Albuquerque, N. M., where he had charge of construction and maintenance of soil conservation projects in four states of the arid southwest where all crop agriculture is by irrigation.

Before working for the Government, Lindley was Superintendent of the Clifton property of Phelps Dodge Corporation, a smelter that turned out 10 million pounds of copper a month; for that and other companies he had built and operated smelting and mining properties in the southwest United States and in Mexico.

Lindley is a native of Missouri. He attended high school in California, and college at the University of Oregon and the University of Arizona, with degrees B.S. and M.E. He is married and has one daughter.

L. A. HOME SHOW PRESIDENT IS RE - ELECTED

Re-election of M. J. Brock as president of the Southern California Construction Industries Exposition and Home Show, and the admission of two additional trade associations as members of the project, was announced today by Lawrence B. Gibbs, secretary of the exposition corporation.

The two associations admitted are the Pacific Coast Gas Association and the Southern California Radio & Electrical Appliance Association, bringing the total to 14 trade associations as participating operators of the show.

"National and local manufacturers have already reserved more than 45 per cent of the auditorium space," said Brock, in accepting re-election.

"Exhibitors include trade associations, building materials, contractors, electrical appliances, radio manufacturers, home furnishings, gas appliances, heating and ventilation, lumber and lumber treating, steel and brass, paint contractors, sales and manufacturers, home financing, banks, hardware supplies, home motion pictures, floor polishes, water softeners, termite control, and other classifications", Brock stated.

The exposition, which will present postwar developments in construction and home building and appliances, will be held at the Pan Pacific Auditorium from July 12 to 21.

Other officers re-elected are Earl S. Anderson, first vice-president; Frank Jani, 2nd vice - president; Lawrence B. Gibbs, secretary, and A. L. Stone, treasurer. Management is under the direction of the Tabery Corporation.

G. E. EXPERT CONFERS WITH S. F. OFFICIALS

W. H. Robinson, nationally-known lighting authority, arrived in San Francisco this morning for a two-day conference with local electrical officials. Robinson is Advertising Manager of General Electric Company's Lamp Department in Nela Park, Cleveland.

Sponsored by General Electric, Robinson will be guest speaker at a dinner meeting this evening being held for local wholesale lamp distributors at the Sir Francis Drake Hotel. He will also talk before utility executives tomorrow noon at a luncheon meeting at the Sir Francis Drake. His subject, "Relighting America" was a slogan first introduced by the electrical industry at the Victory Lighting Jubilee held recently in New York City.

Stressing improved retail store lighting, Robinson will feature General Electric's contribution to the industry progam. . . a color movie "Seeing Is the Biggest Thing In America". The relative importance of better store illumination to increase retail sales and greated production is demonstrated in the film. In addition to the motion picture, he will also highlight other sales points of vital interest to the electrical industry in its postwar campaign to "relight America".

Well known in the national lighting field for many years, Robinson has contributed much to lighting programs throughout the nation. He has long stressed a wider and more intelligent use of G. E. fluorescent lamps. After his visit in San Francisco he will go to Los Angeles, Salt Lake City and Denver, before returning to his headquarters in Cleveland.

Use of Purchasing Power in Planning Shopping Centers Shown in New Study

The use of purchasing power as a yard-stick in planning neighborhood shopping sections is urged in the latest study of the National Committee on Housing, "Planning Neighborhood Shopping Centers", just published.

The study calls attention to the fact that most communities are over-zoned and over-built as far as neighborhood stores are concerned and points out that only by advance study and planning may improvements be made in shopping conveniences and physical appearance of communities. Maintenance of real estate values and relief to distressed retal merchants are other problems analyzed in the study, which also outlines methods of rectifying existing conditions and planning new neighborhood shopping areas.

A foreword by Mrs. Samuel I. Rosenman, Chairman of the National Committee on Housing, Inc., points out that while "adequate neighborhood shopping centers have been recognized as vital to every community, no yardstick has been readily available which would serve as a basis for determining the requirements of such centers. The number of empty and marginal stores which characterize almost every community in the country and the recurrent failures of thousands of small merchants annually, attest to the need for well-planned commercial centers.

"The conclusions to be drawn from the facts presented in 'Planning Neighborhood Shopping Centers' are that most communities, old and new, are over-zoned and over-built as fas as neighborhod stores as concerned. There is no profit to the real estate owner, the merchant, or to the community in over-building and over-zoning for retail trade. The newer and better way will be to plan neighborhood shopping centers in terms of neighborhood needs and neighborhood purchasing power".

Marcel A. Villanueva, A.I.A., planning consultant, who made the study, explains that its chief objective is to call attention to the need of planning commercial centers in terms of the purchasing power of the population to be served and of finding new planning standards for such centers.

"It is time for all groups in the community," the author states in his introduction, "to know the number of unprofitable businesses, the pitiful earnings of the majority of merchants and the percentage of failure that recur every year in the same locations and for the same reasons.

"An analysis of the health of the retail trade reveals unbelieveable distress among the great majority of merchants. Too many stores, particularly small ones, constantly fail. Due to ignorance, merchants continue to open stores

VICE-PRES. SAMUEL LUNDEN TO SPEAK AT AIA MEETING

Program chairman J. Francis Ward has just announced that architect Samuel Lunden, Vice-President of AIA, will be a guest speaker at the Friday night dinner of the Northern California Chapter.

Lunden, former president of the Southern California Chapter, will be remembered here for his stimulating talk given before the Construction Industry Conference, held at the Palace Hotel last November. Since his election as Vice - President of the Institute, he has devoted a great amount of time to the unification program in California and thruout the country. All architects are urged to attend the meeting. Kindly call the Chapter office, DOuglas 4561, and make your reservations.

4— FACTORIES AND WAREHOUSES

January 24, 1946
TO START WORK
HONOLULU, T. H.—McNeil Construction Co., 5860 Avalon Blvd., Los Angeles, will build a concrete and structural steel warehouse building to contain approximately 50,000 sq. ft. of floor space on a site to be announced later in Honolulu, T. H., for Sears, Roebuck & Co.; estimated cost $250,000.

The purchasing of local materials will be handled through McNeil Construction Co. main office, 5860 Avalon Blvd., Los Angeles, and balance will be purchased through McNeil Construction Co., P. O. Box 555, Honolulu. * 4

January 24, 1946
CONTRACT AWARDED
WEST END, Searles Lake, Inyo Co., Calif.—Prime contracts have been awarded by West End Chemical Co., H. D. Hellmers, general superintendent, Latham Square Bldg., Oakland, for expansion to the company's plant at West End, Searles Lake, Inyo County, involving additional housing and plant improvements to cost approximately $750,000, as follows: Western Pipe & Steel Co., 5717 S. Santa Fe Ave., Vernon, for fabricated steel; Santa Fe Tank & Tower Co., 4820 Santa Fe Ave., Vernon, for wood tanks; J. T. Thorpe, Inc., 948 E. 2nd St., Los Angeles, for brick work on furnaces, kiln and boilers; C. F. Braum & Co., 1000 S. Fremont Ave., Alhambra, for heat exchangers, and Gay Engineering Co., 2730 E. 11th St., Los Angeles, for refrigeration equipment.

Plant changes are to include installation of a battery of stainless steel heat exchangers, a compressor which will increase plant refrigeration by 200 tons a day, 20 carbonating towers, a new boiler and other improvements. * 4

9— HOSPITALS

January 24, 1946
FUNDS AWARDED
HILO, T. H.—Glen A. Akina, chairman and executive officer, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $2500 will be furnished the hospital for the purpose of assisting in the preparation of plans for a laundry building at the Hilo Memorial Hospital, Hawaii. The plans can now be completed and all arrangements made for construction.

The preliminary draft outlines a modern laundry in connection with the 200-bed Hilo Memorial Hospital. The estimated cost of the facilities will be $55,000, to be furnished from available cash and other funds. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

C. W. Schruth, located at Honolulu, T. H., is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Hawaii, and N. L. Wung is the architect for the hospital to make the final plans for the laundry building.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 9

January 24, 1946
BIDS WANTED
RIVERSIDE COUNTY, Calif.—Until February 5, 11 A. M., bids will be received by the U. S. Navy, Public Works Office, U. S. Naval Base, Terminal Island (San Pedro), for alterations to administration building to provide morgue and autopsy room at the U. S. Naval Hospital, Corona, Calif.; Spec. No. 17464, NOy 13308.

The work involves demolition, concrete work, miscel. steel and iron, carpentry and millwork, lathing and plastering, glass and glazing, finish hardware, resilient flooring, field painting, plumbing and miscel. piping, electric work, equipment, paving and appurtenant work, and two 36-cu. ft. refrigerators.

Plans and specifications may be obtained from the above office upon deposit of check or postal money order for $10, payable to the Chief of the Bureau of Yards & Docks. 9

13— PUBLIC BLDGS. FIRE HOUSES, JAILS

January 24, 1946
BIDS OPENED
SANTEE, San Diego Co., Calif.—H. H. Johnson, 624 Spreckels Bldg., San Diego, at $61,777, submitted the low bid to the County of San Diego Board of Supervisors, 1600 Pacific Highway, San Diego, January 21, for alterations and additions to county buildings at Santee, San Diego County. The work includes extensive alterations to two buildings and a frame and stucco addition to a building used as a women's dormitory. The cost is estimated at $50,000. Plans were prepared by E. L. Freeland, engineer, 602 Spreckels Bldg., San Diego.

The complete bids were:
H. H. Johnson, $61,777.
Tavares Construction Co., $69,454.
O. L. Carpenter, $71,859.
Stanton Reed Co., $73,835. * 13

January 24, 1946
FUNDS AWARDED
FLAGSTAFF, Coconino Co., Ariz.—Gordon Evans, chairman, Board of Supervisors, has received the information today from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $336 will be furnished the county for the purpose of assisting in the preparation of plans for construction of an addition to the Coconino County Jail in Flagstaff, to be used as a detention wing for juvenile cases. It is planned that the building area will occupy approximately 580 square feet. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $9000, to be furnished from available cash and other funds. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when construction begins.

Wright L. Felt, located at Los Angeles, Calif., is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Arizona, and Lescher & Mahoney, Phoenix, are the architects for the county to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 13

29— STREETS AND HIGHWAYS

January 23, 1946
BIDS WANTED

LOS ANGELES, Calif.—Until Feb. 6, 10 A. M., bids will be received by the Los Angeles Board of Public Works, 153 City Hall, Los Angeles, for the improving by grading, paving and by the removal of walks and guard rails on Mission Rd. between Aliso and First St., Los Angeles; a cash contract; 90 days for completion.

The work involves:

(1) lump sum, grading, including hauling, but not including 2785 cu. yds. of excavation;
(2) lump sum, removal and hauling of 1632 lin. ft. curb, 260 sq. ft. gutter, 6850 sq. ft. sidewalk, 90 lin. ft. wall, 25 lin. ft. handrail and 2 catchbasins;
(3) 76,703 sq. ft. A.C., 8-in. concrete base, 6-in. and 2-in. wearing surface;
(4) 3488 sq. ft. A.C. wearing surface of variable thickness, average thickness 1-in.;
(5) 23,374 sq. ft. concrete pavement 8-in. thick;
(6) 500 sq. ft. rock and oil roadway, 3-in. thick;
(7) 720 sq. ft. rock and oil roadway of variable thickness, average thickness 1-in.;
(8) 1583 lin. ft. unplastered curb, type B;
(9) 125 lin. ft. unplastered curb, type D;
(10) 62 lin. ft. monolithic curb;
(11) 1939 sq. ft. course sidewalk, 3-in. thick;
(12) 272 sq. ft. monolithic sidewalk;
(13) 15 lin. ft. reset iron railing;
(14) reset two manhole frame and cover sets to grade;
(15) storm drain and appurtenances complete in place;
(16) 48 lin. ft. 6-in. house connection sewers;
(17) replace manhole frame and cover cover sets (4 units). 29

January 24, 1946
BIDS WANTED

CALIFORNIA STATE HIGHWAY.—Until February 21, 2 P M., bids will be received by G. T. McCoy, state highway engineer, 808 State Bldg., Los Angeles, for the construction of the Terminal Island Freeway between Henry Ford Ave. and Willow St. (VII-L.A-Terminal Island), in the cities of Los Angeles and Long Beach, about 2.1 miles in length, to be graded and paved with asphaltic concrete; a national defense contract.

The work involves:

(1) 1200 cu. yds. remove concrete;
(2) 58 acres clear and grub;
(3) 14,500 cu. yds. roadway excavation;
(4) 23,500 cu. yds. structural excavation;
(5) 4700 cu. yds. ditch and channel excavation;
(6) 144,000 lin. ft. vertical holes, sand drains;
(7) 16,500 tons sand backfill, sand drains;
(8) 680,000 tons imported borrow;
(9) 72,000 tons imported subgrade material;
(10) 125,500 sq yds. prepare class C subgrade;
(11) develop water supply and furnish water equipment;
(12) 7200 M gallons apply water;
(13) finish roadway;
(14) 290 tons liquid asphalt, RC-2, bituminous surface treatment;
(15) 24,000 sq. yds. prepare, mix and shape surface, bituminous surface treatment;
(16) 2 tons liquid asphalt, SC-2, prime coat;
(17) 540 tons plant mix surfacing;
(18) 50,500 tons asphalt concrete;
(19) 132 tons asphalt emulsion, curing seal and seal coat;
(20) 330 cu. yds. portland cement concrete, pavement base;
(21) 720 cu. yds. portland cement concrete, structures;
(22) 315 tons gravel backfill, retaining wall foundations;
(23) 400 lin. ft. rubber waterstops;
(24) 30 sq .yds. membrane waterproofing;
(25) 410 cu. yds class C portland cement concrete pipe reinforcement;
(26) 2800 cu. yds. portland cement concrete, curbs and gutters;
(27) 34,500 lin. ft. chain-link fence;
(28) 15 each, walk gates;
(29) 1420 lin. ft. 18-in. reinforced concrete pipe, standard strength;
(30) 2500 lin. ft. 24-in. same;
(21) 1320 lin. ft. 30-in. same;
(32) 390 lin. ft 36-in. same;
(33) 90 lin. ft. 48-in. same;
(34) 180 lin. ft. 54-in same;
(35) 1960 lin. ft. 66-in. same;
(36) 5 lin. ft. pipe shaft manholes;
(37) 680 lin. ft. 12-in. plain concrete pipe;
(38) 1980 lin. ft. 15-in. same;
(39) 90 lin. ft. 6-in. steel pipe conduit;
(40) 3 each, adjust manholes to grade
(41) 50,000 lbs. bar reinforcing steel;
(42) 35,000 lbs. miscellaneous iron and steel;
(43) 145,000 each mesembryanthemum edule cuttings;
(44) electric equipment;
(45) pump house and pumping equipment. • 29

January 24, 1946
CONTRACTS AWARDED

STATE OF NEW MEXICO.—F. G. Healy, State Highway Engineer, Capitol Bldg., Santa Fe, N. M., awarded contracts for the construction of the following projects for which bids were received December 21:

Skousen Constr. Co., Albuerque, N. M., $284,291, for FAP No. FI-90 (6) located in Santa Fe County.
G. I. Martin, Albuquerque, N. M., $50,498, for FAP F-109 (2) Quay Co.
Brown Bros. Constr. Co., Albuquerque, N. M., $303,194 for FAP No. F-126 (14) Socorro County.
W. T. Bookout Constr. Co., Las Vegas, N. M., $77,701 for FAP No. F-196 (2), Union County. 29

January 24, 1946
BIDS REJECTED

BERKELEY, Alameda Co., Calif.—The Berkeley City Clerk has rejected all bids for construction of concrete steps and walk on Acacia Path, Spruce to Cragmont.

Albany Concrete Co., 1840 4th St., Berkeley, at $1721.80 submitted the previous low bid. • • 29

30—RESERVOIRS & DAMS

January 23, 1946
FUNDS APPROPRIATED

WASHINGTON, D. C.—The U. S. War Department, Engineer Office, Washington, D. C., has reported appropriation of funds for the construction of the following California flood control projects:

(1) Flood control work, Whittier Narrows reservoir, California, $2,000,000; U. S. District Engineer, Los Angeles.
(2) Flood control work, Santa Fe reservoir, California, $900,500; U. S. District Engineer, Los Angeles.
(3) Flood control work, Los Angeles River, California, $2,000,000; U. S. District Engineer, Los Angeles.
(4) River and harbor improvements, Los Angeles and Long Beach harbors, California, $7,100,000; U. S. District Engineer, Los Angeles.
(5) Flood control work, Big Dry Creek reservoir and diversion, California, $435,000; U. S. District Engineer Office, Sacramento.
(6) River and harbor improvements, San Joaquin, California, $150,000; U. S. District Engineer Office, Sacramento.
(7) River and harbor improvements, Sacramento River, California, $390,000; U. S. District Engineer Office, Sacramento.
(8) River and harbor improvements, Suisun channel, California, $160,000; U. S. District Engineer, Sacramento.
(9) Flood control work, Hot Springs, S. D., $154,000; U. S. District Engineer, Fort Peck, Mont.
(10) Flod control work, Cottonwood Springs reservoir, South Dakota, $510,000; U. S. District Engineer, Fort Peck, Mont.
(11) River and harbor improvements, Columbia River and tributaries, Celilo Falls and Snake River, $100,000; U. S. District Engineer, Portland, Ore.
(12) Flood control work, McKenzie River, Oregon, $62,000; U. S. District Engineer, Portland, Ore.
(13) Flood control work, Cottage Grove reservoir, Oregon, $11,500; U. S. District Engineer, Portland, Ore.
(14) Flood control work, Detroit reservoir, Oregon, $2,000,000; U. S. District Engineer, Portland, Ore.
(15) Flood control work, Dorena reservoir, Oregon, $1,000,000; U. S. District Engineer, Portland, Ore.
(16) Flood control work, Mill Creek, Washington, $125,500; U. S. District Engineer, Portland, Ore.
(17) Flood control work, Mud Mountain reservoir, Washington, $257,000; U. S. District Engineer, Seattle, Wash.
(18) Flood control work, Tacoma, Wash., $700,000; U. S. District Engineer, Seattle, Wash.
(19) Flood control work, Yakima, Wash., $134,000; U. S. District Engineer, Seattle, Wash. 30

January 24, 1946
CONTRACTS AWARDED

REDLANDS, San Bernardino Co., Calif.—The Bear Valley Mutual Water Co., 14 W Citrus, Redlands, received bids and awarded contracts totaling $88,700, Dec. 28, for the construction of a 31,000,000-gallon open gunite reservoir 20-feet. deep near Mentone.

Work involves:

Furnishing and laying reinforcing concrete spun pipe;
56,000 c.y. excavation and fill;
240,000 sq. ft. gunite work;
2400 ft. 2x2-in. mesh fence.

The contracts awarded and the bids submitted were as follows:

Inlet and Outlet Structures And Pipe Work

Concrete Conduit Co., 899 La Cadena Ave., Colton, awarded contract at $19,966:
Bolton Engrg. and Constr. Co., $31,600;
Macco Constr. Co., $31,900.

Excavation and Embankment

Vergil Grove, 5841 Grand Avenue, Riverside, awarded contract at $39 cubic yard;
A. S. Hubbs, Colton, $.52;
Case Constr. Co., $.53;
Matich Brothers, $.54;
H. L. Manning, San Bernardino, $.61;
J. E. Roberts, San Bernardino, $.63.
Willis & Sons, $.64;
Macco Constr. Co., $.685.

Gunite Work

California Gunite Co., 2022 Hyperion Ave., Los Angeles, awarded contract at $.152 per sq. ft.;
Los Angeles Cement Gun Co., $.1775
Macco Constr. Co., $.182;
Case Constr. Co., $.185.

Fencing

Cyclone Fence Co., 5532 San Fernando Road, Glendale, awarded contract at $4,113.93;
Allen & Son, San Bernardino, $4,161.43. 30

32— SEWERS & SEWAGE DISPOSAL PLANTS

January 24, 1946
PREPARING PRELIMINARY PLANS
SEWERS Cost, $112,000
SOUTH SAN FRANCISCO, San Mateo County, Calif.
Construction of intercepter and outfall sewers.
Owner—City of South San Francisco, San Mateo Co., Calif.
Engineer—Charles T. Broughton, City Hall, South San Francisco. 32

33—WATERWORKS

January 24, 1946
BIDS WANTED

PORTLAND, Ore.—Until Jan. 30, 5 P. M., bids will be received by the Capitol Highway Water District at the office of C. E. Carter, engineer, 822 Spalding Bldg., Portland, (to be opened at 8 p. m.) at the Pump House of the Water District, SW 40th Ave. and Taylors Ferry Road, Portland, for the construction of water mains and appurtenances. Portland.

Bidder's bond in amount of 5% to accompany bids. Plans were prepared by Engineer C. E. Carter, 822 Spalding Bldg., Portland, and are available from his office upon deposit of $25.00.

Work involves:

(1) 8800 l.f. 12-in. cast iron pipe;
(2) 4000 l.f. 10-inch do;
(3) 16,000 l.f. 8-inch do;
(4) 9000 l.f. 6-inch do;
(5) 15,000 l.f. 4-inch do;
(6) 800 l.f. 2-inch do;
(7) 6000 l.f. ⅛-in. copper piping;
(8) 13,200 l.f. ½-inch do;
(9) necessary gate valves, fittings and appurtenances.

Schedules will ask quotations on both rail and water delivery of pipe and alternate bids will be taken for (a) flexible joint cement-lined pipe; (b) open bell cement-lined pipe; (c) open bell unlined pipe.

A bid call is expected to be issued in about 60 days for three concrete covered reservoirs, two each of 500,000- and one of 250,000-gal. capacity; cost, $70,000. 33

January 24, 1946
TO PREPARE SURVEY

VENTURA COUNTY, Calif.—Engineer Donald R. Warre, 500 South Figueroa St., Los Angeles, Herman Blau, in charge of field work, will started work January 14 on the Matilija Dam site survey for the Ventura County Flood Control District. The purpose of the survey is to determine the exact location for the dam and to supply data for designing the structure. 33

(Continued on Page Four)

0.3 MILE GRADE AND PAVE, VALLEJO, CALIF.

SOLANO COUNTY, Calif.—C. M. Syar, Box 1431, Vallejo, Calif., at $27,494, submitted the low bid to the State Division of Highways, G. T. McCoy, state highway, engineer, Public Works Bldg., Sacramento, for about three-tenths mile in length to be graded and paved with asphalt concrete on crusher run base on Waterfront Rd., between Virginia St. and Santa Clara St., in the City of Vallejo, Solano Co., Calif. This is a national defense contract.

The work involves:

(1) 45 cu. yds. remove concrete;
(2) 1750 cu. yds. roadway excavation;
(3) 105 cu. yds. structural excavation;
(4) 2300 sq. yds. compact original ground;
(5) 400 cu. yds. imported borrow;
(6) 250 cu. yds. rock fill;
(7) develop water supply and furnish water equipment;
(8) 400 M gallons apply water;
(9) 15 sta. finish roadway;
(10) 5900 tons crusher run base;
(11) 3 tons liquid asphalt MC-2 prime coat;
(12) 8 tons asphaltic emulsion paint binder, seal and armor coat;
(13) 100 tons screenings armor coat;
(14) 1233 tons asphaltic concrete;
(15) 400 lin. ft. raised bars;
(16) 3 cu. yds. class A portland cement concrete structures;
(17) 34 cu .yds. class A portland cement concrete curbs and gutters;
(18) 39 each curb dowels;
(19) 108 lin. ft. 18-in. CMP, 14-gage;
(20) 3 each cast steel frames and covers;
(21) 300 lbs. bar reinforcing steel.

Total bids were:

(A) C. M. Syar, Vallejo, $27,494.
(B) Parish Bros., Benicia, $29,611.60.
(C) E. A. Forde, San Anselmo, $30,367.10.
(D) E. E. Lowell, Vallejo, $30,918.85.
(E) A. G. Raisch Co., San Francisco, $30,919.

34974 475 36th St; owner, Dr Benson; contractor, Paramount Electric; fixtures; alterations.

Purchasing Power

(Continued from Page One)

without regard to the actual necessity for them and with little concern for the repeated failures that preceded them.

"Every year since 1900 some 250-000 to 450,000 retail businesses have failed and a comparable number of new ones have started apparently unaware of what was going on. There has yet been no indication of a reversal of the trend. On the contrary, the post-war period shows signs of stepping up the number of civilians planning to undertake small businesses of their own. In addition some three million veterans are considering such ventures, according to reports received from the armed forces regarding business loans available to them under the G. I. Bill of Rights."

While the problem of inadequate or over-built shopping centers is not a new one, the study explains, it caused little interest because the public did not suffer directly. "Today, however," it continues, "the ill effects of poor retail business reflect directly upon the real estate values, the ratables, the tax rate, and the public suffers."

The text of the study is liberally interspersed with tables and other factual data and gives the theoretical area requirements for neighborhood shopping centers, together with the number and kinds of stores needed.

The study was made possible through the interest of the Field Foundation, Inc., of New York and Chicago.

The booklet may be obtained from the National Committee On Housing, 512 Fifth Ave., New York 18, N. Y., Price $1.00. A copy is on file at the office of the "Builder".

WATER PERMITS ISSUED

SACRAMENTO, Calif.—Permits to appropriate water issued by the Department of Public Works, Division of Water Resources, Sacramento, during December, 1945, were as follows:

Permit 6454, App. 11086 (Calaveras County). Issued to Wm. J. Canepa, Angels Camp, Dec. 4, 1945, for 0.2 c.f.s. from Six Mile Creek for irrigation and stock watering.

Permit 6455, App. 11113 (Humboldt County). Issued to K. L. Blackburn, Fields Landing, Dec. 6, 1945, for 1600 g.p.d. from an unnamed stream for domestic and irrigation of one acre. estimated cost $100.

Permit 6456, App. 11114 (San Bernardino County). Issued to Chas. R. Tayles, Big Bear Lake, Dec. 7, 1945, for 1600 g.p.d. from a spring for domestic purposes.

Permit 6457, App. 11126 (Modoc County). Issued to Milton J. Black, Davis Creek, Dec. 10, 1945, for 2½ c.f.s. and 40 a.f. from an unnamed stream for domestic and irrigation of 240 acres.

Permit 6458, App. 11053 (Los Angeles County). Issued to U. S. Angeles National Forest, Los Angeles, Dec. 12, 1945, for 1350 g.p.d. from Canton Spring for fire protection and stock watering.

Permit 6459, App. 11054 (Los Angeles County). Issued to U. S. Angeles National Forest, Los Angeles, Dec. 12, 1945, for 1350 g.p.d. from Diablo Spring for fire protection and stock watering. Estimated cost, $145.

Permit 6460, App. 11165 (Placer County). Issued to F. M. Hardy, Roseville, Dec. 14, 1945, for 16,000 g.p.d. from an unnamed stream for irrigation of one acre.

Permit 6461, App. 11128 (Humboldt County). Issued to Wallace A. Turner, Arcata, Dec. 17, 1945, for 0.5 c.f.s. from Mill Creek for irrigation of 20 acres.

Permit 6462, App. 11129 (Plumas County). Issued to I. R. Ewing, Meadow Valley, Dec. 18, 1945, for 800 g.p.d. from a spring for domestic purposes. Estimated cost, $200.

Permit 6463, App. 11143 (San Bernardino County). Issued to Elmo C. Proctor, Baker, Dec. 19, 1945, for 0.25 c.f.s. from Mojave River for domestic and irrigation of nine acres. Estimated cost, $2000.

Permit 6464, App. 11132 (Trinity County). Issued to Clifford B. Kennedy, Trinity Center, Dec. 21, 1945, for 16,000 g.p.d. from a spring for domestic purposes. Estimated cost, $69.

Permit 6465, App. 10966 (Monterey County). Issued to L. S. White, Parkfield, Dec. 26, 1945, for ½ c.f.s. from Cholame Creek for irrigation, domestic and stock watering purposes. Estimated cost, $1000.

Permit 6466, App. 10456 (Napa County). Issued to State Department of Finance, Sacramento, Dec. 26, 1945, for 10 c.f.s. and 4400 a.f. from Rector Creek for domestic and irrigation of 940 acres. Estimated cost, $1,350,000. 33

January 24, 1946

WATER APPLICATIONS FILED

SACRAMENTO, Calif. — Applications for permits to appropriate water filed with the Department of Public Works, Division of Water Resources, Sacramento, during December, 1945, were as follows:

App. 11232 (Los Angeles County). Chas. L. Menning, Pasadena, for 16,000 g.p.d. from unnamed spring for domestic and irrigation. Estimated cost, $300.

App. 11233 (Modoc County). Round Valley Ranch Co., Alturas, for 4000 a.f. from three lakes tributary to Boles Creek, Willow Creek and Clear Lake for irrigation of 1000 acres.

App. 11234 (Tehama County). E. B. Estes Feed & Livestock Co., Red Bluff, for 30,000 a.f. from Thomas Creek, tributary to Sacramento River, for irrigation of 35,000 acres.

App. 11235 (Napa County). C. M. Hauboe, San Francisco, for 1.0 c.f.s. from James Creek, tributary to Putah Creek, for irrigation of 70 acres.

App. 11236 (Napa County). Dick Week, San Francisco, for 270 a.f. from unnamed stream tributary to Pope Creek for domestic and irrigation of 100 acres.

App. 11237 (Nevada County). Thos. E. Dee, Smartsville, for 1.0 c.f.s. from Squirrel Creek, tributary to Yuba River, for irrigation of 20 acres.

App. 11238 (San Joaquin County). Willma Cook, Los Angeles, for 4.89 c.f.s. from unnamed creek tributary to San Joaquin River for stock watering and irrigation of 391.6 acres. Estimated cost, $800.

App. 11239 (Humboldt County). Paul M. Schmook, Scotia, for 1.0 c.f.s. from Chemical Creek, tributary to east branch of south fork Eel River, for power purposes. Estimated cost, $800.

App. 11240 (Sacramento County). Victor E. and Carrie M. Nevin, Elk Grove, for 2.5 c.f.s. from unnamed dredger cut, tributary to Snodgrass Slough, for domestic and irrigation of 207.94 acres. Estimated cost, $2000.

App. 11241 (Santa Barbara County). Helen M. Weber, Cuyama Valley, for 2000 g.p.d. from unnamed well in Branch Canyon, tributary to Cuyama River for stock watering purposes.

App. 11242 (Glenn County). Jerald and Edith S. Holzapfel and Gene Valla Tire Co., Willows, for 150 c.f.s. from Bl. drain on lower end of Glenn-Colusa District, tributary to Willow Creek or B. drain of Reclamation District 2047 for irrigation of 1300 acres. Estimated cost, $5000.

App. 11243 (Plumas County). H. R. Brentlinger, Hayward, for 200 g.p.d. from unnamed spring tributary to Bucks Lake for domestic use and fire protection. Estimated cost, $75.

App. 11244 (Contra Costa County). Alfred S. Ferguson, Byron, for 2.4 c.f.s. from Italian Slough and Western Canal, tributary to San Joaquin River for irrigation of 192acres. 33

PLANS and Speculations

A new call for bids on the proposed REDONDO North Beach seawall may be advertised soon, according to Mayor Clyde V. March. The bids recently filed have been rejected by State Director of Public Works Charles H. Purcell. New specifications as recommended by Redondo Beach City Engineer Wm. Barclay will allow minor structural changes expected to reduce the over-all cost of the wall to within the $163,200 already posted by the city, county and state for the work. Previous low bidder was Guy F. Atkinson Company of San Francisco at $179,600.

oOo

Officials of the Frostorage Company of Oakland have announced plans are being completed for the construction of a $500,000 cold storage warehouse plant in WOODLAND. L. Rench, owner of the Oakland company, said the plant will be built on 25 acres north of the Marvin Landplane Company on Woodland - Knights Landing Highway.

oOo

Construction of six proposed permanent public housing projects in SAN FRANCISCO, including Ping Yuen, the Chinatown project, is blocked because the limitation set by law in construction costs is below present building prices. The following projects are effected:

Ping Yuen, 230 family units to be built on the south side of Pacific St. between Powell and Kearny Sts., at a cost of $7,900 per unit.

North Beach, 226 units in an area bounded by Bay, Mason and Francisco Streets and Columbus Avenue; estimated cost. $6,126 per unit.

Glenn Crags, 171 units in an area bounded by 30th, Berkeley, Elk, Sussex and Glen Park Streets; estimated cost, $6,118 per unit.

Bernal, 201 units in area bounded by 26th, Harrison, Folsom and Army Sts.; estimated cost, $4,820 per unit.

De Haro, 135 units in area bounded by Wisconsin, De Haro, 18th and 19th Streets; costs not estimated.

Hunters View, 150 units at Fairfax and Innes Avenues and Hunters View Blvd. adjoining Evans Ave.; costs not estimated.

oOo

On property adjoining the Willstrut Hoisery Mill at 16308 Foothill Blvd. in SAN LEANDRO, now occupied by a riding academy, Will Struthers, president of the hosiery firm, plans to build an ultra-modern restaurant. The building, containing 8000 square feet and seating 250 people, will cost an estimated $75,000.

oOo

CPA Issues Directive Channeling Lumber Into Low-Cost Housing

The Reconversion Housing Program swung into action as the Civilian Production Administration's new Priorities Regulation 33 became effective and the first of its directions to channel scare materials into 400,000 and 500,000 moderate and low-cost housing units for veterans was issued. The first direction to PR 33, spells out the methods by which lumber and millwork will be channelled into the housing program. Directions covering the other materials included in PR 33, like cast-iron bath tubs, soil pipe and radiation, gypsum board and lath, clay products and concrete blocks will be issued soon.

Direction 1 effective January 15 provides for the part which sawmills, distributors, office wholesalers, millwork manufacturers, hardwood flooring manufacturers, and housing contractors are required to play in providing 9 billion board feet of lumber in 1946 for moderate and low-cost housing to which veterans will be given special preference.

Sawmills, coming within the provisions of the Direction include: (1) mills or plants producing in 1945 or expecting to produce in 1946 at least 2,000,000 board feet of softwood or 1,000,000 board feet of hardwood lumber, and (2) concentration yards or plants processing into lumber (by drying, sawing, edging, grading, sorting, planing or otherwise) at least 25 per cent of the total volume of logs and lumber received.

Under Direction 1, such sawmills, beginning February 1 and in each succeeding month thereafter, must reserve from their total lumber production 40 per cent of their expected softwood lumber production in the form of "housing construction lumber" and 100 per cent of the flooring grades, i.e., 2 and 3a, of hard maple, oak and pecan in thicknesses of 5/8-, 4/4- and 5/4-inch. Each month's reserve must be held until the 20th of that month for delivery to certified orders in preference to all other orders (except AAA ratings) On or after the 20th day of the month, any of the production reserve not taken on such orders may be sold to other rated and unrated orders.

A distributor (one who buys and stocks lumber for resale, either at wholesale or retail) may obtain housing construction lumber by placing certified orders each month with a sawmill or office wholesaler for one of the following amounts, whichever is greatest: (1) An amount not exceeding five per cent of the total footage of his softwood lumber inventory as of January 1, 1942; or (2) an amount equal to the total footage of housing construction lumber called for by the orders rated HH which he has accepted for delivery in that month; or (3) one carload of housing construction lumber in each of any two of the three months in a calendar quarter. Housing construction lumber received on a certified order must be held for 60 days beginning on the day of its receipt for orders rated HH or AAA. At the end of the 60 day period such of the lumber as remains may be sold on other ratings or in the free market.

An office wholesaler (one who buys and sells but does not stock lumber) may accept certified orders from distributors, and flooring and millwork manufacturers, and housing contractors and may fill these orders by placing certified orders with the sawmill.

A millwork manufacturer may obtain housing construction lumber by placing certified orders with a sawmill or office wholesaler each month for an amount not in excess of 5 per cent of the total footage of softwood lumber he consumed in the manufacture of millwork in the year 1940. A quantity of such lumber equal to the lumber received on such certified lumber must be used in the manufacture of millwork. At least 75 per cent of this millwork must be held for 60 days after completion for HH rated orders (whether served directly or extended to him by a distributor) in preference to all other orders except AAA. At the end of the 60 day period, any of this millwork remaining may be sold on other rated orders or in the free market.

A hardwood flooring manufacturer may obtain hardwood flooring lumber by placing certified orders with a sawmill or office wholesaler each month for an amount not exceeding 6 per cent of the hardwood lumber he consumed in the manufacture of standard hardwood flooring in the year 1940. He is then governed by the same set aside and disposal rules for his product as is the millwork manufacturer.

A housing contractor (any individual who has been authorized to apply in HH ratings) obtains housing construction lumber by placing an HH rating with a distributor or by placing a certified order with a sawmill or an office wholesaler. However the total footage covered by the HH or certified order must not be in excess of the quantity needed to meet his construction schedule as authorized by the Civilian Production Administration or the Federal Housing Administration under Priorities Regulation 33.

GROOVER AND I

BETTER, THANK YOU

The one bright spot during the past two weeks has been the words of interest and inquiry from the readers which filtered past the "no visitors" sign on my hospital room door.

★ ★ ★

When a guy is in the hospital one standard question seems to be: "Have you a pretty nurse?" The answer is, if you notice, you don't NEED a nurse!

★ ★ ★

Many of the little numbers look very neat in their smartly-tailored uniforms, but when you're burning with fever one hour and your back teeth chattering with chill the next you don't give a durn whether Varga or Petty ever heard of Florence Nightingale!

★ ★ ★

Then is the time you are thankful for one of the gals who has spent years flattening her arches along countless miles of hospital corridors. There is comfort in the way she firmly holds you and says: "Now Bub, you do the relaxing and let me worry about this needle."

★ ★ ★

Why try to describe it? If you've been there you understand—and if you haven't, words don't explain.

★ ★ ★

The interest expressed by many of you adds encouragement to picking up the threads of interest in the passing scene.

AUTO THEFTS RISE

Automobile thefts have risen more than 26 per cent, reports the California State Automobile Association, analyzing FBI figures for the nation. Motorists are urged to protect their cars from possible theft at all times.

NAREB Plans Regional Series Of Conferences

A series of nine regional conferences of local real estate board presidents and secretaries with their national offices has been scheduled for February and March by the National Association of Real Estate Boards.

The meetings will begin February 6 at Boston and conclude March 12 at Los Angeles. Boyd T. Barnard, president of NAREB, and Herbert U. Nelson, executive vice president, will attend each conference.

Their purpose is to review the general position of the Association on vital issues in the real estate field and to make local viewpoints effective in the national program, Barnard announced. On taking office as president of the NAREB last month, he pledged the Association to a policy of positive action on the many problems in the real estate field that now particularly affect the public interest.

Housing for veterans, which is a major effort in NAREB's 1946 activities, and effective measures to overcome the housing shortage will be principal topics of the conferences. The Association is cooperating in the government's program to channel building materials into houses costing less than $10,000 for veterans. Impediments to construction and varying local factors affecting the real estate market will be discussed. Other topics of the meetings include taxation, educational opportunities in real estate and protection of property ownership.

The schedule is as follows:

New England Region, Boston, February 6; Central Atlantic, Washington, D. C., February 8; Southeast, Atlanta, February 12; Great Lakes, Indianapolis, February 15; North Central, Des Moines, February 19; South Central, Tulsa February 22; Northwest, Tacoma, March 5; Southwest (two meetings) San Francisco, March 8, and Los Angeles, March 12.

AMERICAN INSTITUTE ARCHITECTS ANNUAL DINNER TONIGHT

In addition to the previously announced program featuring Vice-President Samuel Lunden and a guest list including most of the past presidents of the Chapter, the Chapter has received word that AIA Regional Director Earl Heitschmidt will be here for the annual dinner. Architect Heitschmidt of the Los Angeles firm of Heitschmidt and Matcham, is widely known among the profession for his outstanding legislative work, as well as his architectural achievement. He first came to the west coast as resident architect for Schultze and Weaver, New York architects for the Hunter Dulin Building.

President Hass and Program Chairman J. Francis Ward expect over 100 at tonight's dinner at the Engineers' Club.

OPA FREEZES SHINGLE PRICES AT DEC. 1 LEVEL

The Office of Price Administration has "frozen" at December 1, 1945, levels the ceiling prices distribution yards may charge for Western Softwood shingles and Northern Softwood lumber.

The action became effective January 22, 1946.

Details of the "freeze" are as follows:

Maximum prices which retail distribution yards may charge on sales of Northern Softwood and Western Cedar shingles lumber must be computed from the maximum prices for mill sales in effect December 1, 1945.

For sales by wholesale distribution yards and in wholesale-type sales by retail yards, however, distribution yards may continue to pass through to buyers any mill price increases becoming effective after December 1, 1945.

Immediate effect of the "freeze" is to require retail distribution yards on most sales to absorb mill price increases of $2 per 1,000 board feet for Northern Softwood lumber, and 20 cents per square for Western Softwood shingles.

The Northern Softwood lumber mill price increase became effective December 26, 1945, and the higher mill ceiling price for Western Softwood shingles on December 22, 1945.

The "freezing" of distribution yard prices is in line with OPA's overall program requiring absorption of producers' price increases, wherever practicable, at distributive levels of sale, thus minimizing increases in prices of goods and commodities generally to ultimate users.

MORE CLASSES AT UC EXTENSION

Next week in the San Francisco center of University of California Extension, classes will open in the fields of business administration and engineering.

Among the business administration courses offered as "Labor Law" and "Introduction to Air Transportation", beginning Monday, 7 p. m.; "Principles of Advertising", Wednesday, 7 p. m., and "Fnancial Statement Analysis", Friday, 7 p. m.

"Tool Engineering" meets for the first time on Friday, 7:30 p. m.

Walter Ballard Corp. Establishes Office In S. F.

West Coast offices of The Walter M. Ballard Corporation of New York and Washington have been recently established in the Hobart Building in San Francisco. This office will serve clients in all states West of the Rocky Mountains and in the territories of Alaska and Hawaii. Other Ballard offices are located in Chicago, Dallas, Atlanta, Miami, New York and Washington.

The Ballard Company has been recognized for more than a quarter of a century as the country's foremost designers and interior decorators of hotels, clubs, steamships and institutions. They are specialists in the field of creating beautiful architectural interiors and merchandising space.

Ballard's most famous clients have included the hotels Mayflower, Shoreham, Raleigh, Carlton and Wardman Park in Washington, D. C., and the Astor, Ritz - Carlton, Plaza, Commodore and Pennsylvania in New York, the Stevens and Blackstone in Chicago, the Radisson at Minneapolis and Hotel Utah at Salt Lake City.

Steamship interiors have been designed and created for the U. S. Lines' Washington, Manhattan, Leviathan, Southern Cross, and others, and for the Moore-McCormack Lines' Brazil, Uruguay, Munargo, and other Mormacs.

Ballard has also handled the interiors of many broadcasting studios for both Columbia and N.B.C. throughout the country, including 35 studios over 10 floors in the RCA Building of Rockefeller Center in New York.

Headquarters of the Ballard Corporation is in New York City. S. M. Revness is President of the Corporation. Walter M. Ballard, Chairman of the Board, resides in Washington, D. C.

The San Francisco office is completely staffed with designers, interior decorators and technicians thoroughly familiar with the problems of creating practical yet beautiful and esthetic architectural interiors for the most discriminating client. Ballard has outstanding local professional associates in architectural and engineering work wherever their projects are undertaken.

Harry S. Moyer is General Manager of the Western territory with headquarters in San Francisco.

AVAILABLE NOW!
The famous "BUTLER BUILT"
PREFABRICATED Rigid Frame STEEL BUILDINGS
Suitable for use as:
WAREHOUSES
WORKSHOPS
GARAGES
FACTORIES
FOUNDRIES
BARNS, etc.

Now you can have an All-Steel Building like this . . . all ready to erect . . . for only $1 per sq. ft. of floor space!

Think of it, only $4000 for a 40 x 100 ft. all-steel building, FOB cars at your railroad station. Everything included! Complete! Ready to put up! A building that was primarily designed for quick, easy field erection, designed and prefabricated to keep erection costs down.

We are now able to offer these famous buildings for early delivery anywhere in California. We also are in a position to refer you to builders associated with us who can give you figures on erection costs.

We have sold two hundred and fifty of these prefabricated buildings in California since V-J Day. If you need one for early delivery, don't delay in placing your order. Orders taken now will be delivered in approximately 90 days. Future orders may take longer, depending on available materials and labor supply. To play safe, order soon.

VARIABLE LENGTHS AS NEEDED

The standard unit is 40 ft. wide, 100 ft. long, 14 ft. high at eaves and 20 ft. high at the center or ridge. No variation in width or height is possible. Where more width is needed, two or more standard units can be erected side by side, with or without separating walls.

Longer or shorter buildings can be had by adding or eliminating 20 ft. lengths. You can order a building 40 x 80 ft., 40 x 120 ft. and so on up to a building 40 by several hundred feet if necessary.

COST OF VARIABLE LENGTH BUILDINGS

The price of the standard 40 x 100 ft. building is $4000. For each additional 20 ft. add $500 to the cost. For buildings less than 100 ft. long subtract $425 for each 20 ft. reduction in size. For example, a 40 x 200 ft. building costs $6500. A 40 x 80 ft. building costs $3575.

FEATURES OF CONSTRUCTION

"Butler Built" Rigid Frame Steel Buildings have a husky steel frame that can be quickly bolted together. All welding is done at the factory before shipping. There are no obstructions. The entire inside space is usable.

Walls and roof are covered with 24-gauge galvanized steel sheets strengthened with deep-drawn shouldered ribs. Sheets are gang punched so that sheets and bolt holes fit perfectly for easy bolting together and to provide watertight joints. Roof sheets are curved at the ridge and eaves.

Sliding doors 12 x 12 ft. are built into each end. These roll on 4-wheel trolleys. All hardware is included. Each end has four windows and an adjustable air louvre, 4 ft. square. On buildings now being manufactured, "vimlite" windows are being furnished. Steel sash and glass windows will be furnished on future buildings as soon as available.

In line with the Butler low-cost mass-production policy, only standard units as described above can be furnished by the factory. But if additional doors, windows or skylights are desired, they can easily be added when the building is being erected.

FOR QUICK ACTION . . . ORDER NOW

A card or phone call to our nearest office will bring complete information in a hurry. We can even help with plans for obtaining Building Permits where necessary. If you need a new building and need it soon, don't delay. Buildings available for early delivery are being sold fast. If you want to avoid delay, get your order in now.

Official Proposal

Warehouse—California National Guard, Sacramento, Calif.

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF ARCHITECTURE

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the Division of Architecture, Public Works Building, 1120 "N" Street, Sacramento, California, up to 2:00 P. M., Tuesday, February 5, 1946, said bids thereafter on said day to be publicly opened and read for Warehouse, California National Guard, Sacramento, California, in accordance with plans and specifications therefor.

The work includes the construction of a 1-story brick and reinforced concrete Warehouse. The floor area will be 4400 square feet, approximately.

Prevailing Wage Scale: In accordance wtih the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

	Hourly Rate
Bricklayers	$1.87½
Bricklayers' Hod Carriers	1.15
Carpenters	1.50
Cement Finishers	1.50
Electric Workers	1.70
Engineers, Portable Hoist or Otherwise	1.50
Glass Workers	1.26
Iron Workers, Architectural	1.60
Iron Workers, Reinforcing Steel	1.50
Laborers, Building	1.06¼
Painters	1.43
Roofers	1.50
Sheet Metal Workers	1.50
Any classification omitted herein not less than	1.06¼

Overtime—One and one-half times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal Officer or agency, in so far as the same may be applicabel to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal Order, whether higher or lower, shall control.

Apprentices may be employed provided they are properly indentured to the Contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Plans and specifications for examination are on file in the Office of the Division of Architecture, Public Works Building, Sacramento, and Room 803 State Office Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Contractors who are prequalified and who are desirous of securing plans, specifications and proposal forms for the purposes of preparing and submitting a proposal for this work may do so by requesting same in writing from the Division of Architecture, Public Works Building, Sacramento.

Prequalification: Plans, specifications and proposal forms will only be issued to those contractors who are prequalified with the Department of Public Works by having filed a statement of experience and financial condition on a standard questionnaire form in accordance with the provisions of the State Contract Act. Such statement must have been filed and approved not more than one (1) year and not less than five (5) days previous to the date set for receiving and opening bids. Contractors may obtain standard questionnaire forms from the Division of Architecture.

No bid will be accepted from a contractor who has not been licensed in accordance with the provisions of the Contractor's License Act or to whom a proposal has not been issued by the Department of Public Works.

No bid will be considered unless it is presented on a proposal form furnished by the Division of Architecture and accompanied by a bidder's bond, cash, a cashier's or certified check made payable to the Director of Public Works in the sum of at least ten per centum (10%) of the amount of the bid.

The Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

Highway Improvements—El Dorado County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on February 13, 1946, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, of a portion of State Highway as follows:

El Dorado County, between Shingle Springs and 1¼ miles west of El Dorado (III-E.D-11-B) about three and four-tenths (3.4) miles in length, to be graded and surfaced with plant-mixed surfacing on crusher run base.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per Hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.375
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity)	1.70
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Renforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.4375
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.3125
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.25
Intermediate Grade Labor	
Concrete vibrator operator	1.25
Jackhammer operator	1.25
Oil dstributor bootman	1.00
Oiler, power shovels or cranes	1.25
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.0625
Truck driver (less than 4 cubic yards water level capacity)	0.90
Unskilled Labor	
Flagman	1.00
Laborer	1.00

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.25 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.00 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, nad forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the wor kis situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (see said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvements, Yolo County at the State Highway Nursery, About Three Miles East of Davis

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 703 B Street, Marysville, California, until 2 o'clock P. M. on January 31, 1946, at which time and place they will be publicly opened and read, for performing work as follows:

Yolo County, at the State Highway Nursery, about three miles east of Davis (III-Yol-6-A) water well to be drilled and cased.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

The rates of wages, including overtime, holiday or Sunday rates, herein specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Laborer	$1.0625
Well driller	1.70
Any classification omitted herein not less than	1.0625

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

STATE HIGHWAY ENGINEER'S ESTIMATE

Item 1. 200 lineal feet drilling and casing well.

Erection of Ward Buildings for Infirm and Disturbed Females, Stockton State Hospital, Stockton, Calif.

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF ARCHITECTURE

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the Division of Architecture, Public Works Building, 12th and "N" Street, Sacramento, California, up to 2:00 P. M., Tuesday, January 29, 1946, said bids thereafter on said day to be publicly opened and read for the erection and completion of the Ward Buildings for Infirm Females and for Disturbed Females, Stockton State Hospital, Stockton, California, in accordance with plans and specifications therefor.

The Ward Buildings for Infirm Females and Disturbed Females consist of a one-story and two-story reinforced concrete buildings having a combined floor area of approximately 160,000 square feet with hollow tile partitions, steel sash, and clay shingle tile roof covering.

Separate bids only will be entertained for the following segregated parts of the work.

1. General Work.
2. Heating and Ventilating Work.
3. Plumbing Work.
4. Electrical Work.

Alternate bids will be required for the omission of certain work.

Prevailing Wage Scale: In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

	Hourly Rate
Asbestos Workers	$1.50
Bricklayers	1.75
Carpenters	1.50
Cement Finishers	1.50
Electric Workers	1.70
Glass Workers	1.25
Iron Workers, Architectural	1.60
Iron Workers, Reinforcing Steel	1.50
Laborers, Building	1.06¼
Lathers	1.75
Masons' Tenders	1.40
Painters (brush)	1.37½
Plasterers	1.75
Plasterers' Tenders	1.50
Plumbers	1.50
Roofers	1.37½
Sheet Metal Workers	1.50
Steam Fitters	1.50
Tile Setter	1.37½
Operator of Power Shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of Power Shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Tractor Driver	1.70
Truck Driver (8 cu. yds. water level capacity and less than 14 cubic yards)	1.25
Truck Driver (4 cu. yds. and less than 8 cu. yds. water level capacity)	1.06¼
Truck Driver (less than 4 cu. yds. water level capacity)	.90
Any classification omitted herein not less than	1.06¼

Overtime—One and one-half times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal Officer or agency, in so far as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal Order, whether higher or lower, shall control.

Apprentices may be employed provided they are properly indentured to the Contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Plans and specifications for examination are on file in the Office of the Division of Architecture, Public Works Building, Sacramento, and Room 803 State Office Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Contractors who are desirous of securing plans, specifications and proposal forms for the purposes of preparing and submitting a proposal for this work may do so subject to certain conditions as hereinafter stated by requesting same in writing from the Division of Architecture, Public Works Building, Sacramento. Such request shall be accompanied by a deposit of Twenty Five ($25.00) dollars. Check shall be made payable to the Division of Architecture. Such deposit is required to guarantee the safe return in good condition of the plans and specifications to the Division of Architecture within 30 days after the date set for opening bids. Failure to so return the plans will cause forfeiture of the Deposit to the State.

Prequalification: Plans, specifications and proposal forms will only be issued to those contractors who are prequalified with the Department of Public Works by having filed a statement of experience and financial condition on a standard questionnaire form in accordance with the provisions of the State Contract Act. Such statement must have been filed and approved not more than one (1) year and not less than five (5) days previous to the date set for receiving and opening bids. Contractors may obtain standard questionnaire forms from the Division of Architecture.

No bid will be accepted from a contractor who has not been licensed in accordance with the provisions of the Contractor's License Act or to whom a proposal has not been issued by the Department of Public Works.

No bid will be considered unless it is presented on a proposal form furnished by the Division of Architecture and accompanied by a bidder's bond, cash, a cashier's or certified check made payable to the Director of Public Works in the sum of at least ten per centum (10%) of the amount of the bid.

The Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

PLANS and Speculations

The Dahl-Chevrolet Company of OAKLAND has purchased property in the rear of its present location at 27th and Broadway and is planning to erect a $125,000 two-story service and warehouse addition. The apartment house on the property will be razed.

oOo

The North Coast Distributors wholesale tobacco, candy, etc., firm of SAN RAFAEL have purchased property at the corner of Second and "A" Streets. R. Austin and E. Brandlein, owners of the business, plan the erection of a two-story concrete building to occupy the entire corner.

oOo

Contract for a new $30,000 store building, at Fourth and Lemon Sts. in VALLEJO, to be erected for the Grigg & Powers Drug Company, has been awarded to the Solano Builders and work on the structure will start immediately.

oOo

Seventy new homes, valued at $525,000, will be added to the 105th Avenue District in OAKLAND, through plans announced by McGah and O'Shea, building contractors. The first unit of 12 houses, six on Bergedo Drive, four on Catron Drive, and two on Reposo Drive, is already under construction, with others to follow as rapidly as possible.

oOo

A permit for the first $40,000 unit of SAN Mateo's new Presbyterian church, a planned $200,000 structure, was issued recently. The church will be built at 25th and Hacienda Ave. Contractor is Geo. Arthur and Sons.

oOo

Joseph T. Ryerson & Son, Inc., one of the largest distributors of steel products in the United States, has purchased 210,000 square feet of land at Green and 65th streets in EMERYVILLE, for the construction of a warehouse. Price paid for the land was $105,000. An additional $645,000 will be spent on building and equipment.

oOo

Having engaged an architect to prepare the plans and specifications, the MILL VALLEY school board is planning to call a $200,000 bond election next month to build a new six-room school at Alto and provide various improvements at the three elementary schools. Alfred Johnson, San Francisco architect, and Carl Zollner of Ross, who has served as structural engineer for the Mill Valley school system for the past ten years, will work together in preparing the plans.

oOo

Architects Will Participate In Lecture Series

A series of six lectures on Architecture and Related Subjects and Problems entitled "The House I Want" will be presented during March and April by The Women's Architectural League sponsored by The San Francisco Museum of Art and the Northern California Chapter of the American Institute of Architects.

Thursday morning lectures will be held at Twentieth Century Club, 2716 Derby Street, Berkeley, at 10:30, and Thursday afternoon lectures at the San Francisco Museum of Art, Van Ness Ave. and McAllister St., San Francisco.

Schedules of lectures follows:

March 7—"Modern Living—California Style", Gardner Dailey, Architect, Thos. D. Church, Landscape Architect and Maurice Sands, Decorator.

March 14—"Choice of The Building Site", John S. Bolles, Architect, and Raymond D. Smith, Realtor.

March 21—"Period Influence in The Modern House", Paul Williams, Architect, Los Angeles.

March 28—"The Modern House—Trends", Pietro Belluschi, Architect, Portland.

April 4—"Contemporary Decoration", Frances Elkins, Decorator, with Dorothy Liebes, Textile Designer.

April 11—"A Garden To Live In", Edward A. Williams, Landscape Architect.

"Your House and The Architect", William Clement Ambrose, Architect.

Series tickets at $6.00 each are available at The San Francisco Museum of Art, Van Ness Avenue and McAllister St., San Francisco (HEmlock 2040); John Breuner Co. (Box office, TWinoaks 4048), 21st Street and Broadway, Oakland; and the Women's Architectural League, 730 Montgomery St., San Francisco 11.

V

COAST SLIDES CLEARED

Slides that have blocked the Jenner to Fort Ross section of State Route 1 on the Sonoma County Coast have been cleared and the route is open again to through travel, according to the Touring Bureau of the California State Automobile Association.

WAGE BOARD WILL ENFORCE NEW SCALES

William E. Hague, Manager of Central California Chapter, AGC, has received the following confirming wire on the carpenter's increase in wages from Robert C. Moore, Executive-Secretary of the Wage Adjustment Board: "Wage Adjustment Board in case 52-8934 has considered dispute involving carpenter's rate of pay, between Bay Counties District Council of Carpenters and nine contractors' associations pursuant to their stipulation submitting the case dated December 11, 1945. Board has decided that appropriate rate for carpenters in this matter is $1.75 an hour and has authorized payment of said rate on non-Federal building construction in San Francisco, Marin, Alameda, and San Mateo Counties, Calif., effective January 1, 1946."

Mr. Hague's statement continued: "In addition to the counties mentioned above, the $1.75 an hour rate was also fixed for carpenters in Contra Costa and Solano Counties. The same rate of $1.75 an hour is also being established by the Wage Adjustment Board for painters, roofers, sheet metal workers, and asbestos workers and any other trades that have been under the same basic wage as the carpenters.

"An electrical workers wage of -1.875 an hour has also been approved by the board and the Master Plumbers and their union have gone together on a $1.875 an hour wage for all of Northern California. The same will be submitted to the Wage Adjustment Board immediately.

"As provided under Order No. 41, under the terms of the contractors' agreement in effect October 2, 1942, overtime during the five working days for the first four hours after eight hours will be time and one-half. I have been in close touch with the local officials of the newly-organized Wage Stabilization Board and have been assured by Mr. Thos. Neblett, Chairman of the Board for California, Nevada and Arizona, that his board and the Wage and Hours Division, headed by Mr. Wesley Ash, will give their full co-operation to the enforcement of the wage scales. Mr. Neblett is having a specially printed government notice to be put on all jobs now underway, stating that the wages now being paid on the jobs have been legally established, and that any payments in excess of the established rate will be considered a violation. The new wage rate now fixed is to remain in effect until May 1, 1947."

V

SIMPLIFIED PRACTICE PROPOSAL MADE FOR COPPER, BRASS ITEMS

A proposed Simplified Practice Recommendation for Copper Water Tube and Copper and Brass Pipe has been submitted to producers, distributors, and users for comment or acceptance, or both, according to an announcement of the Division of Simplified Practice of the National Bureau of Standards.

The proposed recommendation covers copper water tube and copper and brass pipe intended for plumbing uses. Its purpose is to establish, as a useful standard of practice in the production, distribution, and use of these items, a simplified list of types and sizes.

Should this proposal, as submitted, or as adjusted in accordance with suggestions submitted by producers, distributors, and users, meet with the approval of industry, it will be issued in printed form.

Mimeographed copies of the proposed recommendation may be obtained from the Division of Simplified Practice, National Bureau of Standards, Washington 25, D. C.

Correction of Critical Highway Conditions Will Cost an Estimated $629,973,000

Some highway construction has been resumed in California's Central Coast counties, but problems of building to replace the roads battered by wartime wear, of meeting ever-increasing need for newer thoroughfares, of providing support for county programs and parking room in cities—and, finally, how this will be paid for—received major attention at Thursday's meeting of the highway committee of the California State Chamber of Commerce's Central Coast Council, held in San Francisco.

More than 70 attended the committee meeting, representing state officials, trade organizations, motorists' bodies, trucking interests and city, county and civic officers from Alameda, Contra Costa, San Francisco, San Mateo, Santa Clara, Santa Cruz, San Benito, Monterey and San Luis Obispo counties. Dr. E. J. Leach, Salinas, chairman of the highway committee, presided.

Critical deficiences in the State Highway System—to correct roads worn out by war traffic, eliminate greatest accident hazards, replace critical bridges, increase inadequate traffic capacity and construct freeways — is estimated to cost $629,973,000, R. M. Gillis, construction engineer, State Division of Highways, stated, citing the increased use of larger trucks, needs of wider lanes and other factors that must be met at a time when needs are greater than financial resources.

A total of $3,615,000 for budgeted construction in Highway District IV has been advertised, and bids received, Col. John H. Skeggs, district engineer for this area reported. Included is an eight-mile extension of Bayshore Highway south of San Jose and four-lane construction between Ignacio and Petaluma.

Problems of county highway construction and maintenance were outlined by Wallace Boggs, county surveyor, Alameda county. The work of the Major Highway Development Committee was reported by Harry A. Mitchell, president of the Sacramento Northern Railroad, and chairman of the State Chamber's statewide highway committee.

Major oil concerns are carrying on a study of highway matters, throughout the state, and with the Collier interim highway committee, to get to a real picture of what the state needs, what the construction will cost, what the required revenue will be to meet these costs, C. C. Stanley, chief counsel, Texas Company, stated.

"Parking is a nationwide municipal headache," Edwin S. Moore, California Automobile Association, stated, declaring that in postwar competition, the city with the best access will be the most successful—but it must provide parking as well as highways. He declared 41 per cent of persons entering San Francisco's business district travel by private auto; while in Oakland, the figure is 70 per cent—and with freeways, etc., the amount will increase.

"It is a community problem—with business interests cooperating" — L. Demming Tilton, San Francisco's planning director, declared, on the same theme. "Communities must carefully look to their own local problems, make local plans, and look ahead to meet coming local conditions. Now is the time to get ready and to build to meet this, while money is cheap. If we don't, business will go elsewhere."

The meeting endorsed pending legislative measures to continue employment for the remainder of the biennium the state highway patrolmen returning from military service.

Plumbing Waste Fittings Get Price Boost

An increase of 9 per cent over October 1, 1941, in manufacturers' ceilings for brass plumbing fixture waste fittings and trimmings has been announced by the Office of Price Administration.

Also announced were increases varying from 5 per cent to 25 per cent over October 1, 1941, in manufacturers' prices for brass plumbing fixture supply fittings and trimmings.

Resellers are required to absorb the manufacturers' increase only to the extent that their margins on these products generally are not reduced below their average operating expense rate.

The expense rate for jobbers is 20 per cent over cost, for retailers 30 per cent, and for chain stores 40 per cent.

These price actions became effective January 21, 1946.

The increase in manufacturers' prices for brass, waste fittings and trimmings represents the amount necessary under OPA's reconversion program to permit the industry to realize its average normal peace time earning rate after effect has been given to legal increases in material prices and basic factory wage rates which the industry has experienced since October 1941.

In addition to the price increases OPA also announced a profit factor of 3.7 per cent which manufacturers of brass plumbing fixture waste fittings and trimmings are to use in applying for individual price adjustment for these items.

In the case of brass fixture supply fittings and trimmings, to encourage production, greater increases were given to low-end, bulk production items, OPA said. The overall increase in manufacturers' prices, however, averages 8.8 per cent and represents the amount necessary under OPA's reconversion program to permit the industry to realize its average normal peace time earning rate after effect has been given to legal increases in material prices, and basic wage rates which the industry has experienced since October, 1941.

In addition to the price increases OPA also announced the profit factor of 5.7 per cent which manufacturers of brass plumbing fixture supply fittings and trimmings are to use in applying for individual prices adjustment for these items.

GROOVER AND I

MARCH OF DIMES

It is just ninety-nine years too early to evaluate the late Franklin Delano Roosevelt as a World Statesman or County Politician.

* * *

In one realm—high above party or politics—there is no argument. On one point, he may be given a high mark which will last as long as his memory.

* * *

With high courage and unyielding fortitude he faced a physical disaster — giving no quarter and asking none.

* * *

Mr. Roosevelt's fight against infantile paralysis will stand as a challenge to all adults, and as a high mark of inspirational hope to the stricken of any age.

* * *

The Annual March of Dimes is that weak legs may grow strong and walk.

* * *

Let your dimes be dollars. They cannot buy more—would you buy less?

V

ASME ILLUSTRATED LECTURE SET FOR JANUARY 31, 8 P. M.

Sponsored by the San Francisco Section, American Society of Mechanical Engineers, Dr. Lionel S. Marks, Professor of Mechanical Engineering, Harvard University, will present an illustrated lecture on "Jet Propulsion and Rockets" in the P. G. and E. Auditorium, 245 Market Street, on Thursday, January 31, at 8:00 P. M.

Dr. Marks has been associated with Harvard University since 1894 and taugh mechanical engineering actively until 1940 when he became Professor Emeritus. His name has become synonomous with the profession as a result of his editorship of the universally used "Marks Mechanical Engineers' Handbook".

The regular January meeting of ASME will assemble at the Engineers' Club, 206 Sansome Street, at $6:00 P. M., and dine promptly at 6:30 P. M., to be followed by the lecture in the P. G. and E. Auditorium at 8:00 P. M.

FPHA Signs Contracts With Local Builders

Contracts have been signed between the Federal Public Housing Authority and a list of building contractors located throughout the United States to expedite veterans' emergency housing for municipalities and educational institutions under provisions of the recently enacted Meade Resolution.

These contractors constitute a "task force" which will handle the movement and re-erection of quotas of temporary housing when called upon to do so for their respective localities. They were selected because of their previous experience in large-scale housing operations and because they demonstrated capacity to proceed immediately with any jobs assigned to them. The following is a list of contractors in this area with whom contracts have been signed by the FPHA:

M. & K. Corporation, Financial Center Bldg., San Francisco.

Daley Brothers, 426 Bryant St., San Francisco.

Robert McCarthy Company, 1050 Kirkham St., San Francisco.

Baruch Corporation, 625 S. Olive Street, Los Angeles.

Shumaker & Evans Constr. Co., 4007 West 6th St., Los Angeles.

Wick and Dahlgren, 2016—30th Avenue, South Seattle, Wash.

Lease & Leighland, 515 Joseph Vance Bldg., Seattle.

V

MANAGEMENT CONFERENCE SCHEDULED

The second annual Northern California Management Conference will be held Thursday, February 14, at the Palace Hotel, according to Theodore B. Lyman, Conference Secretary, 607 Matson Bldg., San Francisco 5.

The Conference theme will be "Management's New Opportunities", and speakers of national standing will deal with major current problems. Speakers and discussion leaders will shortly be announced by the Conference Committee. Conference fee, including luncheon, will be $3.50. Registration fee for morning and afternoon sessions only, $2.00. Luncheon only, $2.00.

SEATTLE, Wash. 1316 8th Ave.
Renovate entire interior, including recreational facilities.
Owner—Loyal Order of Moose, Walter G. Leckey, secretary.
Architect—Ralph Decker & Associate J. Emil Anderson. 8

9— HOSPITALS

January 25, 1946

EXPANSION PLANNED

POMONA, Los Angeles Co., Calif.—The Pomona Valley Community Hospital, R. L. Bacon, superintendent, 1798 N. Geary, Pomona, has accepted a gift from Mr. and Mrs. Russell K. Pitzer in an amount in excess of $500,000 with which to finance a long-range program of construction at the hospital.

The program includes expansion for which the required property already has been acquired by the hospital, includes four major items. They are:

1—Improvement of the present $275,000 hospital plant, including additions to its equipment and facilities.

2—Building and equipping of a convalescent home just east of the hospital building to accommodate aged persons who require some nursing care but not full medical attention, and to accommodate convalescent patients of all ages who no longer require full hospital care, thus reducing the patient load on the hospital itself.

3—Building of a new home for nurses, which, when accomplished, will make it possible to re-establish the school for nurses; and

4—Building and furnishing of a home for the aged on the northeast portion of the hospital's property, which extends to Orange Grove Ave. This home would be for aged persons not requiring medical or hospital care, but needing pleasant living quarters and association with other people, and with ability to pay.

An architect has not been selected. 9

January 25, 1946

WORK UNDER WAY
CLINICS Cost, $155,900
TACOMA, Wash. Lakewood District, 18-acre site.
Construction of Visitation Villa, 375 ft. wide, 2600 ft. long, portion adjacent to Gravelly Lake Dr., for clinic building. Red Brick building, 1-story, approximately 85 ft. long, modified colonial architecture. To contain minor surgery, X-ray department, consultation and examination rooms, laboratory, physiotherapy department, dental clinic.
Owner—Dr. L. E. Skinner, Lakewood Center.
Architect—Not announced. 9

12— POWER PLANTS

January 28, 1946

APPLICATION APPROVED
POWER PLANT AND TRANSMISSION LINE Est. Cost, $518,698
SITKA, Alaska.
Construction, including log crib, rock filled dam, approximately 5800 ft. tunnel, steel penstock, concrete powerhouse, two 1000-kw. generators and turbines and appurtenant equipment; construction of approximately one mile transmission line and reconstruction of approximately 5½ miles transmission line. No architect or engineer has been retained. It is the intention of the Town of Sitka to employ a capable engineer and field force to do the field work and mapping and to have the dam and powerhouse designed by outside experts.
Owner—Town of Sitka, E. M. Goddard, mayor.

The FWA approved the application. Federal advance of $13,750 planning funds granted. • 12

13— PUBLIC BLDGS. FIRE HOUSES, JAILS

January 28, 1946

ADDENDUM ISSUED

STOCKTON, San Joaquin Co., Calif.—Addendum to specifications for general work for ward buildings for infirm females and for disturbed female patients at Stockton State Hospital, Stockton, has been issued to all contractors figuring the work as follows:

The Division of Architecture has been advised that shingle tile as specified under Section 11 of the specifications is not being manufactured at the present time and that manufacturers will not quote prices for future delivery. It is therefore deemed necessary to supplement the specifications by adding the attached special provisions to your copy of the specifications under Section 11, roofing work Bids shall be submitted accordingly.

Please call to the attention of any roofing subcontractors with whom you deal the contents of this notice.

Special Provisions for Sheet Metal Work, Section 11

The requirements of Section I, Parts I and II, comprising "special conditions and general conditions of the contract" apply to all work in this section.

(1) Scope of Work:

These special provisions apply to and supplement Section 11, standard specifications for "roofing work" attached hereto. Special provisions set forth herein take precedence over and shall be used in lieu of any article or part of the standard specifications, Section 11, that may conflict herewith. Additional work specified herein shall be included as a part of Section 11.

(2) Work Not Included:

Article 11-5—Shingle Tile

Contractors shall exclude from their bids the purchase price of shingle tile but shall include the cost of laying the tile as specified. The tile will be purchased by the State at the time required, if possible, and delivered to the site. The contractor shall bear all other costs in connection with roofing.

(3) Deviations From Standards:

Article 11-2—Roof Insulation

All roof areas where either tile or composition roofing is called for shall be insulated.

The 15-lb. asphalt saturated felt is not required over concrete roofs, but edges of insulation at eaves, gable ends, parapets, etc., shall be sealed with 12-in. wide strips of felt mopped half under and half over the edges of the insulation and path stripping for isolation shall be installed vertically every 30 ft. On wood sheathed roofs, the felt shall be installed by lapping and cementing the seams 3 inches and nailing sufficiently to hold same in place. Insulation over wood shall be nailed 12 inches o.c. with 1¾-in. galvanized large head roofing nails.

Concrete roofs shall be primed and the insulation shall be mopped in as speciefed.

(4) Additional Work:

None. • 13

14— RESIDENCES

January 28, 1946

PREPARING PLANS
RESIDENCE Est. Cost, $15,000
BAYWOOD, San Mateo County, Cal.

15— SCHOOLS

January 28, 1946

PREPARING PRELIMINARY PLANS

SCHOOL FACILITIES

Estimated Cost, $604,980

OAKDALE, Stanislaus County, Calif.

Enlargement of high school campus to include land for play areas, remodel and modernize classrooms, gymnasium and shops to provide new academic building, boys' gymnasium, swimming pool, additional shops, cafeteria building, tennis courts, basketball courts, bleachers and track house with public lavatories in stadium and the necessary extension of services, sewers, landscaping, etc. The total floor aera of the buildings will cover approximately 74,000 square feet.

Owner — Oakdale Joint Union High School District of Stanislaus County, R. F. Carpenter, clerk.

Architect—Johnson & Mayo, 307 Exchange Bldg., Stockton.

The school district voted bonds January 22 in amount of $600,000 to finance the construction. • 15

January 28, 1946

FUNDS AWARDED

PASO ROBLES, San Luis Obispo Co., Calif.—G. Dale Price, President, Board of Trustees, Paso Robles Union Elementary School District, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of Federal Works Agency, Berkeley, that funds to the amount of $2330 will be furnished the school district for the purpose of assisting in the preparation of plans for construction of a cafeteria of approximately 4,000 sq. ft., boys' shower room and additional sanitary facilities in the present school. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $55,800, to be furnished from general obligation bonds. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

Wright L. Felt, located at Los Angeles, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Southern California. The architect for the school district has not yet been selected.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 15

January 28, 1946

FUNDS AWARDED

19—MISC. CONSTRUCTION

January 25, 1946

EXPANSION PLANNED

TRONA, San Bernardino Co., Calif. —The American Potash & Chemical Corp., Trona, has announced an improvement program at the corporation's village in Trona to cost an estimated $1,000,000. The program, which will start as soon as materials and labor are available, includes the construction of new buildings, expanded recreational facilities, added conveniences for the residents and more beautiful surroundings.

The program is broken down into three one-year plans, Walter J. Metzger, manager of the Trona company, announced. Among the improvements tentatively slated for completion the first year are a new $8500 engine house for the Trona fire department which will house two pieces of equipment, and a $140,000 furnished apartment-hotel for women to contain approximately 45 housekeeping apartments for single and double occupancy.

Other plans which are listed on the first-year program are a $110,000 building which will contain a theater and three stores; an addition to the Trona department store to provide space for additional goods, estimated cost, $10,000; remodeling of Austin Hall to convert present theater space into refrigerated and dry storage space at a cost of $65,000. 19

January 25, 1946

PLANNED

CONTRACT AWARDED

LOS ANGELES, Calif.—R. A. Wattson Co., 5528 Vineland Ave., North Hollywood, at $13,537.51, awarded a contract by the Los Angeles Board of Public Works, 153 City Hall, Los Angeles, January 23, for the improvement of Slymar Ave., from Valleyheart Dr. to Millbank St., by grading, paving with rock and oil and installation of curbs, gutters and sidewalks. • 29

January 28, 1946

BIDS REJECTED

HELENA, Mont. — The Montana State Highway Commission, Howard W. Holmes, state highway engineer, Helena, Mont., has rejected all bids received January 23 for the construction of Project FAS 102J (1), grading, draining and surfacing of three miles of the Flathead Lake-East Shore Rd. in Lake County, Montana. Nyberg Construction Co., Yardley, Wash., and Morrison-Knudsen, Inc., Seattle, Wash., submitted the only two bids.

No bids were received for the construction of the other eight projects. • 29

January 28, 1946

REJECTION OF BIDS RECOMMENDED

SAN FRANCISCO. — The Public Roads Administration, Chas. C. Morris, division engineer, 720 Phelan Bldg., San Francisco, has recommended the rejection of all bids received for the construction of 0.074 mile of Project Calif. FH-93-B, Salmon River, Klamath National Forest, Siskiyou County.

The work involves:

(1) extra and miscellaneous force account work, $250;
(2) lump sum, removal and disposal of existing timber;
(3) 175 cu. yds. unclassified excavation for structures;
(4) 217 cu. yds. concrete, class A;
(5) 11 cu. yds. concrete, class YY;
(6) 32,500 lbs. reinforcing steel;
(7) lump sum, government furnished structural steel erected;
(8) lump sum, concrete filled steel grid bridge floors;
(9) lump sum, clean and paint existing structural steel.

Fred J. Maurer & Son, 3031 E St., Eureka, Calif., at total $50,162, submitted the previous low bid. • 29

BIDS WANTED

GLENDALE, Los Angeles Co., Calif.—Until February 1, 5 P. M., bids will be received by Jones California Homes, 448 S. Hill St., Room 1018, Los Angeles, for the installation of 152 ft. of 8-in. concrete curb and gutter, 1729 ft. of 4-in. blacktopping, and 500 lin. ft. 4-in. cast iron or ceramic sewers (with or without materials), including ditching and backfilling, under City of Glendale inspection. Completion time 10 days. Specifications on file in the office of the city engineer, Glendale.

Tentative estimates are also desired for work to begin in about 60 days. in connection with the above project as follows:

(1) 4000 sq. ft. 3-in. asphalt paving for drivway on private property adjacent to the above work;
(2) 800 lin. ft. of standard cement curb and gutter, and 800 lin. ft. of asphalt 4-in. pavement for Sleepy Hollow Dr., 24-ft. wide;
(3) 3000 ft. 3-in. asphalt for driveway and badminton court on adjacent property. • 29

January 28, 1946

PLANS ON FILE

STOCKTON, San Joaquin Co., Calif. **—As previously reported, until Jan-29, 11 A. M., bids will be received at** the office of the officer in charge of construction, U. S. Naval Supply Annex, Stockton, under Spec. 17555 **for additional drainage systems and** extensions of motor parking area at the U. S. Naval Supply Annex, Stockton, Calif.

The work contemplated includes, but is not limited to, the construction of catchment basins, headwalls and ditches, the furnishing and installation of corrugated metal pipe as inverted siphons and culverts, the furnishing and installation of reinforced concrete pipe drains and laterals, paving removal and replacement, and revisions and such incidental features of construction as are necessary to the completion of the drainage project.

The work contemplated also includes the installation of an extension to an existing motor parking area, together with the furnishing and installation of corrugated metal pipe culverts, the construction of headwalls and ditches, the laying of redwood bumper blocks and such incidental features of construction as are necessary to the completion of the motor parking area.

Specifications may be obtained from the above office upon deposit of check or postal money order for $10, payable to Chief of Bureau of Yards and Docks.

A set of plans and specifications, together with Addendums 1 and 2, are now on file at the office of the DAILY PACIFIC BUILDER, 465 10th St. ,San Francisco. • 29

32— SEWERS & SEWAGE DISPOSAL PLANTS

January 28, 1946

BIDS OPENED

LOS ANGELES COUNTY, Calif.—Paul Vukich Construction Co., 112 W. 9th St., Los Angeles, at $7440, submitted low bid to the Los Angeles County Board of Supervisors for construction of a reinforced concrete and corrugated metal pipe arch storm drain on Arbor Rd., south of Bellflower and east of Clark Ave., a distance of 500 lin. ft.; cash contract No. 575. Plans prepared by O. F. Cooley, county road commissioner, Hall of Records, Los Angeles.

The total bids were:
Paul Vukich Construction Co., $7440.
Mitar Nikcevich, $9180.
Oberg & Cook, $9885.
O'Rourke & Parker, $10,825. • 32

January 28, 1946

BIDS WANTED

LOS ANGELES, Calif.—Until Feb. 7, 10 A. M., bids will be received by the Los Angeles Water and Power purchasing agent, Room 1202, 311 S. Spring St., for one positive displacement fuel oil pump and electric motor, assembled complete; Bid 4683. •

January 28, 1946

FUNDS AWARDED

TEMPE, Maricopa Co., Ariz.—Mayor W. W. Cole of Tempe has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $3000 will be furnished the city for the purpose of assisting in the preparation of plans for increasing the capacity of the present sewage treatment plant in Tempe. Improvements to the existing sewage treatment plant will consist of the addition of an Imhoff tank, 22x72x22 feet deep, and a dunbar bed, 112x100 feet, together with the necessary valves, piping and appurtenances.

The estimated cost of the improvements will be $70,000, to be furnished from a sinking or trust fund and revenue from sewer rentals. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

Wright L. Feit, located at Los Angeles, Calif., is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Arizona, and Headman, Ferguson & Carollo, Phoenix, Ariz., are the engineers for the City of Tempe to make final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 32

January 28, 1946

FUNDS AWARDED

KAYSVILLE, Davis Co., Utah.—Mayor Emil M. Whitesides of Kaysville has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $1000 will be furnished to the city for the purpose of assisting in the preparation of plans for a sewage system. The plans can now be completed and all arrangements made for construction.

The preliminary draft outlines a sewage treatment plant to serve a designed population of 2000, together with 6000 lin. ft. of 12-in. effluent disposal line and all necessary appurtenances. The estimated cost of this facility will be $32,000, to be furnished from available cash and revenue bonds to be authorized. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction is begun.

H. C. Jessen, located at Salt Lake City, Utah, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Utah, and Sumner G. Margetts & Co., 204 Felt Bldg., Salt Lake City, Utah, are the engineers for the City of Kaysville to make the final plans for the sewage system.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 32

January 28, 1946

FUNDS AWARDED

LOS GATOS, Santa Clara Co., Cal.—Mayor Cecil Spotswood of Los Gatos has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, that funds to the amount of $8250 will be furnished the town of Los Gatos for the purpose of assisting in the preparation of plans for constructing sanitary sewer improvements consisting of a sewage collection system and reconstruction of outfall sewers. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $186,000, to be furnished from special assessments. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

H. E. Devereaux, located at Berkeley, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Northern California, and L. Cedric Macabee, Palo Alto, is the engineer for the Town of Los Gatos to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 32

PLANS and Speculations

Hillsborough's famous "Carolands" estate is to be subdivided and construction will be started immediately of 250 homes in a price class from $15,000 to $25,000, it was disclosed with transfer of ownership of the 490-acre property to a syndicate headed by T. I. Moseley of Atherton, president of Dalmo Victor Corporation. The property has an entrance from Ralston Ave. in HILLSBOROUGH and extends to the Skyline Blvd. . . Funds amounting to $11,000 recently granted by the Federal Works Agency, will be used at the University of Nevada to prepare plans for an electrical engineering addition to the engineering building. The proposed addition will cover approx. 16,200 square feet, with the building and engineering facilities to cost an estimated $288-000.

oOo

Plans for the construction of a new SAN MATEO roller skating rink at an estimated cost of $80,000 on the corner of Poplar Ave. and Bayshore highway were disclosed by Edward W. Stollery. Work on the 18,000 square foot building will begin shortly. E. Jay Miller of San Mateo prepared the plans and George Arthur & Sons are the contractors.

oOo

The MERCED Chamber of Commerce was informed that the United Air Lines plan to construct a $60,000 building there as headquarters for the company's activities in the area.

oOo

A modern, fully-equipped hardware store will open in RICHMOND within the next few months by Ronald Ahart. The reinforced concrete building, comprising an area of 37x100 feet, is to be located at 325 Ninth Street. Carl Overaa is the contractor.

oOo

The Assembly Ways and Means Committee has recommended for passage two bills appropriating $13,000,000 to provide student housing on the University of California's four campuses and at six State colleges. James Corley, University of California controller, will begin an immediate campaign for funds to match the $7,071,000 in their appropriation.

oOo

PALO ALTO

Permits for 26 homes in Palo Alto have just been issued to Scoble, Inc., of San Francisco, as owner and builder. The unit price is $6,000. B. K. Dobkowitz is the designer.

The four-room rustic houses, with attached garages, will be located on Olive Street at 260, 265, 270, 275, 280, 285, 290, 295, 300, 305, 315, 320, 345, 365, 375, 385, 395, 399, 405, 420, 421, 430, 431, 441, 451, and 461.

ELECT. ENGINEER JOINS WESTERN FIBERGLAS

Messrs. Leighton and Dutton, principal partners of Western Fiberglas Supply, Ltd., announce that Ernest E. Drescher has joined the Electrical staff of their concern.

Drescher is a native San Franciscan, and was educated in the San Francisco schools and the University of California. He is a member of the Electrical Maintenance Engineers' Association, and an Associate Member of the American Institute of Electrical Engineers.

Before joining Western Fiberglas, Drescher was Supervising Engineer in the Design Section of the San Francisco Naval Shipyard. He is married and resides in San Francisco.

MARITIME COMMISSION SURPLUS MATERIAL CATALOG AVAILABLE

The United States Maritime Commission has adopted modern salesmanship methods and today is conducting one of the Nation's largest mail order businesses in marine supplies and materials. Everything is being offered for sale from nuts and bolts, at a few cents in value each, to huge Diesel engines priced at $55,350. In between are such articles as anchors, canoe paddles, oars, diving suits, chain, wire and rope, small boats of all classes, sea mules, searchlights, engines, winches, distillers, misc. hardware and everything else that might go to furnish ships, large and small.

A great many of the items being offered for sale are usable also on the farm and in the factory and general industry. All are being sold at prices that are below the original cost and furnish genuine bargains. Even lower prices are given in wholesale lots and to dealers.

The various articles offered for sale, numbering many thousands, are enumerated in the sales-order catalogue of the Maritime Commission known as Marine Surplus Seller. Prices are quoted as well as directions given for purchase of desired items.

The Marine Surplus Seller can be obtained at U. S. Maritime Commission, 220 Bush Street, Room 533, San Francisco 4. Telephone GArfield 3715—ext. 294 and 295.

More Than $1,100,000,000 of Needed Public Works Scheduled for the Next Three Years

More than $1,100,000,000 of needed public works have been tentatively scheduled to start construction during the three years 1946-1948 by local, State and Federal agencies in California. Working plans have progressed to the point where over $577,000,000 worth of projects is tentatively scheduled to start construction during the year 1946. Another $546,000,000 of needed improvements has been tentativelly scheduled to start during 1947-1948.

This is revealed in the first of a series of reports on timing of public works issued by the State Reconstruction and Reemployment Commission from data asembled up to December 31, 1945.

Local public agencies lead the other governmental units with a total of $552,000,000 of projects proposed for the three-year period.

Local public agencies report $265,000,000 in funds available as of December 31, 1945, for construction of their $552,000,000 proposed three-year program. Of these funds available, $130,000,000, or 49 per cent, are for projects scheduled by California cities.

California counties report funds available of $78,000,000 (29.3 per cent of all funds reported.) School districts have $39,000,000 available for their projects during the three-year period.

Projects proposed by State Agencies total $295,740,000, and those by Federal agencies are estimated at $275,767,000. The Federal projects are for flood control and irrigation works.

Los Angeles County, with $348,170,000, which is 31 per cent of the total, leads all other counties in the estimated cost of the projects. Figures and percentages for the other counties are as follows:

San Francisco	$96,734,000	8.6%
Fresno	61,328,000	5.5%
Alameda	59,569,000	5.3%
Sacramento	47,458,000	4.2%
Tehama	41,203,000	3.7%
Shasta	35,565,000	3.2%
Kern	32,959,000	2.9%
San Diego	31,680,000	2.8%
San Joaquin	29,726,000	2.6%
Tulare	24,175,000	2.2%
San Bernardino	23,213,000	2.1%
Merced	22,006,000	2.0%
Stanislaus	21,870,000	1.9%
Ventura	15,066,000	1.3%
43 Other Counties	232,880,000	20.7%

Flood control and irrigation projects, in the amount of $354,000,000 are the largest single type of work scheduled. The next highest, in the following order, are highway, road and street projects, sewage and storm drain projects and schools and educational facilities.

The 1946 public works scheduled program of California cities totals $141,363,105 with funds reported available as of December 31, 1945

"The first requirement for tim-

IMPORTANT NOTICE

Starting with today's issue of the "Builder", a new index is being used for the report sections.

It is hoped that the new "break-down" will greatly facilitate convenient reference.

in the amount of $106,598,694. County projects for 1946 total $27,826,996 with funds reported available of $14,440,944. Other local, State and Federal projects amount to $408,191,296 bringing the 1946 total proposed program to over $577,000,000.

The report points out that it is doubtful if the entire 1946 public works program actually will be placed under contract this year because of shortages of materials, equipment, and skilled workers. It is also stated that if the total were contracted this year, urgently needed private construction probably would be impeded and construction costs probably would rise further.

In announcing the completion of this report, Colonel Alexander R. Heron, State Director of Reconstruction and Reemployment said:

"It is the duty of the Commission to ascertain all contemplated public improvements or projects, to plan for and promote the improvement and expansion of the highway and freeway systems of the State and to plan for and support necessary reconstruction of State buildings, particularly hospitals and institutions.

"Since the Commission issued a report on public works early in 1945, agencies sponsoring projects have further revised their plans and programs. The report just issued covers information gathered up to the end of 1945.

"The report is the first of a series on the subject of timing of public works projects. It is an inventory and analysis of the proposed construction. The Commission's staff is engaged in continuing study of the subject which will be covered in subsequent reports.

ing of public works is that there be an available 'shelf' or pool of projects for which working plans and specifications have been completed, so that all or part of the work might be put under construction without delay. The report just issued is an inventory, providing the foundation for the first step."

GROOVER AND I

SHOOTING A HORSE

In this war, cavalry involved armor plate, cylinder displacement and gyroscopic gun mounts. Forty or sixty years ago the cavalry occupied a more colorful and romantic place in our military.

★ ★ ★

A recruit would join a "hoss outfit". After about three enlistments, he reached the point where he loved his horse more than his best girl and his Colonel—he was then a CAVALRYMAN!

★ ★ ★

In case of broken leg or other accident, it was sometimes necessary to destroy a horse. Regardless of how tough it might be, no cavalryman would permit anyone else to perform this act for him.

★ ★ ★

With his own revolver he would shoot his horse, then hang up his gun and go down to Pete's or the Dutchman's. He would automatically be carried "on pass" until he returned — generally about three days.

★ ★ ★

Regardless of how aged or decrepit a horse might become, no one ever thought of shooting one just to try out a new gun. There are some acts of sacrilege you don't even put into thought.

★ ★ ★

During the month of May it is planned to experiment with the atom bomb on a group of naval vessels in the Bikini Atoll basin of the central Pacific.

★ ★ ★

Among the ships being "rigged for death" is that grand old lady of the U. S. Navy, the Aircraft Carrier Saratoga, more lovingly known as "Sara".

★ ★ ★

Men who served on the Pennsylvania, Wainwright, Parche, and other ships will have the same feeling regarding their vessel being in the "death house".

★ ★ ★

But somehow, "Sara" was the glamor girl of our entire Navy. Thousands of fliers took off from her flight deck on uncounted missions. When they returned, "Sara" was always waiting at the point of rendezvous—and waited in vain for many who never returned.

★ ★ ★

The War Department has pulled a dumb stunt in Public Relations in listing these ships by name. It would have been better to give them a code number. Then, men who served on these craft would not know for sure that their vessel had met such an ignoble end.

★ ★ ★

There will be public protest, and I have an even-money idea that at least the "Sara" will be taken from the execution line-up.

—V—

BADLANDS EXTENSIVE

The portion of Death Valley which is below sea level is more than 70 miles long and from one to six miles wide, according to the California State Automobile Assn. This area includes Bad Water, 276 feet below sea level, lowest point in the United States.

S. F. Chamber Forms Aviation Committee

Membership of a newly-formed Aviation Committee of the San Francisco Chamber of Commerce was announced today by Chairman George C. Tenney.

In announcing the membership, Chairman Tenney explained that the Committee will devote its attention to San Francisco aviation problems, coordinating its activities with those of the Bay Area Aviation Committee, which is concerned with areawide aviation problems.

Appointments to the Committee, representing airlines, aviation, city, civic, freight and manufacturing interests, include the following members:

Dall De Weese, American Airlines, Inc.; Jerome V. Roscoe, Pan American World Airways; G. R. Thornton, Transcontinental and Western Air; James Murphy, United Air Lines; Roy Backman, Western Air Lines, Inc.; Marsden S. Blois, National Aeronautics Assn.; B. M. Doolin, Municipal Airport; J. Roger Deas, City Planning Commission; Carl J. Eastman, N. W. Ayer Advertising Agency, Inc.;

Belford Brown, San Francisco Bank; R. M. Adamson, Shell Oil Co.; George C. Tenney, McGraw-Hill Publishing Co.; George G. Montgomery; Castle & Cooke, Ltd. M. G. Lickteig, Railway Express Agency, Inc.; Walter Schlichtman, Thompson Aircraft Tire Corp., and Kenneth R. MacDonald, manager, Aviation Department, San Francisco Chamber of Commerce, secretary.

ROUTE 16 OPEN

Storm damage has been cleared on State Route 16, between Woodland and Sacramento and the highway is now open to traffic, according to the Touring Bureau of the California State Automobile Association.

CITY GROWTH INDICATED IN NEW STORE

Announcement by Sears, Roebuck & Company of its plan to construct a new department store in San Francisco was hailed today by Brayton Wilbur, president of the San Francisco Chamber of Commerce, as "an added demonstration of the faith of retailers in the future of this city."

Terming the $5,000,000 investment as one of San Francisco's major realty developments, Wilbur declared that the Sears expansion would also help to maintain high levels of employment in this city by providing 500 new jobs for San Franciscans.

"San Francisco's postwar employment and development depend upon such expansions," Wilbur said. "Not only will this company's step provide now jobs, but it will offer added consumer services for the Bay Area's vastly increased population. The growth of San Francisco's consumer market should be encouraging to expansion of other businesses in the city."

Site of the new store will be 300,000 square feet of property at the northwest corner of Calvary Cemetery, Masonic Avenue and Geary Street, according to an announcement by D. S. Tarvid, Sears manager here for the past 14 years. A two-story structure with a basement department, it will provide parking space for 900 cars. It will have three times the shopping facilities of the Sears Mission Street store, Tarvid said.

The balance of the area will be developed into a residential district by the Mayfair Heights Corporation.

January 28, 1946
FUNDS AWARDED
LAS VEGAS, San Miguel Co., N. M.—Jack C .Hanlon, business manager, New Mexico Insane Asylum, Las Vegas, N. M., has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $4840 will be furnished the asylum for the purpose of assisting in the preparation of plans for constructing hospital and health facilities. The new building, having two stories and 70 bedrooms, will have a floor area of approximately 9240 square feet.

The estimated cost of the facilities will be $129,000, to be furnished from available cash and other funds. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

E. A. Rose, located at Denver, Colo., is the engineer for the Bureau of Communtiy Facilities of the Federal Works Agency for New Mexico, and Trent Thomas, Santa Fe, N. M., is the architect for the asylum to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 11

January 29, 1946
BIDS OPENED
CORONA, Riverside Co., Calif.—W. C. Smith, Inc., 411 W. 5th St., Los Angeles, at $146,000, submitted low bid to the U. S Navy, Public Works Office, U. S. Naval Base, Terminal Island, for construction of miscellaneous alterations to the U. S. Naval Hospital, Corona; Specification No. 17194.

The work involves the construction of sundecks for 30 wards, covered passageways, alterations to existing buildings to provide bake shop, installation of an elevator and bakery equipment, 24,000 sq. ft of linoleum floor covering, 5000 lin. ft. of concrete curbing, 800 lin. ft. of 8-ft. concrete ramp and miscellaneous repairs to gutters and roads.

The work consists in general of demolition, earthwork, concrete work, miscellaneous steel and iron, carpentry and millwork, roofing and sheet metal work, lathing and plastering, glass and glazing, finish hardware, resilient flooring, field painting, plumbing and miscellaneous piping, electrical work, hydraulic elevator, walk-in refrigerator, mechanical refrigerator, bake shop equipment and paving and appurtenant work. Completion time, 120 days.

Bids were submitted on the following items:
(1) lump sum, price for the entire work complete;
(2) additional price for each cubic yard of rock excavation as called for in Section 3-02 (d).

The complete bids were:

W. C. Smith, Inc., (1) $146,000, (2) $30.

Baruch Corp., (1) $174,317, (2) no bid.

Arthur Pinner Jr., (1) $176,827, (2) $16. 11

12-13—INDUSTRIAL BUILDINGS

January 29, 1946
COMPLETING PLANS
BURBANK, Los Angeles Co., Calif.—Architect R. Benedict Brout, 1709 W. 8th St., Los Angeles, is completing plans for the construction of a factory building at 3000 W. L. C Smith, First and Railroad, San Mateo.

Bethlehem Pacific Steel Corporation, Alameda. 12-13

14-17—PUBLIC BLDGS.

January 28, 1946
FUNDS AWARDED
SANTA BARBARA, Santa Barbara Co., Calif.—A. L. Study, Public Works and Planning Consultant for the City of Santa Barbara has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, that funds to the amount of $12,000 will be furnished the City of Santa Barbara for the purpose of assisting in the preparation of plans for construction of a two-story and basement addition to the City Hall. The addition is to be of reinforced concrete with approx. 40,000 sq. ft. of floor area. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facility will be $477,000, to be furnished from general obligation bonds and other funds. The funds made available through the Bureau of Community Facilities of Federal Works Agency are to be repaid without interest when the construction begins.

Wright L. Felt, located at Los Angeles, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Southern California. The architect for the city has not yet been selected.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available 14-17

January 29, 1946
PREPARING PLANS
LA MESA, San Diego Co., Calif.—Architect Sam W. Hamill, 1123 Bank of America Bldg., San Diego, is preparing plans for the construction of a 1-story reinforced concrete civic center building to be located on a triangular site bounded by Allison, Date and University Aves. in La Mesa, for the city; approximately 90x125 feet in area and will house administration, public works, police and fire departments; estimated cost, $165,000. 14-17

January 29, 1946
CONTEMPLATED
PUBLIC SAFETY BUILDING
BREMERTON, Wash. Burwell St., between Washington and Pacific.
Construction of public safety building, probably three stories, including legal department, city courts and police department.
Owner—City of Bremerton, City Engineer S. S. Severance, City Hall.
Architect—Not announced.

City will call for bids for architectural fees shortly. 14-17

January 29, 1946
CONSTRUCTION APPROVED
CANON CITY, Colo.—The planning board of the Colorado State Penitentiary, Canon City, Colo., has approved construction of a four-tier reinforced concrete penitentiary building at Canon City, Colo., at an estimated cost of $375,000. W. Gordon Jamiesmon, 818 12th St., Denver, will be the architect. 14-17

31-32—WATER SUPPLY & SEWAGE DISPOSAL PLANTS

January 25, 1946

BIDS WANTED

NORTH LAS VEGAS, Clark Co., Nev.—Until February 15, 10 A. M., bids will be received by the county clerk of Clark County, Nevada, for the drilling of a well approximately 900 feet deep in the town of North Las Vegas, Nev. Bids shall include the furnishing and installing of casing and completely finishing well preparatory to installation of a pump. The first 200 feet shall be cased with 12-inch casing, the remaining depth shall be cased with 10-inch casing. Bids shall specify cost per foot for drilling and of casing. 31-32

January 28, 1946

FUNDS AWARDED

CLEARFIELD, Davis Co., Utah.—D. M. Nelson, president, Clearfield Town Board, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $1050 will be furnished the Town of Clearfield for the purpose of assisting in the preparation of plans for constructing water works additions, including a well, pump, 6000 ft. of 8-in. feeder line and appurtenances. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $30,300, to be furnished from available cash and other funds. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

H. C. Jessen, located at Salt Lake City, Utah, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Utah, and Caldwell & Richards, Salt Lake City, are the architects for the Town of Clearfield to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 31-32

January 29, 1946

BOND ELECTION PLANNED

LOS ANGELES COUNTY, Calif.—The Los Angeles County Board of Supervisors, 501 Hall of Records, Los Angeles, adopted a motion Jan. 22 authorizing Wayne Allen, County Administrative Officer and the County Counsel to prepare the necessary details for calling a bond election in the amount of $4,600,000 for the construction of six incinerators at sites located in San Fernando Valley, San Gabriel Valley, Hollywood, Norwalk and the metropolitan area. 31

January 29, 1946

January 29, 1946

PERMIT SOUGHT

SAN FERNANDO VALLEY, Los Angeles Co., Calif.—Elmer Cain, editor of the Los Angeles Daily Journal, 121 N. Broadway, Los Angeles, in partnership with Chester L. Keasling, an engineer at Lockheed Aircraft, and A. T. Andrews, are seeking a permit to establish, maintain and operate a private airport on 80 acres of land on the northeast corner of Reseda Blvd. and Devonshire St., San Fernando Valley, to be known as Northridge Field Airports, Inc. A hearing has been set by the zoning administrator for January 31.

The owners stated that if permission was not granted for this particular site, another would be found in the "Valley" and that this is the first unit of 30 similar ones that will be constructed at approximately 300-mile intervals from El Paso, Texas, to Seattle, Wash. Architect E. Dean Cowley, 245 E. Olive St., Burbank, is preparing plans and specifications.

The project involves the construction of two 2400-ft. asphalt runways, two tennis courts, a putting green, parking area for 250 cars and the following masonry buildings: 9 hangars to house 118 plans, auto service station, 50x80 ft.; auto service, 40x80 ft.; engine overhaul, 80x100 ft.; aircraft overhaul, 30x40 ft.; aircraft service, 20 unit airportel; 2-story 150x60 ft. administration building containing a restaurant and clubhouse; 20x30 ft. sales office; 30x150 ft. parts stock room; 30x250 ft. aircraft display room; 60x120 ft. swimming pool and a steel control tower. 36

38— ELECTRIC LIGHTING TRANSMISSION LINES

BIDS WANTED

CALISTOGA, Napa Co., Calif.—Until February 8, 8 P. M., bids will be received by the City Council of the City of Calistoga, George C. Locey, city clerk, City Hall, for the construction of two 8-inch sewer lines, a 4-inch steel water line and a 6-inch steel water line in Calistoga, as follows:

(1) an 8-in. sanitary sewer line from the manhole at the intersection of Wapoo Ave. with Grant St., along Wapoo Ave. to and across the State Highway, along said highway to a point indicated on plan, a distance of 1730.0 ft.;
(2) an 8-in. sanitary sewer line in Railroad Ave. from the manhole at the intersection thereof with Lake St. to a point on the Calistoga fair grounds, a distance of 1233.0 ft.;
(3) a 4-in. 10-gage spiral welded, dipped and wrapped water line in Railroad Ave. from the existing main on Lake St. to a point on the Calistoga fair grounds, a distance of 1400.0 ft.;
(4) a 6-in. 10-gage spiral welded, dipped and wrapped water line from the end of the existing main on Washington Ave., across and along Grant St., along Wapoo Ave., the State Highway and the Silverado Trail, a distance of 4400.0 ft.

Separate proposals are required on each of the sewer lines and on each of the water lines.

Alternate proposals on the water lines are requested as follows:

(1) for pipe and accessories only;
(2) for labor and equipment for installation of all pipe and accessories;
(3) for furnishing and installation complete of all material.

Specifications obtainable from the above office of the city clerk.

Each bid must be accompanied by certified check or bidder's bond in amount of 10% of bid, payable to the City of Calistoga. * 39

$30,000,000 cash ...on the line

In 1946, your gas and electric company will spend thirty million dollars "on the line"..the power line, the gas line and the job line ... for improvements and new construction.

That is our projected construction budget in this new year of 1946 for plant and line improvements—better to serve Northern California.

This thirty million dollars is money spent for the future growth of this area. And we in Northern California must look ahead and be prepared. This is a time to get ready for the growth of new businesses, small or large; for the expansion of local factories or of larger industries backed by outside capital. It is a time to create jobs for our increased population and the development of markets for the products of factory and farm.

The Pacific Gas and Electric Company is now running a series of colorful advertisements in leading national magazines to attract new business and new industries to Northern California. It is a campaign that aims at the live interest of Eastern industries in moving westward. Your gas and electric company will keep ahead of this growth through its multi-million dollar improvement program by providing an abundant supply of electric power and natural gas fuel at rates among the lowest in the nation.

PLANS and Speculations

SAN FRANCISCO Utilities Manager James H. Turner has announced that $40,000 would be spent between now and June 30 to resurface Market Street along the Municipal Railway tracks from the Ferry Building to Ninth St. . . At the same time, the Utilities Manager called for men to take civil service examinations for jobs as trackmen and asphalt workers with the Municipal Railway. Test will be held within the next few weeks. . . City Manager Arthur B. Sullivan of SAN MATEO has announced the holding of examination Saturday, February 16, to fill two posts of assistant building inspectors. Latest date for filing application has been set for February 6. Applications will be made at the office of the city clerk.

oOo

A new $300,000 receiving and processing building is planned for the Libby, McNeil & Libby cannery in Sunnyvale. The structure, plans for which are being prepared by Ellison & King, San Francisco structural engineers, will be built east of and adjacent to the present plant site. It wil be built by Earl W. Heple, San Jose contractor.

oOo

Engineering work on the $900,000 expansion of STOCKTON's south sewage disposal plant to accommodate all of the City's industrial wastes, has passed the preliminary stage and now awaits land purchases, City Engineer Lyle Payton has announced. Municipal authorities have approved preliminary sketches made by Clyde C. Kennedy, San Francisco engineer. Provision for the expansion was made as two major parts of last year's $1,750,000 municipal bond issue.

oOo

Work on plans for the $100,000 addition to Sherwood school, SALINAS will be started at once. The addition will include classrooms, toilets and an auditorium-gymnasium. Charles E. Butner, Salinas, is architect for the school district and retained to make final plans. . . ANTIOCH has scheduled a $500,000 school bond election for Mar. 1. . Bill Eldridge and Art Lloyd, owners of the Perkins Nursery Company, in SACRAMENTO, have announced plans for the construction of the first of four branches at Alhambra Blvd. and K Street. Of modern design, the nursery will be a one-story structure covering 2,800 feet of floor space. The building will be of lightweight concrete construction, prefabricated. The roof also will be of lightweight concrete, conforming to the Bermuda type of architecture.

M. S. Barnes Promoted By General Electric

The appointment of Marion S. Barnes as Assistant Manager of the Central Station Division, of the Apparatus Department's San Francisco office, has just been announced by Allen G. Jones, Pacific District Manager, Apparatus Department.

A former sales engineer and G. E. test man, Barnes has been with General Electric for over 30 years, since his graduation from the University of California in 1915.

He is well known in western electrical circles, and is an active member of both the Pacific Coast Electrical Association and American Institute of Electrical Engineers.

Barnes is a native Californian. He was born in Sebastopol, and now lives in Oakland with his wife and daughter, Margaret.

V

INSTALLATIONS OF PLYWOOD DESCRIBED

Modern, practical applications of Weldwood Plywood for commercial interiors are described and illustrated in a new booklet issued jointly by United States Plywood Corporation and The Mengel Company, the world's largest producers of plywood.

Installations of decorative plywood as used by prominent firms are pictured, including stores, offices, banks, hotels, institutions, barfs and restaurants. That plywood walls, panels, and fittings are equally adaptable to the quiet dignity of a bank or the glamor of an ultra modern bar or specialty shop is impressively demonstrated. The booklet further explains that different effects are secured by a proper choice of woods and finishes as well as individual treatment of each interior.

The booklet will be mailed without charge upon request to the United States Plywood Corporation, Weldwood Bldg., 55 W. 44th St., New York City.

ANDREW T. HASS RE - ELECTED BY NO. CALIF. AIA

The 64th annual meeting of the Northern California Chapter of the AIA was held on Friday night, Jan. 25, at which time 75 members and guests of the chapter heard Samuel Lunden, vice-president of the institute, and Earl Heitschmidt, regional director, discuss the expanding program of education and public relations, which the institute has now undertaken. Both speakers emphasized the fact that the old "do - nothing" policy had been abandoned and that the Institute was now an aggressive organization with a rapidly increasing membership and with a policy of being of service to its members. Vice - President Lunden pointed out that the Northern California Chapter was one of the oldest of the Institute and that it had always taken the lead in promoting the welfare of its membership. The State Association of California Architects was organized by the California Chapter of the Institute and was the forerunner of various state associations throughout the nation. When it was apparent that this program needed stream - lining California again took the lead and instigated the unification program, which culminated in the formation of the California Council of Architects. Other states have followed this lead.

Membership Chairman A. Lewis Koue reported that as a result of the unification program in California the Northern California Chapter had had an increase of 64 per cent during the past year. Including corporate and associate members the Chapter now has an enrollment of 190 members.

Architect A. Appleton served as toastmaster for the group of past presidents at the meeting. In point of service William Mooser was the dean of those present and gave an interesting review of the problems of the Chapter in 1910 and 1911. He said that the highlight of his period of office was the banquet given at the time of the Institute convention in 1911. There were over 300 members and guests in attendance at the sumptuous affair, for which no charge was made. Apparently the architects in 1911 were more affluent than their brothers of today. For that one party cost the Institute $2300. When it was learned that the Governor was unable to attend because of pressing business in Sacramento, the Chapter offered to send a special train to bring him to the banquet. It was agreed among all the members of the present Chapter that no public relations program could compete with the 1911 banquet under William Mooser.

As a result of the election of officers, Andrew T. Hass was reelected president and John S. Bolles re-elected secretary. Hervey P. Clark was elected vice-president, and Ernest Born became treasurer. The holdover directors are Messrs. William Clement Ambrose, Norman K. Blanchard, and William Knowles.

JAMES G. WILLIAMS LAST RITES

Funeral services for James G. Williams will be held today, Wednesday, January 30, at 2 o'clock in Albert Brown Chapel, 3476 Piedmont Avenue, Oakland, under Masonic auspices.

Mr. Williams was a steel erection contractor and a member of the San Francisco Builders' Exchange.

1946 Construction Requirements Call for Critical Material Production Increase

Increases in the current production of critical construction materials ranging from 33 per cent for brick to as high as 275 per cent for cast iron radiation will be needed to meet 1946 construction require- ments, the Construction Division, Department of Commerce, reported today.

Construction materials for which estimates of 1946 requirements have been made are brick, structural tile, clay sewer pipe, gypsum board including lath, lumber including millwork and flooring, cast iron soil pipe, cast iron radiation, and bath tubs. Requirements, made up on consumption and minimum working inventories, are based on 1946 construction amounting to $7,500,000,000 for new construction and $5,000,000,000 for maintenance.

Particularly significant, in view of the nationwide housing shortage and efforts now being made to step-up construction of housing units, is the fact that more than half of estimated requirements for brick and gypsum board are for private and public residential work.

Comparative data on current annual production based on output in November or later, percentage of increase needed to meet 1946 requirements, and past production in reasonably good years as a yardstick of production capacity was also made public by the Construction Division.

Brick: Estimated 1946 requirements are 4,200,000,000 brick, an increase of 33 per cent over the current annual production rate of 3,168,000,000 brick. In 1941 production amounted to 4,900,000,000 brick.

Structural Tile: Estimated 1946 requirements are 1,180,000 tons, representing a 45 per cent increase over the current annual rate of 814,000 tons. Production in 1941 was 1,200,000 tons.

Clay Sewer Pipe: Estimated 1946 requirements are 1,174,000 tons, an increase of 35 per cent over the current rate of 871,000 tons. Production in 1941 was 1,200,000 tons.

Gypsum Board Including Lath: Estimated requirements, 2,972,000,000 sq. ft., an increase of 30 per cent over current production of 2,280,000,000 sq. ft. Though the industry has capacity to produce 3,000,000,000 sq. ft., output is limited by the supply of paper liner, it was pointed out. Gypsum lath requirements for 1946 are estimated at 1,620,000,000 sq. ft., while the current production rate is only 720,000,000 sq. ft. To meet 1946 requirements production will have to be increased 125 per cent.

Lumber Including Millwork and Flooring: Estimated requirements for construction and maintenance are 18,000,000,000 bd. ft. out of total estimated production of 30,000,000,000 bd. ft. Production in 1945 was about 27,500,000,000 bd. ft. Millwork requirements for 1946 construction are estimated at 1,600,000,000 bd. ft. as compared with 750,000,000 bd. ft. current production, an increase of more than 100 per cent. In 1940 millwork consumed 1,780,000.000 bd. ft. of lumber.

Cast Iron Soil Pipe: Estimated 1946 requirements are 390,000 tons an increase of 55 per cent over the current rate of 251,000 tons. Capacity of plants now operating is about 550,000 tons.

Cast Iron Radiation: Estimated 1946 requirements are 275,000,000 sq. ft.; current production is 16,000,000 sq. ft., calling for an increase of 275 per cent. In 1941 the output of 16 plants was 84,000,000 sq. ft. At present, out of 15 plants, 10 are producing, two are on strike and three are shut down. With resumption of production in the two plants now out on strike the 12 plants will have capacity equal to 90 per cent of pre-war production.

Bath Tubs (cast iron and steel): Estimated 1946 requirements are 960,000 tubs, an increase of 78 per cent over the current annual rate of 540,000 tubs. In 1937, when only cast iron tubs were made, output was 387,000 tubs. Capacity for steel tub production in 1946 is expected to be more than 200,000 tubs.

Did You Know That . . .

The Bowie Switch Company, pioneer San Francisco firm, has been acquired by the A. B. Chance Company of Centralia, Missouri, it was announced here today.

J. T. Isbell has been appointed Vice President and Pacific Coast manager, and J. A. Martin was named Pacific Coast plant manager.

The firm will be known as the Bowie Switch Division of the A. B. Chance Company, and will continue to manufacture pole line equipment and maintenance tools.

-O-

California Aggregates Company has started construction of a warehouse and ready-mix concrete plant for the handling of a complete line of building materials. The new plant is located at Linden Avenue and San Bruno Road in South San Francisco. They have purchased eight 4½-yard ready-mix trucks and will be operating with their concrete plant within 60 to 90 days. The plant will be managed by P. H. Tyrrell, formerly operator of Golden West Quarry and associated with Ken Royce of Ken Royce Equipment Company. Bob Wilkins will handle retail sales.

FREEDOM OF ACTION

Just recently Home Builders trying to complete a block of Veterans preference homes, made a Monday morning discovery of a week - end of vandalism during which windows, trim and fixtures had been smashed, apparently for the joy of destruction.

* * *

The money damage was about $7000—but the real problem is to replace the materials at ANY price.

* * *

Police rounded up the supposed culprits—a bunch of young hellions ranging in age from 11 to 13 years.

* * *

From what manner of homes come these delinquents? Are we to say that because they are "have nots", we should be tolerant toward their destruction of the property of others?

* * *

What became of the old-fashioned wood-shed and shingle which seemed to exercise an influence in this land a generation or so ago?

* * *

Rather than worrying too much about more Freedom for the rest of the world, why not give thought to a little less "freedom" for these future citizens?

V

ESTABLISHED OFFICES WILL CONTINUE TO HANDLE SURPLUS

Designation of the War Assets Corporation, Reconstruction Finance Corporation Subsidiary, to handle the disposal of surplus consumer goods and capital and producers goods in no way means a change in the already established sales offices, personnel, procedures and policies, it is announced.

Lt. General Edmund B. Gregory, War Assets Corporation Chairman, pointed out that the established offices for such surplus property throughout the nation will still be used and the same policies will be in effect. He asks that purchasers of these types of surplus property continue to do business with the same people and at the same addresses as heretofore.

PGE Announces Sta. Rosa, Sonoma County Plans

To meet the demand for electric power created by the rapid growth of Santa Rosa and other Sonoma County communities, Pacific Gas and Electric Company plans to spend $1,752,000 in enlarging and extending its distribution facilities in this area. The proposed construction will more than double the power capacity available to the area.

Announcement of the project was made in San Francisco today by A. Emory Wishon, vice president and general manager. A new step-down substation will be built at Fulton, Sonoma County, at a cost of $778,000, and a 110,000-volt transmission line will be constructed from Fulton to a point near Winters, Yolo County, to tap the company's main line running from Placer County powerhouse to the Vaca-Dixon substation. Construction of the Fulton-Winters line will cost $870,000.

At the Winters junction a switching station will be erected to control transmission of power to the Santa Rosa area. Construction of the switching station will cost $104,000, bringing the total investment to $1,752,000.

Work on the project will be started as soon as materials and labor become available.

V

Real Estate Assn. Will Install New President

Cleland O. Whitton will be installed 1946 president of the Real Estate Association of San Francisco, this Thursday evening, Jan. 31, at a brilliant installation in the Palace Hotel gold ballroom. State Real Estate Commissioner Rubert Scudder will install Whitton and other officers and directors of the organization for the ensuing year.

Walter Gordon, first vice-presiden, and general chairman of the installation, has announced a banquet, entertainment and dancing party will feature the evening's program. The "sold out" sign on reservations went up several days ago.

Chester R. MacPhee will be master of ceremonies at the banquet, with Max Robinson and Desmond Kelly handling reservations for the dinner event. James C. Kinard, 1945 president of the Real Estate Association, is the retiring head of the organization.

11—HOSPITALS

January 30, 1946
FUNDS AWARDED
CORCORAN, Kings Co., Calif.—T. K. Brown, Mayor of the City of Corcoran, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of Federal Works Agency, Berkeley, that funds to the amount of $3600 will be furnished the City for the purpose of assisting in the preparation of plans for constructing a municipal hospital with 20 beds, operating facilities, clinic, kitchen and administration offices. The structure is to be of reinforced concrete, wood roof with composition roofing, metal sash, and air conditioned and will cover a total area of approximately 7500 sq. ft. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $91,000, to be furnished from available cash, tax receipts and general obligation bonds. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

H. E. Devereaux, located at Berkeley, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Northern California, and David H. Horn is the architect for the City to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 11

BOND ELECTION
HERMOSA BEACH Los Angeles Co. Cal.—The city of Hermosa Beach will vote April 9 on the proposition of issuing bonds in the amount of $600,000 to finance a municipal improvement program.

Included in projects to be voted upon are a Hermosa Ave. parking lot to cost an estimated $25,000; a civic auditorium and pier to cost $350,000; an expenditure of $20,000 for new Fire Department equipment and a $100,000 Civic Center on Pier Ave.

Funds under the Civic Center plan are expected to be augmented by the projected sale of the present City Hall.

An outline of the program was prepared by a civic planning committee of which Paul Drake, president of the Chamber of Commerce, is chairman. 14-17

January 29, 1946
FUNDS AWARDED
OGDEN, Weber Co., Utah. — W. Karl Hopkins, superintendent, Board of Education, Ogden City School District, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $6208 will be furnished the school district for the purpose of assisting in the preparation of plans for constructing a two-story addition to an existing school to include 13 classrooms with auxiliary facilities. The plans can now be completed and all arrangement made for construction.

The estimated cost of the facilities will be $188,680, to be furnished from available cash and other funds. The funds made availabel through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

H. C. Jessen, located at Salt Lake City, Utah, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Utah, and Leslie S. Hodgson, Ogden, Utah, is the architect for the school to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 15

FUNDS AWARDED

FLAGSTAFF, Coconino Co., Ariz. —Mayor R. A. Bledsoe of Flagstaff, Ariz., has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of Federal Works Agency, Berkeley, Calif., that funds to the amount of $5350 will be furnished the City of Flagstaff for the purpose of assisting in the preparation of plans for a sewage treatment plant and extension of the sewage collecting system. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $187,200, to be furnished from general obligation and assessment bonds. The funds made available through the Bureau of Community Facilities of Federal Works Agency are to be repaid without interest when the construction begins.

Wright L. Felt, located at Los Angeles, Calif., is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Arizona, and Headman, Ferguson & Carollo, Phoenix, Arz., are the engineers for the City of Flagstaff, to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 31-32

January 30, 1946

FUNDS AWARDED

LONG BEACH, Los Angeles Co., Calif.—S. E. Vickers, city manager, City of Long Beach, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of Federal Works Agency, Berkeley, Calif., that funds to the amount of $25,500 will be furnished the city for the purpose of assisting in the preparation of plans for construction of a high temperature incinerator for reduction of combustible rubbish and garbage with provision for three furnace units of 120 tons each; construction of a two-story metal studding and stucco structure fire station with approximately 5000 sq. ft. floor area, and construction of a fire alarm communication building, one story with full basement and approximately 4200 sq. ft. floor area. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $568,420, to be furnished from general obligation bonds. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

Wright L. Felt, located at Los Angeles, Calif., is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Southern California. The engineer for the city has not yet been selected.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 31-32

January 30, 1946

BIDS WANTED

YELM, Thurston Co., Wash.—Until February 14, 10 A. M., bids will be received by Consulting Engineer A. K. Stillman, Funk Bldg., Olympia, Wash., for the construction of a 50,000-gallon elevated steel water tank.

Specifications obtainable from the above office. • 31-32

January 30, 1946

PROSPECTIVE BIDDERS

RITZVILLE, Wash.—As previously reported, until February 19, 8 P. M., bids will be received by the City of Ritzville, Jake Hoefel, city clerk, Municipal Bldg., Ritzville, for construction of reinforced concrete water tank, 1,000,000-gal. storage capacity, 22 ft. high, 90 ft. diameter. Alternate bids will be taken on prestressed concrete tank and standard reinforced concrete tank, cast iron and transite pipe.

The following have taken out plans:

H. D. Fowler Co., 538 1st S.
A. J. Goerig & Philp Co., Lloyd Bldg.
James Construction Co., Arctic Bldg.
Bethlehem Steel Corp., 3800 Iowa.
All of Seattle.
Central Construction Co., W. 918 Mallon Ave.
S. G. Morin, S. 309 Bernard St.
Hansen Construction Co., W. 232 Pacific Ave.
Clifton & Applegate, Yardley via Spokane.
All of Spokane.

Specifications obtainable from the above office, also from Consulting Engineer A. K. Stillman, Funk Bldg., Olympia, Wash., upon deposit of $25. • 31-32

January 30, 1946

BIDS WANTED

KELSO, Wash.—Until February 18, 5 P. M., bids will be received by Lora Blackstone, city clerk, 312 Allen St., Kelso, for the construction of sewage disposal plant, 200-gallon capacity. Bidder to state where plant is to be located, cost of additional sewer mains, pumping facilities to deliver raw sewage to plant. Bidder to furnish specifications. Bidder's costs to be complete cost of sewage disposal plant installed and inspected. Bidder to state what degree of purification is to be obtained from proposed plan by stating: (1) final BOD of effluent or reduction of BOD final effluent; (2) bacteria account in final effluent. Bidder to state cost per day or cost per M gallons to obtain stated purification and state cost of sludge proposal and method of disposition of sludge.

Specifications obtainable from the above office. • 31-32

PLANS and Speculations

Two motels will be constructed in SANTA CRUZ soon, according to Malcolm Sinclair, city building inspector, who has issued the permits. One motel is to be built at 211 Water Street by Jay Dickerson at an estimated cost of $30,000. Lynn Duckering is architect for the project. . . . H. G. Brailsford is planning a motel at 402 Ocean Street, where he wants to build about 12 rental units. Edwin L. Snyder is architect for the buildings, estimated to cost about $25,000. . Construction of a new J. C. Penney Company store for SANTA CRUZ to cost about $50,000 is ready to start and ground has been broken for work on the basement. The new structure will be located at Pacific Avenue and Cathcart Street. MacDonald Products Company is the contractor.

oOo

A $30,000 California Colonial style church edifice will be constructed by the Riverdale United Brethren Church in RIVERDALE, Fresno County, as soon as materials and labor are available. Plans were drawn by Walter Wagner, Fresno architect, and approved by the church's building committee.

oOo

Construction will be started soon on a 14-unit auto court north of SAN RAFAEL on the east side of Highway 101, if the Planning Commission votes rezoning of the property and approves construction plans. Mrs. Carrie Skaggs of San Rafael, is the developer of the $50,000 project.

oOo

Proposed for construction on the campus of the University of California at Berkeley as part of the $60,000,000 program is a new chemistry building, which will extend over College Avenue. New cross-campus road is to be built from Piedmont Avenue to Founders Rock, past the end of the stadium. Plans also call for a new Forestry building to cost $800,000 which will be located at the south end of Hilgard field. Estimated cost for the new Boalt Hall for the School of Jurisprudence, to be located at Bancroft Way and College Avenue, is $900,000. A $670,000 Plant Sciences building is planned for the Davis extension.

Interim Increase In Machinery Prices Extended

Extension to May 15, 1946, of the five per cent interim increase in ceiling prices granted Sept. 28, 1945, to manufacturers of basic construction machinery, equipment and parts has been announced by the Office of Price Administration.

The five per cent interim increase was originally scheduled to terminate on December 31, 1945, OPA said. The extension became effective January 16, 1946.

The temporary higher prices may be passed on by resellers to all levels of distribution, OPA said.

The increase is applicable to more than 100 classifications of machinery items urgently needed in postwar public works, highway and home construction and maintenance programs. The list includes cranes, dredges, drills, concrete mixers, graders, loaders, road maintainers, pavers, rollers, street sweepers, track-laying type tractors, half-track trucks and crawler wagons.

All items affected are covered by the general machinery regulation, OPA said.

The interim five per cent increase was authorized last September, OPA said, to insure continued high production by relieving many changes in operation that came at the termination of the war.

The reasons for granting the interim increase to manufacturers of construction machinery and equipment to a large extent still exist, OPA said. The agency has, therefore, decided to continue present ceilings at least until the industry has had a longer period of normal operation in which to adjust itself to peacetime practices.

Before the expiration date of the extension of current price ceilings to manufacturers of construction machinery and equipment a resurvey of the industry's operations from V-J Day to March 31, 1946, will be made by OPA to determine definitely the needs of the industry with respect to price relief under the statutory requirements.

Reconstruction Finance Corporation Announces New Loan Plan for Contractors

Extension of the Reconstruction Finance Corporation blanket loan participation plan to include residential financing for contractors during construction period to the time of payment by purchasers is announced today.

"Reports from commercial banks and other lending institutions in this region and others indicate that residential building contractors can obtain all the credit needed to launch the greatest construction activity in the history of the United States," James S. McCullough, Jr., Manager of the RFC Loan Agency at San Francisco, announced today. "Assurance that adequate credit would be available to take care of soundly conceived residential building projects was provided," McCullough said, "when the Board of Directors of the Corporation, at a recent meeting in Washington, extended the protection of the RFC Blanket Participation Agreement with banks to include loans made by banks to contractors or other business enterprises interested in financing the construction of residential properties.

"The action is part of a Government program in which RFC is participating to hasten the reconversion of the nation and its productive capacity from a wartime to a peacetime basis. In this program, RFC is concentrating on the problem of assuring adequate credit through banks to take care of returning veterans, anxious to establish their own businesses, and to provide for the credit needs of small business establishments which frequenty need loans of longer maturity than commercial banks ordinarily extend.

"An example of commercial banking reaction to the modification of the RFC Blanket Participation Agreement Plan is contained in a letter from the president of a Midwestern bank to Charles B. Henderson, Chairman of the RFC Board. The letter states: 'We want you to know that we consider this Amendment of your Regulations a most friendly gesture towards small business and an effective demonstration of the fact that small businesses and small banks can receive from your Corporation and the Administration the kind of help they need in meeting the problems arising from the conversion to a peacetime basis. As evidence of the effectiveness of the Amendment to the Blanket Participation Agreement, we are glad to advise we can immediately put into effect several construction programs which we have had under consideration, but which had been delayed because of the difficulty in arranging financing for the contractors.'

"The RFC Blanket Participation Agreement Plan provides a simple and expeditious procedure whereby the Corporation in effect makes available to approved banks a guarantee up to 70 per cent of any loan which meets the requirements of the Agreement. This plan, however, had not been available until now for residential construction loans.

"Since its inception last March, the Blanket Participation Agreement Plan has been applicable to various kinds of business loans and, by virtue of the recent action taken by the RFC Board of Directors, the BPA Loan protection now applies not only to temporary loans made by banks to contractors or other business enterprises for the purpose of financing the construction of residential properties, but also to loans made to contractors for general construction purposes. It is necessary, of course, that the applicant for such a bank loan have a commitment acceptable to the bank for the permanent financing of the project. Bank loans under the BPA Plan serve the important need of providing funds to tide contractors over the construction period until they receive payment from the owners of the property.

"Such loans may be obtained through banks by contractors and other business enterprises for the construction of a single house or for the erection of many houses. It is expected that a number of corporations desiring to construct homes for their workers may desire temporary financing from banks which have been admitted to the Blanket Participation Agreement.

"In the San Francisco region, more than 50 loans, totaling more than $3,686,000 had been authorized under the agreement up to January 15, last, and more than 48 banking institutions had been approved, as of that date, to make loans under the agreement entered into with the San Francisco RFC Loan Agency.

"It is expected that this number will further increase through the extension of protection to loans made to contractors and other business enterprises for residential construction.

"RFC, as a Governmental lending agency, will cooperate with banks in financing contractors and other business enterprises building homes for veterans and other civilians," McCullough concluded.

TWO NEW WELD COMPOUNDS ARE ANNOUNCED

Two new weld-spatter-resistant compounds, No. 9951 and No. 9952 have been announced by the Electric Welding Division of the General Electric Company. Both of the new compounds are specially formulated for use in the welding field wherever weld spatter is undesirable and must be avoided easily and economically.

Furnished in powder form, ready to be mixed with water, the compounds are identical in performance. The only difference between them is that No. 9951 is non-adherent and can be easily removed with an air hose or a dry cloth, while the No. 9952 is semi-adherent but can be quickly and easily removed with a damp cloth or a direct stream of water.

A feature of these compounds is that the surface of the work, even if slightly oily, does not require wetting before they can be applied. Another feature is that a special ingredient in the compounds eliminates the necessity of a water-soluble binder in order to obtain adhesion. Therefore, since the compounds are inert and cannot burn, they are completely smokeless.

Available from distributors, the compounds are easily mixed and applied. Water is added slowly until a thin paste is obtained. No lumping occurs, and the mixture can be applied with an ordinary bristle brush. The brush can be safely left in the compounds afterwards or readily cleaned with cold water.

GROOVER AND I

HORIZONS UNLIMITED

Very little has been said to date regarding a prominent Visiting Fireman, Winston Churchill, now vacationing in Florida.

★ ★ ★

Don't think that Mr. Churchill is here solely for the purpose of sunning himself at Miami Beach and buying a $2 ticket at Joe Kennedy's horse plant at Hialeah.

★ ★ ★

"Winnie" is here primarily to throw his weight around when the going gets rough on the forthcoming 4.4 billion dollar loan to Britain.

★ ★ ★

France has declared herself next in line, suggesting a 2.5 billion dollar loan as being acceptable.

★ ★ ★

Sometime ago Russia mentioned a figure of 6.5 billion; however, no specific amount has been recently stated.

★ ★ ★

Perhaps Russia will wait until the other loans are made and then ask for an amount equal to the total. If we don't grant it, it may be called an act hostile and unfriendly to the Soviet.

★ ★ ★

It might be time to turn our pockets inside-out and see if we have any money to lend—or the price of a cup of coffee!

★ ★ ★

We have a National Debt of about 280 billion dollars — which will probably be 300 billion during the next 18 months of our "balanced budget".

★ ★ ★

If you are interested in Ancient History, you might go back to 1916, just before World War I. Our National Debt at that time was less than one and one-quarter billion dollars!

★ ★ ★

Don't tell me that this is not a land of expanding opportunity! We have a National Debt that increased TWOHUNDREDAND FORTY-FIVE TIMES within 30 years—24,500 per cent. Brother, THAT'S expansion!

V

CAMPAIGN TO PROMOTE USE OF CLAY PIPE

Increased advertising campaigns to further acquaint builders and industry with the advantages of clay pipe were announced this week by National Clay Pipe Manufacturers, Inc., following a meeting of its officers in Columbus, Ohio.

According to H. C. Maurer, president of the association, leading trade papers and farm magazines have been selected to broaden the program begun two years ago at the inception of NCPMI.

The new campaigns are planned to reach builders, contractors, engineers, architects, plumbers and farm users on a national scale. They have been prepared by the NCPMI agency, Norman Malone and Associates of Akron, Ohio.

NCPMI was formed two years ago by clay pipe manufacturers located in all sections of the United States. Its purpose is to promote the use of clay pipe and to keep the public informed of new uses and developments of clay pipe and other clay products. Forty-four clay pipe manufacturers comprise the association.

State Reconstruction, Re-employment Commission Publishes Survey Report

Through the establishment of planning commissions, most of the local governments of the State are taking rapid strides toward making California communities better places in which to live. In this respect, California is one of leading States of the Union.

This is shown in a report issued today by the State Reconstruction and Reemployment Commission. The report, entitled "California Planning", points out that in addition to official planning commissions, much work is being done by unofficial planning groups.

In announcing the results of surveys made by the Commission in connection with planning at local levels, as contained in the publication, Col. Alexander R. Heron, State Director of Reconstruction and Reemployment, said:

"One of the major functions of the Commission is to stimulate advance planning, not only on the part of local governmental units, but by private groups. Through this planning it will be possible for the people of California to take advantage of wartime gains and also surmount obstacles which have come with wartime changes.

"The Commission has given assistance and advice to 115 California communities in planning activities. This has been carried out through the Commission's field staff, which is in constant touch with local planning commissions and private planning groups.

"Through this service, the Commission has made available to cities and counties the results of research and analysis of the prewar and wartime economy of California, as well as estimates of future trends."

"The Commission's report contains statistical data showing the details of planning on the part of cities and counties. It is pointed out that, under the California public planning laws, cities may, and counties must, establish planning commissions.

The report shows that the number of city planning commissions has increased from 132 in 1939 to 150 in 1945. These city planning commissions serve more than 95 per cent of the population in incoporated cities. All cities of population over 100,000 are served by planning commissions. In the other population brackets, the percentage of planning commissions is high, except in cities under 1,000. The report shows that planning commission budgets for cities in 1945-1946 total $423,591, as compared with $138,081 for 1939-1940.

The number of county planning commissions has increased from 33 in 1939 to 50 in 1945, with several more counties preparing to establish commissions in the near future. The present county planning commissions cover 96 per cent of the State's population outside of incorporated cities.

Anticipated expenditures by county planning commissions for 1945-1946 total $444,773, an increase of $115,984 over the 1944-1945 fiscal year.

The report deals only with the activities of official planning agencies as set up by California statutes and does not cover the work of a great number of additional unofficial planning groups throughout the State.

The report contains a review of the objectives, history, planning laws and activities of city and county planning commissions. It also suggests basic steps for planning agencies as follows:

1.—Consideration of the assets and liabilities.
2.—Analysis of the causes of present conditions.
3.—Determination of objectives to correct previous ills and take advantage of new opportunities.
4.—Formulation of a general plan for future development.
5.—Means for carrying out the plan.

9-10—EDUCATIONAL BUILDINGS

January 31, 1946
FUNDS AWARDED
OJAI, Ventura Co., Calif.—A. A. Herman, district superintendent of Nordhoff Union Elementary School District, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $9020 will be furnished the district for the purpose of assisting in the preparation of plans for constructing eight classrooms, administrative unit, kindergarten, all-purpose room, garage and ground development at the Meiners Oaks School; six classrooms, administrative unit and garage at the Oak View Gardens School, and alterations to 14 classrooms at Ojai School. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $250,000, to be furnished from general obligation bonds. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

Wright L. Felt, located at Los Angeles, Calif., is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Southern California, and Maynard Lyndon is the architect for the school district to make the final plans.

Mr. Chenery stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 9

FUNDS AWARDED
IMPERIAL, Imperial Co., Calif.—Percy R. Palmer, principal, Brawley Union High School District of Imperial County, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $9000 will be furnished the school district for the purpose of assisting in the preparation of plans for constructing a cafeteria with connecting corridors, an auditorium with seating capacity of 1000, and a musc department at the Brawley Union High School. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $260,000, to be furnished from general obligation bonds. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

Wright L. Felt, located at Los Angeles, Calif., is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Southern California, and H. L. Gogerty Organization, Hollywood, Calif., is the architect for the school district to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 9

January 31, 1946
FUNDS AWARDED
EAST MERCED, Merced Co., Calif.—W. Max Smith, superintendent, Merced Unon Elementary School District, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $9000 will be furnished the school district for the purpose of assisting in the preparation of plans for constructing a new school, consisting of three rooms, a kindergarten room, teachers' room, office and related facilities in East Merced and new school facilities at L and 23rd Sts., consisting of nine classrooms, administrative offices, auditorium and related facilities. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $184,000, to be furnished from available cash, tax receipts and general obligation bonds. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

H. E. Devereaux, located at Berkeley, Calif., is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Northern California, and Elmore G. Ernst, Stockton, Calif., has been selected as architect for the school district to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 9

35— DOCKS, PIERS & HARBORS

January 31, 1946
TO ASK BIDS
SANTA BARBARA, Calif. — Consulting Engineers Leeds, Hill & Jewett, 1000 Edison Bldg., Los Angeles, have completed an overall survey of the conditions of Stearns Wharf in Santa Barbara for the Santa Barbara Equipment Co., Dr. Edward Cagney, president; Harold Benner, comptroller and acting manager, Anacapa and Mason Sts., Santa Barbara. The report stated that approximately 1458 new creosoted bearing piles will be required and about 75 per cent of the eucalyptus fender piles will also have to be renewed. Present plans call for the immediate repair of all piling at the end of the wharf, and the Santa Barbara Crane Service, 35 N. Quarantina, Santa Barbara, has a contract to drive 25 new piles at this point immediately. The engineers have been authorized to prepare detailed specifications and plans covering all repairs to the wharf and a bid call for the work is expected to be issued in the near future. 35

FUNDS AWARDED

LOGAN, Cache Co., Utah.—David Tarbet, clerk, Board of Education, Logan city school, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $840 will be furnished the school district for the purpose of assisting in the preparation of plans for constructing a two-story addition to the Whittier School to include an auditorium-recreation room with lunchroom and kitchen, and $1000 furnished for constructing an auditorium - recreation room, lunchroom, kitchen and one classroom at Wilson Elementary School. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $23,400 and $28,400, respectively, to be furnished from available cash and other funds. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

H. C. Jessen, located at Salt Lake City, Utah, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Utah.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available 9-10

January 30, 1946

FUNDS AWARDED

BURBANK, Los Angeles Co., Calif. —H. I. Stites, city manager, City of Burbank, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $23,885 will be furnished the City of Burbank for the purpose of assisting in the preparation of plans for constructing a warehouse, electric, machine, blacksmith shops and garage, carpenter and paint shops and loading docks, and additional water facilities consisting of a booster pumping plant and 5MG intermediate water reservoirs, and water main extensions in the Valley section, Mariposa St., Chandler Blvd., Scott Rd., Peyton Ave. and Andover St., Main St., Clark and Jeffries Aves., Sixth St., Alameda and Elmwood Aves. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $694,635, to be furnished from income of the operations of the municipal water and electric departments. The funds made available through the Bureau of Community Facilities of Federal Works Agency are to be repaid without interest when the construction begins.

Wright L. Felt, located at Los Angeles, Calif., is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Southern California, and Public Service Department engineers of the City of Burbank will make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 12-13

January 29, 1946

FUNDS AWARDED

FAIRFAX, Marin Co., Calif.—E. A. Goertz, Trustee, Fairfax Elementary School District, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $4250 will be furnished the Fairfax Elementary School District for the purpose of assisting in the preparation of plans for constructing five classrooms, including lavatories, storeroom, health and administration; cafeteria building, including fully equipped kitchen; equipment classroom building; equipment cafeteria on the Fairfax School site. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $100,000, to be furnished from available cash, tax receipts and other funds. The funds made available through the Bureau of Community Facilities of Federal Works Agency are to be repaid without interest when the construction begins.

Wright L. Felt, located at Los Angeles, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Southern California, and Frank Wynkoop is the architect for the School District, to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available. 9-10

PLANS and Speculations

Immediate dismantling of all public dormitories for single war workers in the bay area for transfer to smaller communities thruout central California, has been announced by the FPHA. The dormitories will be erected as family dwelling units in areas where the housing situation is more acute. As announced in the "Builder" recently, such work will be handled by the following San Francisco contractors, with whom contracts have been signed by the FPHA: M. & K. Corp., Daley Bros., and Robert McCarthy Company.

oOo

Clyde Griffin, RICHMOND real estate broker, has announced plans for construction of a new $72,000 building to house the United States Employment Service, according to Griffin. R. J. Stemple, Richmond contractor, is in charge of construction of the new business building, to be located near 23rd Street and Bissell.

oOo

CONCORD has plans for several new projects: a preliminary survey has been made for a two-story office building to be constructed by Sylvester and San Enea at Salvio and Grant Streets. An expenditure of $40,000 is contemplated. . . . V. Savagnino and C. Garibotti will soon start construction of a reinforced concrete building costing $30,000 at the corner of Willow Pass and Colfax. It will be occupied by a market and grocery store. . . By March 1 a 3-apartment building and duplex on School Street, at East and Park Streets will be started by A. P. Dudley, building contractor. . . Planned almost two years ago and postponed until building materials became available, the new Greyhound Bus Lines depot, to be built at the corner of Grant Street and Concord Blvd., will soon be ready to go out for bids. The modern depot will cost an estimated $20,000.

oOo

Construction of a $30,000 building at OAKLAND Airport for expansion of activities by Pacific Airmotive Corporation was authorized by the Board of Port Commissioners. The building, 48x110 feet, will be erected by the Port of Oakland.

Engineers Report Destruction of Navy Hangars Due to Unprecedented Wind Load

Collapse of the three Navy "blimp" hangars during the recent Florida hurricane was caused by a wind load exceeding two-and-a-half times that for which the structures were designed, states a joint report, approved for publication by the Navy, and delivered before the 30th annual meeting of the Building Officials Conference of America by Frank J. Hanrahan, structural engineer of the National Lumber Manufacturers' Association.

Also concurring in the findings were Verne Ketchum and J. F. Haldeman, Timber Structures, Inc.; F. A. Hartman and R. C. Bastress, Protexol Corp.; R. H. Bescher of the Wood Preserving Division, Koppers Company, Inc., and Henry Garnjobst, Jr., American Lumber & Treating Company. These seven technical men, who examined the destriuction at the site immediately after the hurricane, made every effort to collect and correlate all available, reliable data.

In his preliminary remarks, Hanrahan pointed out that, as in the case of the Knickerbocker Theatre, Cocoanut Grove Club, and Tacoma Bridge disasters, many important lessons may be learned from such mishaps.

High points of the joint report are:

1. Each of the three hangars, having exterior dimensions of approximately 300 feet width, by 1,060 feet length, by more than 180 feet height, with no interior partitions, collapsed separately during the peak, or near peak, winds of the hurricane.

2. Intense, sustained fires, exceeding 2,000 deg. F., were started and fed by the contents of each hangar separately following collapse. The 25 "blimps", 366 airplanes, and 150 automobiles housed in the hangars contained large quantities of high octane gasoline believed ignited by electrical shorts or sparks caused by aircraft batteries, metal parts of planes, concrete floors or electrical circuits being struck by falling timbers with metal fastenings.

3. Although U. S. Weather Bureau reports over a period of 33 years showed the extreme wind velocity (fastest mile of wind) measured at Miami to be 96 m.p.h., the structures were designed to resist a wind of 110 m.p.h. Available meteorological data indicate the winds during the September 15, 1945, hurricane exceeded 175 m. p. h. at the Richmond Naval Air Station. It would be unreasonable to except the structures to withstand the high overload imposed and the failure may be considered an "Act of God".

4. No evidence of faulty design, materials, treatment, fabrication, erection or maintenance was found.

5. Even though untreated interior portions of the wood members were often exposed by breakage in falling from great heights,, the fire-retardant treatment of the wood prevented or assisted in preventing fire and spread of fire where the fire was not fed directly by the highly combustive contents of the buildings, such as high-octane gasoline. There was no spread of fire to other buildings on the base in spite of the high winds, and the fire-retardant treated wood did not itself support combustion.

6. The timber connectors found on the site were of specified size and type of standard make. No evidence of failure of connectors or bolts was found.

A copy of the 19-page report is on file at the offices of the "Builder".

GROOVER AND I

ARMY DISCOVERS MOON

The U. S. Army Signal Corps, using radar, has verified the existence of the moon and mention has been made of shooting a radio-controlled robot bomb to see what would happen.

★ ★ ★

Interesting, but not news. When Dewey took over from the Spanishers in Manila,, ground forces fanned out covering all approaches to prevent counter-attack.

★ ★ ★

A battery of field artillery made a forced march of about 10 kilometers and at nightfall took up position at a bend of the Pasig River.

★ ★ ★

The day had been hot and wearisome—perhaps the gun crew were entitled to a little shut-eye. The cannoneer snapped awake with the realization he was looking into the searchlight of a hostile gunboat rounding the river bend.

★ ★ ★

By reflex action he flipped off the safety latch, jerked the lanyard and sent a shell screaming through the night. The half-asleep gun crew jumped into action and a second shot was fired up the river before they realized they were firing at the rising tropic moon.

★ ★ ★

The U. S. Field Artillery not only discovered, but fired upon the moon from the Island of Luzon in 1898!

★ ★ ★

The best stories of our wars will not be found in the stiff, edited official reports but in the legend and traditions of the various outfits.

★ ★ ★

In France, as late as 1918, you could still start a brawl by whispering "shoot the moon" in the presence of artillerymen from a certain regiment.

Bid Calls Soon For Contra Costa Canal Links

The two final links in the main-line Contra Costa Canal soon will be forged, according to Richard L. Boke, Regional Director of the U. S. Bureau of Reclamation at Sacramento.

Already under construction when a 1942 order of the War Production Board called a halt to the work, a 6.2 - mile section of the canal north of Walnut Creek will be completed this spring, under the pre-war contract. Boke has announced that bids will be called this month for the terminal 3.6-mile section ending at Martinez.

In early spring, contracts also will be let for construction of the Mountain View dam and reservoir at the western terminus of the 47.5-mile canal, and for two shorter relift canals, which will have their source in the Contra Costa Canal itself. These are the Clayton and Ygnacio Canals, which will serve agricultural lands lying above the main canal.

In addition to this schedule of major work, all slated to begin before July 1, construction of the Clayton and Ygnacio plants, two transformer stations, and the lateral distribution system is required to place the canal in full operation.

Bureau engineers estimate that the entire project-feature will be completed by June 1947. Irrigation service to the total 22,000 acres of the area must, however, await construction of the 140 miles of pipe lines and ditches which compose the lateral system. It is expected that a portion of these laterals will be ready for the irrigation season of 1948.

Since August 1940, about 38 miles of the Contra Costa Canal have been in operation, furnishing industrial and domestic water to cities and war plants along its route, as well as to irrigated farm areas immediately adjacent to the canal.

The four pumping plants which lift water 124 feet to accomplish this service are now operated by power served by a private utility company. When the project transmission line has been extended to the Delta, Shasta power will be used direct.

NOTICE OF CANCELLATION

The duration examination for Pileman, announced on the bulletin issued September 19, 1945, has been canceled.

State Personnel Board.

Pacific Drilling Corporation Organized

Formation of the "Pacific Drilling Corporation", a firm specializing in churn, rotary and square shaft drilling for test, exploration and geophysical borings, and industrial drilling was announced today.

Walter F. Harcourt-Palmer, a mining and construction engineering executive with experience in Alaska and United States for the U. S. Smelting, Refining & Mining Company, Permanente Metals Corporation, and J. D. Proctor, Inc., General Contractors, was elected president.

Headquarters for Pacific Drilling Corporation are at 233 Sansome Street, San Francisco, and an East Bay office is maintained on the 6th floor, Syndicate Building, Oakland.

Drilling of the type to be conducted by Pacific Drilling Corporation includes:

1. Test borings for the mechanical analysis of soils—a prerequisite to heavy construction and to the selection of sites for dams, bridges, airports, large buildings, piers, cofferdams, breakwaters and tunnels.
2. Exploration borings for the development of placer and lode mineral properties.
3. Industrial drilling—including blast hole, foundation footings, and cast-in-place piles.
4. Borings for geophysical operations.

PEDESTRIAN INJURIES

Motorists who violate a pedestrian's right of way in a cross walk, with resultant injury, are now subject to a penalty of $500 or six months in jail, or both, the California State Automobile Association points out.

Engineers And Architects Assn. To Meet Feb. 8th

The Engineers and Architects Association, San Francisco Bay Area Chapter, will hold a dinner meeting February 8, 7:15 p. m. at the Marconi Restaurant, 241 Pine Street.

Guest speaker at the gathering will be Dr. August C. Helmholz, Professor of Physics, University of California, on the subject of atomic energy. An outstanding authority on atomic reactions, Dr. Helmholz is noted for his ability to explain his subject in a manner that can be grasped by the average audience. His talk will be followed by a question and answer session.

All engineers are cordially invited, but, in order that seating can be provided, reservations should be made not later than February 6. Telephone C. T. Ledden at TUxedo 6633; dinner, $1.75.

(Continued on Page Four)

A Letter to the President of the United States

January 18, 1946

Hon. Harry S. Truman
President of the United States
The White House
Washington, D. C.

Dear Mr. President:

Your proposal to me in Washington last evening that the wage demand of the United Steelworkers of America-CIO be settled on the basis of a wage increase of 18½ cents an hour, retroactive to January 1, 1946, cannot, I regret to say, be accepted by the United States Steel Corporation for the reasons set forth below.

As you must be aware, your proposal is almost equivalent to granting in full the Union's revised demand of a wage increase of 19½ cents an hour, which was advanced by Philip Murray, the President of the Union, at our collective bargaining conference with the Union in New York a week ago today. In our opinion, there is no just basis from any point of view for a wage increase to our steel workers of the large size you have proposed, which, if put into effect, is certain to result in great financial harm not only to this Corporation but also to users of steel in general.

As I have tried to make clear to you and other Government officials during our conferences in Washington over the past few days, there is a limit in the extent to which the Union wage demands can be met by us. We reached that limit when we raised our offer to the Union last Friday from a wage increase of 12½ cents an hour to one of 15 cents an hour. This would constitute the highest single wage increase ever made by our steel-making subsidiaries. Our offer of 15 cents was equivalent to meeting 60% of the Union's original excessive demand of a $2 a day general wage increase. Our offer met 75% of the Union's final proposal of a wage increase of 19½ cents an hour. A wage increase of 15 cents an hour, such as we offered, would increase the direct labor costs of our manufacturing subsidiaries by approximately $60,000,000 a year. That is a most substantial sum, and does not take into account the higher costs we shall have to pay for purchased goods and services, when large wage increases generally become effective throughout American industry, as is inevitable after a substantial increase in steel wages.

As you know, collective bargaining negotiations with the Union broke down at the White House yesterday afternoon, because Mr. Murray then refused to budge from his position that a country-wide steel strike must take place, unless steel workers are granted a general wage increase of 19½ cents an hour. Our offer of a wage increase of 15 cents an hour was again rejected by the Union.

The Union threatened to go ahead with its program for a national steel strike at midnight next Sunday, although such a strike will be a clear violation of the no-strike provision contained in our labor contracts with the Union, which continue by their terms until October 15, 1946.

From the outset, we have recognized how injurious a steel strike will be to reconversion and to the economy of this whole country. Most industries are dependent upon a supply of steel for their continued operations. We have done everything reasonably within our power to avert such a strike. If a strike occurs, the responsibility rests with the Union.

When the Government at the eleventh hour informed us about a week ago of its willingness to sanction an increase in steel ceiling prices, we at once resumed collective bargaining negotiations with the Union. Such price action by the Government was a recognition by it of the right of the steel industry to receive price relief because of past heavy increases in costs, something which the steel industry for many months has unsuccessfully sought to establish with OPA.

I should like again to point out some pertinent facts relative to the wages of our steel workers.

Since January, 1941, the average straight-time hourly pay, without overtime, of our steel workers has increased more than the 33% increase in the cost of living during that period, recently computed by Government authorities. Steel workers' wages have kept pace with increased living costs. Such average straight-time pay in our steel-producing subsidiaries was $1.14 an hour in each of the months of September, October and November, 1945, excluding any overtime premium and any amount for correction of possible wage inequities. An increase of 15 cents, in accordance with our offer, would raise such average straight-time pay to $1.29 an hour, placing such pay among the highest today in all of American industry.

Under our offer of a 15 cent increase, the average weekly take-home pay of our steel workers for a forty-hour week would amount to $51.60, assuming that no overtime is involved. This figure is only $4.54 less than the actual average weekly earnings of these employees, including overtime, in the last full war year of 1944, when the average work week was 46.1 hours. The difference is really less, because we will undoubtedly continue to have overtime in the future, just as we have at the present time. In November, 1945, overtime premiums to our steel workers aggregated more than $1,300,000. Such reduction of $4.54 in weekly take-home pay is the natural consequence of a shorter work week of forty hours, and therefore one of lower production.

Much as we desire to avoid a steel strike, we cannot overlook the effect both on this Corporation and on our customers and American business in general, of the 18½ cent an hour wage increase, which you have proposed. Such a wage increase must result in higher prices for steel than have previously been proposed to us by the Government. Great financial harm would soon follow for all users of steel who would be obliged to pay higher prices for their steel, higher wages to their employees, and still have the prices for their own products subject to OPA control. Such a high and unjustified wage scale might well spell financial disaster for many of the smaller steel companies and for a large number of steel fabricators and processors. The nation needs the output of these companies. Increased wages and increased prices which force companies out of business can only result in irreparable damage to the American people.

In our judgment, it is distinctly in the public interest to take into account the injurious effect upon American industry of an unjustified wage increase in the steel industry.

After a full and careful consideration of your proposal, we have reached the conclusion above stated.

Respectfully yours,

Benjamin F. Fairless,
President, United States Steel Corporation

Official Proposal

FIRST PUBLISHED TODAY

Highway Imp.—Solano County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on **February 27, 1946**, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Solano County, across Napa River at West City Limits of Vallejo (X-Sol-208-A) a bridge fender to be repaired.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Carpenter	$1.75
Electrician	1.70
Flagman	1.00
Laborer	1.00
Oiler power shovels or cranes	1.40
Pile driver hoistman or operator	1.85
Pile driver man	1.61
Tractor driver	1.70
Any classification omitted herein not less than	1.00

Overtime: one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen): one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (See said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **February 27, 1946**, at which time they will be publicly opened and read, in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Contra Costa County, between Concord Avenue and four-tenths (0.4) mile west of Ohmer Station (IV-C.C-75,106-E,Cnd,C), about two and three-tenths (2.3) miles in length, to be graded and paved with Portland cement concrete.

Bids are required for the entire work described herein.

THIS IS A NATIONAL DEFENSE CONTRACT UNDER THE DEFENSE HIGHWAY ACT OF 1941

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant mixer operator	$1.45
Asphalt spreading machine operator	1.75
Carpenter	1.75
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity)	1.70
Mechanical tamper and finisher operator (concrete or asphalt)	1.70
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovl type controls (up to and including one cubic yard)	2.00
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (8 cubic yards water level capacity or more)	1.625
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.3125
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.1875
Intermediate Grade Labor	
Asphalt plant dryerman or fireman	1.40
Concrete vibrator operator	1.25
Headerboard man	1.375
Jackhammer operator	1.25
Oil distributor bootman	1.00
Oiler, power shovels or cranes	1.40
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Unskilled Labor	
Flagman	1.0625
Laborer	1.0625

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.1875 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.0625 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.0625 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable herto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (see said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

Flagman	1.00
Laborer	1.00

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.25 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.00 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applica- Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, nad forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the wor kis situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (see said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

(Jan. 18-25, Feb. 1, 1946)

Warehouse—California National Guard, Sacramento, Calif.

STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF ARCHITECTURE

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the Division of Architecture, Public Works Building, 1120 "N" Street, Sacramento, California, up to 2:00 P. M., Tuesday, February 5, 1946, said bids thereafter on said day to be publicly opened and read for Warehouse, California National Guard, Sacramento, California, in accordance with plans and specifications therefor.

The work includes the construction of a 1-story brick and reinforced concrete Warehouse. The floor area will be 4400 square feet, approximately.

Prevailing Wage Scale: In accordance wtih the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

	Hourly Rate
Bricklayers	$1.87½
Bricklayers' Hod Carriers	1.15
Carpenters	1.50
Cement Finishers	1.50
Electric Workers	1.70
Engineers, Portable Hoist or Otherwise	1.50
Glass Workers	1.26
Iron Workers, Architectural	1.60
Iron Workers, Reinforcing Steel	1.50
Laborers, Building	1.06¼
Painters	1.43
Roofers	1.50
Sheet Metal Workers	1.50
Any classification omitted herein not less than	1.06¼

Overtime—One and one-half times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal Officer or agency, in so far as the same may be applicabel to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal Order, whether higher or lower, shall control.

Apprentices may be employed provided they are properly indentured to the Contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Plans and specifications for examination are on file in the Office of the Division of Architecture, Public Works Building, Sacramento, and Room 803 State Office Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Contractors who are prequalified and who are desirous of securing plans, specifications and proposal forms for the purposes of preparing and submitting a proposal for this work may do so by requesting same in writing from the Division of Architecture, Public Works Building, Sacramento.

Prequalification: Plans, specifications and proposal forms will only be issued to those contractors who are prequalified with the Department of Public Works by having filed a statement of experience and financial condition on a standard questionnaire form in accordance with the provisions of the State Contract Act. Such statement must have been filed and approved not more than one (1) year and not less than five (5) days previous to the date set for receiving and opening bids. Contractors may obtain standard questionnaire forms from the Division of Architecture.

No bid will be accepted from a contractor who has not been licensed in accordance with the provisions of the Contractor's License Act or to whom a proposal has not been issued by the Department of Public Works.

No bid will be considered unless it is presented on a proposal form furnished by the Division of Architecture and accompanied by a bidder's bond, cash, a cashier's or certified check made payable to the Director of Public Works in the sum of at least ten per centum (10%) of the amount of the bid.

The Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

Engineering

Fifty-sixth Year—Vol. 56— No. 24 SAN FRANCISCO, MONDAY, FEBRUARY 4, 1946 PRICE 15 CENTS PER COPY

PLANS and Speculations

Construction of a new telephone building on the southwest corner of Second and D Streets in SAN RAFAEL is scheduled to be started by June 1. The building, which will be built by Sam and Zekie Smith for lease to the telephone company, will be of wood frame construction and stucco exterior with approx. 5000 sq. ft. of floor space. S. Heiman is the architect.

oOo

Bert Paxton, BUTTE COUNTY consulting engineer, has been authorized by the board of supervisors to employ the engineers of the Warren Bridge Company of San Francisco to draw plans and specifications for the new bridge to replace the old Bidwell Bar suspension span.

oOo

The Assembly Governmental Efficiency Committee has given favorable recommendation of a bill to provide $500,000 for the construction of a State building in SAN JOSE.

oOo

The San Joaquin Valley Walnut Growers Association are in the process of selecting a site for a new plant, to cost approximately $150,000. The location of the new structure will be in the STANISLAUS area.

oOo

Plans for a new school building were submitted to the board of directors of the SELMA (Fresno County) Elementary School District by W. D. Coates, Fresno architect. A fund of $55,000 is available for the project.

oOo

Expenses of installing a new sewer system in SPARKS, Nev., will be met with a bond issue of approximately $100,000. Of the total, about $70,000 will be allocated to the installation of the new system and about $30,000 to overhaul the disposal plant. Planning work, financed by Federal Works Agency funds, has been compiled, according to George Schilling, project engineer.

oOo

P. J. Pasetta Construction Company is to erect a building at the northwest corner of Franklin and Main Streets in SANTA CLARA for Mrs. F. R. Hayward. The $25,000 structure will have an 82-foot frontage on Franklin Street and will contain three stories.

oOo

Services of L. O. B. Lindstrom, San Francisco electrical engineer, are being sought by the Board of Directors of the Truckee-Carson Irrigation District. A survey is to be made for the purpose of increasing generation of electrical power in the district.

oOo

Bureau Has Over $35,000,000 For Central Valley

A contract for $102,220 to manufacture and deliver nine penstock intake gates for Keswick Dam on the Central Valley irrigation and multiple-purpose project in California has been authorized for award to the American Bridge Company of Denver, Commissioner of Reclamation Michael W. Straus informed the regional office at Sacramento Thursday, January 31.

The steel gates, approximately 12½ by 23½ feet in size, are to be installed at the upper end of the intake passages through which water flows from the reservoir to the turbines in the power plant. The gates will shut off the flow of water through the intake passages so that the necessary inspection and maintenance work can be done inside the penstocks and on the turbines.

Keswick Dam, located 9 miles below Shasta Dam on the Sacramento River, is designed to provide an afterbay for the "parent" dam, to provide for generation of power from three 25,000 kilowatt units, and to protect migratory fish.

Commissioner Straus said that this contract for Keswick gates is one of many material and construction contracts which the Bureau of Reclamation is preparing to let this year on the Central Valley and other Reclamation projects. The Bureau will have more than $35,000,000 available in 1946 for resuming work on various features of the Central Valley Project delayed by the war.

Work to be done will include finishing touches on three dams, Shasta, Keswick, and Friant, continued building of the 160-mile Friant-Kern Canal, and initial construction on the 110-mile Delta-Mendota Canal, both channels of river-size proportions. Other important undertakings on the Central Valley Project this year will be the completion of the last ten miles of the Contra Costa Canal System and the building of the Oroville to Sacramento section of a 230-kv transmission line from Oroville to Tracy.

Brookman Company Organized to Serve Building Industry With Complete Line

Builders in the San Francisco Bay Area will be interested in the establishment of a new firm, The Brookman Company, which will serve the building industry with floor coverings, acoustical materials, building materials, marine deck coverings, and similar lines.

While The Brookman Company as an organization is new, the personnel is well known to bay area builders. Owner of the company is J. A. Mancini, who for several years past has been district manager of L. D. Reeder Company, and previously was district manager of Turner Resilient Floors, Inc., having founded their West Coast office nine years ago. Associated with Mancini will be William O'Connor and several other former employees of L. D. Reeder Company.

A bit of human interest attaches to the name of the new company. Establishing his firm on a sound, substantial basis that will carry far into the future, Mancini looks ahead to the time when his son, now a small boy, will participate in the business. With this in mind, he has combined the two names, Brooks for his little son, Mancini for himself, into the new name, The Brookman Company.

A temporary location has been secured at 55 Main Street until such time as more suitable quarters may be leased or purchased.

The Brookman Company is already a going concern and those associated with the new firm are prepared to serve their many friends in the building industry with the same courtesy, efficiency and integrity that has characterized their service in the past.

V

Victor R. Sandner Appointed To New Moore Dry Dock Post

The Moore Dry Dock Company today announced the appointment on February 1, of Victor R. Sandner as manager of their Structural Steel Division. Sandner has been with the Company since 1929 and previous to that time spent 13 years on structural engineering work for engineers and architects in the Bay area.

During World War II he was in charge of the Structural Steel Department's operations on many important private and war contracts. The Company is now furnishing, fabricating and erecting steel on numerous buildings and projects in connection with reconversion and plant expansion in the Western States. Sandner's wide experience and ability in the structural steel field well suits him to serve industry on all structural steel work.

NOTICE OF CANCELLATIONS

Sheet Metal Worker—Coppersmith

The duration examinations for Sheet Metal Worker-Coppersmith announced on the bulletin issued Sept. 15, 1945, has been canceled by the State Personnel Board.

Terminal Island Shipyard Materials To Go Out For Bids

The California Shipbuilding Corporation has been auhtorized by the United States Maritime Commission to demolish the shipyard facilities located at Terminal Island. These facilities were built for the emergency production of cargo vessels and consists of the shops, offices, ways, and all other buildings and structures which formed tthe second largest emergency shipyard in the United States.

It is the plan of the California Shipbuilding Corporation to offer the buildings and structures to enterprising California contractors of character in order that the materials which are now incorporated in the facilities, may be available for use in West Coast construction activities.

The facilities have been divided into moderately sized areas and bids will be sought for the materials in these areas as soon as the structures are vacated and ready for demolition. Some areas are available at the present time and the balance of the areas will become available at more or less regular intervals during the next several months.

The following items are available now at "Calship": piling (treated and untreated), cyclone fencing, durable tools, buildings, tractors, trailers, welding machines lumber, piping, cranes, structural steel, trucks, glass, plumbing fixtures.

It is believed that this offers an opportunity to acquire materials for construction at reasonable prices and fulfills a desire to place these materials on the market as quickly as possible.

Contractors interested in participating in any of this work should communicate with J. M. Warfield California Shipbuilding Corporation, P. O. Box 966, Wilmington, Calif.

GROOVER AND I

STRICTLY PERSONAL

As my Readers know, I have just discovered that a hospital bed is no fun. I think I am back to normal as I am beginning to "protest" various things, and worry about the National Debt.

★ ★ ★

The experience left me with a respect for penicillin and a deep appreciation of the many friends this column has made through the years in its anonymous fashion.

★ ★ ★

There was a gratifying number of messages, phone calls and cards received at the "Builder" office. Rather than a roster of names, I ask you to each accept a generous share of this collective "Thank You".

★ ★ ★

During the lost month-end another date was skated over. January 24 marked the end of the SIXTEENTH year YOUR column has appeared. I say YOUR column because it has been your acceptance of this effort which has maintained its place.

★ ★ ★

Your column is unique in that it is written without credit of by-line. Personal credit or recognition has been carefully avoided. It has been the first objective to make this column "stand on its own feet" without benefit of name, personality, or acquaintance.

★ ★ ★

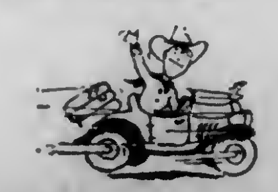
The copy sometimes evokes sharp criticism. This has generally been an honest and healthy difference of opinion.

★ ★ ★

If I can set up a screen against which you project your thoughts, it is not necessary that the pictures match. Anything causing either of us to think is worthwhile.

★ ★ ★

For sixteen years the joy of the doing has been its own reward. To this has been added a full measure of rich compensation through your acceptance and friendly words of encouragement.



UNO Capital Should Be Worthy Of Its High Purpose, AIA Declares

Formation of a nation-wide committee of leading architects, selected to provide the best ability and experience of the American architectural profession, is planned as a contribution toward the development of the new United Nations Capital, it was announced today by The American Institute of Architects.

In making available this professional experience to the U.N.O. officials, the Institute placed special emphasis on the fact that it "is not interested in getting jobs, nor is it interested in what specific site the U.N.O. Committee may select." The proposed committee would serve only in an advisory capacity on the procedure and method calculated to give U.N.O. a worthy setting.

"As representatives of the only national professional organization or architects in the United States," the Institute explained, "we are, however, assiduously interested in seeing that physically the new U.N.O. Capital shall measure up to the objectives of the U.N.O. It is more than likely that the architects here established will set a pattern for future generations.

(Continued on Page Four)

AIA-STRUCTURAL ENGINEERS JOINT DINNER

John S. Bolles, President of the California Council of Architects, announces that the AIA, Northern California Chapter, and the Structural Engineers' Association are planning to hold a joint meeting in March. Further details on this dinner meeting will be announced at a later date. "Members of these organizations," Mr. Bolles said "should not confuse the February 1 announcement in the Daily Pacific Builder of a meeting scheduled for February 8, under the auspices of the Engineers and Architects Association, with the regularly scheduled meeting of either the Structural Engineers, the AIA, State Association of California Architects, or the California Council of Architects. The Engineers and Architects Association has no affiliation with any of the above organizations."

OPA Liberalizes Provisions Of Order No. 133

The Office of Price Administration has liberalized one provision of the order of September 15, 1945, under which individual company price adjustments other than reconversion adjustments were authorized for a wide variety of industries.

The action amended, issued as Supplementary Order No. 133, is for the use of manufacturers of certain commodities covered by regulations that lack as liberal provision for price adjustments, OPA said.

The provision being amended is an eligibility provision, which formerly required an applicant to show that failure to receive a price adjustment would compel him to conduct his entire business operations at a loss, presumably even though his total business operations might comprise several separate plants, companies or corporations.

Under the amendment, effective January 15, 1946, OPA can give individual consideration to hardship claims involving one or more such operating units. In a statement accompanying the action, however, OPA said that adjustments would be considered only "where the applicant affirmatively shows that adjustment of, or failure to adjust, prices of the separate plant will not affect the operations, costs or operating profits of any other business establishment having common ownership or other affiliation."

Under the order as originally written, OPA said, one of several plants or corporations under common ownership occasionally had to be denied relief because — due to unusually profitable operation of the other plants or corporations— the owners could not show over-all loss. In some cases to deny the request has seemed out of line with the general transition adjustment policy, OPA said.

2/4/46 9
FUNDS AWARDED

LOGAN, Cache Co., Utah.—A. B. Paulson, state architect, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $8800 will be furnished the State of Utah for the purpose of assisting in the preparation of plans for the construction of an engineering building for the State Agricultural College at Logan. It is planned that this will be a two-story and basement structure of fireproof construction and containing classrooms, lecture rooms, laboratories, etc., with an approximate area of 42,000 sq. ft. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $249,980, to be furnished by legislative appropriation. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

H. C. Jessen, located at Salt Lake City, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Utah. The architect to make the final plans for the college engineering building has not yet been selected.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available.

2/4/46 9
FUNDS AWARDED

SALINAS, Monterey Co., Calif.—R. D. Case, Supt., Salinas City School District, has received the information from W H. Cheney, division engineer in charge of the Bureau of Community Facilities of Federal Works Agency, Berkeley, that funds to the amount of $12,800 will be furnished the school district for the purpose of assisting in the preparation of plans for constructing additional school facilities at the Sherwood School site, including classrooms, toilets, an auditorium and gymnasium. The plans can now be completed and all arrangements made for construction

The estimated cost of the facilities will be $100,000, to be furnished from available cash, tax receipts and other funds. The funds made available through the Bureau of Community Facilities of Federal Works Agency are to be repaid without interest when the construction begins.

H. E. Devereaux, located at Berkeley, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Northern California, and C. E. Butner, Salinas, is the architect for the school district to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available.

2/4/46 9
FUNDS AWARDED

COUNTY OF HAWAII, T. H.—Clem A. Akina, chairman and executive officer of the County of Hawaii, has received the information from W. H. Cheney, division engineer in charge of the Bureau of Community Facilities of the Federal Works Agency, Berkeley, Calif., that funds to the amount of $13,000 will be furnished the County of Hawaii for the purpose of assisting in the preparation of plans for constructing a new 16-classroom school with office, library, kitchen, cafeteria at Paauilo, and development of improvements to Wailoa River Park, to consist of channel walls, boat basins, swimming pool, roads, walks, landscaping and allied appurtenances. The plans can now be completed and all arrangements made for construction.

The estimated cost of the facilities will be $328,000, to be furnished from funds appropriated by the Territorial Legislature. The funds made available through the Bureau of Community Facilities of the Federal Works Agency are to be repaid without interest when the construction begins.

C. W. Schruth, located at Honolulu, is the engineer for the Bureau of Community Facilities of the Federal Works Agency for Hawaii, and E. L. Wung is the engineer for the County of Hawaii to make the final plans.

Mr. Cheney stated that work on the plans will be started at once so that construction may begin without delay when funds and materials are available.

BIDS OPENED
MARE ISLAND, Solano Co., Calif.—The following bids were submitted February 1 to the officer in charge of construction, Public Works Department, Mare Island, under contract NOy 13295, Spec. No. 17459, for the construction of buildings and services for reserve fleet berthing at the Mare Island Naval Shipyard, Mare Island.

Work involves construction of a pumphouse and steam plant, a generating station, an electrolyte pumphouse, two toilet buildings, an elevated concrete deck, 11 storage tanks, two warehouses and all mechanical and electrical services for reserve fleet berthing:

Barrett & Hilp, 918 Harrison St., San Francisco, (1) $897,000, (2) deduct $11,000, (3) deduct $5000.

Peter Kiewit Sons Co., 442 Post St., San Francisco, (1) $898,647, (2) deduct $14,000, (3) deduct $7000.

Clinton Construction Co., San Francisco, (1) $913,300, (2) deduct $11,000, (3) deduct $5000.

Duncanson-Harrelson Co. & Healy-Tibbitts Construction Co., San Francisco, (1) $956,000, (2) deduct $12,000, (3) deduct $5000.

J. I. Barnes, San Francisco, (1) $965,000, (2) deduct $14,000, (3) deduct $10,000.

34—DAMS, RESERVOIRS & DREDGING

2/4/46 34
TO ASK BIDS
CADDOA, Bent Co., Colo.—The U. S. Engineer Office, Commercial Bldg., and P. O. Box 1538, Albuquerque, N. M., will issue a call for bids about February 1, to be opened approximately 30 days later, for the completion of John Martin Dam on the Arkansas River, approximately 50 miles west of the Kansas-Colorado state line and near Caddoa, Bent Co., Colo. The work will consist of completing the construction of the dam, various phases of the work are partially completed and a portion of the materials and equipment required in the construction will be furnished by the government. The major part of the work consists of completing concrete bridge piers and spillway bridge, steel stairs and gratings, the tainter gates and gate operating machinery equipment, the spillway and dam power and lighting systems and the highway construction; furnishing and installing an automatic elevator, the spillway servicing equipment and a gallery drainage system. Completion time, 365 days.

The work involves:
(1) 4400 cu. yds. concrete;
(2) 788,400 lbs. placing concrete reinforcing steel;
(3) 86,300 lbs. installing structural steel;
(4) 2,517,800 lbs. semi-corrosion resisting steel;
(5) 7000 lbs. installing corrosion resisting steel;
(6) 114,500 lbs. installing steel castings;
(7) 10,100 lbs. installing steel forgings;
(8) 4700 sq. ft. steel gratings;
(9) 32,500 lbs. installing miscellaneous non-ferrous metals;
(10) 2100 lin. ft. molded rubber seals;
(11) 39,500 lbs. installing black steel pipe;
(12) 7500 lbs. installing cast iron pipe;
(13) lump sum, elevator;
(14) lump sum, lighting and telephone power systems;
(15) lump sum, electrical equipment, tainer gate operating machinery;
(16) lump sum, mechanical equipment, tainter gate operating machinery;
(17) spillway surfacing equipment;
(18) 43,800 sq. yds. bituminous road surfacing;
(20) 3300 cu. yds. embankment;
(21) lump sum, grouting gallery drainage system.

Plans and specifications are available from the above office upon deposit of $25.

2/4/46 34
BIDS WANTED
HANKSVILLE, Utah.—Until Feb. 11, 2 P. M. (as previously reported), bids will be received by the Civil Aeronautics Administration, 1500 4th St., Santa Monica, Calif., for drilling of a water well at the intermediate landing field, Hanksville, Utah. The work in general consists of the drilling and casing of a water well, installing pumping equipment, construction of a pumphouse and installation of power cable for the pumping equipment; Proposal No. 6-48-128. Guarantee in the amount of 10% of bid required. Specifications available from the above office. Completion time, 45 days.

The work involves:
(a) lump sum, drill well 50 ft. deep to accommodate 6¼-in. I. D. casing, including moving equipment in and out and setting up;
(b) 150 lin. ft. drill well to accommodate 6¼-in. I. D. casing (b-1) 51 ft. to 200 ft. deep;
200 lin. ft. (b-2) 201 ft. to 400 ft. deep;
200 lin. ft. (b-3) 401 ft. to 600 ft. deep;
(c) 300 lin. ft. case with 6¼1in. I. D. casing, including surface sealing and perforating;
(d) lump sum shoe 6¼-in. casing if ordered;
(e) 300 lin. ft. case with 4½-in. I. D. casing, including perforating;
(f) lump sum shoe 4½-in. I.D. casing if ordered;
(g) lump sum sealing joint between 4½-in. and 6¼-in. casing;
(h) 170 lin. ft. furnish and install 3-in. galvanized down pipe;
(i) 150 lin. ft. furnish and install 1 ⅝-in. hardwood pump rod;
(j) lump sum construct wood pump shed complete with heater and insulation if ordered;
(k) lump sum furnish and install deep well pump and pressure tank system complete with electric motor capable of pumping not less than 10 gallons per minute against a tank pressure of 40 lbs. when the head does not exceed 90 ft.;
(l) 1 each lift 91 ft.-125 ft. (dditive to item K);
(m) 1 each lift 126 ft.-175 ft. (additive to item K);
(n) 1 each lift 176 ft-240 ft. (additive to item K);
(o) 1 each lift 241 ft.-380 ft. (additive to item K);
(p) lump sum install underground power cable and hookup, complete;
(q) lump sum furnish and install 1-in. standard galvanized iron water pipe and fittings, including hydrants, 200 lin. ft., more or less, as shown on drawing 6-C-953-15.

2/4/46 • 34
BIDS OPENED
CASCADE, Idaho. — The following bids were received by the Bureau of Reclamation, Earl Harmon, engineer, Cascade, Idaho, for clearing reservoir site of the Cascade dam project. The work involves clearing timber and brush from 16 tracts varying in size from 40 to 480 acres, located one to eight miles west of Cascade. The Cascade project involves the construction of an earth-fill dam, 90 ft. high and 860 ft. long at the crest, and will provide a storage reservoir for approximately 700,000 acre feet of water.

Low bidder (combined bid), Sched. 1, George Harwood, Cascade, Idaho, $1195.

Schedules 2 to 6, inclusive, 9 to 15, inclusive, Joe Sliska, Cascade, Idaho, $91,970.

Schedule 7, Cecil Dossett, Stibnite, $2000.

Schedule 8, Chet Mathews, Cascade, $2500.

Schedule 16, Taus Charnesk, Leaburg, Ore., $21,700.

Total, $119,365.

Only other bidder: Joe Sliska, Cascade, Idaho, $138,470.

2/4/46 34
TO ASK BIDS
PORTLAND, Ore.—Consulting Engineer C. E. Carter, Spalding Bldg., Portland, is completing plans and bids will be asked about February 20 on Maplewood Water District program, estimated to cost $206,000. The work will include laying approximately 10 miles cast iron water pipe, construct two concrete reservoirs, one 500,000-gallon capacity, the other 250,000-gallon capacity.

Quantities: 5000 ft. of 2-in. pipe, 20,000 ft. of 4-in., 17,000 ft. of 6-in., 5000 ft. of 8-in., 3000 ft. of 10-in. Bids will be received on $206,000 bond issue until 7:30 P. M., February 13, by A. H. Wendland, secretary, 527 Builders' Exchange Bldg.

2/4/46 34
BIDS WANTED
ASTORIA, Ore.—Until a date to be announced shortly, bids will be received by the Public Works Officer, 13th Naval District, Seattle, Wash., for construction of mooring basin for about 500 ships and about 15 piers at Tongue Point, Astoria, Ore. The work includes the construction of a solid fill and sheet piling breakwater which will cross the John Day entrance at a point about 6000 ft. downstream from the mouth of the John Day River; about 15 piers within the breakwater and dredging will be done to 15 to 20 ft. below low water; dredging of new John Day channel in the existing channel some 2000 ft. south of the proposed breakwater and extending northeasterly about 5000 ft. into Cathlamet Bay. All materials dredged to be disposed of in the area between the proposed channel and breakwater.

2/4/46 34
BIDS WANTED
ASTORIA, Ore.—Until February 14, 10 A. M., bids will be received by Capt. G. A. Duncan, officer in charge of construction, Bureau of Yards and Docks, 13th Naval District, Exchange Bldg., Seattle, Wash., for the following work on inactive fleet berthing facilities:

Remove and dispose of two seaplane ramps, dredge 3,000,000 cu. yds. material other than solid rock, dredge and dispose of same into breakwater, remove and dispose of 1500 cu. yds. solid rock, dredging, including construction of breakwater and construction of timber groin.

Specifications obtainable from the above office.

BIDS POSTPONED

WASHINGTON STATE. — Until February 14, 10 A. M. (bids postponed from February 5), bids will be received by the director of highways, Clarence B. Shain, Olympia, Wash., for the construction of the following improvements:

1. Constructing three reinforced concrete highway grade separation structures on primary state highway No. 1 in the vicinity of Kelso in Cowlitz County, at Allen St., Brinyon St. and vicinity of Station 571, Federal Aid Projects Nos. UI-32(11), Unit 1, UI-32(12), Unit 4, and FI-32(6), Unit 1, involving about 2025 cu. yds. of concrete class A, 30 cu. yds. of concrete class B, 360 cu. yds. of concrete class F, 867 lin. ft. of reinforced concrete bridge railing, 595,000 lbs. of steel reinforcing bars, 5000 lin. ft. of timber piling (untreated), 8200 lin. ft. of steel piling and other items.

2. Grading and surfacing on 1.866 miles of primary state highways Nos. 1 and 12, Kelso to Rocky Point and Allen St. connection, in Cowlitz County, Federal Aid Projects Nos. UI-32 (11), Unit 2; UI-32(12, Unit 3; FI-32 (6), Unit 1, and UI-167(12), involving about 29.26 acres of clearing, 16.45 acres of grubbing, 399,370 cu. yds. of common excavation, 28,820 cu. yds. of solid rock excavation, 6205 cu. yds. of common trench excavation, 4140 cu. yds. of structure excavation, 6145 cu. yds. of ballast, 4160 cu. yds. of crushed stone surfacing, 590 lin. ft. of cement concrete curb, 335 sq. yds. of cement concrete sidewalk, 179.21 cu. yds. of concrete class A, 4.0 cu. yds. of concrete class B, 70.24 cu. yds. of concrete class C, 28,626 lbs. of steel reinforcing bars, 1130 lin. ft. of beam guard rail, 4692 lin. ft. of culvert pipe and other items.

3. Grading, paving, constructing reinforced concrete retaining walls and constructing a reinforced concrete T-beam bridge over Pacific Coast Railroad Co. tracks on 0.25 mile of primary state highway No. 5, Maple Valley vicinity in King County, Federal Aid Project No. SG-19(3), and state project, involving about 2520 cu. yds. of unclassified excavation, 1231 sq. yds. of cement concrete pavement, 122,320 lbs. of steel reinforcing bars, 12,200 lbs. of pavement reinforcing, 270 cu. yds. of concrete class A, 80 cu. yds. of concrete class B, 269 cu. yds. of concrete class F, 3800 lbs. of structural steel, 438 lin. ft. of culvert pipe and other items.

4. Grading, surfacing and constructing two steel and concrete bridges over the Soleduck River on 1.774 miles of primary state highway No. 9, Sniders Ranger Station east and west, McDougal Creek revision, in Clallam County, Federal Aid Project No. F-170(10), involving about 18.92 acres of clearing, 11.56 acres of grubbing, 112,030 cu. yds. of common excavation, 3500 cu. yds. of solid rock excavation, 7480 cu. yds. of selected roadway borrow, 4110 cu. yds. of crushed stone surfacing, 490 cu. yds. of crushed cover stone, 340 cu. yds. of crushed mineral aggregate, 3230 lin. ft. of culvert pipe, 744 cu. yds. of concrete class A, 446 cu. yds of concrete class F, 366 cu. yds. of concrete class H, 640 lin. ft. of reinforced concrete bridge railing, 247,000 lbs. of steel reinforcing bars, 568,000 lbs. of structural steel, 5200 lbs. of cast steel and other items.

Federal funds have been allocated for the above construction.

Unskilled labor employed for all federal projects shall be obtained from lists prepared by agencies designated by the United States Employment Service.

All bid proposals shall be accompanied by a bid proposal deposit in cash, certified check or cashier's check in an amount equal to five per cent (5%) of the amount of such bid proposal. Should the successful bidder fail to enter into such contract and furnish a satisfactory performance bond wtihin the time stated in his proposal, the bid proposal deposit shall be forfeited to the State of Washington.

Prequalification of bidders is required. Maps, plans and specifications may be obtained from this office upon written request therefor and payment to the director of highways by cash, certified check, cashier's check or money order the sum of two dollars ($2.00) for each copy of such maps, plans and specifications as a rental for the use of them. Plans will be forward by third class mail.

Informational copies of maps, plans and specifications are on file in the office of the county engineer of the county in which the work is situated, the chapter office of the Associated General Contractors of America at Seattle, Spokane, Tacoma and Portland, and the offices of the district engineers of the Department of Highways where they may be inspected.

UNO Capital

(Continued from Page 1)

"The officers and members of The Board of Directors of the Institute feel that the location of the United Nations Capital in this country is an occasion of profound significance and that the implications will be far-reaching from an architectural point of view. Therefore, the concept of the Capital demands the best thought and the highest skill that the architectural profession, nationally and internationally, can produce. It is the beginning of a long road. The realization of the project will take time, and it is important that we set off on the right foot.

"What we propose to do is to form a nation-wide committee of leading architects, old and young, representing the entire country geographically, and representing the various tastes that manifest themselves in the archiectural profession. This committee would advise and assist U.N.O. officials in obtaining a physical embodiment of the U.N.O. Capital that would accord with the Organization's high ideals.

"The experience of the profession on procedure and other matters would be made available to U.N.O. officials. It may be that the program to the judgment of those in charge of physical aspects of the U.N.O. Capital will decide that an international competition among architects would be desirable. In this event, our proposed committee could be of considerable assistance in setting up, organizing and carrying through the competition from the writing of the admissions."

Pointing out that U.N.O. officials will undoubtedly be besieged with ideas and proposals from many organizations and individuals the Institute said that the advice of the committee should prove especially helpful in shifting such ideas for the U.N.O. officials' further consideration.

"There are doubtless many other questions that will arise, on which the advice and assistance of such a committee should be most helpful," the Institute continued. "It is, of course, our intention that the committee would serve without compensation."

OFFICIAL PROPOSAL

LS 346—Steel Pipe

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the East Bay Municipal Utility District, 512 Sixteenth Street, Room 205, Oakland, California, until 5:30 P. M., Wednesday, February 13, 1946, and at that hour will be opened, for furnishing approximately 1500 linear feet of 16-inch cement lined and coated steel pipe, f.o.b. District Property between 73rd Avenue and 98th Avenue near San Leandro Boulevard, Oakland, California.

Specifications (No. LS 346) may be obtained at room 406 of the office of the District.

DANIEL READ,
Secretary.

PLANS and Speculations

Marin County: The American Legion campaign to secure a veterans memorial building for Mill Valley appears to be a success. The County Board of Supervisors has taken steps to provide a series of nine buildings throughout the county. Tentative site for the MILL VALLEY structure is on Elm near Sydney Street, and will cost an estimated $125,000. Aggregate expenditure for the nine buildings is estimated at $660,000. . . . The Madera Gardens Company has announced plans to construct approximately 650 homes, each with a valuation of $10,000, or more, on a 170-acre tract lying between Corte Madera and Larkspur on the Redwood Highway. . Hil Probert, newly appointed Marin County dealer for the Kaiser-Frazer automobile, has announced a $30,000 building program. Probert also plans to handle a complete line of appliances in his new building, which is to be an addition to his present service station.

oOo

Berkeley: Foundation work has been started for a new $750,000 dry ice plant for Pure Carbonic, Inc. The building will be erected adjoining the firm's present factory at Third and Virginia Streets. . . . The Berkeley Sheet Metal Works, operated by Carlo Johnson, plans expansion of its plant upon moving into a new building at 3045 Green Street, which will be completed in about 90 days.

oOo

Susanville: The Lassen County Board of Supervisors announces that word has been received from the Federal Works Agency that the proposed Feather Lake Highway, northwest from Susanville, has been designated as California Forest Highway Route No. 92, and $400,000 has been set aside for the building of 12 miles. Three miles, costing $150,000, wil be built east from Old Station. Nine miles starting at the junction with Route 36 west of Susanville, will cost $250,000.

oOo

Surveys to determine a new Marin highway approach to the Golden Gate Bridge, to augment the present steep Waldo approach, have been started. State highway engineers are checking on at least two possible routes for the proposed new thoroughfare. The first project will be a survey through Sausalito's hill residential district approx. mid-way between Waldo and the waterfront. The second survey course will be along the water-level course for an intersection with Alexander Avenue at the Fort Baker gate.

oOo

Resumption of Coastwise Cargo Service Planned

Resumption of coastwise cargo service under private operation is planned to be started from California ports about February 16, according to announcement made today by W. Creighton Peet, Jr., Pacific Coast Director of the War Shipping Administration.

Under the proposed plan five companies will operate a fleet of nine ships of the C1-M-AV1 coastal cargo type, between the ports of California and Columbia River and Puget Sound in the general cargo carrying trade.

The proposal calls for two weekly sailings from the California pots to the ports of the Columbia River and two sailings a week from California to the ports of Puget Sound.

The McCormick Steamship Company and the Coastwise Line will be allocated three ships each for the resumption of this service while one ship each will be turned over to the Burns Steamship Company, Griffiths Lines, and the Olympic Steamship Company.

Eight of the ships already selected are the Coastal Rambler, Coastal Cadet, Coastal Telegrapher, Coastal Courser, Coastal Charger, Coastal Buccaneer, Coastal Champion, and the Carrick Bend. The ninth craft will be selected later.

V

MARITIME COMMISSION OPENS OAKLAND SALES OFFICE

The United States Maritime Commission has announced the inauguration of increased service to prospective buyers of government-owned surplus marine materials. Sales and inquiries will still be handled through the Materials Disposal Section, Washington 25, D. C., but service will also be available through a Maritime Settlement Section, whose office is located at 14th and Franklin Streets, Oakland 12.

Selected items of surplus marine materials will be on display at the above-mentioned office and an up-to-the-minute centralized inventory will be maintained in the main offices in Washington to permit all field offices to sell from the total supply.

Report Demonstrates How Communities Can Put Redevelopment Act to Work

The steps by which California communities can take advantage of the Community Redevelopment Act of 1945 are clearly shown in a report released today by the State Reconstruction and Reemploy- ment Commission. The report, issued in the form of a pamphlet entitled "Blighted", points out that it is now possible for local governments to preserve human values and to save untold millions in taxes by "mobilizing resources behind the most dramatic reclamation project of our time."

The report demonstrates how communities may eliminate slum conditions of neglected and wasted sections of cities, put them to new and better uses, aid in raising standards of health and morals and restore physical values to the tax rolls.

Announcing the release of the report, Col. Alexander R. Heron, State Director of Reconstruction & Reemployment, said:

"The Community Redevelopment Act, recommended by the Commission, became a law last year. This legislation permits the reassembling of land ownership in the so-called "blighted areas" of cities and counties for the purpose of redesigning and redevelopment.

"In order to bring about the purposes for which this legislation was passed, the Commission has provided a simplified explanation of the procedure by which citizens of California communities may take the necessary steps to eliminate their blighted areas.

"The assistance which the Commission offers in putting the Community Redevelopment Act to use is a part of its assigned duty to encourage the economic and social improvement of the general public."

The report shows that the Commission, which brought together the groups that drafted the legislation, is taking four major steps to help bring the act into full usefulness. These are:

1. Assistance in carrying thru the California courts the test case to which the new basic laws are subjected.
2. Investigation of the details of financing urban redevelopment projects through a group of financial authorities.
3. Formation of "redevelopment teams", composed of persons who are experts in city planning, construction, finance and other fields connected with community rebuilding. These "teams" will be available, without cost, to consult with citizens interested in using the Community Redevelopment Act.
4. Distribution of the pamphlet "Blighted", which tells about the new law and how to use it.

The pamphlet singles out examples of how blight affects a modern community by citing instances in San Francisco, Los Angeles, San Diego, Lodi, Huntington Beach, Sacramento and Upland. These cities assisted the Commission by supplying data which shows how the use of the new law may contribute to both the human and financial welfare of a community.

It is pointed out that almost every other city in California shares with these cities the problems which can be solved by putting the Community Redevedopment Act into practical use.

It is shown that the governmental functions of communities may be put to use in assisting private enterprise to carry out redevelopment projects.

Did You Know That . . .

Jack Bell has returned to San Francisco to represent the Universal Atlas Cement Company on the Pacific Coast. Universal Atlas has recently opened an office at 714 West Olympic Blvd. in Los Angeles and has renewed their membership in the San Francisco Builders' Exchange.

-O-

Architect S. Heiman announces that since January 1, Ralph N. Pollack, AIA, has been associated with him in the practice of architecture at 605 Market Street, San Francisco.

-O-

H. Bertram, heating and plumbing contractor, has announced a new business location at 330 Fifth Street, San Francisco 7. Telephone DOuglas 3632. A modern show room has been added and a twenty-four-hour emergency service is maintained.

Plan Nob Hill Underground Garage

As one solution to the automobile parking problem in San Francisco, preliminary studies are now being developed for an underground garage below Huntington Square.

Mrs. J. A. Swanson, president of the Nob Hill Civic Club, points out that Nob Hill and its immediate vicinity is the most highly congested and closely populated section of the city. One apartment house after another line the streets and within a three-block radius of Huntington Square are living quarters for 7000 families. For this number of living units there is approximately accommodations for only 850 automobiles. This lack of garage space aggravates the problem so that many of the residents, who would like to own cars deprive themselves of this convenience, while those who own cars are forced to park wherever they can at all hours of the day and night.

Engaged in the preparation of studies for the proposed underground garage is PLANCO, a local firm of engineering, planning and construction consultants, located at 255 California Street, with branch offices at 37 Wall Street, New York. Leonard S. Mosias, president and managing director, outlines the project as including a sub-surface garage under Huntington Square, 12 stories in depth, which would be about three times the size of Union Square Garage and accommodate approximately 6000 automobiles. "The subterranean structure", says Mr. Mosias, "with facilities for all kinds of shops and services, will rival Radio City in New York. No longer will one have the problem of finding parking space within easy walking distance of such famous hotels as the Fairmont, Mark Hopkins and Huntington. By using any one of the proposed northeast, south or west subway entrances, one will be able to drive into the underground parking area. After leaving the car to be parked by an attendant, high-speed elevators will whisk one up to the street level or an underground entrance with access to the hotels on top of Nob Hill". The project is estimated to cost $20,000,000, and the proposed subway entrances are tentatively located on the west at California and Hyde Streets; on the south at Bush and Mason Sts.; on the east through St. Mary's Park, and on the north in the vicinity of Clay and Mason Streets.

V

ENGINEERS IN FIRST POSTWAR CONFERENCE

The Pacific Coast section of the Society for the Promotion of Engineering Education will meet on the Berkeley campus of the University of California on February 22 and 23. In this meeting, the first since the beginning of the war, papers on the effects of the war and war research upon engineering education will be presented, according to Chairman Clement T. Wiskocil, professor of civil engineering at the University.

Faculty and staff members from colleges and universities in Arizona, California, Nevada, and Utah and engineers from Pacific Coast industries, will participate in the discussions.

GROOVER AND I

WHAT IS "NOTHING"?

When the Corning Glass Company cast the 200-inch reflector block for the Mt. Palomar Observatory, I expressed the wish that I might live until this telescope was in action and bringing to the vision of man the secrets of unexplored space.

★ ★ ★

(Hitler and his gang clipped about five years off the schedule but I may yet get my wish.)

★ ★ ★

When we remember that our sun is only about eight light-minutes away, it is necessary to take a deep breath when you think of distances involving hundreds and thousands of light-years.

★ ★ ★

It is man's nature to want to know the answers—to add a column of figures and write down the total. If space is infinite, he wants to know the size of infinity.

★ ★ ★

On the other hand, if the Curvature of Light Theory is correct and space is finite, then additional questions present themselves:

★ ★ ★

If space is finite what is on the other side of space? Nothing?

★ ★ ★

What is "nothingness', and how far does it extend? What begins after "nothing" ends?

★ ★ ★

When you come to the edge, will you drop off? How far will you drop? And, on what will you land? How thick is it, and on what does it rest?

★ ★ ★

Can an astronomer be an atheist?

Surplus Drafting Equipment Offered For Sale To Agencies

Quantities of architectural and engineering equipment, recently declared surplus by the armed forces, are at present being offered for sale to governmental agencies, veterans and tax exempt educational institutions, the War Assets Corporation announced today.

The disposal is being conducted through the regional consumer goods offices maintained by WAC in 11 cities. Purchasing agents of federal, state and local governmental offices and non-profit institutions who are interested in purchasing this scarce merchandise should contact their regional office for the sales date.

Non-profit institutions engaged in public health and educational work will be allowed a 40 per cent discount on needed items as provided by law.

The surplus includes 2,000 proportional dividers, 7¾-inch with case; 33,000 drawing boards including those folding or adjustable trestles; 80,000 rolls of tracing cloth, ink type, in standard size rolls; 47,000 architects and engineers triangular boxwood scales; and 64,000 rolls, 26,000 pads and 2,000 gross loose sheets of tracing paper.

Consumer goods regional offices are located in the following western cities:

1030 15th Street, Denver 2, Colo.
30 Van Ness Ave., San Francisco.
2005 Fifth Ave., Seattle 1, Wash.

V

SOMETHING TO THINK ABOUT

Total American casualties during the World War from December 7, 1941 to June 1, 1945, were 1,012,000. The traffic toll of motor vehicle accidents during the corresponding period was 3,200,000. That's something to think about.

2/5/46 • • 31
LOW BIDDER
LARAMIE, Wyo.—Allred & Enix Constr. Co., Papa, Texas, submitted low bid to the city council of the City of Laramie, Wyo., January 29, for construction of improvements to water supply system at Laramie; estimated cost, $750,000. Plans and specifications were prepared by R. J. Tipton & Associates, 602 Insurance Bldg., Denver.

The work involves:

(1) 108,000 cu. yds. pipe and structural excavation;
(2) 94,000 cu. yds. of pipe backfill;
(3) 100,000 lin. ft. of either 20-in. pre-stressed or modified prestressed concrete pipe, or
(4) 100,000 lin. ft. of 20-in. welded steel pipe, or
(5) 100,000 lin. ft. 20-in. asbestos cement pressure pipe;
(6) 8600 lin. ft. of either 36-in. reinforced concrete pipe, or
(7) 8600 lin. ft. 36-in. welded steel pipe, or
(8) 8600 lin. ft. of 36-in. asbestos cement pressure pipe;
(9) 1180 lin. ft. 20-in. class C-150 cast iron pipe;
(10) 125 lin. ft. 16-in. same;
(11) 285 lin. ft. 12-in. same;
(12) 380 lin. ft. 8-in. same;
(13) 290 lin. ft. 4-in. same;
(14) concrete intake structure;
(15) concrete air valve wells;
(16) blow off wells and sectionalizing valve wells.

2/5/46 32
FRESNO, Fresno Co., Calif.—The City of Fresno has filed an application with the Department of Public Health, Wilton L. Halverson, M. D., director, Phelan Bldg., San Francisco, for a permit to construct a primary stage sewage treatment plant on the present sewer farm located on the south side of Jensen Ave. and between Cornelia and Grant Aves.; also to acquire approximately 1260 acres of additional land for the disposal of effluent from the proposed plant. The additional land lies immediately south and southwest of the present sewer farm.
The method of treatment proposed is the use of mechanically cleaned clarifiers and two-stage covered sludge digesters. Raw sewage is to be chlorinated for odor control. Digested sludge is to be dried on beds and effluent from the plant is to be disposed of by irrigation, ponding and land filtration. Preliminary reports were prepared by Engineers Koebig & Koebig, Rowan Bldg., Los Angeles, and may be seen at the office of the Bureau of Sanitary Engineering, 15 Shattuck Square, Berkeley, Calif.

BIDS WANTED

LOS ANGELES COUNTY, Calif.—Until February 26, 10 A. M., new bids will be received by the Los Angeles County Board of Supervisors, 501 Hall of Records, Los Angeles, for the construction of a reinforced concrete and corrugated metal pipe arch storm drain on Arbor Rd., south of Bellflower and E. Clark Ave., a distance of 500 lin. ft. Cash contract No. 575. Plans and specifications were prepared by O. F. Cooley, county road commissioner, Hall of Records, Los Angeles.

The work involves:
(1) 20 lin. ft. corrugated metal pipe arch (25¾x15½ inches);
(2) 1 standard catchbasin No. 2, including curb and gutter;
(3) 2 standard storm drain manholes No. 4;
(4) 1 standard junction chamber No. 5;
(5) reinforced concrete box drain, complete.

Paul Vukich Construction Co. submitted low bid January 22 at $7440. All bids were rejected because of the irregularity of one of the bids and because all bids were considered as being excessively over the estimate.

COMPLETE BIDS

ALAMOGORDO, N. M.—As previously reported, Jones Bros. Construction Co., Albuquerque, N. M., at $84,164.24, submitted low bid to the City of Alamogordo, N. M., office of the city clerk, City Hall, Alamogordo, N. M., for the construction of an earth-fill dam and water storage reservoir at Alamogordo. Plans were prepared by Ashley C. Classen & Associates, consulting engineer, 412 Martin Bldg., El Paso, Texas.

(1) 126,950 cu. yds. embankment;
(2) 3400 M gallons sprinkling;
(3) 1100 hours rolling;
(4) 5760 cu. yds. riprap;
(5) 2720 cu. yds. gravel blanket;
(6) 2966 cu. yds. gravel toe drain;
(7) 5400 cu. yds. channel excavation;
(8) 46 cu. yds. class A concrete;
(9) 3600 lbs. reinforcing steel;
(10) 250 lbs. structural steel;
(11) 176 ft. 18-in. cast iron pipe;
(12) 8000 lbs. cast iron fittings;
(13) 1 18-in. gate valve;
(14) 2 12-in. gate vales;
(15) 1 Sparling meter;
(16) 1675 reinforced concrete pipe;
(17) 131 acres clearing and grubbing;
(18) 2.1 miles fence.

Complete bids were:

Jones Bros. Construction Co., Albuquerque, N. M., (1) $.19, (2) $1.50, (3) $6.50, (4) $3.90, (5) $.50, (6) $.85, (7) $.155, (8) $75, (9) $.12, (10) $.20, (11) $8.75, (12) $.19, (13) $583.09, (14) $330.17, (15) $626.38, (16) $4.90, (17) $20, (18) $580.80; total bid, $84,164.24.

Frank P. Llewellyn, Alamogordo, N. M., (1) $.27, (2) $1.25, (3) $6.50, (4) $5.65, (5) $1.35, (6) $1.25, (7) $.20, (8) $37.50, (9) $.15, (10) $.30, (11) $7.50, (12) $.12, (13) $427.35, (14) $250, (15) $540, (16) $.47, (17) $25, (18) $792; total bid, $106,866.55.

Henry Thygesen & Co., Albuquerque, N. M., (1) $.25, (2) $2, (3) $5, (4) $5.50, (5) $2.50, (6) $2, (7) $.30, (8) $50, (9) $.10, (10) $.50, (11) $12, (12) $.15, (13) $650, (14) $450, (15) $650, (16) $4, (17) $20, (18) $550; total bid, $108,839.

Lee Moor Constructoin Co., El Paso, Texas, (1) $.26, (2) $.90, (3) $6, (4) $6.50, (5) $1.60, (6) $1.40, (7) $.25, (8) $54, (9) $.15, (10) $.40, (11) $8.50, (12) $.15, (13) $600, (14) $475, (15) $575, (16) $5.75, (17) $12, (18) $750; total bid, $110,683.25.

Hugh McMillan, El Paso, Texas, (1) $.40, (2) $1.50, (3) $8, (4) $6, (5) $2, (6) $1.50, (7) $.35, (8) $40, (9) $.10, (10) $.25, (11) $8.50, (12) $.15, (13) $500, (14) $300, (15) $750, (16) $5.50, (17) $25, (18) $850; total bid, $132,098.50.

Hayner & Burn, Las Cruces, N. M., (1) $.30, (2) $2, (3) $6, (4) $10, (5) $1.25, (6) $1.25, (7) $.50, (8) $60, (9) $.10, (10) $.50, (11) $8, (12) $.12, (13) $600, (14) $300, (15) $500, (16) $5, (17) $20, (18) $528; total bid, $138,308.05.

2/5/46 34
TO ASK BIDS

FORT GIBSON DAM PROJECT, Oklahoma.—The U. S. District Engineer Office, P. O. Box 61, Tulsa, Okla., has postponed the issuance of a call for bids from January 22 to March 1 and bids will be received about 30 days later for furnishing labor and materials for the construction of the Fort Gibson dam on the Grand (Neosho) River, approximately five miles north of Fort Gibson, Okla.; Announcement No. 46-3. The work in general will consist of the construction of a gravity type concrete dam, with a short section of rolled earthfill at one abutment, and with a powerhouse and an elevator and stair tower downstream and adjacent to a non-overflow intake section of the concrete dam on the left bank of the existing river channel. A masonry service building will also be constructed on the right abutment and other miscellaneous work, exclusive of the powerhouse superstructure and certain other facilities appurtenant to the power plant; completion time, 800 days. Plans and specifications available from the above office upon deposit of $35 and will be on exhibit at the U. S. District Engineer Office, 751 S. Figueroa St., Los Angeles.

2/5/46 34
TO ASK BIDS

WISTER, Okla.—The U. S. District Engineer Office, P. O. Box 61, Tulsa, Okla., will issue a call for bids shortly scheduled for opening about February 25 for the construction of the Wister Dam on the Poteau River, near Wister, Okla.; Announcement 46-4. The work will consist of a rolled earthfill dam, reinforced concrete outlet works and reinforced concrete spillway. The work will also include construction of temporary frame buildings for use by the government during construction work; 800 calendar days for completion.

The work involves:
(1) 120,000 cu. yds. stripping;
(2) 100,000 cu. yds. excavation, common;
(3) 120,000 cu. yds. excavation, rock;
(4) 650,000 cu. yds. spillway excavation, unclassified;
(5) 1,900,000 cu. yds. excavation, borrow;
(6) 2,250,000 cu. yds. fill;
(7) 20,000 cu. yds. sand and gravel drains;
(8) 50,000 cu. yds. sand and gravel under riprap;
(9) 25,000 cu. yds. rock spalls;
(10) 130,000 cu. yds. dumped riprap;
(11) 40,000 sq. yds. sodding;
(12) 1,700,000 lbs. reinforcing steel;
(13) 35,000 cu. yds. concrete;
(14) 50,000 bbls. cement;
(15) 1800 lbs. corrosion resisting steel water stops;
(16) 1000 lbs. copper water stops;
(17) 60,000 lbs. miscellaneous metal work;
(18) 47,000 lbs. miscellaneous cast iron pipe;
(19) 45,000 lbs. miscellaneous black steel pipe;
(20) 20,000 lbs. miscellaneous wrought iron pipe;
(21) lump sum, 6 tractor type sluice gates and 1 emergency gate, together with condut lining and gate hoisting equipment;
(22) lump sum, 1 traveling crane;
(23) lump sum, 1 standby electric generator unit;
(24) 8000 lbs. rigid metal conduit;
(25) lump sum, electric wiring, fixtures and equipment;
(26) 260 lin. ft. 24-inch corrugated metal pipe;
(27) 18,500 lin. ft. highway guard rail;
(28) 4500 lin. ft. drilling grout holes;
(29) 1000 bags cement, pressure grouting;
(30) 1000 lin. ft. perforated vitrified clay pipe, 6-in.;
(31) lump sum, construction of feld buildings.

Specifications available from the above office upon deposit of $35. Plans and specifications will be on file for examination at the office of Figueroa St., Los Angeles. the U. S. District Engineer, 751 S.

37— RAILROADS, SUBWAYS & TUNNELS

2/5/46 • 37
BIDS WANTED

COLORADO-BIG THOMPSON PROJECT, Colorado.—Until Feb. 26, 10 A. M., bids will be received by the Bureau of Reclamation, Denver, Colo., for the construction of excavation and concrete lining, Rams Horn and Prospect Mountain tunnels, Power Canal No. 1, Colorado-Big Thompson Project, Colorado; Specification No. 1167. The work is situated from one mile south to four miles southwest of Estes Park, Colo.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation; E. B. Debler, regional director, 501 Continental Oil Bldg., Denver, Colo.; C. H. Howell, project engineer, Estes Park, Colo.; Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C., without charge to prospective bidders; to others, $1.75 per copy, not returnmable; guarantee of 10% to accompany bids; 500 calendar days for completion. Prospective bidders desiring to visit the site of the work should communicate with the project engineer.

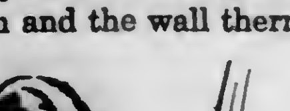
The principal items of work and the estimated quantities involved are as follows:

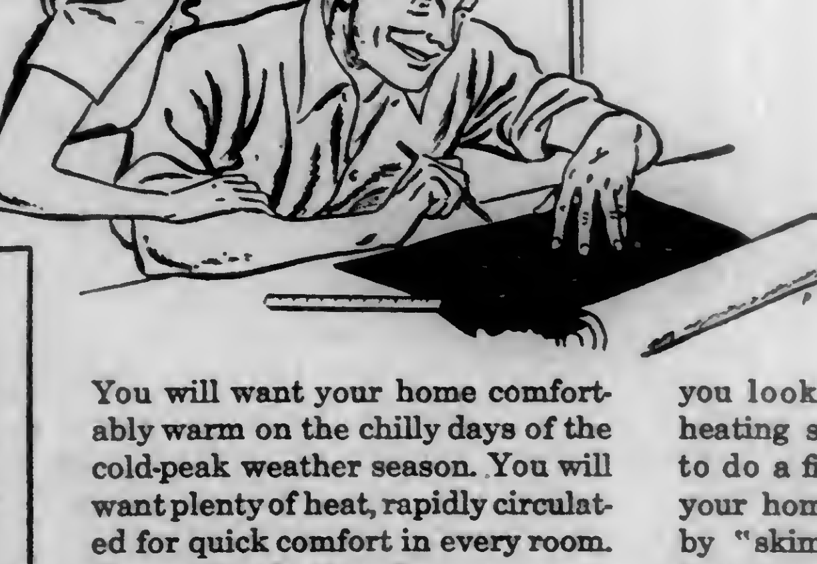
Schedule No. 1
Rams Horn Tunnel

(1) 1500 cu. yds. excavation, common, for open cut;
(2) 1500 cu. yds. excavation, rock, for open cut;
(3) 31,000 cu. yds. excavation, all classes in tunnel;
(4) 50 cu. yds. excavation, common, for tunnel outlet drain;
(5) 50 cu. yds. excavation, rock, for tunnel outlet drain;
(6) 100 cu. yds. backfill in tunnel outlet drain;
(7) furnishing and installing 290,000 lbs. of permanent steel tunnel supports;
(8) furnishing and erecting 125 M ft. b.m. of permanent timbering in tunnel;
(9) constructing 6900 lin. ft. of 6-in. diameter tunnel drain;
(10) laying 100 lin. ft. 6-in. diameter sewer pipe with cemented joints;
(11) 100 cu. yds. pneumatically applied mortar;
(12) 7160 cu. yds. concrete in tunnel lining;
(13) 47 cu. yds. concrete in portal structures and transitions;
(14) placing 6700 lbs. reinforcement bars;
(15) drilling 1000 lin. ft. feeler and pilot holes ahead of tunnel excavation;
(16) drilling 500 lin. ft. grout holes not more than 10 ft. deep;
(17) placing 500 lbs. grout pipe and connections;
(18) 1000 cu. ft. pressure grouting.

Schedule No. 2
Prospect Mountain Tunnel

(19) 1200 cu. yds. excavation, common, in inlet portal open cut;
(20) 500 cu. yds. excavation, rock, in inlet portal open cut;
(21) 2640 cu. yds. excavation, common, in outlet portal and surge tank open cut;
(22) 4200 cu. yds. excavation, rock, in outlet portal and surge tank open cut;
(23) 37,000 cu. yds. excavation, all classes, in tunnel;
(24) 7360 cu. yds. excavation, all classes, in surge tank shaft;
(25) 50 cu. yds. excavation, common, for tunnel outlet drain;
(26) 50 cu. yds. excavation, rock, for tunnel outlet drain;
(27) 100 cu. yds. backfill in tunnel outlet drain;
(28) furnishing and installing 508,000 lbs. of permanent steel tunnel supports;
(29) furnishing and erecting 210 M ft b.m. of permanent timbering in tunnel;
(30) constructing 5650 lin. ft. of 6-in. diameter tunnel drain;
(31) laying 100 lin. ft 6-in. diameter sewer pipe with cemented joints;
(32) 100 cu. yds. pneumatically applied mortar;
(33) 11,300 cu. yds. concrete in tunnel lining;
(34) 1040 cu. yds. concrete in surge tank shaft lining;
(35) 540 cu. yds. concrete in portal structures, transitions and surge tank roof;
(36) 1,454,000 lbs. placing reinforcement bars;
(37) drilling 1000 lin. ft. of feeler and pilot holes ahead of tunnel excavations;
(38) drilling 500 lin. ft. of grout holes more than 10 ft. deep;
(39) placing 600 lbs. of grout pipe and connections;
(40) 1000 cu. ft. of pressure grouting;
(41) installing 2000 lbs. of miscellaneous metal work.





Planning to Build this Summer?

When you are making plans for a new home or for the remodelling of your present home, be "fussy" about the capacity of your gas furnace, and the location of the heat outlets, the cold-air return and the wall thermostat. This is most important.

P. G. & E. RECOMMENDS

If you are planning a new home or modernizing your present one and you need help on house heating, come in and consult with one of our gas heating specialists. He will work with you, your architect and heating contractor to help you get a heating installation tailored to your home and your pocketbook. Use this Free Service. It will save you time, worry and money.

You will want your home comfortably warm on the chilly days of the cold-peak weather season. You will want plenty of heat, rapidly circulated for quick comfort in every room. You will get this from an automatic, forced-air Gas Heating System that is properly installed, and when you use such a heating plant, you will save money every heating hour.

When cost estimates come in and you look them over, choose the heating system that is engineered to do a first-class job of heating your home. What you might save by "skimping", you will pay for later on with less heating comfort, quickly worn-out equipment and higher fuel bills.

Remember, a furnace will produce only so much heat; it cannot be forced beyond the capacity its builders gave it.

BIDS WANTED

MONTEREY COUNTY, Calif.—Until March 6, 2 P. M., bids will be received by G. T. McCoy, state highway engineer, Public Works Bldg., Sacramento, for about one and nine-tenths miles in length to be graded, paved with asphaltic concrete on cement-treated base and on existing surfacing and plan mix surfacing to be placed on the shoulders, between two miles south of Salinas and Salinas in Monterey County.

The work involves:
(1) 800 cu. yds. remove concrete;
(2) 100 sta. clearing and grubbing;
(3) 35,000 cu. yds. roadway excavation;
(5) 100 cu. yds. ditch and channel excavation;
(6) 40,000 sq. yds. compact original ground;
(7) 24,500 cu. yds. imported borrow;
(8) develop water supply and furnish water equipment;
(9) 2300 M gallons apply water;
(10) 100 sta. finish roadway;
(11) 33 tons liquid asphalt SC-2 prime coat;
(12) 95 tons asphaltic emulsion paint binder, curing seal and seal coats;
(13) 200 tons screenings seal coat;
(14) 4700 tons minimum aggregate plant mix surfacing;
(15) 250 tons liquid asphaltic SC-5 or SC-6 plant mix surfacing;
(16) 2700 sq. ft. place plant mix surfacing in ditches;
(17) 13,900 tons minimum aggregate cement-treated base;
(18) 5900 bbls. portland cement cement-treated base;
(19) 5200 tons asphaltic concrete leveling course;
(20) 4900 tons asphaltic concrete, type B surfacing;
(21) 300 lin. ft. raised bars;
(22) 22 cu. yds. class A portland cement concrete structures;
(23) 900 lbs. bar reinforcing steel;
(24) 100 lbs. steel nagles curb inlets;
(25) 620 cu. yds. portland cement concrete curbs and gutters;
(26) 56 each ruby reflectors;
(27) 26 each monuments;
(28) 52 each culvert markers, project markers and guide posts;
(29) 490 lin. ft. move and reconstruct existing guard railing;
(30) 0.4 mile remove and reconstruct existing property fences;
(31) 450 lin. ft. 18-in. CMP, 16-gage;
(32) 44 lin. ft. 24-in. CMP, 14-gage;
(33) 120 lin. ft. 36-in. CMP, 12-gage;
(34) 190 lin. ft. salvage existing pipe culverts;
(35) 130 lin. ft. relay salvaged CMP.

Specifications obtainable from the above office.

BIDS WANTED

ALAMEDA COUNTY, Calif.—Until March 6, 2 P. M., bids will be received by G. T. McCoy, state highway engineer, Public Works Bldg., Sacramento, for about eight and three-tenths miles in length shoulders to be widened with imported borrow and surfaced with plant mix surfacing and penetration treatment between Warm Springs and Mission San Jose, and between Warm Springs and Centerville, in Alameda County.

The work involves:
(1) 3 cu. yds. remove concrete;
(2) 325 cu. yds. structural excavation;
(3) 15,550 tons imported borrow;
(4) develop water supply and furnish water equipment;
(5) 290 M gallons apply water;
(6) 830 tons crusher run base;
(7) 68 tons liquid asphalt SC-1 penetration treatment;
(8) 32 tons liquid asphalt SC-3 penetration treatment;
(9) 410 tons sand seal coat and penetration treatment;
(10) 24 tons asphaltic emulsion paint binder and seal coat;
(11) 1900 tons plant mix surfacing;
(12) 5 cu. yds. class A portland cement concrete structures;
(13) 210 lbs. bar reinforcing steel;
(14) 460 lin. ft. metal plant guard railing;
(15) 120 each move and reset existing culvert markers and guide posts;
(16) 14 lin. ft. 8-in. CMP, 16-gage;
(17) 8 lin. ft. 10-in. CMP, 16-gage;
(18) 56 lin. ft. 12-in. CMP, 16-gage;
(19) 22 lin. ft. 18-in. CMP, 16-gage;
(20) 1300 lin. ft. 11¾x17¼-in. in CMP arch, 16-gage;
(21) 2 each remove and reset headwalls;
(22) 120 lin. ft. salvage existing spillway assembly downdrains;
(23) 120 lin. ft. relay salvage spillwa yassembly downdrains;
(24) 8 each salvage spillway assemblies;
(25) 8 each install salvaged spillway assemblies.

Specifications obtainable from the above office.

BIDS WANTED

LOS ANGELES COUNTY, Calif.—Until March 7, 2 P. M., bids wil lbe received by G. T. McCoy, state highway engineer, 808 State Bldg., Los Angeles, for about one and one-tenth miles in length to be graded and paved with asphaltic concrete on cement treated base on Rosemead Blvd., between Huntington Blvd. and Colorado St. (VIII-L.A-168-C), in Los Angeles County.

The work involves:
(1) 580 cu. yds. remove concrete;
(2) 57 sta. clearing and grubbing;
(3) 21,000 cu. yds. roadway excavation;
(4) 80 cu. yds. structural excavation;
(5) develop water supply and furnish water equipment;
(6) 600 M gallons apply water;
(7) 57 sta. finish roadway;
(8) 40,500 sq. yds. cement treated subbase road mix;
(9) 9100 tons minimum aggregate cement treated base, plant mix;
(10) 5400 bbls. portland cement cement-treated subbase and base;
(11) 102 tons asphaltic emulsion curing seal paint binder and seal coat;
(12) 10,350 tons asphaltic concrete pavement;
(13) 28 cu. yds. class A portland cement concrete structures;
(14) 1100 cu. yds. class A portland cement concrete curbs, gutters, sidewalks and driveways;
(15) 1600 lbs. bar reinforcing steel;
(16) 7000 lbs. steel rail assemblies;
(17) 2260 lin. ft. ¾-in. galvanized pipe sprinkling system;
(18) 2780 lin. ft. 1-in. galvanized pipe spring system;
(19) 150 lin. ft. 1¼-in. galvanized pipe sprinkling system;
(20) 500 lin. ft. 1½-in galvanized pipe sprinkling system;
(21) 3500 lin. ft. 2-in. galvanized pipe sprinkling system;
(22) 30 each turning union assemblies;
(23) traffic warning system;
(24) 34,000 each kikuyu grass cuttings.

Specifications obtainable from the above office

4 MILES GRADING, DRAINING, PAVING, ARIZONA

ARIZONA STATE HIGHWAY.—Fisher Contracting Co, 516 S 7th St., Phoenix, Ariz., at $448,211.34 submitted low bid to the Arizona State Highway Commission, 1739 W Jackson St., Phoenix, Jan. 30, for the improvement of the Flagstaff-Winslow Highway, FI 84 (4), Schedule 1, AFE 6670. The work involves four miles of grading, draining and paving, beginning about three miles east of Flagstaff and extending easterly.

Work involves:
(1) 129,670 c.y. rdwy. excav., unclass
(2) 1000 c.y. overbreakage;
(3) 1000 c.y. slides;
(4) 2415 c.y. drainage excav., unclas.
(5) 1300 l.f. grader ditches;
(6) 255 c.y. struc. excav., unclass.;
(7) 150,308 sta. yds. overhaul;
(8) 6935 c.y. mile haul;
(9) 1000 tons imported borrow;
(10) 38,900 tons aggregate base;
(11) 6600 c.y. stripping pits;
(12) 6560 M. gals. sprinkling;
(13) 2330 hours rolling;
(14) 54,405 sq. yds. concrete pave.;
(15) 86 c.y. Class A concrete, includ. cement;
(16) 6372 lbs. reinf. steel (bars);
(17) 340 l.f. 18-in. CMP (except excavation);
(18) 394 l.f. 24-inch do;
(19) 204 l.f. 30-inch do;
(20) 124 l.f. 36-inch do;
(21) 322 l.f. 42-inch do;
(22) 3 each cattle guards, two-unit (except excav. and concrete);
(23) deleted;
(24) 4940 l.f. reconstructing fence;
(25) 1 each resetting steel gate;
(26) 3840 l.f. road guard;
(27) 118 each guide posts;
(28) 33 each right of way markers, type E;
(29) 4994 tons mineral aggregate;
(30) 525 tons road oil, SC-4 (road mix);
(31) 3.864 miles processing road mix;
(32) 453 tons screenings;
(33) 61 tons emulsified asphalt, Class A (seal coat);
(34) 591 sq. yds. placing intersections.

Total bids were:
(A) Fisher Contr. Co., $448,211.34.
(B) Wallace & Wallace, $449,795.31.
(C) Bowen - McLoughlin and L. G. Lynch, $452,351.77.
(D) Packard Contr. Co., $460,448.53.
(E) Western Contr. Co., $463,266.09.
(F) Arizona Sand & Rock Co., $469,654.95.
(G) W. E Orr, $489,772.92.

7 MILES GRADING, DRAINING, PAVING, ARIZONA

ARIZONA STATE HIGHWAY.—Tanner Constr. Co., 731 N Avenue 19, Phoenix, Ariz., at $824,994.03 submitted low bid to the Arizona State Highway Commission, 1739 W Jackson St., Phoenix, Jan. 30, for the improvement of Flagstaff - Winslow Highway, FI 84 (4), Schedule 2, AFE 6670. The work involves 7 miles of grading, draining and paving, beginning about 7½ miles east of Flagstaff, and extending easterly.

Work involves:
(1) 210,714 c.y. rdwy. excav., unclass.
(2) 10,000 c.y. overbreakage;
(3) 10,000 c.y. slides;
(4) 1595 c.y. drainage excav., unclassified;
(5) 7100 l.f. grader ditches;
(6) 1210 c.y. struc. excav., unclass.;
(7) 367,940 sta. yd. overhaul;
(8) 4463 c.y. mi. haul;
(9) 6950 tons imported borrow;
(10) 66,724 tons aggregate base;
(11) 17,000 c.y. stripping pits;
(12) 7321 m. gals. sprinkling;
(13) 2831 hours rolling;
(14) 99,505 sq. yds. conc. pave.;
(15) 1034 c.y. Class A conc., includ. cement;
(16) 170 c.y. Class D do;
(17) 127.528 lbs. reinf. steel bars;
(18) 195,370 lbs. structural steel;
(19) 427 l.f. struc. steel handrail;
(20) 1540 l.f. steel pile shells;
(21) 44 each driving pile shells;
(22) 80 l.f. steel test pile shells;
23) 2 each driving do;
(24) 1620 l.f. filling steel pile shells conc. and reinf. steel;
(25) 2 each loading tests for piles;
(26) 224 l.f. 18-in. corru. metal pipe;
(27) 292 l.f. 24-inch do;
(28) 770 l.f. 36-inch do;
(29) 5 each cattle guards (2 unit);
(33) 7275 l.f. road guard;
(34) 214 each guide posts;
(35) 66 each R/W markers, type E;
(36) 9407 tons minerall aggregate;
(37) 800 tons road oil, SC-4 (for road mix);
(38) 7.067 miles processing road mix;
(39) 1054 tons screenings;
(40) 142 tons emulsified asph. (Class A) for seal coat;
(41) 1222 sq. yds. placing intersections.

Total bids were:
(A) Tanner Constr .Co.. $824,994.03.

PLANS and Speculations

Oakland: The City Council has approved an agreement budgeting $50,000 from the gas tax fund for surveys, plans and purchase of needed land to make 42nd Avenue a part of the city's proposed freeway system.

oOo

Sacramento: If the bili appropriating $90,000,000 to the cities and counties of California becomes a fact, San Francisco's share will be $8,409,959. Other bay area and northern California county appropriations, including the cities, are as follows: Alameda, $6,358,586; Contra Costa, $1,212,255; Solano, $687000; Marin, $675350; Napa, $410,530; Sonoma, $890,382; San Mateo, $1,397,719; Santa Clara, $2-082,440; Sacramento, $2,087,197; Yolo $463,296. Los Angeles county and its cities will get more than $33,000,000.

oOo

Watsonville: A new theatre is scheduled for construction as soon as materials and conditions allow, W. H. Lollier, Fox West Coast theatre real estate representative, has announced. Lollier said his firm would erect a building on the corner of Hyde Street, Main Street and Western Drive. Cost is estimated at $250,000. The new cinema, to be named the "Hyde Park Theatre" will have seating for 1200.

oOo

San Leandro: Ground was broken last Sunday for a new church at the corner of Lewis Avenue and MacArthur Boulevard. The new edifice is being erected by the San Leandro Church of Christ at an approximate cost of $20,000. Pastor is Charles A. Polley. . . . Approval has been given an application for re-zoning made by Dr. C. L. Hoffman, San Leandro dentist, to permit construction by him of a medical-dental building on the southwest corner of Bancroft Ave. and Dowling Blvd. . . Construction of a $250,000 steel fabrication plant has been started at Bayshore Blvd. and Davis Street for the Osborne Engineering Co. First unit is an office building. A modern plant building of 50,000 square feet will get underway shortly.

oOo

Furniture To Be Manufactured By Oakland Plant

Increasing importance of the San Francisco Bay Area is a furniture production center is reflected in an announcement made by the industrial departments of the Oakland and San Francisco Chambers of Commerce.

Plans have been completed by the National Automotive Fibres Corporation, the largest supplier of upholstered equipment for automotive manufacturers, to begin the manufacture of furniture in the Bay Area. Sales headquarters have already been established in San Francisco for Market Week, with the Oakland Division selected as the manufacturing site from among the company's seven plants throughout the country.

Furniture manufacturing in the firm's Oakland plant will require an expansion of some 65,000 sq. ft., and a sizeable expenditure for new construction and equipment. Personnel will be increased by 200 to 250 people at the factory level and will constitute an addition to the industrial permanent payroll of over $75,000.

Charles Futterer, authority in furniture production and design, and recently head of his own manufacturing concern, has been retained to supervise the furniture division, according to J. G. Bannister, Oakland Divisional Manager.

Opening of this new furniture operation is expected to alleviate one of the most severe shortages in Northern California furniture and department stores and will fill the manufacturing deficiency in this type of merchandise by narrowing the gap between local manufacturer and consumption, according to the chambers of commerce.

Engineer's Tour Through ILG Plant Pictured In Book

"An Engineer Looks at ILG"—the title of a new book published by the ILG Electric Ventilating Company of Chicago — tells the complete story of the book's content in just five words.

For the new publication is just that—a word and picture story of what a consulting engineer saw as he made a tour of the ILG plant.

Starting out with manufacture of motors with special characteristics for ventilating equipment duty, several pages picture the operations performed on ILG motors.

A stop is made in the Centrifugal Fan Department where both all-steel and fans with cast iron sides are in progress. Here, in addition to showing construction and testing views, pictures of special features such as the ILG patented variable air controller and "floated drive" are included.

Propeller Fans with self-cooled motors are shown before and during assembly along a block long continuous conveyor system. Closely adjoining are photographs taken of vaneaxial fan construction. Two pages of pictures show the manufacture and assembly of unit heaters. Here one center of interest focuses on a photograph of an ILG installation in the Ford sub-chaser plant of 1917—the first known application of the propeller fan unit heating principle.

Following the parade of manufacturing sequences, A. G. Sutcliffe, ILG Chief Engineer, conducts the visitor through the new, fully equipped Research Laboratory. P. D. Briggs, Vice-President in Charge of Sales, points out the nation-wide sales engineering help available from ILG. O. W. Dexter, Advertising and Sales Promotion Manager, gives a brief summary of exclusive ILG features. President John M. Frank visualizes the prominent buildings equipped with ILG apparatus, as well as the prominent role played by ILG in World Wars I and II. And Vice-President Walter Rietz, in charge of manufacturing, indicates the highlights of pioneering practices in personnel relationships which make production flow smoothly and efficiently.

The 36-page, two-color book ends up with a glowing promise for the future based upon new research facilities, improved equipment and "know-how" gathered over a period of 40 years of manufacturing experience.

Copies of the new book are available without charge either from the home office or from one of the 40 ILG Branch Offices located in principle cities. The San Francisco office of the ILG Electric Ventilating Company is located at 55 New Montgomery St. While it is not intended as a substitute for an actual trip through the plant, it is the next best thing. Men in the business of specifying, designing, purchasing, or installing ventilating or heating systems, who have had the opportunity of reviewing the new publication state that it is an "eye-opener" and definitely of help to them in their work.

ARCHITECTURAL CLUB TO MEET

A. J. Robertson, President of the San Francisco Architectural Club, will address the regular meeting to be held today, Feb. 6, at 666 Mission Street. Robertson will outline future plans for the Club and urges all members to bring along a prospective member.

Members will leave Club quarters at 6 p. m., for dinner as usual, and return at 8:15 p. m., for the meeting.

FPC Reveals New Hydroelectric Project

The Federal Power Commission has announced its receipt of an application filed under the Federal Power Act by Public Utility District No. 1 of Clallam County, Wash., for a preliminary permit for 36 months for a hydroelectric project to be located on the Hoh River, in the region of Forks, Wash., and affecting lands of the United States in the Olympic National Forest, as well as lands owned by the state of Washington and private owners.

According to the application, the proposed development would consist principally of a masonry or rock-fill dam 150 feet above low water stage located on the upstream side of the Ox-Bow Bend, a steel penstock from the dam to the powerhouse, and a powerhouse with installed capacity of about 32,000 horsepower to be located on the downstream side of a ridge which separates the two arms of the Ox-Bow Bend. The energy generated would be distributed for public utility purposes through a municipal distribution system in Clallam and Jefferson Counties, Washington.

A preliminary permit, if issued, would be for the purpose of maintaining priority of application under the Federal Power Act but would not authorize any actual construction on lands of the United

Traffic Problem To Be Discussed At CC Luncheon

San Francisco's traffic problems will be the subject of discussion at a public luncheon sponsored by the City Planning Commission and Public Utilities Commission at noon today, Wednesday, February 6, in the Italian Room of the St. Francis Hotel, it was announced by the San Francisco Chamber of Commerce.

Edward L. Turkington, chairman of the Traffic and Highway Committee of the Chamber, will preside as chairman.

Guest speaker will be Leslie Williams, City Planning Engineer, American Transit Association, who will discuss "Traffic Congestion and What Can Be Done About It". Guests will be permitted to ask questions after the address and general discussions will follow.

Representatives of all civic agencies are invited to attend. Reservations may be made with Roger Deas, secretary of the City Planning Commission.

Williams, who is touring the nation on behalf of the American Transit Association, will also address public meetings in Oakland and Berkeley while in this area.

After a career spent in study and teaching of traffic engineering at Harvard and Yale Universities, Williams became director of the Civic Planning and Traffic Board of Providence, Rhode Island, and engineer-director of the Governor's Commission on Metropolitan Transportation in Rhode Island. He subsequently was appointed to his present position with the American Transit Association, which is the national professional agency of the American transit industry.

GROOVER AND I

FREEDOM OF SPEECH

The most important news item of the week is the Supreme Court Decision, 8 to 0, reinstating the right of the magazine Esquire to the mails and males of the nation.

★ ★ ★

The Postmaster General (not Hannegan, but his predecessor) lifted the second-class mailing privileges of Esquire because he did not like the "art" work it contained.

★ ★ ★

As an Old Second-Looker, I do not think the bosomy, leggy gals in Esquire are especially harmful to the public morals. They are escapist pictures rather than delineations that are disturbingly true.

★ ★ ★

Should you see a girl with the proportions of an Esquire figure you would probably go on the wagon or have your glasses changed. She would be more curious than cuddly.

★ ★ ★

Even though you have never seen nor read a copy of Esquire (yes, it has stories too!) this decision is important to you. The Supreme Court is reaffirming the Free Speech guarantee contained in our Constitution.

★ ★ ★

Under the Constitution, you can still stand up and say "horsefeathers" if one man issues a Fascist dictum as to what you can or cannot say or read.

New Lightweight Portable Saw Announced

A new lightweight portable 12-inch radial saw, which it is said will save 25 per cent or more of the usual power saw time on the average building or other production cutting job, has just been added to the Monarch Uni-Point line of woodworking machinery.

The new radial saw is made principally of light, non-rusting magnesium, so that the unit complete with carrying frame and 1½-h.p. electric motor weighs approximately 200 pounds and can be carried readily by two men. It is so compact that it is easily carried through a 30-inch doorway, yet it has a 3 by 16-inch crosscut and 20½-inch wide ripping capacity, and it will handle all the diffferent kinds of work that heavy stationary radial saws will do. It can be carried and plugged in anywhere that there is electric current.

The American Saw Mill Machinery Co., Hackettstown, N. J., makers of the new saw, say that it embodies all of the principal features of the large size stationary Monarch Uni-point radial saws already famous throughout the country. Chief among these features is the exclusive Uni-Point cutting principle which is the main reason for the company's claims of simpler operation and speedier performance.

"One-point cutting" is accomplished by a unique design that permits the entire column of the machine to tilt vertically and also to pivot to the right or left through a horizontal arc so that regardless of how the machine is adjusted for a bevel, miter or compound mit-

Owner—County of Santa Cruz. Board of Supervisors, Courthouse. Santa Cruz.
Architect—Chas. E. Butner, 7 Winham St., Salinas.

2/6/46 26
UNITS APPROVED
LOS ANGELES, Calif. — Family dwelling units approved for Greater Los Angeles area by the FPHA as of January 25, by communities are as follows:

City of Alhambra	75
City of Burbank	*180
City of Covina	**20
Culver City	50
City of Glendale	100
City of Hawthorne	25
City of Inglewood	75
City of Long Beach	250
City of Los Angeles	1500
County of Los Angeles	***308
City of Pasadena	100
City of Santa Monica	100
City of South Gate	50
City of Whittier	50
	2883

*100 formerly approved.
**Formerly approved.
**Of the 308 units approved for Los Angeles County, the county is paying the total cost of removing 108 units from the Pomona fair grounds to the Maravilla housing project site east of Mednik St., between 1st St. and Floral Ave., and reconverting the barracks into family units at a cost estimated by the FPHA to be well under $1000 per unit. The remaining 200 units allotted to the County of Los Angeles will be brought in and erected with FPHA funds, the county to furnish the site

With reference to the above table, Langdon W. Post, director of Region VI of the FPHA, in the office of Stanley Abel, area managemnet supervisor of the authority in Los Angeles, stated that of the 250 units approved for Long Beach, 93 units will be obtained by reconversion of barracks on present site, 157 units to be moved in; Burbank, 58 units by reconversion of barracks on site, 22 units to be moved in; Santa Mnoica, 44 units by on-site reconversion, 56 to be moved in; Hawthorne, all 25 units to be obtained by on-site reconversion of barracks. Reconversion for some of these 220 on-site units will begin next week. Mr. Post stated that most "war apartment" units to be moved into this area would probably come from Portland, Ore.; surplus war housing units with furniture are available at that point, and shipment may be made by water.

As soon as the City of Los Angeles notifies the FPHA that the Griffith Park site has been prepared, the authority will bring in 750 new Quonset huts (converting to two dwelling units per hut or 1500 total) from Port Hueneme. Furniture, with the exception of stoves, will have to be provided by the city. Inasmuch as the city has title to the site, the FPHA, after units have been erected, will give title to the city and thereafter the city is responsible for future removal.

Under a ruling made January 24, the FPHA, where a community puts up all the money for on-site reconversion of barracks into dwelling units, will not count such units in the community's quota, and a community will therefore be eligible for its full quota over and above such paid-for units.

Mr. Post stated that FPHA is getting bona-fide contractors for the reconversion work, and will name contractors for work outside the City of Los Angeles next week. He further announced that allocations of units for educational purposes—to schools, etc.—will be made next week.

...ALL BUILDINGS AND STRUCTURES OF THIS GREAT 14-WAY SHIPYARD

★ The California Shipbuilding Corporation has been authorized by the United States Maritime Commission to demolish the shipyard facilities located at Terminal Island. These facilities were built for the emergency production of cargo vessels and consist of the shops, offices, ways, and all other buildings and structures which formed the second largest emergency shipyard in the United States.

These buildings and structures are now being offered for sale in order that the vital materials which are incorporated in the facilities may be available for use in West Coast Construction activities. You may find many of these buildings exactly fit your requirements, as they are—others, adaptable to modification for use as industrial plants or warehouses.

Here is an opportunity to acquire complete structures, or materials for construction at reasonable prices. Many of the structures are vacated and ready for immediate demolition and the others will become available at regular intervals. There is no red tape between sale and delivery. Deliveries must be taken at Terminal Island.

Your inquiries are invited. For inspection of the properties, or for additional information, write or wire.

(7) 650 c.y. common excav. for side drains and dikes;
(8) 50 c.y. rock excav. for do;
(8) 350 c.y. common excav. for structures;
(10) 25 c.y. rock excav. for do;
(11) 1500 c.y. backfill;
(12) 350 c.y. compacting backfill;
(13) 250 s.y. dry-rock paving;
(14) 216 c.y. concrete in structures;
(15) placing 13,000 lbs. reinf. bars;
(16) erecting 22 M FBM of timber in structures;
(17) driving 882 l.f. of timber piles;
(18) laying 32 l.f. 18-in. diam. conc. pipe;
(19) laying 286 l.f. 18-in. diam. corru. metal pipe;
(20) installing 250 lbs. of gates and gate hoists;
(21) installing 100 lbs. of misc. metalwork.

This invitation for bids does not cover the purchase of materials which are to be furnished by the Government. Materials to be furnished by the contractor and those furnished by the Government are described in the specifications which will be a part of the contract.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.75 per copy, not returnable.

Specifications obtainable from the above office.

34—DAMS, RESERVOIRS & DREDGING

2/6/46 • 34
FUNDS AWARDED
DAM Estimated Cost, $5,576,000
BOULDER COUNTY, Colorado.

Construction of dam about 350 feet high on South Boulder Creek, between Pine Cliff and Eldorado Springs, forming a reservoir about 67,800 acre feet capacity with all necessary appurtenances

Owner — State of Colorado, G. F. Hughes, executive secretary, Board of Water Commissioners.

Engineers—D. D. Gross, P. O. Box 629, Denver, Colo.

The Bureau of Community Facilities, Federal Works Agency, 2223 Fulton St., Berkeley, Calif., awarded funds in amount of $50,000 to assist in preparation of plans.

CONTRACT AWARDED

BREMERTON, Wash.—Scheumann & Johnson, Lloyd Bldg., Seattle, at $442,441, were awarded contract by Capt. E. B. Keating, officer in charge of construction, Public Works Division, Bldg. 78, Puget Sound Navy Yard, Bremerton, under Spec. 16857 for furnishing all labor and materials and performing all work for subdivision of dry dock No. 3, Puget Sound Navy Yard, Bremerton.

38— ELECTRIC LIGHTING TRANSMISSION LINES EQUIPMENT

2/6/46 • 38
BIDS WANTED

VALLEJO, Solano Co., Calif.—Until February 13, 10 A. M., bids will be received by the Vallejo City Council, City Hall, Vallejo, Calif., for the construction of a traffic signal system on the public streets of the City of Vallejo, consisting of automatic traffic signals and all the appurtenant and accessory parts thereof, including all materials, labor, apparatus and equipment therefor, complete and ready for operation.

Specifications obtainable from the above office.

40— STREETS AND HIGHWAYS

2/6/46 • 40
CONTRACT AWARDED

NEW MEXICO STATE HIGHWAY.—F. G. Healy, state highway engineer, Capitol Bldg., Santa Fe, N. M., received bids January 26 and action was taken as noted below for highway improvements in various counties, as follows:

New Mexico Project No. FI-3 (5), located in Santa Fe County on U. S. Highway Route No. 85, between Santa Fe and Canoneito, approximately 7.687 miles. The proposed work consists of grading minor drainage structures, four multiple concrete box culverts each over 20-ft. clear span, base surfacing, bituminous top course surfacing and miscellaneous construction. Skousen Construction Co. awarded contract at $493,895.

New Mexico Project No. S-58 (3), located in Union County on New Mexico Highway Route No. 58, between Springer and Clayton, approximately 10.298 miles. The proposed work will consist of grading and shaping present roadbed, watering and rolling, placing ballast and leveling course and bituminous top course surfacing and miscellaneous construction. Northwestern Engineering Co., Rapid City, S. D., low at $143,488. Bid rejected.

New Mexico Project No. S-87 (1), located in Santa Fe County on New Mexico Highway Route No. 4, between Otowi and Popoaque, approximately 7.297 miles. The proposed work will consist of grading, minor drainage structures, 4 multiple concrete box culverts each of 20-ft. clear span, ballast, leveling course and miscellaneous construction. E. M. Silver and G. I. Martin, Albuquerque, N. M., awarded contract at $277,129.

New Mexico Projects No. F-110 (2) and F-139 (4), located in Luna County on N. M. Highway Route No. 11, between Deming and Columbus, approximately 7.4 miles. The proposed work will consist of grading, minor drainage structures, 2 multiple concrete box culverts each of 20-ft. clear span, watering and rolling, leveling course, ballast, bituminous top course, surfacing and miscellaneous construction. Walter L. Denison, Albuquerque, N. M., was awarded contract at $127,984.

New Mexico Project No. F-186 (4), located in San Juan County on N. M. Highway Route No. 44, between Aztec and Bloomfield, approximately 7.571 miles. The proposed work will consist of grading, minor drainage structures, two multiple concrete box culverts each over 20-ft. clear span, watering and rolling, leveling course, ballast and miscellaneous construction. F. M. Limbaugh, Albuquerque, N. M., was awarded contract at $229,881.

New Mexico Project No. S-214 (14), located in Santa Fe County on N. M. Highway Route No. 10, between Santa Fe and Madrid, approximately 0.5 mile. The proposed work will consist of grading, minor drainage structures, one 290-span concrete and steel bridge, watering and rolling, leveling course, ballast, bituminous top course surfacing and miscellaneous construction. J. H. Ryan, Albuquerque, N. M., submitted the low bid at $185,343. Bid was rejected.

BUY U. S. WAR BONDS

15-MILE LAP, FRIANT-KERN CANAL; SPEC. 1148

CENTRAL VALLEY PROJECT, Friant-Kern Canal. — Bechtel Bros.-McCone, 220 Bush St., San Francisco, at $267,805 on Schedule No. 1 only, and Peter Kiewit Sons Co., 442 Post St., San Francisco, at $1,721,584 on alternate bid on Schedule 2, and at $1,656,021.85 on alternate bid on Schedule 3, submitted apparent low bids February 5, 10 A. M., to the U. S. Bureau of Reclamation, Walker R. Young, chief engineer, Friant, under Spec. 1148 for construction of the next 15-mile lap of the Central Valley Project's 160-mile Friant-Kern Canal, Friant Division, Central Valley Project, California; Specification No. 1148.

The work, in general, consists of the construction of earthwork, concrete lining and structures, station 301 plus 60 to station 1144 plus 00, and wastway at station 298 plus 66. The work is situated from 14 miles north to 15 miles east of Fresno, Calif. Guarantee will be required with each bid in an amount not less than 10 per cent of the amount of the bid. Completion time, 600 days.

The work involves:

Schedule No. 1

Little Dry Creek wasteway, station 298 plus 66 and Little Dry Creek siphon, station 301 plus 60 to station 311 plus 27.87.

(1) 1000 cu. yds. excavation, common, for structures;
(2) 24,500 cu. yds. excavation, rock, for structures;
(3) 18,000 cu. yds. backfill;
(4) 3000 cu. yds. compacting backfill;
(5) 6420 cu. yds. concrete in structures;
(6) 1,760,000 lbs. placing reinforcement bars;
(7) 11,000 lbs. placing metal water stops in joints;
(8) 100 sq. ft. placing elastic joint-filler material;
(9) 115,000 lbs. installing gates and gate hoists;
(10) 3500 lbs. installing miscellaneous metal work;
(11) 150 lin. ft. installing electrical metal conduit;
(12) 100 lbs. installing electrical conductors and ground wires;

Schedule No. 2

Earthwork, canal lining and structures, station 311 plus 27.87 to station 710 plus 00.

(13) 575,000 cu. yds. excavation, common, for canal;
(14) 1,400,000 cu. yds. excavation, rock, for canal;
(15) 19,000 sta. cu. yds. overhaul;
(16) 83,500 cu. yds. compacting embankments;
(17) 83,000 cu. yds. excavation, common, for drainage channels and dikes;
(18) 70,000 cu. yds. excavation, rock, for drainage channels and dikes;
(19) 10,500 cu. yds. excavation, common, for structures;
(20) 6500 cu. yds. excavation, rock, for structures;
(21) 320,000 sq. yds. preparing rock foundations for concrete lining;
(22) 80,000 sq. yds. trimming earth foundations for concrete lining;
(23) 7000 cu. yds. backfill;
(24) 6000 cu. yds. compacting backfill;
(25) 400 sq. yds. dry-rock paving;
(26) 1470 cu. yds. concrete in structures;
(27) 38,400 cu. yds. concrete in canal lining;
(28) 2,200,000 lbs. placing reinforcement bars;
(29) 105 sq ft. placing elastic joint-filler material;
(30) 85 lin. ft. placing rubber water stops;
(31) 100 M ft. b.m. erecting timber in structures;
(32) 800 lbs. installing miscellaneous metal work;
(33) constructing 10 cattle guards;
(34) 10.8 miles constructing barbed-wire right-of-way fence;
(35) 4 miles constructing combination barbed-wire and woven-wire right-of-way fence;

Schedule No. 3

Earthwork, canal lining and structures, station 710 plus 00 to station 1144 plus 00.

(36) 840,000 cu. yds. excavation, common, for canal;
(37) 590,000 cu. yds. excavation, rock, for canal;
(38) 83,000 sta. cu. yds. overhaul;
(39) 114,500 cu. yds. compacting embankments;
(40) 252,000 cu. yds. excavation, common, for drainage channels and dikes;
(41) 15,500 cu. yds. excavation, rock, for drainage channels and dikes;
(42) 12,000 cu. yds. excavation, common, for structures;
(43) 4000 cu. yds. excavation, rock, rock, for structures;
(44) 234,000 sq. yds. preparing rock foundations for concrete lining;
(45) 164,000 sq. yds. trimming earth foundations for concrete lining;
(46) 6500 cu. yds. backfill;
(47) 5000 cu. yds. compacting backfill;
(48) 500 sq. yds. dry-rock paving;
(49) 560 cu. yds. rock fill;
(50) 4825 cu. yds. concrete in structures;
(51) 38,200 cu. yds. concrete in canal lining;
(52) 2,900,000 lbs. placing reinforcement bars;
(53) 11,500 lbs. placing metal water stops in joints;
(54) 1330 sq. ft. placing elastic joint-filler material;
(55) 405 lin. ft. placing rubber water stops;
(56) 185 M ft. b.m. erecting timber in structures;
(57) 120 lin. ft. laying 48-in. diameter corrugated metal pipe;
(58) 3000 lbs. installing miscellaneous metal work;
(59) constructing 22 cattle guards;
(60) 9.8 miles constructing barbed-wire right-of-way fence;
(61) 4.8 miles constructing combination barbed-wire and woven-wire right-of-way fence;
(62) 28,500 lin. ft. construct underdrains with uncemented joints;
(63) 20,000 lin. ft. construct feeder drains.

Complete total bids were:

(A) Bechtel Bros. McCone, San Francisco (Sched. 1 only), $267,805.
(B) Peter Kiewit Sons Co., San Francisco (Sched. 1), $461,159.50; (alt. bid Sched. 1), $460,517.50; (Sched. 2), $1,820,334; (alt. bid, Sched 2), $1,721,584; (Sched 3), $1,727,521.85; (alt. bid), $1,656,021.85; total on main bid, $4,009,015.35; total on alternate bids, $3,838,123.35.
(C) George Pollock Co., Sacramento (Sched 3 only), $1,689,255.
(D) Morrison-Knudsen Co., Inc., and M. H. Hasler, Los Angeles (Sched. 1), $295,030; (Sched. 2), $1,762,229; (Sched. 3), $1,818,300; total bid, $3,875,629.
(E) Rhoades Bros. & Shofner and Shofner & Gordon & Hinman, Los Angeles (Sched. 1), $320,065; Sched. 2), $1,791,847.50; (Sched. 3), $1,785,167.50; total bid, $3,897,090.
(F) Arizona - Nevada Constructors (Sched. 1), $350,543; (Sched. 2), $1,775,821.75; (Sched. 3), $1,788,342.55; total bid, $3,914,707.50.
(G) Guy F. Atkinson Co., San Francisco (Sched. 1), $362,980; (Sched. 2), $1,996,158; (Sched. 3), $1,716,300; total bid, $4,075,438.50.
(H) Bressi & Bevanda Constructors, Inc., Los Angeles, and W. E. Kier Construction Co., San Diego (Sched. 1), $339,635; (Sched. 2), $2,064,850; (Sched. 3), $1,780,927.50; total bid, $4,175,412.50.
(I) H. Earl Parker, Larson Bros. and Harms, Sacramento (Sched. 1), $442,675; (Sched. 2), $2,104,872.50; (Sched. 3), $1,814,290; total bid, $4,361,837.50.
(J) Pacific Bridge Co., San Francisco (Sched. 1), $641,575; (Sched. 2), $2,824,268; (Sched. 3), $2,951,252; tota lbid, $6,417,095.
(K) Grace - Callaghan Construction Co., Mark C. Walker & Sons Co. and Gunther & Shirley Co., Los Angeles (Sched. 1), $655,966; (Sched. 2), $3,076,801.55; (Sched. 3), $3,045,215.05; total bid, $6,777,982.60.

The following stipulations were made regarding acceptance of contract: Grace-Callaghan Construction Co., Mark C. Walker & Sons Co. and Gunther & Shirley Co., Los Angeles, will accept Schedules 1, 2 and 3 or 2 and 3 only; Arizona-Nevada Constructors will accept all three schedules or schedules 2 and 3; Morrison-Knudsen Co., Inc., and M. H. Hasler, Los Angeles, will accept Schedules 1, 2 and 3 or 2 and 3; H. Earl Parker, Larson Bros. & Harms, Sacramento, will not accept Schedule 1 without 2 and 3, and will not accept 2 without 3 and will not accept 3 without 2; Guy F. Atkinson Co., San Francisco, will accept only on Schedules 1, 2 and 3 combined or 2 and 3 combined; Pacific Bridge Co., San Francisco, will accept all or none; Peter Kiewit Sons Co., San Francisco, will accept 1 only if awarded 2 and/or 3, if awarded 1, 2 and 3, deduct from unit price item 5, Schedule 1, 10 cents per cu. yd., if awarded 2 and 3 reduce items 1, 3 and 14 of Schedule 2 to 43 cents, if awarded Schedule 3 in combination with Schedule 2 reduce items 36 and 37 to 35 cents; Rhoades Bros. & Shofner and Shofner & Gordon & Hinman, Los Angeles, if awarded Schedules 1, 2 and 3 deduct from item 5 50 cents per cu. yds. and from items 21, 22, 44 and 45 deduct 5 cents sq. yd. and from items 27 and 51 deduct 50 cents per cu. yd. totaling $81,410, if awarded Schedules 2 and 3 only deduct from items 21 and 22, 44 and 45 5 cents per sq. yd. and from 27 and 51 50 cents per cu. yd.; total $78,200.

New Saw

(Continued from Page 1)

er crosscut angle, the saw blade always travels through the guide fence and cuts the lumber at exactly the same point on the table.

Another important and interesting feature of this new magnesium portable radial saw is the added safety, speed, and accuracy made possible by its heat-treated, hardened-steel safety arm. When making a cut, the saw assembly and arm move forward on wide, hardened-steel ball bearing self-aligning rollers in a smooth effortless glide. Vision is unobstructed while cutting. At the completion of each cut, the assembly moves back out of the way and the entire table top is clear for layout, measuring, and other table work. There is no over-table mechanical obstruction against which the operator can hit his head or bump his shoulder. Work can be set up quickly and accurately without having to duck and dodge around any part of the machine.

Permanent accuracy, not only of the safety arm, but of the entire machine, is maintained by five simple adjustments. The first of these is at the top of the housing, where eight set screws permit the safety arm bearings to be taken up to compensate for any wear at the arm bearing surfaces. Adjustment set screws at the head are available to maintain the vertical post in constant alignment. At the motor plate, set screws permit alignment in the three-way positions of the motor, should it ever be necessary during the life of the machine. Also, permanently accurate zero settings can be maintained, even after years of use, by a set screw at the motor arc for motor angle adjustment and a set screw at the base of the column for vertical setting adjustment of the column. This five-way adjustability is a unique advantage of the Monarch Uni-Point portable radial saw. It makes possible the maintenance of permanent accuracy throughout the machine without the need for expensive replacement of parts.

An interesting booklet describing the unit can be had by writing the Company.

PLANS and Speculations

Sacramento: Acme Refrigeration and Equipment Company, 619 "J" Street, has purchased an 80 x 80 foot site at the northwest corner of California and Seventh Streets. This will be an addition to present quarters and will be sales and display rooms for a complete line of household appliances. Modernization and installations will cost $100,000.

oOo

Salinas: Several sites are under consideration by the AFL labor council in Salinas and the Alisal District for construction of a labor temple estimated at $75,000, it was announced by Peter A. Andrade, president of the AFL labor council.

oOo

Chico: The Board of Education has voted to authorize Charles F. Dean, Sacramento architect, to draw up a plot plan of the proposed location of buildings for the development of the high school.

oOo

Red Bluff: The 30th District Agricultural Association has approved the expenditure of $89,000 for construction, repair and promotion of the County fairgrounds. Largest single appropriation involves the construction of a large exhibit building at an estimated cost of $50,000.

oOo

Visalia: The Memorial Plunge Executive Council announces that over $10,000 has been contributed toward the building of the proposed community swimming pool. This is the halfway mark toward the goal of $20,000, the anticipated cost. . . . Complete modernization of the Elks building, Main and Locust Streets at a cost of $17,000. Plans include installation of two elevators. Announcement was made by Oakley Morris, executive secretary of the lodge.

oOo

Richmond: Operations suspended by war will be resumed by the California Art Tile Corp., 27th and Maine Streets, by next fall, W. A. Hislop, vice - president, has announced. A $70,000 modernization program is planned.

oOo

Butane Engineering Co., located on Davis Highway one mile west of Tower Bridge, Sacramento, plan expenditure of $50,000 for the construction of new buildings to be used as office, salesroom, shop, and Butane-Propane storage, on adjacent property, recently acquired.

oOo

Home Builders Exposition Space Is A 'Sell-Out'

As Convention and Exposition date for the National Association of Home Builders in Chicago, at the Stevens Hotel approaches, the exhibit space is a "sell out". This forecasts the largest home building show ever assembled.

Paul Van Auken, Convention and Exposition Director, announced on January 28, that more than 2,500 advance reservations for hotel accommodations have already been received which indicates that the figure of 5,000 builders, real estate brokers, dealers, architects, and bankers previously expected to be in attendance will be exceeded.

Among those who have accepted invitations to take leading roles in the discussions at the Convention meetings are:; Seward Mott, Director, Urban Land Institute, Marcel Villanueva, National Commission on Housing, J. C. Nichols, Kansas City, Mo., Wilson W. Wyatt Housing Expediter, John D. Small, Administrator, CPA, Raymond M. Foley, Commissioner, FHA, Jos. Meyerhoff, Baltimore, Md., Wallace Johnson, Memphis, Tenn. Norton Long, Assistant to the Administrator, OPA, H. R. Northrup, National Retail Lumber Dealers' Assn., James Follen, Structural Clay Products Institute and Producers' Council, Robt. P. Gerholz, Flint, Mich.; George West, First Federal Savings & Loan Association, Atlanta, Ga.

Curt Mack, FHA, Boris Shiskin, Secretary AFL Housing Commisson, William Farrington, Houston, Texas Wm. Guinan, Detroit, Mich., Fritz B. Burns, Los Angeles, David D. Bohannon, Los Angeles, W. Hamilton Crawford, Baton Rouge, La., Andrew Higgins, Higgins Shipbuilding Corp., Roland D. Doane, General Sales Mgr., Ingersoll Steel Division, Borg-Warner Corp., R. Warmee, Minneapolis-Honeywell Co., P. E. McCaughey, Mgr., National Adequate Wiring Bureau, Carl Boester, Purdue Research Foundation, Miles Colean, Housing Consultant.

Year-End Reports for 1945 on Bay Area Major Activities Reveal New Maximums

Complete year-end reports for 1945 on major activities in the Bay Area prepared by the San Francisco Chamber of Commerce revealed new maximums established in many fields and wide contrasts between prewar levels. The population on January 1, 1946 is estimated at 2,543,000 or 157,000 above a year ago and 808,692 or 46.6 per cent above the 1940 census for the nine-county area. Retail sales estimate for 1945 of $1,937,024,000 is $176,000,000 above 1944 and $1,060,628,000 or 121 per cent above the total reported by the census for 1939. Wholesale sales estimate of $3,478,000,000 for 1945 exceeds the 1944 estimate by $64,277,000 and the 1939 sales by $1,842,018,000, or 112 per cent.

Financial transactions measured by bank debits in the Bay Area soared to $27,393,883,000 or $1,750,182,000 above 1944 and $14,320,142,000 above the 1940 level representing an increase of 127 per cent. 1945 freight car movements in the San Francisco-Oakland switching limits totaling 784,567 were 40,925 under the 1944 level but 370,106 above the 1940 level. 1945 payrolls in the manufacturing industries in the San Francisco Industrial Area (5 counties) estimated at $473,000,000 dropped off about 34 per cent from the 1944 level but were nearly four times the total reported by the 1939 census which amounted to $110,964,000. The non - manufacturing industries reported payroll increases during 1945 over 1944 of 5 per cent in the retail, wholesale and laundry groups, and 10 per cent in the hotel group.

San Francisco busines activity attained a new high in December. Our index reached 247, topping the previous high of December 1944 by 6.6 per cent, the annual average at 203.1 surpassing last year by 7.9 per cent.

Bay Region department store sales for the last few months of the year were above similar months a year ago and the cumulative sales for the entire year were up 11 per cent, which was idential to the rise for California, Seattle, and the 12th Federal Reserve District. Sales of independent retailers in California were 19 per cent higher for November 1945 than for November 1944 with the 11 months sales 10 per cent above last year's volume, according to the latest report from the Bureau of the Census. Increases reported by Bay Area cities for this period were led by Santa Rosa with 19 per cent gain, Pittsburg followed with 17 per cent, San Francisco with 11 per cent, San Jose 10 per cent, Oakland 9 per cent, Berkeley 9 per cent, and Palo Alto 8 per cent. In San Francisco the apparel group led all groups with a 16 per cent gain for the cumulative period. The food group reported a 3 per cent increase, eating and drinking places 13 per cent, drug stores 11 per cent, motor vehicle dealers 11 per cent, furniture stores 6 per cent, and hardware stores 17 per cent.

Reports on job openings in the San Francisco Bay Area as of the beginning of January 1946 showed a total of 15,576. More than half, or 8,310, were in San Francisco. 4,893 of these were clerical opportunities, 1109 professional, 403 in sales, and the balance were in the skilled, semi-skilled and unskilled divisions. Reports indicate that employers in all areas are giving the veterans preferential treatment. During December San Francisco's office of the United States Employment Service reported a total of 5,465 placements. Based on a partial report, 43 per cent of the placements were in the clerical and sales group, 14 per cent in the service, 9 per cent in the skilled, 7 per cent in the semi-skilled, and 27 per cent in the unskilled, and less than one-half per cent in the professional and managerial group.

Other substantial developments in San Francisco during the year were revealed in the following activities: shares traded on the San Francisco stock exchange were up 61 per cent in number and 80 in market value over last year; postal receipts rose 43 per cent to a total of $50,818,124; real estate sales established a new all-time high; San Francisco air traffic totaled 34,040 planes in and out, or 66.9 per cent above last year, and the number of passengers on and off soared to a total of 449,145 or 72 per cent above a year ago; sales of electrical energy were up 8.7 per cent and industrial and commercial gas sales 9.7 per cent; and total construction 45.3 per cent in value.

V

SIMPLIFIED PRACTICE RECOMMENDATION MADE FOR NAILS, STAPLES

A technical committee of the American Iron and Steel Institute is sponsoring two closely related simplification programs which are being developed through the established procedure of the Division of Simplifiel Practice, National Bureau of Standards.

One program proposes a list of stock sizes and types for wire nails and staples. It includes fence staples, poultry netting staples and all kinds of wire nails commonly used by the various building trades and by box manufacturers.

The other is a proposed revision of Simplified Practice Recommendation R9-28, Woven Wire Fencing. It presents a list of stock items in the following products: Farm Fence, Close Mesh Fence, Wolf Proof Fence, Poultry and Garden Fence, Chick Fence, Galvanized Barbed Wire and Galvanized Two-Ply Barbless Wire.

Should these proposals as submitted, or as adjusted in accordance with suggestions which may be submitted, meet with the approval of producers, distributors and users, they will be promulgated and issued in printed form.

Mimeographed copies of the programs are available for approval, comment or both, through the Division of Simplified Practice, National Bureau of Standards, Washington 25, D. C.

'Prefab' Housing Can Be Turned Out At 150,000 Yearly

American firms now manufacturing prefabricated houses or planning to go into production have a capacity for turning out about 150,000 units a year, according to estimates of the Construction Division, Department of Commerce.

Approximately 150 firms are now making or planning to make prefabricated houses, ready-cut structures, or components. Because of the importance of these types of construction in relieving the housing shortage, the Construction Division will undertake a detailed study of the industry in the near future.

As many home prefabricators were, until recently, engaged in other production related to the war and do not now have adequate inventories, production of prefabricated houses will be slow in starting.

However, well over 100,000 units could be built in 1946 if a sufficient flow of materials could be arranged, the Construction Division estimates. Prices of prefabricated houses run in general from $2,000 to $6,000, exclusive of the site, with higher prices for the larger and more elaborate types.

House trailers might also contribute to relieving the housing shortage, the Construction Division said. They are particularly adaptable for use on college campuses and other sites where a large volume of housing is temporarily needed. The capacity for producing house trailers is estimated at about 100,000 a year.

Prefabrication should be thought of as a method of building not as a term distinguishing the final product from that built by conventional methods, it was pointed out. A prefabricated house consists of sections or panels for floors, walls, ceilings or roofs. Line production technique is usually used.

The completed sections are transported to the site for quick erection on a previously prepared foundation. The number of sections and their degree of completeness varies. One typical four-room and bath prefabricated house consists of 38 sections exclusive of the foundations and chimney.

Ready-cut structures, in distinction to prefrabricated ones, are not made up of completed sections but of sills, rafters, studs, sheathing and other components cut and marked for a predesigned house. These components, delivered to the site, are then assembled exactly as in the case of a house built by conventional methods. The difference is that none of the parts have to be cut to size on the job.

GROOVER AND I

ATOMPLAN

There is a school of Internationalist thought which claims we should prove ourselves to be an open-hearted and generous folk by sharing the atom bomb secret with the rest of the world.

★ ★ ★

If this be sound thinking, why do we stop with one foot in the air? Why do we not follow this line to its logical conclusion?

★ ★ ★

Perhaps now is the time to introduce the "Groover Atomplan". We have the scientific knowledge, the technical skill and the plants. Let us not stop at passing out formula, blue-print and specification.

★ ★ ★

Let us start manufacturing atom bombs in a wholesale way—let us build up maximum production and then distribute the completed bombs to all other nations.

★ ★ ★

The plan has not been perfected. In order to satisfy all Nations and prevent jealousy, there remains one detail of mathematics to be worked out.

★ ★ ★

How can we distribute bombs to ALL Nations, giving EACH Nation 50% MORE bombs than we give to ANY OTHER Nation?

V

NOTICE OF CANCELLATIONS

The duration examinations for Highway Equipment Operator-Laborer, and Institution Equipment Operator announced on the bulletins issued Sept. 19 and 21, 1945, have been canceled by the State Personnel Board.

Surplus Barges, Tugs To Be Sold At Fixed Price

Prospective purchasers of wooden tank barges, harbor tugs, steel tank barges and other craft will welcome an announcement today by the United States Maritime Commission that such craft, declared surplus in large quantities by the Armed Services, will be sold on a fixed price basis after the market has been tested through competitive bids by the Commission.

The current offerings include 39 169-foot DPC wooden tank barges located at Palatka, Fla., for sale at a fixed price of $3,150 each; three 85-foot harbor DPC single screw tugs located at Jacksonville, Fla., and twenty-three 85-foot harbor DPC single screw tugs located at Madison ville, La., at $80,000 each, eighty 195-foot DPC steel tank barges located at Logtown, Miss., and eleven 195-foot DPC steel tank barges located at Pearlington, Miss., are for sale at a fixed price of $21,000 each.

All persons interested in acquiring any of these vessels should submit their offer or offers to the Secretary, U. S. Maritime Commission, Washington 25, D. C., specifying by number the particular vessel or vessels desired. Prospective purchasers may obtain copies of Form of Offers upon application to J. J. Fitzpatrick, District Manager, U. S. Maritime Commission, Canal Building, New Orleans, La., or Director, Division of Small Vessel Procurement and Disposal, U. S. Maritime Commission, Washington 25, D. C.

BIDS WANTED
CENTRAL VALLEY PROJECT, California.—Until March 5, 10 A. M. (tentative date), bids will be received by the U. S. Bureau of Reclamation, Walker R. Young, chief engineer, Friant, for another 10-mile section of Friant-Kern Canal, Friant Division, Central Valley Project, Calif.

Additional information on the above will be published shortly.

The bureau anticipates issuing three or more bid calls during March, bringing the total number of miles to about 70.

2/7/46 34
PERMIT SOUGHT
MISSION BEACH, San Diego Co., Calif.—An application has been made by the Division of Beaches and Parks, Department of Natural Resources, State of California, Sacramento, Cal., for War Department permit to construct a bulkhead and pier along the face of a proposed fill area, and to dredge to depth of approximately 8 feet below mean lower low water, an area in the northwesterly section of Mission Bay. The dredged material, amounting to approximately 3,000,000 cubic yards, will be deposited along the shoreline of Mission Bay at Mission Beach, Calif., to increase the municipally owned property in this locality for recreational purposes. Drawings showing location of the proposed work are on file in the office of the U. S. District Engineer, 751 S. Figueroa St., Los Angeles. Interested persons are invited to inspect these drawings and to submit in writing, in triplate, on or before 11 A. M., Monday, February 4, 1946, any objections based on navigation interests that they may have to said work. Objections based on other than navigation interests cannot be considered.

35— DOCKS, PIERS & HARBORS

2/7/46 • 35
CONTRACT AWARDED
TERMINAL ISLAND, Los Angeles Co., Calif.—Guy F. Atkinson Co., 1103 Heartwell Bldg., Long Beach, at $134,000, awarded contract by the Hughes Aircraft Co., Florence and Teal Aves., Mar Vista, for the construction of reinforced concrete dock approximately 35x60 feet at Terminal Island for a flying boat now under construction by the Hughes Aircraft Co.

37— RAILROADS, SUBWAYS & TUNNELS

2/7/46 37
PLANNED
PALM SPRINGS, Riverside County, Calif.—The Mt. San Jacinto Winter Park Authority, Palm Springs, has reported plans to proceed with the construction of a 12,400-ft. aerial tramway linking Palm Springs to Mt. San Jacinto by way of Chino Canyon, and is beginning with a complete survey of physical and economic aspects of the proposed project.

Plans call for the operation of cable cars starting in Chino Canyon, near Palm Springs, at an elevation of 2700 feet and running to a mountain area of 8500 feet on the heights of Mt. San Jacinto; the tramway will accommodate approx. 400 passengers an hour. A roadway will be built to the lower terminus and parking facilities are planned. Terminal accommodations at each end of the tramway will also be constructed. It is expected that the Mt. San Jacinto Winter Park Authority will be granted power to issue a maximum of $3,000,000 in revenue bonds to finance construction of the project which will probably be completed within a year from the date of the award of contract. The preliminary survey and final report for the project were prepared by Engineer R. G. Cone, 602 Marshall Street, Mindan, Louisiana.

Contractors indicating an interest in engineering and construction in connection with the project include the Interstate Equipment Co., Gilbert M. Kilcarr, vice-president and chief engineer, Elizabeth, N. J.; American Steel & Wire Co., C. E. Bannerman, chief engineer, New Haven, Conn.; and Coverdale & Colpitts, c/o George Warfield, New York City. These firms either have above representatives at Palm Springs at present or have scheduled their arrival within the next week.

2/7/46 37
PROPOSED
BAKERSFIELD - LOS ANGELES, Calif. — A resolution calling for a study by the California Department of Public Works, Sacramento, on the feasibility of a highway and railroad tunnel under the Tehachapi Mountains, beteewn Bakersfield and Los Angeles, has been introduced in the California State Legislature by Assemblyman C Don Field, Glendale. The project has been proposed to improve railroad and trucking facilities between the northerly and southerly sections of the State.

BIDS WANTED

ST. GEORGE, Utah.—As previously reported, until February 18, 10 A. M., bids will be received by the Civil Aeronautics Administration, 1500 4th St., Santa Monica, for the construction of improvements to the intermediate landing field at St. George, Utah; Proposal 6-46-129.

The work involves clearing, grading, graveling and sealing northeast-southwest runway; clear, grade and smooth northwest-southeast landing strip; erection of a 16x24-ft. prefabricated steel panel watchhouse building, 8x12-ft. prefabricated steel building for telephone termination equipment, construction of a sewage system, installation of receiving antenna poles, including obstruction lighting, and installation of subsurface power lines and conduit and other miscellaneous items connected with the establishment of control quarters for an airways communication station at St. George, Utah, intermediate landing field.

The bids will be taken as follows:

Schedule I (Alternates A and B)

Preparation of Site

(1) 152 acres clearing and grubbing;
(2) 64,000 cu. yds. grading, common excavation;
(3) 4800 cu. yds. grading, rock excavation;
(4) 22,000 cu. yds. borrow, unclass.;
(5) 4200 M gallons watering as ordered;
(6) 290 sq. yds. erosion protection, 3-in. gravel-oil mix;
(7) 6 cu. yds. concrete in place for drainage structures;
(8) 12 cu. yds. structural excavation, unclassified;
(9) 50 acres smoothing landing strip outside graded area;
(10) 23,000 lin. ft. fence, new, class D, 4-wire, wood or steel posts;
(11) lump sum, 14-ft. steel gate in place;
(12) lump sum, 10-ft. concrete cattle guard in place, per Dr. D-2112;

Alternate A

(a) 21,200 cu. yds. 9-in. crushed gravel base course, in place;
(b) 1500 M gallons watering as ordered;
(c) 43,000 gallons liquid asphalt, MC-2;

Alternate B

(a) 21,200 cu. yds. 9-in. uncrushed gravel base course, in place;
(b) 1500 M gallons watering as ordered;
(c) 43,000 gallons liquid asphalt, MC-2;

Total Schedule I—Alternate A.
Total Schedule I—Alternate B.

Schedule I (Alternates C and D

(13) 152 acres clearing and grubbing;
(14) 59,000 cu. yds. grading, common excavation;
(15) 4800 cu. yds. grading, rock excavation;
(16) 23,000 cu. yds. borrow, unclass.;
(17) 4200 M gallons watering as ordered;
(18) 290 sq. yds. erosion protection, 3-in. gravel-oil mix;
(19) 6 cu. yds. concrete for drainage structures in place;
(20) 12 cu. yds. structural excavation, unclassified;
(21) 50 acres smoothing landing strip outside graded area;
(22) 23,000 lin. ft. fence, new, class D 4-wire, wood or steel posts;
(23) lump sum, 14-ft. steel gate in place;
(24) lump sum, 10-ft. concrete cattle guard in place per Dr. D-2112;

Alternate C

(a) 14,200 cu. yds. 6-in. crushed gravel base course in place;
(b) 1000 M gallons water as ordered;
(c) 43,000 gallons liquid asphalt, MC-2;

Alternate D

(a) 14,200 cu. yds. 6-in. uncrushed gravel base course in place;
(b) 1000 M gallons watering as ordered;
(c) 43,000 gallons liquid asphalt, MC-2;

Total Schedule I—Alternate C.
Total Schedule I—Alternate D.

Schedule I (Alternates E and F)

(25) 152 acres clearing and grubbing;
(26) 71,000 cu. yds. grading, common excavation;
(27) 8800 cu. yds. grading, rock excavation;
(28) 64,000 cu. yds. borrow, unclass.;
(29) 7200 M gallons watering as ordered;
(30) drainage:
(a) 2800 lin. ft. 12-in. corrugated metal pipe in place;
(b) 520 lin. ft. 18-in. corrugated metal pipe in place;
(31) 35 cu. yds. concrete in place for catchbasins, headwalls, spillways, check dams, aprons, etc.;
(32) 15 each, catchbasin gratings and frames, steel;
(33) 1000 cu. yds. structural excavation, common;
(34) 500 cu. yds. structural excavation, rock;

PLANS and Speculations

Sacramento. The following firms have recently announced building plans:

Golden State Co., 214 19th St., producers of milk products, are now modernizing their milk fluid department at a cost of $50,000; will modernize the ice cream department at a cost of $50,000; build truck housing and a new office building at a cost of $100,000.

Hires Bottling Co., 1901 21st St., will erect an additional new building and install equipment for carbonating beverages at an approximate expenditure of $150,000.

B. L. Lancaster Co., wholesale grocers and distributors, will erect a new warehouse at 24th and R Sts., at an estimated cost of $50,000.

California - Western States Life Insurance Co. will remodel the 20x160-ft. building owned by the company adjoining the home office building. Cost is estimated at $80,000.

Made Rite Sausage Co., 3535 2nd Ave., will expand quarters and facilities, spending an estimated $200,000 for building and equipment.

Sacramento Frosted Foods Co. plans to erect an additional food processing building at 818 D St. The building, of concrete and brick, will cost $50,000.

Herman Davis & Sons will erect a new building for optometry at 1213 L Street at an estimated cost of $60,000.

Sutton-Morf Tractor and Equipment Co. will erect new quarters at 1901 Broadway at an estimated cost of $57,000. This will provide sales, service, and storage facilities for tractors, power equipment, farm implements, and parts.

Greyhound Lines will expand facilities at 7th and L Sts., purchasing the Berry Garage building and expending $500,000 on the new Sacramento terminal.

American Fuels and Materials Company, 2700 Stockton Blvd., are enlarging facilities for sale of building materials and plan extensive expansion of the glass and glazing department at a cost of $100,000.

Country Maid Cream, 1030 J St., will remodel present quarters and expand, adding adjacent store building. Additional space will be utilized for fountain lunch and candy busines. Estimated cost is $95,000.

Survey Shows Scientific Application of Color Will Reduce Plant Accident Rate

A recent survey of 46 different type industrial and manufacturing plants revealed that the scientific application of color has provided clean, wholesome, morale - building working areas and the natural result has been the elimination of one of the prime sources of industrial accidents, district paint and branch managers of the Pittsburgh Plate Glass Company were told today.

"Improvement of actual environment in industry through the application of the Principles of Color Dynamics is emerging as one of the more significant advances in industrial safety made during the war years," E. D. Peck, general paint manager for the company, declared in an address at the Roosevelt Hotel.

Prior to the war, color was rarely conceded to be a safety morale factor in industry. Paint was considered only as a preservative in the average pre-war plant. As a result, color often was so misused that it actually produced industrial hazards.

Most plant walls were painted white and the machinery a dull, drab gray. This combination of reflecting and absorbing colors robbed the worker of whatever illumination was available. Unknowingly, he was placed under mental and physical strain.

However, demands from the military services for unprecedented amounts of war materials opened the way for the application of scientific color principles on a practical scale.

Seeking every possible means to produce a mountain of materials on time for the United States and allied military machines, production officials turned their plants over to the color engineers. As the shades of green, ivory, blue, yellow, and other up-to-now interior decorators' colors replaced the traditional gray, white and black, a new and functional means of promoting industrial safety, and consequently increased production, war born.

Peck revealed that in the survey of the 46 industries, a cross-section of the thousands of plants using the Color Dynamics system, plant officials credit engineered color as one of the basic factors toward attaining maximum safety.

He said, "This survey was not an attempt to determine the exact percentage value of Color Dynamics application as a safety or production factor. Since production officials are employing any number of new industrial incentive programs simultaneously, the aim of the survey was to establish the general trends and accomplishments of scientific color use particularly as it related to safety promotion."

One of the basic ideas of the Principles of Color Dynamics is its use for identifying safe and dangerous areas of production machinery. By use of focal and eye-rest colors, each part of the machine is so treated that moving parts, switches, levers, and wheels are spotlighted for the operator's convenience.

Peck quoted George Schneider, assistant general manager, Arrow Metal Products, Detroit, as stating: "The practice of painting vital parts of the machines in different colors has made operations much safer. Painting the handles ivory and switches orange has enabled our men to reach for controls almost automatically. We have also painted dangerous parts of the machines a bright orange so that the men are constantly warned away from the danger zone."

In concluding his address, Peck said: "It is evident that the engineered use of color in industry for safety purposes is still in its infancy. As more and more plants adopt this method of styling their plants and equipment, safety engineers will discover new and different ways in which color can solve safety problems. These plants will find, as the others already have, that Color Dynamics can be used as a specific safety 'tool".

ERNEST J. KUMP ON JURY TO PICK CONTEST WINNERS

Streamlining to Chicago, airlining thence to Atlanta, Georgia, is San Francisco architect Ernest J. Kump, to sit on the jury which will pick the winners in the nation-wide $10,000 prize architectural contest for best designs of a realistic small-family house.

The contest, which has attracted wide attention in architectural circles, is being conducted by "Progressive Architecture" (Pencil Points), national architectural magazine, and sponsored by Atlanta's big department store, Rich's Inc. Kump, whose design of Fresno's new City Hall won a national award, was chosen to represent the West on the jury.

AGC Of America To Hold Annual Convention

The 27th annual convention of The Associated General Contractors of America will be held February 18 to 22 at the Stevens Hotel in Chicago.

Managing Director H. E. Foreman announced today that all problems related to getting a large volume of construction under way in 1946 as rapidly as possible will be discussed by guest speakers, association officers and members.

Names of the speakers will be announced at a later date when final arrangements have been concluded with all those who will be able to attend and address the meetings.

This will be the first convention since 1942 to which it has been possible to invite the full membership of the association. Membership of the national association now includes more than 3,300 leading general contractors throughout the country.

"During 1946 the construction industry is faced with greater demands for its services than can be fulfilled even with several years of operations at levels higher than ever attained before," Foreman said. "Although the future is filled with uncertainties caused by shortages of materials and labor, rising prices, and other factors, the nation needs and wants construction and our industry must do everything possible to satisfy those needs as quickly as possible.

"At this convention we hope to explore the entire construction outlook and take action with a view to meeting the urgent needs of building, highway, heavy and all types of construction."

The opening session will be held the afternoon of February 18. Other convention sessions will be held Tuesday, Wednesday and Thursday of the week, concluding with the annual banquet Thursday evening.

OFFICE BUILDING OF FUTURE TO BE DUST- AND MICROBE-PROOF

New York.—The skyscraper of the future will not only be air conditioned. It will be screened for dust and protected against microbes, according to Robt. W. Dowling, president of City Investment Building.

Dowling told the building management division of the Real Estate Board that the new business buildings would also be equipped with concealed lighting and new heating devices that combine the best features of radiant, panel and hot air systems.

One of the largest new buildings now being planned, the speaker said, will have arcaded sidewalks, which will have the effect of widening the street at that point.

On the question of parking space Dowling voiced suggestions that buildings providing inside parking space should be rewarded with some sort of tax rebate.

GROOVER AND I

STRIKES

The press wires have just carried a story concerning a strike by the Rabbis in the Kosher meat markets of Los Angeles.

★ ★ ★

This brings to mind the fact strikes are not new. In the year B. C. 1491 there was a strike which changed the entire course of human history.

★ ★ ★

The Pharaohs, who held monopoly on the commerce, industries and black markets of Egypt, installed a "speed-up" system in their brickyards. They had a "task-and-bonus system"—without the bonus.

★ ★ ★

The order went out that brick makers were to maintain production of their daily quota of brick, but in addition were to gather and supply their own straw.

★ ★ ★

"Go ye, get your straw where ye can find it; yet not ought of your work shall be diminished".

★ ★ ★

This led to a strike by the Children of Israel, who walked off the job. The Red Sea proved to be a most effective picket line. Read the story in your Bible—Exodus, 5:6.

★ ★ ★

The Pharaohs also cut out the daily rest period of the workmen, adding another "beef" to this strike, which occurred 3,437 years ago.

NEW DOORHOLDER ANNOUNCED

A new idea in doorholders has just been introduced to the building, hardware, and institution fields. It's the Doormaster, a patented, spring - loaded doorholder which the manufacturers claim holds the heaviest doors without slipping.

This sturdy doorholder employs the spring idea in an entirely different way, bringing to bear much greater pressure without slipping. Doormaster is built compactly, closely hugs the door, thereby eliminating stumbling or tripping. A bullet-catch holds Doormaster firmly up and out of the way when not in use. Two flat head screws are all that are needed to mount this doorholder.

Doormaster is fabricated of durable aluminum and mounts a tough rubber foot firmly to the spring-loaded piston. This sturdy doorholder can be used for theatres, public buildings, stores, schools, office buildings, homes or wherever a rugged doorholder is needed. Door master list price is $1.95.

For further information write to Swallow Airpane Co. Inc., Wichita 1, Kansas.

Hundreds of Miles of Roads, Highways Recommended for Columbia Basin Project

Each of the 17,000 farms expected to be established in the Columbia Basin Project in south-central Washington will have direct access to a county road if recommendations contained in a report by a group of planning authorities are adopted by State, County and Federal agencies in developing vehicular routes for the area, the Bureau of Reclamation announced today.

Under the title "Highway Development", the planners' report points out that a coordinated network of roads and highways will increase safety, eliminate needless construction and provide maximum convenience for the thousands of settlers developing the newly irrigated region.

Travel in the Basin will justify construction of hundreds of miles of primary and secondary State highways, the report comments, estimating that daily use of these main roads will total more than 1,200,000 vehicle miles.

"The project area lies between the two major portions of the State now most heavily populated," the report continues. "It is about 80 miles long, from north to south, and from 30 to 60 miles wide. Hence, with appropriate planning, many segments of a State highway network, needed to interconnect portions of the project area, will also improve connections between adjacent parts of the State.

"It has long been recognized that a maximum degree of economy, safety, and service adequacy could be achieved if the road system for an irrigated area were as carefully planned as the irrigation system. The Columbia Basin presents an unusual opportunity for such planning, which will yield substantial benefits to the State, to the counties in which the project lies, and to the settlers."

Conforming with the Columbia Basin Project Act of March 10, 1943, plats of all farm units in each irrigation block in the area will be available before water is delivered. The planners advised that a tentative layout for county roads be prepared after the location of principal canals, State highways, and towns, but before the farm unit plats for irrigation blocks are formed. They also urged that rghts-of-way be reserved in the plats.

"The tentative road plans would then serve as guides in the preparation of farm unit plats and would be modified, if necessary, to meet requirements imposed by problems of developing farm units of sizes and shapes convenient for irrigation," the report adds.

A right-of-way of 150 feet is recommended for all State highways. If suggestions in the report are followed, roadbeds on primary routes would be 36 feet wide, each shoulder 7 feet wide, and surfaced width, 22 feet. On secondary State routes, roadbeds would be 30 feet wide, each shoulder, 5 feet, and the surfaced portion, 20 feet.

Investigators and advisers in the study on "Highway Development", also known as Problem 19 in Columbia Basin Joint Investigations, included representatives of the State Highway Department, officials of Adams, Grant, and Franklin counties, the Chicago, Milwaukee, St. Paul and Pacific Railway, Great Northern Railway Company, Northern Pacific Railway Co., Spokane, Portland, and Seattle Railway System, Union Pacific Railroad System, the Bureau of Reclamation, and the Bonneville Power Administration.

Copies of "Highway Development", may be purchased from the Supt. of Documents, Washington, 25, D. C., for 15 cents each.

CONSTR. EQUIPMENT DISTRIBUTORS TO MEET FEB. 11TH

The regular monthly dinner meeting of Construction Equipment Distributors Assn. will be held Monday, February 11, 6:30 p. m., at the St. Julian Cafe, 140 Battery street.

President Bob Hughes has arranged for a surprise guest speaker in addition to the report of those attending the A.E.D. convention at Chicago and a sound motion picture picture will be presented by entertainment committee chairman Bud Richter.

OFFICIAL PROPOSALS

FIRST PUBLISHED TODAY

Highway Improvements—Solano Co. An existng ferry moored on the Sacramento River (X-Sol-100-A).

STATE OF CALIFORNIA DEPARTMENT of PUBLIC WORKS DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 1200 North Center Street, Stockton, California, until 2 o'clock P.M. on **Feb. 19, 1946**, at which time and place they will be publicly opened and read, for performing work as follows:

An existing ferry moored on the Sacramento River about 0.5 mile upstream from Rio Vista in Solano County (X-Sol-100-A) to be repaired.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

The rates of wages, including overtime, holiday or Sunday rates, herein specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done at the site where the boat is to be left at the end of the work, to be as follows:

Classification	Rate per hour
Laborer	$1.00
Any classification omitted herein not less than	1.00

Overtime—one and one-half (1½) times the above rates. Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

STATE HIGHWAY ENGINEER'S ESTIMATE

Item 1. Dry-docking and delivering ferry.

Item 2. 4 thousand feet board measure miscellaneous timber.

Item 3. Miscellaneous repairs.

Item 4. 2,600 pounds miscellaneous iron and steel.

Item 5. 2,500 lineal feet caulking seams.

Item 6. Painting hull and superstructure.

FIRST PUBLISHED TODAY

Highway Improvement—Monterey County

STATE OF CALIFORNIA DEPARTMENT of PUBLIC WORKS DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 6, 1946**, at which time they will be publicly opened and read, in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Monterey County, between 2 miles south of Salinas and Salinas (V-Mon-2-B), about one and nine-tenths (1.9) miles in length to be graded, paved with asphalt concrete on cement treated base and on existing surfacing, and plant-mixed surfacing to be placed on the shoulders.

Bids are required on the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.50
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity or paving type)	1.70
Mechanical tamper and finisher operator (concrete or asphalt)	1.70
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.4375
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.3125
Truck driver (8 cubic yards and less than 14 cubic yards water level cpacity)	1.25
Intermediate Grade Labor	
Concrete vibrator operator	1.25
Headerboard man	1.375
Jackhammer operator	1.25
Oil distributor bootman	1.00
Oiler power shovels or cranes	1.25
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.0625
Truck driver (less than 4 cubic yards water level capacity)	0.90
Unskilled Labor	
Flagman	1.00
Laborer	1.00

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.25 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.00 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, includng overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regultions will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (See said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvements—Contra Costa County

SECOND ADVERTISEMENT

STATE OF CALIFORNIA DEPARTMENT of PUBLIC WORKS DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **February 27, 1946**, at which time they will be publicly opened and read, in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Contra Costa County, between Concord Avenue and four-tenths (0.4) mile west of Ohmer Station (IV-C.C-75,106-E,Cnd,C), about two and three-tenths (2.3) miles in length, to be graded and paved with Portland cement concrete.

Bids are required for the entire work described herein.

THIS IS A NATIONAL DEFENSE CONTRACT UNDER THE DEFENSE HIGHWAY ACT OF 1941

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant mixer operator	$1.45
Asphalt spreading machine operator	1.75
Carpenter	1.75
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity)	1.70
Mechanical tamper and finisher operator (concrete or asphalt)	1.70
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovl type controls (up to and including one cubic yard)	2.00
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (8 cubic yards water level capacity or more)	1.625
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.3125
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.1875
Intermediate Grade Labor	
Asphalt plant dryerman or fireman	1.40
Concrete vibrator operator	1.25
Headerboard man	1.375
Jackhammer operator	1.25
Oil distributor bootman	1.00
Oiler, power shovels or cranes	1.40
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Unskilled Labor	
Flagman	1.0625
Laborer	1.0625

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.1875 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.0625 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.0625 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable herto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (see said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

FOR BETTER BUILDING
NEWS OF MATERIALS, EQUIPMENT AND METHODS

PREFAB HOUSE

National distribution through lumber dealers is planned for a two-story prefabricated house called **HomeOla**, built of plywood with a steel "chassis." All wall and floor panels are of plywood stressed-skin construction with the panels glued to both side of light wood framing members. Floor sections are in 4-foot squares and have special wearing surfaces of vertical grain fir. Wall panels are 4 by 8 ft. Blanket insulation in both wall and floor units is placed during fabrication.

Built-up plywood roof rafters, completely fabricated at the factory, have been developed, over which longitudinally braced plywood roof decking is placed; finished roofing is conventionally applied. Roof insulation, in blanket form, is attached to the back of second-story wall and ceiling panels.

The house, exclusive of lot, is intended to sell complete for less than $3,000. Shipment of the house parts will be to building material dealers who will provide the crews for erection. Willisway System, 9 S. Clinton St., Chicago 6, Ill.

#

TEMPERATURE REGULATOR

A self-contained, spring loaded, internal pilot, piston operated **Temperature Regulator** for steam service features Duo-Matic Control—both accurate temperature regulation and pressure control obtained simultaneously with a single regulator. The unit has a thermostatic element with 100 deg. F. adjustable temperature range, equipped with metal diaphragms. All wearing parts are renewable. Leslie Co., 57 Delafield Ave., Lyndhurst, N. J.

#

HEAT PANELS

Immediate production of the **Base-Ray Heat Panel** has been announced by Burnham Boiler Corporation, Irvington, N. Y. Developed by research engineers at the University of Illinois, the panel is a hollow, cast iron baseboard unit (see AR, June, 1945, p. 124).

#

UNIT LOCK

A new lock, the Corbin Unit Lock, is said to offer home owners complete freedom from the annoyance of sticking and binding knobs and latches because it is assembled at the factory in one complete unit. Installation is simple, with no mortising necessary—the unit slips into a slot in the edge of the door and is made fast by two bolts without touching or adjusting the working parts in any way. P. & F. Corbin, New Britain, Connecticut.

#

DOORSTOP

An easily installed **Door Stop-Nut** slips over the top knuckle of a door hinge and is held secure by the hinge pin. Eliminating the need for baseboard or floor type door stops, the unit prevents the banging of doors against walls or furniture. Door Stop-Nut, Inc., 810 W. 76th St., Chicago 20, Ill.

#

DRAFTING AIDS
SLIDE RULE

The **Deci.Point**, a slide rule which places the decimal point in involved expressions with results up to 19 places, is now being manufactured of lightweight Dowmetal (magnesium metal alloy), surfaced with a flat white plastic said to be impervious to water or chemicals and virtually immune to abrasion from regular use. The rule first was introduced in a wartime "Demonstrator" model. Pickett & Eckel, 53 W. Jackson Blvd., Chicago, Ill.

ALL-PURPOSE DEVICE

An all-purpose drawing and measuring device, the **parva-graph** is accurately designed and mathematically calibrated to serve as a square, dividers, protractor, triangle, ruler, compass, French curve and miter.

The Parva-graph consists of a combination square and a removable miter arm which can be mounted on the square through either of two mounting holes. A wing nut locks the arm at any desired position. Made of tought, transparent plastic. Parva Products Co., West Haven, Conn.

#

METAL WINDOWS
STORM SASH STORAGE

Manufacture of the **Rusco All-Metal Combination Window** has been resumed, it has been announced, with an important change in design incorporated. Storage of the lower storm sash is now provided within the window unit itself.

The compact unit provides screen storm sash and weatherstripping, plus a patented spring-steel clip arrangement that permits the lower storm sash to be raised and held in storage space behind the upper sash. The F. C. Russell Co., Cleveland, Ohio.

Expected soon to be in production is a new aluminum extruded window unit, the **Winco**, which has no pulleys, weights, cords or springs, and requires no regular weatherstripping. Can be left open in rain or snow, as lower sash swings in. Also made for glass block installations. Watco Engineering, Inc., 2200 Scranton Road, Cleveland 13, Ohio.

#

LIGHTING NEWS
COLD-CATHODE LAMP

Addition of a cold-cathode K lamp to a regular line of fluorescent products has been announced. The new lamps will be instant-starting, will have a rated lif eof 10,000 hours. They will be made in both 72- and 96-in. lengths, 1-in. in diameter, will operate on a standard 120 milliampere multiple ballast. Sylvania Electric Products, Inc., Danvers, Mass.

SERVICE STATION

Commissioned by Allegheny Ludlum Steel Corp. to design an automotive service station looking toward expected competitive development in that field, George Cooper Rudolphs, New York industrial designer, has come up with the **Moto-Serv.** Features: eligibility for mass prefabrication; ease of installation; high flexibility and ready expansion; easy upkeep.

The basic design of the Moto-Serv consists of an office and storeroom cubicle and a single island-and-canopy unit with two stainless steel tubular supports footed in stainless castings.

#

FIBERGLAS SOUNDPROOFING HELPS POLICE RADIO

Improved radio transmission from the radio operations room at the Newark, Ohio, police headquarters has resulted from the installation of inch-thick Fiberglas acoustical board on the walls and ceiling of the room and in other parts of the building. The room is used to maintain two-way radio communication between headquarters and the radio-equipped patrol cars.

#

AIR CONDITIONED PRINTING PLANT

Air conditioning which controls temperatures to within one degree and humidity to within one per cent of desired levels is being installed in a new $1,900,000 printing plant now under construction for the Newman-Rudolph Lithographing Company in Chicago. It is expected to result in faster and less costly printing on paper that is more thoroughly seasoned and thus of better quality.

The building, designed by R. N. Friedman, of Alschular and Friedman, Architects, will have a brick exterior with granite and Indiana limestone trim. Construction will be steel and concrete, with a floor load of 250 lbs. per sq. ft. Four stories in height, the plant will cover 53,500 sq. ft., will be ready for occupancy about the first of next May.

#

HOUSE "CORE"

A new home-building unit engineered for assembly-line production is an enclosed central core containing household heating, hot water, plumbing, electricity and meters. Attached to three sides are a complete kitchen, laundry and bathroom, with floor areas, walls, windows and doors placed according to individual house plans. The unit is said to be adaptable to both conventionally-built and prefabricated houses ranging in price from $3,000 to $10,000.

The enclosed core has service access through panels, is equipped with forced warm air furnace—gas or oil; hot water heater—gas or electric; all plumbing, vents and stacks; chimney connections; electrical connections. Kitchen equipment includes refrigerator, cabinets, gas or electric range and sink; an electric washer is provided in the laundry. Ingersoll Division, Borg-Warner Corporation, Kalamazoo, Mich.

#

NAILABLE STEEL

Nailable steel for framing in residential and light industrial construction is now available, it has been announced. Consisting of grooved framing sections, this is the framing which is a basic part of Quonset huts. The groove permits the driving of nails into the metal framework. Stran-Steel Division, Great Lakes Steel Corp., Penobscot Bldg., Detroit 26, Mich.

#

PORTABLE WASHER

Especially designed for apartment use, the **1900 Whirlpool Portable Washer** will hold 2 lbs. of clothing, has a 2½ gal. water capacity, rinses as well as washes. Its small size—13-in. in diameter and 20-in. in height—permits easy storage when not in use. Nineteen Hundred Corp., St. Joseph Michigan

THEATER CONSTRUCTION EQUIPMENT

Anticipating a widespread development in drive-in theater construction following the lifting of wartime restrictions on building materials, equipment and gasoline, the Theater Equipment Section of RCA Victor has announced plans to supply a complete line of sound and projection equipment designed to meet the special requirements of this type of theater.

The line will include new types of in-car speakers, combined terminal-box and speaker-receptacle units, and self-adjusting amplifier systems. The in-car speakers are said to be 100 per cent weatherproof, so that they can be permanently located at parking spaces on the ramps, within reach of patrons from their car windows. They are specially designed to be acoustically correct for in-car operation; a volume control on the front of the speaker permits the patron to adjust the sound level to his own satisfaction. Radio Corp. of Amferica, RCA Victor Division, Camden, N. J.

#

REFLECTIVE INSULATION

A low-cost insulation material just announced, **Sisalation**, is composed of specially-treated asphalt, fiber reinforcement, and aluminum-coated Kraft paper. It is said to reflect heat and cold very much as a mirror reflects light, keeping the heat in and the cold out in winter, and reversing the process in summer. It also prevents moisture-vapor within the home passing into the sidewalls and condensing, it is claimed, and prevents infiltration of dust and dirt through walls, around windows and doors. The Sisalkraft Co., 205 W. Wacker Drive, Chicago.

#

BATHROOM SPOT HEATER

A new infrared lamp producing radiant heat is built of special ruby red glass which is highly resistant to temperature extremes. It has withstood a temperature shock test of more than 500 deg. F., the manufacturer reports, and has continued to burn even after being dipped in ice cold water.

Its ability to withstand temperature shocks, it is suggested, will make it particularly suitable as a spot comfort heater for the bathroom, where it is apt to come in contact with water drops. Westinghouse Electric & Mfg. Co., 306 Fourth Ave., P. O. Box 1017, Pittsburg 30, Pa.

DOWNLIGHTING

To provide downlighting which is particularly useful in store illumination, two new silvered bowl lamps have a circular inside frosted "window" at each bulb's end. The lamps are rated 300 and 500 watts. In the former, the downlight filters through a 2¾-inch diameter inside frosted window; the latter has a circular window with a diameter of 3-in. General Electric Lamp Dept., Nela Park, Cleveland, Ohio.

LUMINOUS SHIELD

Now available is a patented luminous plastic switch plate shield which will fit over any standard toggle or push button plate and, when exposed to any normal light during the day, will glow all night. Originators, Inc., National Outlet Co., 612 N. Michigan, Chicago 11.

CONVENIENCE OUTLET

To make it easier to find and plug into convenience outlets, the new **LumiNite Duplex Convenience Outlet Plate** features a small shielded electric bulb which burns continuously. The plate is molded in a single piece of ivory plastic, will fit any standard duplex convenience outlet. Associated Projects Co., 80 E. Long St., Columbus 15, Ohio.

STARTER

A new split-second starter for fluorescent lamps, the **Jack Rabbit**, is designed to fit in conventional starter sockets for use with instant-starting lamps. The split-second starting action, it is claimed, is accomplished with unusually high operating efficiency. With it, manufacturers can provide split-second starting in fixtures equipped with conventional low-cost ballasts. It is said to provide approximately 13 per cent greater operating efficiency than high-voltage instant-starting ballast systems. General Electric Co., 1285 Boston Ave.. Bridgeport 2, Conn.

BALLASTS

Two new special ballasts have been announced by one company. One is a single-lamp type, designed for the operation of a new line of 13-watt lamps used primarily in show cases and similar installations; the other is for the instant-starting operation of "Slimline" lamps designed for decorative and special lighting purposes. General Electric Co., Schenectady, New York.

#

HOME FREEZERS

Expected to be available to the general public shortly after the first of January, a 4 cu. ft. cabinet or horizontal model home freezer is 36-in. high, 34½-in. long, and 24-in. wide, weighs 250 lbs. Finish is white baked enamel. Slightly less than 1½ kw of electricity are necessary to run the freezer in a normal room temperature, the manufacturers report, or a period of 24 hours. Frigidaire Division, General Motors Corp., Dayton, O.

Planning Ahead With Glass for More Enjoyable Living. Over a hundred ideas for the use of glass in residential buildling—in living room, hallways, dining room, kitchen, bathroom, bedroom, basement and attic. Includes basic information on solar heating and "window conditioning." 30 pp., illus. Libbey-Owens-Ford Glass Co., Toledo 3, Ohio.* 10 cents.

HEATING

Byers Radiant Heating in a Garage (Case Study No. 5). Application of radiant heating in an industrial garage and service station. Describes the installation, design of the heating coils, operation. 6 pp., illus. A. M. Byers Co., Pittsburgh, Pa.*

Certified Counterflow Air Conditioner Heating System; Certified Gravity Steel Furnace and Air Conditioning Units; Mammoth Certified Vertical Steel Tubular Heaters. Descriptive circulars including complete specifications for each type of furnace. 4 pp. each, illus. Stainless & Steel Products Co., 1000 Berry Ave., St. Paul 4, Minn.

Convector Radiation (Bulletin 245). Describes method of operation, advantages claimed. 4 pp., illus. Modine Mfg. Co., Racine, Wis.*

Econostat Temperature Control System. Heat regulation system controlled by outdor temperature. Description of system and how it works, features, applications. 8 pp., illus. Barber-Coleman Co., Rockford, Ill.*

S.B.I. Rating Code (A.I.A. File No. 30-C). The Steel Boiler Institute Rating Code covering commercial and residential steel boilers. Includes standardized sizes for mechanically-fired boilers, a new grate area formula and furnace volume requirements for hand-fired boilers and a code for testing oil-fired boilers. 24 pp. Steel Boiler Institute Inc., 366 Madison Ave., New York 17, N. Y. 50 cents.

JALOUSIES

Jalousies. Description of and for jalousies; specifications; stock sizes; diagrams. 4 pp., illus. Pro-Tect-U Jalousie Co., 2762 S. W. 10th St., Miami 35, Fla.

PARTITIONS

Certain-Teed 2-in. Solid Plaster Partition. Description of a non-load bearing partition for new construction or remodeling. Includes specifications and methods of construction. 6 pp., illus. Certain-Teed Products Corp., 120 S. La Salle St., Chicago, Ill.*

PIPING

Volumetric Capacities of Tube-Turn Welding Fittings. Formulae used to compute the volumetric capacities, and tables giving the volumetric capacity in cu. in. of the most commonly used Tube-Turn welding fittings. 10 pp., illus. Tube Turns, Inc., Louisville 1, Ky.

PLASTICS

Plastic Primer. Factual information on the phenolic plastics, with a table showing the characteristics and uses of various phenolic compounds. 8 pp., illus. Durez Plastics & Chemicals, Inc., North Tonawanda, N. Y.*

Velon and Foamex. Description of the two materials, their qualities and uses, plus two pages of general information on molded and extruded plastics. 20 pp., illus. Firestone Industrial Products Co., Akron, Ohio.*

The Watertown Book of Plastics. General information on thermosetting and thermoplastic materials, saran, lucite, cerex, nylon and polyethylene, and specific information (including properties chart) on Neillite. Also a discussion of molding methods and engineering details. 44 pp., illus. The Watertown Mfg. Co., Watertown, Conn.

RECONVERSION PLANNING

Production Planning Data. A set of production planning cards and data sheets intended for use in reconversion, provision for expanded facilities, and new building plans. Provide scale machine models to be placed on factory floor plan and arranged to meet specific requirements. Plan-O-Mill Corp., 1811 E Eight Mile Road, Hazel Park, Mich.

RUBBER

Cellular Rubber. Describes various forms in which sponge rubber, bonded fiber and other subdensity materials are manufactured. 4 pp., illus. Sponge Rubber Products Co., Shelton, Conn.

STEEL

Jessop Stainless Steels. The various types produced by Jessop, their physical properties and mechanical characteristics, plus a page of information on the company's stainless-clad steels. 8 pp., illus. Jessop Steel Co., Washington, Pa.*

SURFACE COATING

Aquella. Question and answer brochure describing a mineral surface coating that waterproofs and dampproofs interior and exterior porous masonry surfaces such as concrete, masonry blocks, common brick, rough plaster and stucco. 4 pp. Prima Products, Inc., 230 Fifth Ave., New York 1, N. Y.*

VENTILATION

Put the Wind to Work. Bulletin on the "Agitair" air exhauster. Typical applications, engineering data selecting the proper size, location principles. 10 pp., illus. Air Devices, Inc., 17 E. 42nd St., New York 17, N. Y.

WINDOWS

The Ultimate in Modern Ventilation and Vision. Descriptive folder on an aluminum package window unit. Gives specifications and installation details. 4 pp., illus. Watco Engineering, Inc., 2200 Scranton Road, Cleveland 13, Ohio.

COMPLETE BIDS

INYOKERN, Kern Co., Calif.—As previously reported, Haddock Engineers, Ltd., 129 W. 2nd St., Los Angeles, at $846,809, submitted the low bid to and was recommended for the award of contract by the U. S. Navy, officer in charge of construction, U. S. Naval Ordnance Test Station, Inyokern, February 5, for the construction of miscellaneous buildings, paving and utilities in area "K," Hangar No. 2 (Yakutat), paving and utilities, and a supersonic building and appurtenances thereto at the U. S. Naval Ordnance Test Station, Inyokern; Specification 17379, NOy 13211.

The work in general comprises the following: Miscellaneous construction in the K-2 area (firing barricade and observation building of concrete with plumbing, electric wiring, air conditioning, observation mirrors, cesspool, etc.; two magazines, corrugated metal and concrete, complete with all necessary bonding and grounding, and covered with stabilized earth fill; spotting tower, steel frame construction with concrete foundation, including the armored platform and all necessary electric wiring; six loader barricades constructed of concrete with all necessary electric wiring; four camera control barricades constructed of concrete, complete with necessary electric wiring; roads, asphaltic concrete pavement, together with all necessary grading; the grading and oiling of all shoulders adjacent to the launcher platform and the grading of the plate storage area; drilling a well, constructing a pumphouse, and installing pump complete with all electric wiring, piping and controls; moving of steel water tank and wood tower from their present location to the new location, including new concrete foundation, necessary piping, wiring and controls; installation of an electrical distribution system, including all services as detailed; spotters' shelters of wood frame construction with three sides and top covered with steel plate; construction of wood frame garage, concrete pit and floor, composition roof, together with necessary facilities and cesspool).

Temperature control building (reinforced concrete construction, complete with electric wiring, all necessary water connections, monorails, insulation, air conditioning, heating, plumbing, etc.).

Steel frame hangar building (concrete foundation and floor, asbestos cement siding and composition roofing, complete with all necessary heating, ventilating and air conditioning, plumbing, electrical facilities and all other appurtenant work; construction of a conduit from present boiler house to the hangar, complete with steam, condensate and drip return pipelines, together with all manholes and appurtenances; construction of concrete aprons with tiedown anchors; construction of all required road work; construction of all necessary ramps and platforms; construction of and connection of all necessary sewer and water services; construction of electrical transmission line extension, complete with transformer and all other required work; cutting off and covering four plug boxes, complete with water, air and electric lines).

Supersonic building (reinforced concrete), with automatically controlled vertical sliding doors, bridge crane, monorails and all required equipment; construction of covered concrete walkway, concrete with transite roof, supported pipe frame structure; loading dock of reinforced concrete). Completion time, 240 days.

Bids were submitted on the following items:

(1) lump sum, entire work complete;
(2) deduct from (1) for omission of entire "K" area project;
(3) deduct from (1) for the omission of entire hangar No. 2 (Yakutat) project;
(4) deduct from (1) for the omission of the supersonic project;
(5) deduct from (1) for the omission of the 2 spotters' buildings in the "K" area;
(6) deduct from (1) for the omission of the garage and equipment building in "K" area;
(7) deduct from (1) for the omission of road construction from 0 plus 00 to Sta. 115 plus 00;
(8) deduct from (1) for the omission of road construction from Sta. 9 plus 00 to Sta. 186 plus 06.91 in the "K" area;
(9) add to or deduct from (1) for substitution of road-mix surfacing for asphaltic concrete surface on all roads as shown on "K" area drawings;
(10) deduct from (1) for the omission of compaction and oil penetration stabilization;
(11) deduct from (1) for the omission of paving section "X" of the hangar No. 2 (Yakutat) apron;
(12) deduct from (1) for the omission of paving marked section "X" and section "Y" of the hangar No. 2 (Yakutat) apron;
(13) deduct from (1) for the omission of the paving marked section "X," section "Y" and section "Z" of the hangar No. 2 (Yakutat) apron;
(14) deduct from (1) for the omission of the public address system and the intercommunicative system in the hangar building;
(15) deduct from (1) for the omission of the sprinkler and deluge fire protection systems in the hangar building;
(16) add to or deduct from (1) for the substitution of a concrete tunnel for steam distribution to hangar No. 2;
(17) deduct from (1) for the omission of all painting on concrete wall and ceiling surfaces inside all buildings, except in the supersonic building;
(18) price per ft for well drilling.

The bidders were:

(A) Haddock Engineers, Ltd.
(B) James I. Barnes Construction Co.
(C) Johnson, Drake & Piper.

38—ELECTRIC LIGHTING TRANSMISSION LINES EQUIPMENT

2/8/46 • • 38
BIDS POSTPONED

OROVILLE to Sacramento, Calif. —Until Feb. 25, 10 A. M. (bids postponed from Feb. 11, 10 A. M.), bids will be received by the Bureau of Reclamation, Denver, Colo., under Spec. No. 1152, for the construction of a 230-kilovolt transmission line from Oroville to Sacramento.

The transmission line, approximately 56 miles in length, will be a 230,000-volt, 3-phase, 60-cycle, 3-wire, single-circuit of steel-tower construction. The towers will be from 60 feet to 110 feet in height. The conductors for the line will be either 795,000-circular mil aluminum, steel reinforced, or 500,000-circular mil expanded type copper. Two transpositions will be constructed in the line. The tower footings will be of the reinforced concrete type. The principal items of work and the approximate quantities involved are as follows:
(a) For aluminum conductors (266 towers);
3200 c.y excav. for tower foundations;
1600 c.y. concrete for towe foundations;
furnishing and placing 22,000 lbs. of reinf. bars for tower foundations;
placing 67,000 lbs. of steel stubs for tower footings;
erecting 4,000,000 lbs. of structural steel for towers.
(b) for copper conductors (298 towers):
3600 c.y. excav. for tower foundations;
1800 c.y. conc. for tower foundations;
furnishing and placing 24,000 lbs. of reinf. bars for tower foundations;
placing 75,000 lbs. of steel stubs for tower footings;
erecting 4,500,000 lbs. of structural steel for towers.

In addition to the above items, the installation of insulators and the stringing of conductors will also be required.

This invitation for bids does not cover the purchase of materials which are to be furnished by the government. Materials to be furnished by the contractor and those furnished by the government are described in the specifications which will be a part of the contract.

The work shall be commenced within 15 calendar days after date of receipt of notice to proceed and shall be completed within 180 calendar days from the date of receipt of such notice.

No charge to prospective bidders for copies of the specifications and drawings; to others, $1.25 per copy, not returnable.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: R. L. Boke, regional director, Old Post Office Bldg., 7th and K Sts., Sacramento 14; I. C. Harris, acting construction engineer, Redding, Calif.; Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C.

Prospective bidders desiring to visit the site of the work should communicate with the acting construction engineer.

The Bureau of Community Facilities, FWA, 2223 Fulton St., Berkeley, Calif., awarded funds in amount of $16,900 to assist in preparation of the plans.

2/8/46 9

PROGRAM APPROVED

PHOENIX, Maricopa Co., Ariz.—The Phoenix Elementary School District, Dr. Donald E. Tope, superintendent, has approved a proposed building program and the calling of a bond election soon to finance the work in the district at a cost of $1,750,000.

An outline of the program follows:

A new building for colored children to be located on 15th Ave. south of Buckeye Rd.

This building will include administrative offices, 10 regular classrooms, a shop, homemaking room, library, art and music room, an auditorium and a lunchroom.

Franklin and Whittier schools each are to have four new classrooms, utility rooms, a shop, homemaking room and a lunchroom. At Garfield School a new lunchroom will be erected and a new building for the Garfield School District is to be constructed on a site to be acquired east of 16th St.

The new building for the Garfield School will consist of administrative offices, 10 regular classrooms, a shop, homemaking room, library, an art and music room, an auditorium and a lunchroom.

Additions to Booker T. Washington School are to include two classrooms, a shop, homemaking room, library and music rooms, an auditorium and a lunchroom.

A new building is to be erected on the site of the Stevenson School to house the upper grade children of the district The structure will have eight classrooms, utility rooms, a shop, homemaking room, library and an art and music room. A lunchroom for the school will be in a separate building.

The school system plans to acquire a new site in the southeast part of Phoenix for a building for primary grade children. This unit is to replace Lincoln School, which is located on the route for the proposed truck freeway.

Lincoln School's new home will consist of administrative offices, 12 classrooms and a kindergarten.

Plans also include the purchase of a school site in the northwest part of Phoenix to take care of future development in that area, and a new lunchroom for Adams School.

At present, building plans are only in the preliminary sketch stage. The architects for the program have not yet been selected.

2/8/46 9

FUNDS AWARDED

SCHOOL BLDG. Est. Cost, $135,000

MESA, Maricopa Co.. Ariz. School District No. 4.

Construction of an auditorium (900 students), 3 classrooms, a 6-bus garage and equipment. Approximate floor area, 14,860 sq. ft.

2/8/46 9

BOND ELECTION

COMPTON, Los Angeles Co., Calif.—The Compton Junior High School and Junior College District will vote May 17 on a proposal to issue bonds in the amount of $985,000 to finance improvements in the district.

Of the total amount, $166,500 is earmarked for recommended improvements to the Lynwood Junior High School as follows:

Eleven classrooms, $88,000.
Gym shower additin, $30,000.
Cafeteria kitchen equipment, $15,500.
Furniture and equipment, $6000.
Ground improvement, $2000.
Girls' exercise room, $15,000.
Corrective exercise room, $6000.
Boys' storage room, $2000.
Girl' storage room, $2000.
Total, $166,500.

2/8/46 9

BOND ELECTION

SOUTH PASADENA, Los Angeles Co., Calif.—The South Pasadena Elementary School Board may call for a $550,000 bond issue to raise funds with which to rehabilitate existing elementary school buildings and entirely rebuild the Marengo School, South Pasadena, for the district.

Estimated cost of the building program as indicated in a survey authorized by the board is $599,800, but $550,000 is the maximum that the board can ask for in a bond issue.

Breakdown of the costs are as follows: New Marengo School, $209,000; El Centro rehabilitation, $90,100; Las Flores, $68,700; Lincoln, $39,200; Oneonta, $116,600; improvement of school grounds, $10,000; architect's fees, $51,800; equipment, $20,000. Total grand cost, $599,800.

2/8/46 10

APPROVED

Louis C. Dunn Co., 799 Monadnock Bldg., San Francisco.

Erbentraut & Summers, 446 Sixth St., San Francisco.

Horace J. Silno, 23 W. 7th St., Pittsburg.

G. E. Seeno & Sons, 150 E. 2nd St., Pittsburg.

Let your HEAD take you

(The average American today has a choice of just going where "his feet take him", or choosing wisely the course to follow. Let's skip ahead 10 years, and take a look at John Jones—and listen to him . . .)

"SOMETIMES I feel so good it almost scares me.

"This house—I wouldn't swap a shingle off its roof for any other house on earth. This little valley, with the pond down in the hollow at the back, is the spot I like best in all the world.

"And they're mine. I own 'em. Nobody can take 'em away from me.

"I've got a little money coming in, regularly. Not much—but enough. And I tell you, when you can go to bed every night with nothing on your mind except the fun you're going to have tomorrow—that's as near Heaven as man gets on this earth!

"It wasn't always so.

"Back in '46—that was right after the war and sometimes the going wasn't too easy—I needed cash. Taxes were tough, and then Ellen got sick. Like almost everybody else, I was buying Bonds through the Payroll Plan—and I figured on cashing some of them in. But sick as she was, it was Ellen who talked me out of it.

" 'Don't do it, John!' she said. 'Please don't! For the first time in our lives, we're really saving money. It's wonderful to know that every single payday we have more money put aside! John, if we can only keep up this saving, think what it can mean! Maybe someday you won't have to work. Maybe we can own a home. And oh, how good it would feel to know that we need never worry about money when we're old!'

"Well, even after she got better, I stayed away from the weekly poker game—quit dropping a little cash at the hot spots now and then—gave up some of the things a man feels he has a right to. We didn't have as much fun for a while but we paid our taxes and the doctor and—we didn't touch the Bonds.

"What's more, we kept right on putting our extra cash into U. S. Savings Bonds. And the pay-off is making the world a pretty swell place today!"

The Treasury Department acknowledges with appreciation the publication of this advertisement by

BIDS WANTED

DENVER, Colo. — Until February 14, 2 P M., bids will be received by the Bureau of Reclamation, Office of Director of Finance, Custom House, Denver 2, Colo., under Inv. No. D-33,250-A-1 for furnishing the following supplies, f.o.b. shipping point and/or Marysville, Calif., and/or intermediate points between Sacramento and Oroville, Calif.:

Schedule No. 1

(1) 1,135,200 lin. ft. (215 miles) steel reinforced, bare aluminum stranded conductor having a nominal cross-sectional area of 795,000 circular mils and an effective copper equivalent cross-sectional area of 500,000 circular mils;
(2) 300 only compression connectors suitable for the conductor furnished under item 1;
(3) 200 only compression dead-end connector assemblies, complete with jumper connectors, suitable for the conductor furnished under item 1;
(4) 100 only compression repair sleeves suitable for the conductor furnished under item 1;
(5) 1250 only tapered armor-rod assemblies for use with the conductor furnished under item 1, complete with two armor-rod clamps per assembly;
(6) 100 only parallel groove clamps suitable for the conductor furnished under item 1;
(7) 200 only vibration dampers suitable for the conductor furnished under item 1;
(8) one set equipment for installing the connector dead-ends and repair sleeves furnished under items 2, 3 and 4 on the conductor furnished under item 1;
(9) one set (2 wrenches) wrenches for installing armor-rod assemblies furnished under item 5;
(10) two only hollow screw wrench for armor-rod clamps;

Schedule No. 2

(11) 1,135,200 lin. ft. (215 miles) hollow, hard-drawn bare copper conductor having a nominal effective copper cross-sectional area of 500,000 circular mils;
(12) 300 only compression or rolled type connectors suitable for the conductor furnished under item 11;
(13) 200 only dead-end compression or rolled type connector assemblies, complete with dead-end connectors and jumper connectors suitable for the conductor furnished under item 11 with clevis plates suitable for attaching to dead-end insulator assemblies;
(14) one set equipment for installing the connectors furnished under items 12 and 13 on the conductor furnished under item 11.

Specifications obtainable from the above office.

Fifty-sixth Year—Vol. 56—No. 29 SAN FRANCISCO, MONDAY, FEBRUARY 11, 1946 PRICE 15 CENTS PER COPY

PLANS and Speculations

Oakland: Limited quantities of building equipment and materials are now available for direct sale to contractors and builders for new home construction at the California Quartermaster Depot, 15th and Clay Streets. Included among the items are electrical and plumbing fixtures, supplies and tools, and roofing materials. Prospective buyers should write the depot, care of the Salvage Officer, itemizing materials needed. . But, here's the catch—a limit has been set on the amount any one builder can purchase—$800 worth.

oOo

San Francisco: The city's Park Commission has outlined a program to spend $8,500,000 in capital improvements during the next five years. It asked for $2,300,000 in the fiscal year 1946-47. The program includes: water supply and irrigation system for Golden Gate Park, $750,000; development of Fleishhacker Zoo, $2,000,000; development of Yacht Harbor and Marina Park, $1,500,000; new seats for Kezar Stadium, $500,000; two 18-hole golf courses, $1,250,000; McLaren Park development, $250,000; nine-hole pitch-putt course, $50,000; rifle range, $75,000.

oOo

Sacramento: Friend and Terry Lumber Co., Front and T Streets, will rebuild and reconstruct their entire plant as materials become available. Buildings destroyed by fire will be replaced and the mill and cabinet shop will be extensively remodeled. Estimated cost of the entire project is $100,000. . . . Lucky Stores, subsidiary of Blair and Company, New York investment bankers, will construct a $300,000 super market on Broadway between 30th Street and Alhambra Blvd.

oOo

San Jose: Plans for a new Firestone Tire and Rubber Company sales building representing an over-all cost of approx. $140,000 were announced with sale to F. Langdon Hubbard of property just south of the YWCA on Second Street. Hubbard said he would erect a new structure and remodel the present one for a combined square footage of 8000 feet. The new structure will be 40x100 feet. The transaction was handled by Thos. L. Mitchell & Co. . . . Warner Press, religious publishing house, will move its western headquarters from Sacramento to San Jose and build a $75,000 plant at Stockton Avenue and Clinton Street. Purchase of the property was completed in a transaction handled by the Arnold Jamison Company. The plant site has a 121-foot frontage on Stockton Avenue, a 155-foot frontage on Clinton Street and a 97½-foot frontage on Julian St. The reinforced concrete structure will occupy the entire property.

Builders To See How Carpenter Nails To Steel

A "magnanimated" view of a nail being driven into a steel joist and revolving wall sections composed of various building materials applied to metal framework will be displayed during the National Association of Home Builders convention at Chicago, Feb. 25-28.

Details of the exhibit, which will demonstrate how carpenters now are able to use steel rather than wood for frames of dwellings, were made public today by the Great Lakes Steel Corp., Stran-Steel Division, Detroit. The division manufacturers nailable steel framework and Quonset buildings.

The magnified, animated nailing demonstration will be provided by representations of a yard - long hammer swinging down on a 12-inch nail in an 18-inch Stran-Steel cross-section. The eye thus will be able to follow progress of the nail as it is driven into the framing member's patented groove and is clinched by the metal.

This big hammer will be in action beside a photomural backdrop in an exhibit room furnished at one side with a long, soft-cushioned seat for the convenience of convention visitors. Photographs comprising the mural will be of single dwellings, apartments, commercial buildings and churches built with Stran-Steel. Illuminated cartoons below the mural will show a frustrated termite, detoured lightning bolt, nonplussed flames and other characterizations depicting metal framing's advantages.

Four revolving wall sections will form the exhibit room's third side. These sections will be constructed of Stran-Steel framing with wood, asbestos shingle, brick veneer and metal sidings applied to their respective exteriors, and metal lathed plaster, plaster board, wood panel and tile applied to the interiors. All construction details will become visible as the sections rotate.

Construction Of Dwelling Units No. 1 Opportunity

Construction of new dwelling units—the country's number one industrial opportunity — can provide sustained profits and at the same time full employment to more than four million workers for the next 10 to 12 years. If geared to public demand for moderately priced houses, the construction industry could help to carry the country safely past the danger of a postwar depression.

On the other hand, a short term, high priced boom - and - bust construction period—such as the country saw after the last war — not only would fall short of the objective of providing necessary housing, but would itself powerfully increase the forces in the direction of depression.

475,000 Units for 1946

According to the National Housing Administration, if the probable maximum of 475,000 units (new construction plus structural conversions) are added to the nation's supply in 1946, and if all present and probable new vacancies are fully occupied, the country will still be 11,390,000 units short of its needs.

If 1,250,000 of these units were built each year at an over-all average selling price of $5,000, between four and four and a half million jobs would be created in residential building alone. This is equal to 20 per cent of the peak wartime industrial employment, and would provide several times as many jobs as the 1941 automotive industry.

Similar Situation in 1918

A similar opportunity was present at the end of 1918. The national housing deficit then was estimated at 403,000 units, and a building boom got underway. It lasted just one year.

In 1919 building costs began to get out of hand. Buyers grew timid. Building dropped 40 per cent; construction costs then fell.

Building Resumed in 1922

By 1922 the deflation in prices permitted resumption of building which then continued for several years. Construction costs, however, stayed far above the levels of other prices, and carrying charges bore heavily upon home buyers.

By 1926 the industry had again priced itself out of the market, and home building began to decline. The slump had serious consequences, both for home purchasers and for the nation, and undoubtedly was a major factor in bringing on the great crash of 1929.

GROOVER AND I

. . . AND MOLLY

As a rule I create my own copy, but here is a line lifted from the McGee and Molly radio program well worth repeating:

★ ★ ★

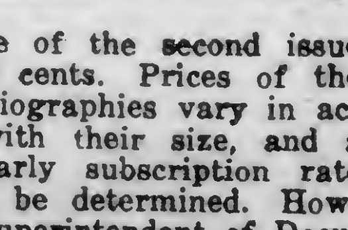
Doc Gamble: "I wish every boy of 18 could read his own obituary. He would then correct it or live up to it."

★ ★ ★

The same thought might be helpful at the age of 28 or 38.

★ ★ ★

Even age 48 might not be too late for minor corrections!



V

HIGH ACCIDENT RATE

For almost every mile of California's rural state highway system, one person was either killed or injured in 1944, the California State Automobile Assn. points out. Casualties totalled 11,107 for 12,869 miles of the road system. Major traffic routes, comprising 20 per cent of the state highway mileage, were the scenes of 47 per cent of the accidents.

V

ANOTHER GERMAN MYTH

"We have learned that German science is not of the high order we had been led to believe. Propaganda in behalf of German science has been effective over a long period. Prior to the first world war we accepted superiority of German scientific knowledge in this country.

"My visits to German plants have convinced me that we are superior to them in every way."

This statement comes from Dr. Gustav Egloff, leader in petroleum research and one of the nation's top scientists. He knows whereof he speaks. Isn't it about time for Uncle Sam to stop taking off his hat to the other nations of the world, not only in this field but in many others?

Second Issue Bibliography Of Reports On Sale

The second issue of the "Bibliography of Scientific and Industrial Reports Distributed by the Office of the Publication Board", was placed on sale by the Superintendent of Documents, Government Printing Office, on February 1, the Office of the Publication Board said.

The bibliography, issued in weekly installments, contains the serial numbers, prices, and titles of reports obtainable from OPB. The reports each are grouped according to subject matter. A brief summary of the contents of each report is included in the bibliography.

The price of the second issue will be 20 cents. Prices of the weekly bibliographies vary in accordance with their size, and a definite yearly subscription rate cannot yet be determined. However, the Superintendent of Documents will accept $10.00 as initial payment for the service and will notify subscribers when additional remittance is required. Copies of the bibliographies also may be purchased singly.

Orders for the bibliographies should be accompanied by check, money order, or Superintendent of Documents coupons and should be addressed to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The second issue, comprising 38 pages and covering 516 reports, will contain listings under the following subject headings: chemicals and allied products, with 359 titles; fabricated metal products (except ordnance, machinery, and transportation equipment) with 5 titles; food and kindred products, with 4 titles; machinery (except electrical), with 5 titles; ordnance and accessories, with 8 titles; paper and allied products, with three titles; printing, publishing and allied industries, with one title; products of petroleum and coal, with two titles; professional, scientific, and controlling instruments, photographic and optional goods, watches and clocks, with 10 titles; rubber products, with 2 titles; stone, clay, and glass products, with 3 titles; textile mill products, with 1 title; transportation equip-

NAREB Presents Plan To Speed Housing

A program for quickly meeting the housing shortage by suspending federal restrictions on home building and providing a direct housing subsidy for veterans was advocated today by the National Association of Real Estate Boards.

This program, with other suggestions, has been laid by the Association before Wilson Wyatt, the Housing Expediter, and the House Banking and Currency Committee considering the Patman housing bill.

"Our veterans are returning to an advanced price level," the Association declared, "and this fact should be recognized in building homes for veterans, whether for rent or sale. Building costs have risen anywhere from 30 to 60 per cent, and it is foolish to try to produce houses under that level by granting subsidies to producers or builders.

"The subsidy ought to go directly to the veteran who can make a showing that he needs aid in obtaining good living conditions. That aid is due him, and it would be better to give it to our returning service men than to put it into bricks and mortar.

"It would stimulate building of houses by recognizing the economic facts of life—that prices have advanced and cannot be concealed. If that were done, and the federal restrictions on wages, materials, sales prices and rents (on new construction) were to be suspended for six months, we would have a tremendous wave of homebuilding and do something effective in meeting the veterans' housing shortage."

In a memorandum to Wilson Wyatt and the Banking and Currency Committee, the NAREB suggested that consideration should be given to a subsidy of $500 or $1,000 for any veteran who can show he needs it in order to acquire decent living conditions. The subsidy could be in the form of a credit that could be used to help finance purchase of a home or to apply on rent payments over a period of 24 months. Direct help of this type would not add to inflationary pressure but would assist the veteran in fitting himself back into the economy, the Association said.

(Continued on Page Four)

Nation's First 'Private Housing Authority' Formed

A new pattern for the solution of the nation's long range, number one problem — the acute housing shortage—was indicated today by the formation of the firm of Harrison, Ballard & Allen as the nation's first "Private Housing Authority".

The three partners in the firm will be Allan S. Harrison, Director of Public Housing for the City of New York, William F. R. Ballard, architect, who was retained by the New York City Housing Authority in the design of several of its larger projects, and Frederick H. Allen, Deputy Mortgage Officer of the Bowery Savings Bank. Harrison and Allen today announced their resignation from their present positions, effective February 1.

The firm will resemble public housing authorities in the scope of its functions, relieving the owner of all detail and responsibility in connection with development problems.

Functoning as owner's agent in the creation of multi-family housing developments and communities, the firm will retain services such as architects and contractors and will control all or a part of the processes, in accordance with the owner's requirements, from inception of the project to setting up of management staffs.

"Public agencies, insurance and banking interests, labor unions and private investors want to build," Harrison said, "but postwar building is hampered now by the necessity for such interests to deal with many agencies to coordinate functions.

"We think our type of organization, by making available to all communities the experience we have gained in housing, will stimulate construction of large scale urban housing developments, apartment houses, industrial communities, recreation communities, and new towns and villages.

"The organization, as a single agency," he said, "will be prepared to carry through to completion projects which would otherwise require contacts with promoters, real estate representatives, financial experts, architects, engineers, contractors, landscape architects, and other agencies"

BIDS OPENED
SAN FRANCISCO.—M. & K. Corp., 200 Financial Center Bldg., at $461,937.45 total bid on Proposition BC; $345,170 on Prop. AD, and $796,989.55 on Propositions BC and AD combiner, submitted low bids February 8 to the Department of Public W'ks, Room 282, City Hall, for construction of Scott Street sewer system, Sections BC and AD, on 17th, Church, 14th, Sanchez and Steiner Streets between Treat Ave. and Waller St.

Work involves:

PROPOSITION BC
Covering Section BC Only

(1) lump sum, junction structure in Treat Ave. at 17th St.;
(2) 726 l.f. 9-ft. x 7-ft. 3-in. reinf. concrete sewer on piles;
(3) lump sum, taper structure at 17th and Shotwell Sts.;
(4) 974 l.f. 6-ft. 6-in. reinf. concrete sewer on piles;
(5) lump sum, taper structure at 17th and Mission Sts.;
(6) 587 l.f. 5-ft. 9-in. diam. reinf. concrete sewer on piles;
(7) 1,948 l.f. 5-ft. 9-in. reinf. conc. sewer;
(8) lump sum, taper structure at 17th and Church Streets;
(9) 54 l.f. 18-in. VCP sewer;
(10) 115 l.f. 15-inch do;
(11) 112 l.f. 12-inch do;
(12) 50 l.f. 10-in. VCP culvert;
(13) 2 each catchbasin trap;
(14) 17 each manhole on coc. sewer;
(15) 6 each manhole on brick sewer;
(16) 8 each manhole on VCP sewer;
(17) 1425 l.f. 12-in. VCP sub-drain;
(18) 1,425 l.f. 10-inch do;
(19) 1,425 l.f. 8-inch do;
(20) 1,100 tons rock fill;
(21) 51,000 l.f. timber piles;
(22) alterations to sewer in Treat Ave., 16th to 18th Sts.;
(23) 3 each altering 14-inch gate valve setting (AWS system);
(24) 1,290 l.f. 14- and 16-in. pipe line shifting, altering and realigning (AWS system);
(25) 640 l.f. 12-inch do;
(26) altering 8-in. hydrant lines (A W S system);
(27) 3,160 lbs. pig lead (do);
(28) 4,900 lbs. wrought iron bolts. nuts and washers (do);
(29 7,880 lbs. cast iron specials castings (do);
(30) 4,760 lbs. cast steel specials castings (do);
(31) 515 lbs. cast iron valve boxes (AWS system);
(32) 14 c.y. concrete structures (do);
(33) traffic routing work;

PROSPOSITION AD
Covering Prop. AD Only

(1) 1,825 l.f. 7-in. diam. reinforced concrete sewer;
(2) 70 l.f. 2-ft. 6-in. x 3-ft. 9-inch reinforced concrete sewer;
(3) 45 l.f. 2x3-ft. do;
(4) connection to existing 7-ft. diam. sewer;
(5) 60 l.f. 27-in. centrif. spun reinf. concrete pipe sewer;
(6) abandoning exist. 3x5-ft. brick sewer;
(7) taper structure at 14th and Church Streets;
(8) 1,814 l.f. 5-ft. 9-in. diam. reinf. concrete sewer;
(9) storm overflow structure at Waller and Steiner Streets;
(10) 45 l.f. 21-in. VCP sewer;
(11) 57 l.f. 18-inch VCP sewer;
(12) 232 l.f. 12-inch VCP sewer;
(13) 7 each 12x6-in. Y-branch;
(14) 573 l.f. 10-in. VCP culvert;
(15) 48 l.f. 6-in. VCP side sewer;
(16) 2 each catchbasin;
(17) 25 each catchbasin trap;
(18) 21 each manhole on conc. sewer;
(19) 11 each manhole on VCP sewer;
(20) 1,260 l.f. 12-in. VCP sub-drain;
(21) 1,260 l.f. 10-in. VCP sub-drain;
(22) 1,260 l.f. 8-in. VCP sub-drain;
(23) 900 tons rock fill;
(24) alterations to weir at 14th and Dolores Sts.;
(25) 65,000 sq. ft. pavement excavation in track rea;
(26) 6,400 l.f. track removal;
(27) 1,400 c.y. excav. below pave.;
(28) 1,700 c.y. crushed rock ballast furnish and deliver);
(29) 4,200 l.f. track construction;
(30) 150 each thermit weld joints;
(31) standard crossover;
(32) double track branch-off at Market Street;
(33) do at 16th Street;
(34) 80 c.y. trenches for conduits and drains (track work);
(35) 50 l.f. 6-in. VCP drains (do);
(36) 100 l.f. 4-in. VCP drains (do);
(37) 120 each arc welded copper bonds;
(38) 2,000 l.f. copper bond wire at special work;
(39) 200 l.f. 1-in. galv. pipe conduit;
(40) 66,000 sq. ft. asph. conc. wearing surface on concrete base;
(41) 80 tons asph. concrete-conform pavement;
(42) 4,800 sq. ft. concrete base conform pavement;
(43) traffic routing work.

PROPOSITION BC, AD
Covering Section BC and Section AD

(1) junction structure in Treat Ave. at 17th St.;
(2) 726 lin. ft. 9-ft. x 7-ft. 3-in. reinforced concrete sewer on piles;
(3) taper structure at 17th and Shotwell Sts. ;
(4) 974 lin. ft. 6-ft. 6-in. reinforced concrete sewer on piles;
(5) taper structure at 17th and Mission Sts.;
(6) 587 lin. ft. 5-ft. 9-in. diameter reinforced concrete sewer on piles;
(7) 3761 lin. ft. 5-ft. 9-in. diameter reinforced concrete sewer;
(8) taper structure at 17th and Church Sts.;
(9) 1825 lin. ft. 7-ft. diameter reinforced concrete sewer;
(10) 70 lin. ft. 2-ft. 6-in. x 3-ft. 9-in. reinforced concrete sewer;
(11) 45 lin. ft. 2-ft. x 3-ft. reinforced concrete sewer;
(12) connection to existing 7-ft. diameter sewer;
(13) 60 lin. ft. 27-in. centrifugally spun reinforced concrete pipe sewer;
(14) abandoning existing 3-ft. x 5-ft. brick sewer;
(15) taper structure at 14th and Church Sts.;
(16) storm overflow structure at Waller and Steiner Sts.;
(17) 45 lin. ft. 21-in. vitrified clay pipe sewer;
(18) 111 lin. ft. 18-in. vitrified clay pipe sewer;
(19) 115 lin. ft. 15-in. vitrified clay pipe sewer;
(20) 344 lin. ft. 12-in. vitrified clay pipe sewer;
(21) 7 each 12-in. x 6-in. Y branches;
(22) 623 lin. ft. 10-in. vitrified clay pipe culvert;
(23) 48 lin. ft. 6-in. vitriifed clay pipe side sewer;
(24) 2 each catchbasins;
(25) 27 each catchbasin traps;
(26) 38 ech manholes on concrete sewer;
(27) 6 each manholes on brick sewer;
(28) 19 each manholes on vitrified clay pipe sewer;
(29) 2685 lin. ft. 12-in. vitrified clay pipe subdrain;
(30) 2685 lin. ft. 10-in. vitrified clay pipe subdrain;
(31) 2685 lin. ft. 8-in. vitrified clay pipe subdrain;
(32) 2000 tons rock fill;
(33) 51,000 lin. ft. timber piles;
(34) alterations to sewer in Treat Ave., 16th to 18th Sts.;
(35) alterations to weir at 14th and Dolores Sts.;
(36) 3 each altering 14-in. gate valve setting (A.W.S. system);
(37) 1290 lin. ft. 14-in. and 16-in. pipeline shifting, altering and realigning (A.W.S. system);
(38) 640 lin. ft. 12-in. pipeline, shifting, altering and realigning (A. W.S. system);
(39) altering 8-in. hydrant lines (A. W.S. system);
(40) 3160 lbs. pig lead (A.W.S. system);
(41) 4900 lbs. wrought iron bolts, nuts and washers (A.W.S. system);
(42) 788 lbs. cast iron specials castings (A.W.S. system);
(43) 4760 lbs. cast steel special castings (A.W.S. system);
(44) 515 lbs. cast iron valve boxes (A. W.S. system);
(45) 14 cu. yds. concrete structures (A.W.S. system);
(46) 65,000 sq. ft. pavement excavation in track area;
(47) 6400 lin. ft. track removal;
(48) 1400 cu. yds. excavation below pavement;
(49) 1700 cu. yds. crushed rock ballast (furnishing and delivering);
(50) 4200 lin. ft. track construction;
(51) 150 joint thermit weld joints;
(52) standard crossover;
(53) double track branch-off at Market St.;
(54) double track branch-off at Sixteenth St.;
(55) 80 cu. yds. trenches for conduits and drains (track work);
(56) 50 lin. ft. 6-in. vitrified clay pipe drains (track work);
(57) 100 lin. ft. 4-in. vitrified clay pipe drains (track work);
(58) 120 each arc welded copper bonds;
(59) 2000 lin. ft. copper bond wire at special work;
(60) 200 lin. ft. 1-in. galvanized pipe conduit;
(61) 66,000 sq. ft. asphaltic concrete wearing surface on concrete base;
(62) 80 tons asphaltic concrete conform pavement;
(63) 4800 sq. ft. concrete base conform pavement;
(64) traffic routing work.

LOS ANGELES CITY—GRADING, PAVING

LOS ANGELES Calif. — Warren-Southwest Inc., 2145 E 25th St., Los Angeles, at $35,11868, submitted low bid Feb. 6 to Los Angeles Board of Public Works, 153 City Hall, Los Angeles, for improving by grading, paving and by removal of walks and guard rails on Mission Rd. between Aliso and First St., Los Angeles; a cash contract; 90 days for completion.

The work involves:

(1) lump sum, grading, including hauling, but not including 2785 cu. yds. of excavation;
(2) lump sum, removal and hauling of 1632 lin. ft. curb, 260 sq. ft. gutter, 6850 sq. ft. sidewalk, 90 lin. ft. wall, 25 lin. ft. handrail and 2 catchbasins;
(3) 76,703 sq. ft. A.C., 8-in. concrete base, 6-in. and 2-in. wearing surface;
(4) 3488 sq. ft. A.C. wearing surface of variable thickness, average thickness 1-in.;
(5) 28,374 sq. ft. concrete pavement 8-in. thick;
(6) 500 sq. ft. rock and oil roadway, 3-in. thick;
(7) 720 sq. ft. rock and oil roadway of variable thickness, average thickness 1-in.;
(8) 1583 lin. ft. unplastered curb, type B;
(9) 125 lin. ft. unplastered curb, type D;
(10) 62 lin. ft. monolithic curb;
(11) 1939 sq. ft. course sidewalk, 3-in. thick;
(12) 272 sq. ft. monolithic sidewalk;
(13) 15 lin. ft. reset iron railing;
(14) reset two manhole frame and cover sets to grade;
(15) storm drain and appurtenances complete in place;
(16) 48 lin. ft. 6-in. house connection sewers;
(17) replace manhole frame and cover cover sets (4 units).

Total bids were:

(A) Warren - Southwest, Inc., $35,-118.68
(B) Griffith Co., $37,813.21
(C) John J. Swigart, $39,760.18.

LOW BIDDERS
CANTON, Blaine Co., Okla.—C. F. Lytle Co., Sioux City, Iowa, and Amis Construction Co., Oklahoma City, Okla., joint adventurers, at $5,-192,623 ,submitted low base bid to the U. S. District Engineer Office, P. O. Box 61, Tulsa, Okla., for the construction of spillway and completion of embankment, Canton Dam, on the North Canadian River, in Blaine County, about two miles north of Canton, Okla.

The completed project will consist essentially of a rolled earth fill embankment, four rolled earth fill dikes, concrete spillway and control works and service buildings. The four dikes, a portion of the embankment and part of the excavation for the spillway have been completed by a previous contract.

The work involves:

(1) 2,000,000 cu. yds. excavation;
(2) 1,700,000 cu. yds. fill;
(3) 10,000 cu. yds. sand in drainage trench;
(4) 180,000 cu. yds. (regular bid) and 300,000 cu. yds. (alternate bid) protection stone and including crushed rock, riprap and derrick stone;
(5) 120,000 bbls. cement;
(6) 1,000,000 lbs. reinforcement steel;
(7) 110,700 cu. yds. concrete;
(8) 3600 lbs. copper water stops;
(9) 140 lin. ft. 4-in. concrete pipe;
(10) 125 lin. ft. 15-in. corrugated metal pipe;
(11) 500 lin. ft. 6-in. vitrified clay pipe;
(12) 3600 lin. ft. 6-in. perforated vitrified clay pipe;
(13) 33,800 lbs. miscellaneous wrought iron pipe;
(14) 40,000 lbs. miscellaneous cast iron pipe;
(15) 95,000 lbs. miscellaneous metal work;
(16) 62,800 lbs. miscellaneous iron and steel castings;
(17) 5000 lbs. miscellaneous non-ferrous metals;
(18) 47,000 lbs. lead;
(19) 240,000 lbs. tainter gate embedded metal;
(20) 12,000 lbs. tainer gate steel forgings;
(21) 6700 lbs. rubber seals, molded;
(22) 20,000 lbs. tainer gate corrosion-resisting steel;
(23) 900,000 lbs. tainer gate movable parts;
(24) lump sum, tainer gate operating machinery;
(25) lump sum, 3 tractor-type sluice gates and 1 emergency gate, with frames, guides, hoists and conduit liners;
(26) lump sum, standby electric generator unit;
(27) lump sum, masonry service building including water treatment plant therein;
(28) lump sum, elevated water storage tank;
(29) 20,000 lbs. metal conduit;
(30) 5500 lin. ft. 2-in. fiber duct;
(31) lump sum, electric wiring, fixtures and equipment;
(32) 1000 sq. yds. sodding, Bermuda;
(33) 12,000 sq. yds. sodding, buffalo grass.

Second and third low bidders were:

James & Phelps Construction Co., Oklahoma City, Okla., $5,857,643.50 (base bid).

Western Contracting Corp., Sioux City, Iowa, $5,863,299 (alternate bid).

APPROVAL SOUGHT
SAN BRUNO, San Mateo Co., Cal. —The City of San Bruno has applied to Highway District No. 10 of San Mateo County for construction of a 150-foot long tunnel in Huntington Canyon under the proposed extension of Junipero Serra Highway. The request was made recently by Mayor Edward McGuire at a conference held with Bert West, surveying engineer for the district.

Mayor McGuire and City Engineer C. L. White of San Bruno gave assurance that the city would construct a 400-foot road linking the tunnel's exit to Cedar Ave. At the same time, the mayor and city engineer urged two cloverleafs to reach the road extension, one at San Bruno Ave., the other on Crystal Springs Road.

BIDS WANTED

SAN DIEGO, Calif.—Until Feb. 20, 11 A. M., bids will be received by the U. S. Navy, Public Works Department, 11th Naval District, 1220 Pacific Highway, San Diego, for the furnishing of all necessary materials and equipment, and performing all labor for the installation of automatic wet pipe sprinkler systems, and fire retarding partitions in each of the existing one-story frame buildings Nos. 74 and 108; Spec. No 17495.

Work involves concrete construction, sheet metal work, plastering, sprinkler system, electrical work, field painting, and other miscellaneous related work.

Specifications may be obtained from the above office upon deposit of check or postal money order for $10, payable to Chief of Bureau of Yards and Docks.

2/11/46 • 41

PERMISSION GRANTED

LOS ANGELES, Calif.—The California Railroad Commission, Feb. 5, granted permission to the Southern California and Southern Counties Gas companies, 810 S. Flower St., Los Angeles, for the construction of a gas pipeline for a distance of 1206 miles to pipe natural gas from Texas into Southern California via Blythe, Riverside County. As previously reported, the project calls for the construction of a 26-inch, 214-mile pipeline from Blythe to Santa Fe Springs, Calif., and construction of a 10,000 h.p. compressor station at Blythe to pump the gas over the mountainous regions. The proposed line will have a daily capacity of 175,000,000 cubic feet of gas to start and ultimately a capacity of 305,000,000 cubic feet. The plans call for the construction of the line at Blythe with a 720-mile line to be laid by the El Paso Natural Gas Co., El Paso, Texas, from the Panhandle in West Texas to the point of proposed construction of the California line. Cost of the entire project is estimate at $66,000,000.

QUO. 34414, REQ. 104146:

Sheldon Oil Co. only bidder.

Alternate A, $3 per ton plus $.50 for unloading; alternate B, $3.40 Rio Vista, $3.92 Isleton, and $4.27 Denverton; awarded.

2/11/46 • 42

BIDS WANTED

NEAR OXNARD, Ventura Co., Calif.—Until a date to be announced later, bids will be received by the Office of Defense Plants, a subsidiary of War Assets Corp., attention Mr. Theuer, Room 200, 727 W. 7th St., Los Angeles, for the sale and removal of surplus government-owned buildings at the Mira Loma Flight Academy near Oxnard.

The buildings are available for bids on a group bases—not separately. The buildings consist of 36 barracks buildings, 28x32 feet in area, each with 8-foot ceilings; two 16x30 feet in area storage buildings; one kitchen-recreation-messhall building containing 18,400 square feet; one administration-hospital-academic building containing 9000 square feet, and a small gate house.

All buildings are of frame construction with concrete foundations and floors, wood shingle roofs, stucco exteriors, wood interior finish (except three small buildings). Plumbing, heating and wiring are included.

Structures to be sold as a group because the buyer will be obligated to restore the grounds to original condition as farmland, a costly operation. Work involves destruction of concrete walks, pavements and floors, as well as excavation of sewers and plumbing. For this reason WAC reserves the right to reject any or all bids.

The property is located about one mile from Oxnard on U. S. Highway 101 Alternate.

2/11/46 42

BIDS WANTED

WEST LOS ANGELES, Los Angeles Co., Calif.—Until February 19, 1:30 P. M., bids will be received by the Veterans' Administration, Los Angeles 25, for furnishing (1) 1200 prefabricated acoustical units, 12x12x1-in., tinted white, nonperforated; (2) 8 gallons mastics used in applying acoustical units, delivery f.o.b. Soldiers' Home, West Los Angeles; Invitation No. 46-495.

2/11/46 • 42

NOTICE TO CONTRACTORS

Sealed proposals will be received at Room 205 of the office of the East Bay Municipal Utility District, 512 16th Street, Oakland, California, until 5:30 P. M., Wednesday, Feb. 20, 1946, and will at that hour be opened for furnishing 3755 cast iron and spigot water pipe fittings of 4- to 12-inch diameters.

Specifications (No. LS 347) may be obtained upon application at Room 406 of the office of the District.

DANIEL READ,
Secretary

Oakland, California.
February 7, 1946.
(Daily Pacific Builder)
(February 11, 1946)

Bibliography

(Continued from Page One)

ment, with 28 titles, and miscellaneous, with 58 titles.

The reports described in the listings contain information on scientific and technical developments, processes, products, inventions, and related matters of potential interest to American science and industry. This information previously was subject to security restrictions but has now been released for distribution by OPB.

Among the reports listed and described in the second issue are 324 research reports, written by chemists in the employ of the I. G. Farbenindustrie, and covering several years' activity in many fields of chemical research in ten plants of the large German cartel. A comprehensive economic survey of the I. G. Farbenindustrie, covering light metals, dyestuffs, pharmaceuticals, insecticides, synthetic rubber, and other products, also is described in the second issue of the bibliography.

NAREB Plans

(Continued from Page 1)

The Association also pointed out that price ceilings on houses will retard construction of new units. Veterans also would be discriminated against under the Patman bill ceilings, since if he buys a house, he would be held to the ceiling price if compelled for any reason to sell. Meanwhile, any other owner who has not made a first sale would be free to demand any price he could get, it declared.

"How will the veteran feel when he is held to his original price but his neighbor can sell for 10 or 20 per cent more?" the NAREB asked.

Under the proposal for a six-months' "holiday" on building restrictions, all price and wage restrictions on production of materials, construction or sale would be lifted for a period starting May 1. During that period, a limitation of profit to 10 or 12 per cent would be fair to prevent profiteering, the Association said. An added restriction on the resale of homes started during the holiday also might be imposed, which would prevent increase in the resale price for a period of at least one year after the first sale.

In addition, the Association said, priority ought to be given for veterans on existing rental property where an eviction is justified by conditions of a lease or local custom and law. Low income veterans also ought to be gven a chance to take over public housing units now occupied by families with incomes higher than the ordinary occupancy restrictions for such projects.

"If the building and real estate industries and veterans were allowed to proceed along these lines instead of being more and more restricted, we could build ourselves out of the shortage in a hurry, and veterans would get dwellings faster," the Association said.

PLANS and Speculations

Yolo: Preliminary plans for a 2-room addition to the new Cacheville Elementary School building are being drawn by Chas. Dean, Sacramento architect. . . Plans for a new Masonic hall are being discussed. Both the hall and the old Cacheville school were destroyed by fire January 7.

oOo

Kentfield: Work on a new residential subdivision in the Kentfield district will get underway as quickly as the Planning Commission approves the plans and grading equipment and building materials can be assembled. The developer is George C. Goheen, head of the Marin Capital Co. The property comprises four acres on the east side of Wolfe Grade near the Sir Francis Drake highway intersection.

oOo

Paso Robles: Plans for the first major industrial plant were announced recently. Within a short time a modern three-story steel and concrete factory building will be erected to serve as a processing plant for almonds and walnuts. Plans for the half-million dollar project were revealed by Frank P. and Lou Slate of the Slate Almond Company.

oOo

San Mateo: Development of 5th Avenue as the city's newest business district appeared in prospect as the Parrott Investment Company moved to complete commercial zoning of the Payson Tract. The property involved contains 10 lots on the north side of 5th Ave., all fronting on Central Park. . . L. D. Bourkey of the Frozen Food Company has applied for a permit to erect a $24,000 commercial structure at San Mateo Drive and Poplar Avenue. . Wm. P. Kyne, general manager of Bay Meadows race track, has announced the formation of Kyne Construction Co. and that work on the fill and building of Bay Meadows Airport will start immediately. Construction plans for the airport call for an expenditure of about $100,000.

oOo

Daly City: The city council has ordered the purchase of 66,000 sq. ft. of property on Mission Street between Alpha Avenue and Hillside Blvd. The property is earmarked for the city's new civic center and war memorial building.

oOo

Sacramento: California Apparel Shops will build a new store in Oak Park at a cost of $50,000. . . Lawrence Construction Co. will build a store and market building at Stockton Blvd. and Fruitridge Road at an estimated cost of $50,000. . . United Air Lines plan an extensive program of quarters and facilities at Municipal Airport. Work will start soon and will cost in excess of $100,000.

oOo

San Rafael: Lloyd Grandi has announced plans for the erection of a $35,000 building on "A" Street between 3rd and 4th. The new business is to be an auto laundry and will be owned and operated by Adrien Bouche, supplementing his Vogue Motor Co. at 1566 Fourth St. Contractors are Cliff Monk and Mario Bottini.

Harold L. Ickes Will Speak In Bay Area

On a whirlwind visit to northern California, Secretary of the Interior Harold L. Ickes will make three speeches in as many days between February 14 and 16, the Sacramento Regional Office of the U. S. Bureau of Reclamation announced. All three addresses will be broadcast.

Ickes will arrive in the Bay Region on Thursday, February 14, and will address the student body of the University of California at 2 o'clock that afternoon. His subject will be "Free Advice, And Worth It's Cost."

Friday noon, the secretary will address the Commonwealth Club luncheon in San Francisco on "The Central Valley". At this time Ickes will outline the Department of Interior's basin-wide plan for the comprehensive development of the water resources of the Central Valley of California.

At a public meeting in Fresno Memorial Auditorium on Saturday evening at 8:30 o'clock, Secretary Ickes will speak on "Your Valley of Decision", and will discuss controversial aspects surrounding construction and administration of the Central Valley Project. Arriving in Los Angeles over the week-end, Secretary Ickes will be the guest there at a luncheon on Monday, February 18.

The Fresno meeting on Saturday evening, February 16, is under sponsorship of the CVP Conference, of which State Grangemaster George Sehlmeyer is chairman. Sehlmeyer will call on Mayor Z. L. Leymel of Fresno to introduce the Secretary.

Many Trade Groups to Be Represented in So. California Exposition and Home Show

All eyes of California's building and home industries are focused on the preparations for the First Annual Construction Industries Exposition and Home Show of Southern California which will be held in the Pan Pacific Auditorium, Los Angeles, next July 12 to 21, inclusive.

And there is good reason for it, according to Milton J. Brock, president of the exposition and show. It will be the type of presentation of vital importance to those in the building industry as well as educational value to the general public.

"Already," Brock said, "we have had the opportunity here and there to catch some glimpse of the things in store for the postwar home builder. The complete picture, however, of the wonders awaiting the postwar planner and builder will be unveiled at the exposition."

Under the direction of the Tabery Corporation, the gigantic show will become a huge showcase for the manufacturers who are linked in one way or another to the building trades, home appliances and home maintenance.

With the public consciousness new centured on the need for new home building and improvements to existing dwelling units, a general interest already has been awakened in the projected exposition.

Aware of this, exhibitors will present the developments in postwar materials, designs and processes now being applied in heavy construction as well as in the building, furnishing and renovating of dwellings, Bock explained.

In planning the exposition and home show, the participating operators are underscoring the huge part commercial, industrial, public and house construction is playing and will play in the postwar era. That is because they know full well just what it is they are underscoring. In Southern California, for instance, they know that during the next five years, construction will be the Number One industry in dollars and cents—outstripping agriculture and petroleum which for many years in that area occupied the most lucrative berth. Labor, too, will feel the impact of the building program the country over.

This, then, will be reflected in the exhibits. Already, display space has been reserved by those who will show new methods of using paints and plaster, brick and flagstone — yes, and adobe, too. New uses for glass and ornamental iron also will be demonstrated, and postwar roofing, hardware, plumbing fixtures, electrical and gas appliances, radios, overhead garage doors and chemicals used as deodorants and water purifiers likewise will be displayed.

According to Lawrence Gibbs, secretary of the show and an official of the Los Angeles chapter, Building Contractors Association of California, Inc., 63 per cent of the available display space in the vast auditorium has been reserved.

Included among those who are arranging for exhibits are the principal electrical and gas appliance and heating manufacturers, several large banks engaged in fi-

GROOVER AND I

HONEST HOMEBUILDING

Today "Veteran Housing" is hot news all over the nation. Speaking of a housing shortage, if a man needs a home for his family, his need is urgent, be he Veteran, grocery clerk, salesman or second vice-president.

★ ★ ★

In San Francisco, we have a shortage of housing. A far greater shortage of MODERN housing. This is further complicated by the fact there are just too many people in this City of St. Francis of Assisi.

★ ★ ★

From many parts of the country you read complaints of egg-crate and crackerbox construction. On this point San Francisco is fortunate. It isn't happening here! The **Home Builders of this Community have done an outstanding job in maintaining a high standard of construction.**

★ ★ ★

As an example, I pull a name from the hat: HENRY DOELGER doesn't know me, but to my personal knowledge he has been constructing homes in San Francisco for more than 19 years. These homes, typical of the construction in this community, have been honestly built.

★ ★ ★

Without counting, it is an even-money guess that Doelger has built more dwellings in San Francisco than any other one Home Builder.

★ ★ ★

Whether more or less, the point is this; A builder, if so inclined, can squeeze an additional profit of $50 per room out of a dwelling—and after the paint dries the buyer would be unable to tell the difference!

★ ★ ★

Honesty and integrity have been built into our homes by workmen who were doing a sincere job. The word "sincere" of Latin parentage, was applied to ancient craftsmen, whose work was so perfect there were no uneven joints to be filled with wax.

★ ★ ★

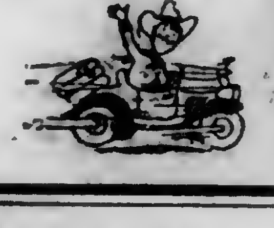
"Sincere"—without wax, applies to our building trades workmen today.

★ ★ ★

When you buy a home you are not trusting the Builder TODAY—you are trusting him TWENTY-FIVE YEARS FROM NOW!

★ ★ ★

This is the day to mention that Abraham Lincoln's father was a carpenter.



Dead Spots, Echoes in Auditorium Eliminated by Plywood Sounding Board

Introduction of a plywood sounding board, or shell, recently completed at the Louisville, Ky., Memorial Auditorium for use by Louisville Philharmonic Orchestra has "completely eliminated dead spots and echoes in the auditorium," according to Harper Fowley of Joseph E. Seagram & Sons, Inc., donors of the shell. The auditorium has been criticized in the past for its poor acoustics at symphonic performances. Fowley, who designed the shell with the help of Dr. Paul Sabine of the Riverbank Laboratories, Geneva, Ill., states that "without a doubt the shell has increased the volume in all parts of the auditorium and all concerts are remarkably clear; we now believe Louisville has the best concert hall in the country."

The new Louisville shell is 52-inches wide, 12-inches high at the back and raising to 22½-ft. at the front. It has a back, two sides and a top, all made of ¼-inch plywood on a frame of 1x3-ft. white pine strips running vertically and horizontally. This construction holds vibration to a minimum while the design throws all sound forward to the audience and no notes are absorbed or lost by deflection, Fowley reported to The Mengel Co., Louisville, which supplied the plywood.

The use of plywood for orchestral shells was popularized by Leopold Stokowski who specified plywood in a shell he ordered from McDonald Construction Company of New York, builders of stage settings. According to P. A. McDonald of that company, this shell was used for outdoor concerts by Stokowski during a tour of the United States and South America. As a result of this single tour more than 150 letters of inquiry came to the McDonald Company, which later built the shell now in use at the New York City Center.

The City Center shell is made of ¼-inch fir plywood on a frame of 1½x4-inch white pine. The entire shell, built in sections for easy breakdown and storage, is covered with 6-ounce duck painted with casein. McDonald states that, "plywood makes an excellent reverberator of sound. It is light in weight which makes for easy handling of sections and low cost transportation, yet its solidity reduces vibration and lends itself to either permanent or portable construction. Plywood shells should be equally successful on the smaller stages used by dance bands or where the size of the theater itself does not permit the dimensions we have used heretofore."

APPAREL CITY CORP. AWARDS CONTRACTS

In a surprise move the Apparel City Corporation, on Saturday, February 9, awarded construction contracts to Harney, Haas and Rothschild (Joint Venture) and to Barrett and Hilp. Both contracts were negotiated. Under the awards construction totaling over $1,000,000 will immediately get underway, with initial occupancy scheduled within 120 days.

The buildings for which contracts have been awarded are the one-story concrete and steel structures facing on Oakdale and Industrial Avenues. All buildings will have reinforced concrete slab floors on piles.

Ten days ago Charles L. Harney was given notice to proceed for the fill for the project site. This fill is being obtained from the Anzavista Apartment development, which is to occupy the site of the old Calvary cemetery at Geary and Masonic.

J. Francis Ward and John S. Bolles are the architects, and E. Elmore Hutchison is the site engineer for both the Apparel City and the Anzavista.

BIDS WANTED

CENTRAL VALLEY PROJECT, California.—Until March 5, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Walker R. Young, chief engineer, Friant, under Spec. No. 1171 for the construction of earthwork, canal lining and structures, station 1144+00 to station 1591+66.15, Friant-Kern Canal, Friant Division, Central Valley Project, California. The work is situated about 18 biles east of Fresno, Calif.

The principal items of work and the estimated quantities involved are as follows:

(1) 1,570,000 cu. yds. excavation, common, for canal;
(2) 286,000 cu. yds. excavation, rock, for canal;
(3) 171,000 sta. cu. yds. overhaul;
(4) 170,000 cu. yds. compacting embankments;
(5) 28,000 cu. yds. excavation, common, for drainage channels and dikes;
(6) 12,000 cu. yds. excavation, rock, for drainage channels and dikes;
(7) 8000 cu. yds. excavation, common, for structures;
(8) 1750 cu. yds. excavation, rock, for structures;
(9) preparing 141,000 sq. yds. rock foundations for concrete lining;
(10) trimming 330,000 sq. yds. earth foundations for concrete lining;
(11) 6200 cu. yds. of backfill;
(12) 3300 cu. yds. compacting backfill;
(13) 200 sq. yds. dry-rock paving;
(14) 1775 cu. yds. concrete in structures;
(15) 45,200 cu. yds. concrete in canal lining;
(16) placing 2,600,000 lbs. reinforcement bars;
(17) placing 760 sq. ft. elastic joint-filler material;
(18) placing 140 lin. ft. rubber water stops;
(19) erecting 283 M ft. b.m. of timber in structures;
(20) installing 2500 lbs. of miscellaneous metal work;
(21) constructing 24 cattle guards;
(22) constructing 16 miles of barbed wire right-of-way fence;
(23) constructing 2 miles combination barbed wire and woven wire right-of-way fence;
(24) removing 1800 lin ft. existing pipelines;
(25) laying 800 lin. ft. 2½- and 3-in. diameter iron pipe;
(26) laying 5800 lin. ft. 4-, 6- and 12-in. diameter thin-wall steel pipe;
(27) laying 16 lin. ft. 18-in. diameter corrugated metal pipe;
(28) installing 145 units of orchard outlets and stand pipes;
(29) constructing 17,000 lin. ft. underdrains with uncemented joints;
(30) constructing 12,500 lin. ft. feeder drains.

This invitation for bids does not cover the purchase of materials which are to be furnished by the government. Materials to be furnished by the contractor and those furnished by the government are described in the specifications which will be a part of the contract.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.25 per copy, not returnable.

Guarantee will be required with each bid in an amount not less than 10 per cent of the amount of the bid.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: R. L. Boke, regional director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; R. K. Durant, acting construction engineer, Friant, Calif.; Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the acting construction engineer.

BIDS WANTED

RIO GRANDE PROJECT, New Mexico.—Until March 6, 10 A. M., bids will be received by the Bureau of Reclamation, Denver, Colo., under Spec. No. 1170 for the construction of the Alamogordo-Hollywood and the Elephant Butte-Socorro 115-kilovolt transmission line, Rio Grande Project, New Mexico. The work is situated in approximately the central portion of the state of New Mexico.

The specifications will provide for bids on either or both of the two transmission lines, but no bid will be considered for only a part of either line.

The lines will each be 115-kilovolt, 3 - phase, single - circuit, wood - pole lines. The Alamogordo - Hollywood line, approximately 55 miles in length, will extend from the point of connection of the Alamogordo Army Air Base tap, near Alamogordo, N. M., to the Hollywood substation near Hollywood, N. M. The Elephant Butte-Socorro line, approximately 77 miles in length, will extend from the Elephant Butte power plant to the Socorro substation near Socorro, N. M. The conductors for each line will be either No. 4/4A.W.G. aluminum cable, steel reinforced, or 133,00 circular mil copper of hollow construtcion. Two overhead ground wires will be installed for 1½ miles of the Alamogordo-Hollywood line and for the full length of the Elephant Butte-Scorro line.

This invitation for bids does not cover the purchase of materials which are to be furnished by the government. Materials to be furnished by the contractor and those furnished by the government are described in the specifications which will be a part of the contract.

The work shall be commenced within fifteen (15) calendar days after date of receipt of notice to proceed and shall be completed within the following number of calendar days from the date of receipt of such notice: Alamogordo-Hollywood line, 120 days; Elephant Butte-Socorr line, 160 days.

No charge to prospective bidders for copies of the specifications and drawings; to others, $1.75 per copy, not returnable.

Guarantee will be required with each bid in an amount not less than 10 per cent of the amount of the bid.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: W. R. Nelson, regional director, Oliver-Eagle Bldg., 6th and Polk Sts., Amarillo, Texas; O. N. Parker, construction engineer, Alamogordo, N. M.; Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the construction engineer.

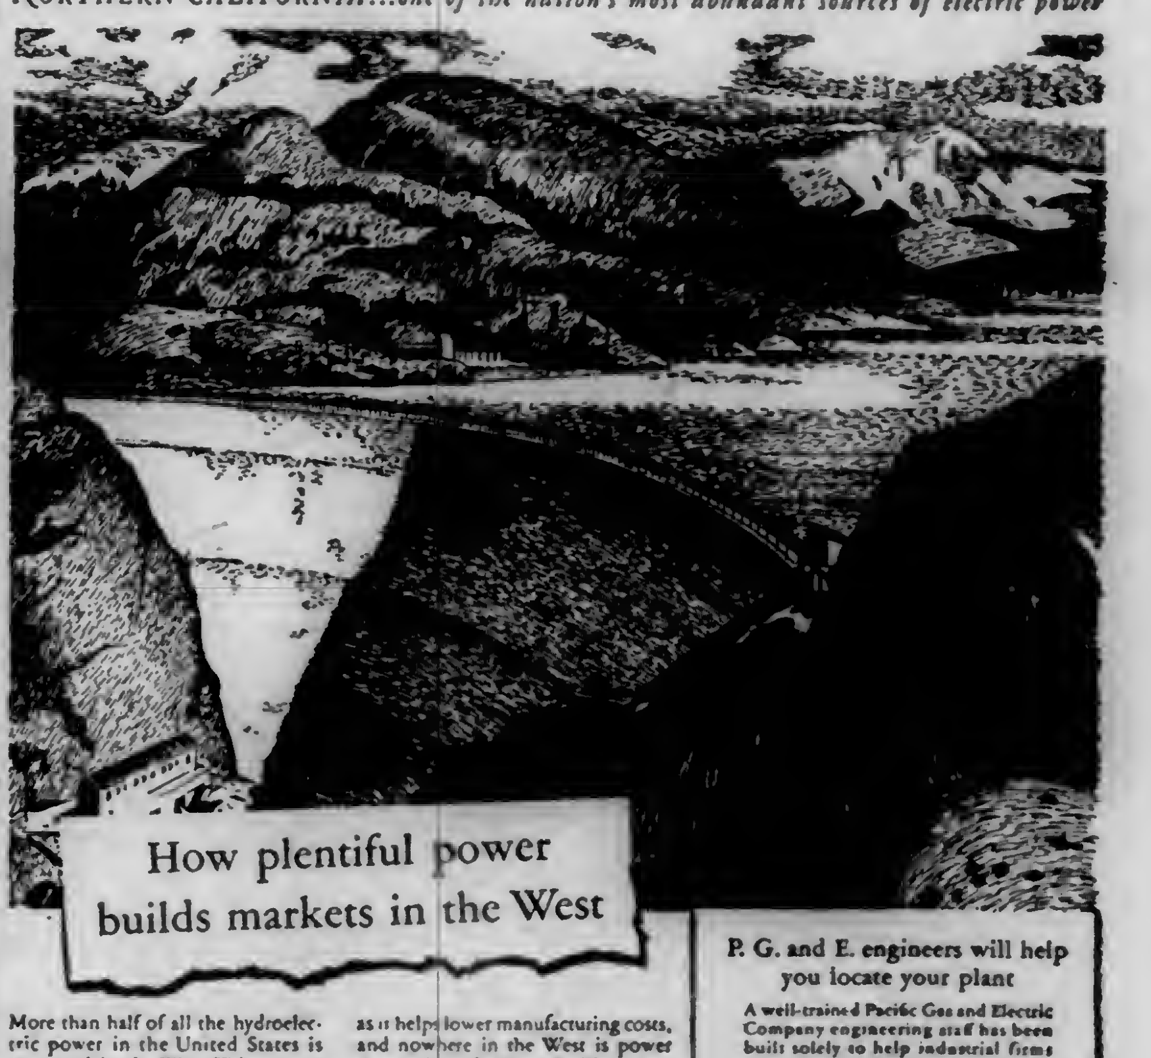
NORTHERN CALIFORNIA...one of the nation's most abundant sources of electric power



How plentiful power builds markets in the West

More than half of all the hydroelectric power in the United States is generated in the West. Thirty-seven billion kilowatt-hours annually.

And one important result is... better markets for your products.

Western housewives, for example, buy far more home appliances than average housewives. Seventeen per cent more of their homes are wired for electricity, and their standards of living are consequently higher. Western farms use nearly three times as much electricity as average farms, California alone accounting for more than half the country's entire rural consumption.

So plentiful power helps build western markets just as it helps lower manufacturing costs, and nowhere in the West is power more plentiful than in Northern California. Here, the Pacific Gas and Electric Company's vast interconnected generating system has a capacity twice that of Boulder Dam, and 60 per cent greater than Bonneville and Grand Coulee combined. Rates are among the lowest in the nation.

If power is important in your business, either in creating a market or in producing for one, investigate the advantages of locating in Northern California. The Pacific Gas and Electric Company will be glad to help you in every way possible.

Northern California...industrial center of the new Pacific World

PACIFIC GAS AND ELECTRIC COMPANY

P. G. and E. engineers will help you locate your plant

A well-trained Pacific Gas and Electric Company engineering staff has been built solely to help industrial firms learn the facts about locating in Northern California. This staff works closely with established agencies throughout the entire area, and its service includes at no charge...

A thorough study of available sites; photographs, maps, aerial perspectives.

Complete information on environment, transportation, drainage... trucking and freight rates.

Estimated cost of property, of any necessary improvements, of power and other utilities.

For more information, or assistance of any kind, write Pacific Gas and Electric Company, San Francisco 6, California.

POWER... *to Pace the Future*

Electric energy, the "White Coal" of the West, has been an important factor in the challenging growth and prosperity of Northern California. The abundance of this electric power, its widespread distribution at rates among the lowest in the nation, have fostered a live demand for a great diversity of products for the home, farm, factory and business. A dependable supply of hydro-electricity has helped make Northern California one of the richest markets in the Nation.

You, who use electric appliances in your homes and constantly add to this family of mechanical servants, are that market. You buy and use far more electrical appliances than folks elsewhere in the country and you can do so because electricity is convenient and cheap. You, who have farms in Northern California, use more than half of the Nation's entire rural power load. You have complete electric service in your farm home, in the fields and barns. And you, like Northern California business and industry, use electricity to help lower your production costs.

Low cost electric power, and lots of it, has been a builder of markets in Northern California. It took the heavy demands of wartime industries in stride and is ready now to pace the future.

This is the fourth of a series of Pacific Gas and Electric Company advertisements to attract new industry to Northern California. It will appear in Time and the Saturday Evening Post.

P·G·and·E· PACIFIC GAS AND ELECTRIC COMPANY

Home Show

(Continued from Page 1)

nancing construction, and a wide assortment of firms making vital products for building and home use.

Two large organizations, the Los Angeles City Department of Water and Power and the Natural Gas Bureau, have reserved space in which to tell the public something of the workings of their organizations.

Potentialy home builders and buyers, according to Brock, will find in the outdoor exhibits much of interest in the overall planning of a home. There will be demonstrations of how best to locate swimming pools, barbecue pits, sports courts and outdoor living room so that they fit harmoniously into the general landscaping plan. Model homes of varying designs will be open for public inspection on the grounds surrounding the auditorium, while new construction developments in commercial, industrial and public building will be illustrated by scale models and maps, photographs and drawings.

Expected to draw heavy interest, said Brock, will be the displays showing construction uses of new metals such as duraluminum and stainless steel; the public, too, will be afforded the opportunity to see and test examples of acoustics materials, insulation and plastics now going into the 1946 version of dwelling and commercial units.

Other exhibits will feature television screens that also may be used for some motion pictures, health lamps for "indoor sunbathing", germicidal lamps and, for use in outdor living rooms, insect-repelling lamps.

Officers of the show besides Brock and Gibbs are Earl S. Anderson and Frank Jani, first and second vice presidents. respectively, and A. L. Stone, treasurer.

The exposition and show will be presented by a non-profit corporation comprising 14 trade associations. They are the Pacific Coast Gas Association, Southern California Radio and Electrical Appliance Association, Southern California Radio and Electrical Appliance Association, Southern California chapter, Associated General Contractors of America; Building Contractors Association of California, Inc.; Contracting Plasterers Association of Southern California; Heating, Pipe and Air Conditioning Contractors Association of Southern California, Inc.; Los Angeles Chamber of Commerce, Merchant Plumbers Association of Los Angeles, Southern California chapter, Home Builders and Subdividers of the National Association of Home Builders of America; Painting and Decorating Contractors Association of Los Angeles, Inc.; Refrigeration Contractors Association, Inc.; Los Angeles chapter, National Electrical Contractors Association; and the Sheet Metal Contractors Association of Southern California.

Never before in the West have so many trade groups banded together for the purpose of staging an exposition to display the products of their endeavors.

Reservations for space in the show may be made with the Tabery Corporation, 3443 South Hill St., Los Angeles 7; PRospect 1264.

CALIFORNIA STATE LIBRARY

PLANS and Speculations

Woodlake, Tulare Co.: Voters of the elementary school district will decide a proposed $72,000 bond issue February 21. Funds will be spent for the construction of additional classrooms.

oOo

Gridley, Butte Co.: D. A. Stewart, president of the Farmers' Cooperative Creamery, has announced plans for the erection of a modern creamery on Highway 99, just south of town. It is anticipated that the cost of the building and equipment will exceed $500,000. The Cooperative will build the plant, Golden State Co., Ltd., will equip and operate it.

oOo

Porterville, Tulare Co.: Justin C. Schroeder, owner of the new Porterville Hospital, has engaged architect Douglas D. Stone and Lou B. Mulloy, Associate, 381 Bush St., San Francisco, to draw plans for the enlargement of the institution. Cost of the improvement will be around $85,000.

oOo

Sacramento: The Zellerbach Paper Company will construct a modern one-story fireproof plant on a 10-acre site in the Industrial Park Area at a cost of $350,000, including equipment. The plans were announced by Leland J. Doherty, manager of the Sacramento division for the company.

oOo

San Leandro: T. E. Morehouse has revealed plans for the construction of a frozen food locker plant at the northeast corner of Davis and Dabner Streets. Cost of the building is estimated at about $20,000 and the refrigeration equipment at $20,000.

oOo

Oakland: Frank W. Wentworth, financial vice-president of Mills College, has announced that a total of $225,000 is now on hand for a program which includes a life science hall, a library building and a residence hall. Clarence Mayhew, Piedmont architect, has been selected to design the buildings. The science hall will be erected first under present plans.

oOo

Downey Urges CVP Get 50 Millions For Next Year

Senator Sheridan Downey of California has urged Secretary of Interior Harold L. Ickes to push the state's Central Valley Project to the limit in the fiscal year starting next July 1 and has suggested "an appropriation of at least $50,000,000," for its major lines of development.

In a letter to Secretary Ickes, released at his Washington office this week, Senator Downey said: "Any survey of the Western post-war situation immediately brings up the development and utilization of the vast resources of the valleys of the Sacramento and the San Joaquin and the mountain region lying within their watersheds.

"The land, water and hydro-electric resources of these river basins comprise one of the greatest potentials in Western America for building new homes, farms and industries for thousands of returning veterans and for displaced war workers in the overflowing cities of the Pacific Slope."

The California Senator emphasized that the Central Valley Project should not be considered as part of a public works program; the potentials of the central valley, he said, being so obvious, and the need of supplying the water-deficient San Joaquin from the richer resources of the Sacramento so urgent, there could be no sound reason to delay the project to provide a reservoir of work in future years.

Urging Mr. Ickes to present the project's needs to Harold D. Smith, director of the bureau of the budget, and to "make a vigorous ap-

(Continued on Page Four)

GROOVER AND I

TALKING TOO MUCH

After UNCIO, talk began to turn toward a permanent home for UNO. Five hundred acres was mentioned as being spacious and adequate.

* * *

San Francisco got off with a delayed start in bidding for the permanent home. We are still in there pitching, but in view of recent developments, **perhaps we are talking too much—we better grab our hat and sneak out during the newsreel.**

* * *

Committee on Permanent Site has put the finger on a spot on the NY-Conn. line—**42 square miles of the most valuable suburban real estate in this Nation!**

* * *

That isn't all: They want this area with extra-territorial rights—outside the law and domain of this Republic. Further, they want a temporary home in downtown New York with night clubs, red leather cushions and blondes.

* * *

Of course, whatever the cost, we will pay the greater share. But the extra-territorial privileges automatically puts the home in the United States, as no other prospective nation would go for such a deal.

* * *

(Why not give them the island of Puerto Rico? This would go far towards relieving the economic situation of the Puerto Ricans.)

* * *

South Dakota has offered 100 square miles, with extra-territorial rights, in the Black Hills district of that state.

* * *

In our bug-eyed enthusiasm we have overlooked the fact that no state has the right to give up sovereignty over such property. The question of partitioning was settled by President Lincoln and General Grant in 1865. Even the Congress can't do it. A Constitutional amendment would be required.

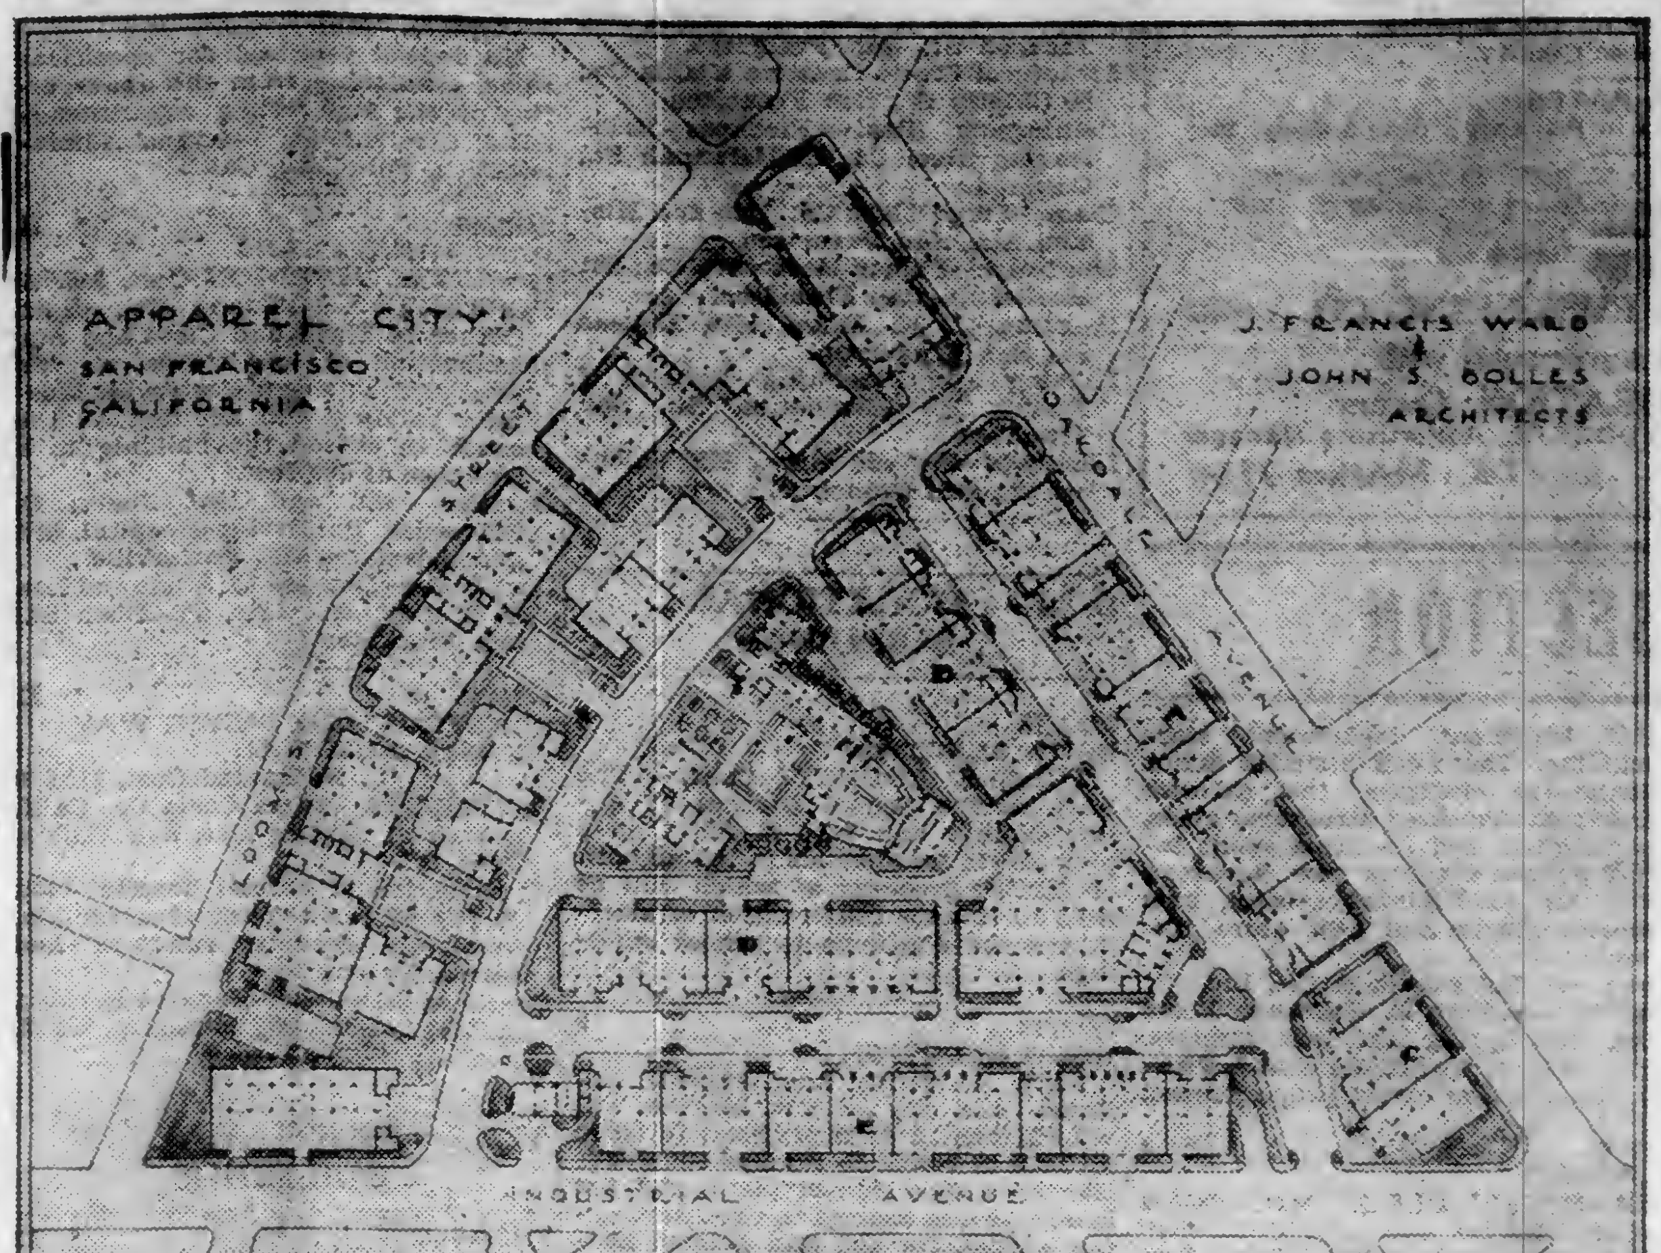
* * *

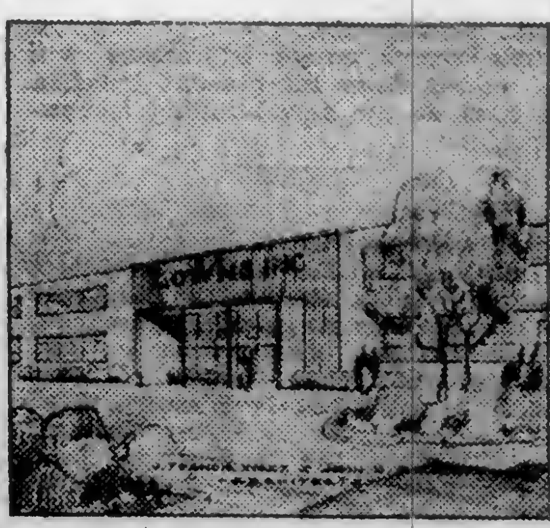
We can't really blame the Committee on Sites for making such an ambitious grab.

* * *

For years we have been telling the entire world, including people who never owned clear title to a herd of goats, just point to whatever they want and Uncle Sam will deliver, freight prepaid.

San Mateo: Seekand Properties Co., headed by Leonard David, San Francisco real estate broker, has purchased the Benjamin Franklin Hotel and adjoining property. Plans call for the construction of a new business building on Fourth Avenue adjoining the hotel.





Plot plan of San Francisco's new $4,000,000 Apparel City to be built at Industrial and Oakdale Avenues. Harney, Haas and Rothschild (joint venture), and Barrett and Hilp, on Saturday, February 9, were awarded negotiated contracts totaling over $1,000,000 for construction of buildings A, B, C and D (above). Right—Typical building entrance.

A.I.A. CHAPTER WILL SELL STOCK PLANS

Seeking a solution to the problem of the lower-income bracket public desiring an architecturally designed house, the Washington State Chapter of the A.I.A. and the Seattle Master Builders have formed a Stock Plan Selling Bureau. Architects are invited to submit to this organization plans which, when approved, will be displayed for the public's selection. Anyone may purchase from the Bureau a complete set of plans, including six sets of blueprints and specifications, cost estimate and materials list, for $50, half of which will be paid to the architect. A charge of $50 will be made for evey home constructed from the plan.

LIGHTING HANDBOOK PLANNED

Plans for publication of a lighting handbook have been announced by the Illuminating Engineering Society. Five hundred pages of text will cover every phase of lighting from the pure physics of light to specific lighting recommendations for stores, offices, homes, factories, and even the juke boxes and television studios. Publication is scheduled for October, 1946.

MUSEUM TO GIVE DESIGN AWARDS

Beginning this year, annual awards will be made by the Museum of Modern Art, New York City, to the three outstanding designs of the year in mass-produced objects of everyday use. The awards will not be limited to any specific field, and may be conferred upon a tractor or a toothbrush, a canoe or an ashtray, a desk or a fountain pen, or any other useful object.

The annual awards are to be part of a three-way program initiated by the Museum's Department of Industrial Design to stimulate the creation of better design in manufactured articles. The program also includes an annual publication which will catalog currently available consumer goods recommended for their design excellence. The first issue of the catalog will be published in the early autumn of this year, at which time the awards will be made and the winning designs placed on exhibition at the museum.

—#—

Lindsay, Tulare Co.: The municipal swimming pool fund now stands at $51,000, following the action of the city council in earmarking $35,000 as the city's share in its construction.

AERO 'REEFERS' SUBJECT FOR ASRE MEET

The San Francisco Section of the American Society of Refrigerating Engineers will hold its regular February meeting on Friday, February 15, at the Engineers' Club, 206 Sansome Street, at 6:00 P. M.

The subject under consideration will be Refrigerated Transportation by Air and will be divided into three discussions. Edward Simons, Chairman of the Program Committee, will present a brief history of refrigerated transportation. His remarks will be followed by Philip D. Carr, San Francisco Manager of Owens-Corning Fiberglas Corp., who will speak on "Developments of Insulation for Refrigerated Air Cargo".

Fred F. Dawson, Manager of Air Cargo for the United Air Lines at San Francisco, will present as his subject, "The Method of Handling and the Potentialitis of Refrigerated Air Cargo."

These subjects are timely and should prove of extreme interest to all those in attendance. Reservations can be made by calling the Secretary's Office — EXbrook 4404.

BIDS WANTED

DESCHUTES PROJ., Ore. — Until Feb. 28, 10 A. M., bids will be received by the Bureau of Reclamation Bend, Oregon, Walker R. Young, Chief Engineer, under Spec. 1174 for furnishing labor and materials and performing all work for the construction of highway crossing, sta. 2718 plus 78, North Unit Main Canal; sta. 29 plus 17.7, lateral M-48; station 30 plus 51.23, lateral M-51, Deschutes Project, Oregon. The work is situated in the vicinity of Metolius, Oregon.

The principal items of work and the estimated quantities involved are as follows:

3000 c.y. common excav. for struc.;
100 c.y. rock do;
2500 c.y. backfill;
2000 c.y. compacting backfill;
310 c.y. concrete in structures;
placing 42,000 lbs. reinf. bars;
laying 125 l.f. 18-in. diam. conc. pipe;
laying 272 l.f. 36-inch do.

This invitation for bids does not cover the purchase of materials which are to be furnished by the Government. Materials to be furnished by the contractor and those furnished by the Government are described in the specifications which will be a part of the contract.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: R. J. Newell, Regional Director, P. O. Box 937, Reclamation Bldg., Fairgrounds, Boise, Idaho; C. H. Spencer, Construction Engineer, Bend. Oregon; Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Construction Engineer.

2/13/46 • • 34

BIDS WANTED

DENVER, Colo.—Until April 2, 2 P. M., bids will be received by the Bureau of Reclamation, Denver, under Spec. No. 1173, for furnishing and delivering fob cars at the shipping point or fob cars at Friant, Calif., at the option of the bidder, two 86-inch interior differential needle valves with control stands, paradox controls, supports and anchor bolts, and erection equipment; eight 96-inch hollow-jet valves, with valve controls, intermediate shafts, anchor brackets and bolts, and erection equipment; and adapters and connection bolts for installation in the Madera Canal outlet, the Friant-Kern Canal outlet, and the river outlet at Friant Dam, Central Valley Project, Calif. The valves will be installed by the Government.

The specifications do not contain a provision for liquidated damages for delay. No charge for copies of the specifications to prospective bona fide bidders; to others, $2.00, not returnable. For particulars, address the Bureau of Reclamation, Denver.

VENTURA, Ventura Co., Calif.—Donald R. Warren Co., engineers, 500 S Figueroa St., Los Angeles, is completing plans and specifications for the city of Ventura for the construction of storm drains in Oak St., Ventura; est. cost, $60,000. A call for bids will probably be issued this summer.

2/13/46 • 34

ADDENDUM ISSUED

CADDOA, Bent Co., Colo.—The U. S. District Engineer Office, Commercial Bldg. and P. O. Box 1538, Albuquerque, N. M., has issued an amendment No. 1 to advance notice No. 24 stating that bids for the completion of John Martin Dam will be issued immediately upon settlement of the present steel strikes instead of February 1, as previously indicated. The period of solicitation will be 30 days from the date of issuance. Plans and specifications will be available from the above office upon deposit of $25.

2/13/46 • 34

TO ASK BIDS

NEAR MOUNTAIN HOME, Arkansas.—The U. S. District Engineer Office, Gay Bldg., Broadway at Third, Little Rock, Ark., will issue a bid call about February 20 and bids will be opened about April 23 for the construction of the Bull Shoals Dam, a concrete gravity type dam, and appurtenances, on the White River in Arkansas. The dam is located on White River, approximately 420 miles above its mouth. The damsite lies in Baxter and Marion counties, central northern Arkansas, approximately 115 miles north of Little Rock and 10 miles west of Mountain Home, Arkansas.

The project involves the following works: Care and diversion of the river; clearing, grubbing, excavation and foundation preparation; drilling and grouting; concrete masonry; miscellaneous drainage structures and systems; installing penstock and tainter gates, including operating machinery; furnishing and installing slide gates and conduit lining; furnishing and installing rigid electrical conduit system; fill, backfill, riprap and gravel surfacing; miscellaneous piping, valves, castings and structural steel; 1200 calendar days for completion.

The principal items of work are:

(1) 400,000 cu. yds. common excavation;
(2) 450,000 cu. yds. rock excavation;
(3) 42,200 lin. ft. core drilling;
(4) 36,000 lin. ft. percussion drilling;
(5) 1,700,000 bbls. unloading, hauling and storing cement;
(6) 2,000,000 cu. yds. concrete work;
(7) 10,300,000 lbs. penstocks, gates, conduit lining, accessories and operating machinery;
(8) 7,000,000 lbs. reinforcing and structural steel;
(9) 200,000 lbs. electrical conduit and fittings;
(10) 100,000 M gallons pumping cooling water.

Plans and specifications are available from the above office upon depoist of $50 for each set of plans and will be available for inspection in the office of the U. S. District Engineer Office, 751 S. Figueeroa St., Los Angeles.

2/13/46 • 34

TO ASK BIDS

LOS ANGELES, Calif.—The U. S. District Engineer Office, 751 S. Figureau St., Los Angeles, will issue a bid call soon for the construction of channel improvements on the Los Angeles River from N. Broadway to Alhambra Ave. (river mile 23.5 to river mile 22.9).

The principal items of work are:

(1) 126,000 cu. yds. excavation;
(2) 41,000 cu. yds. backfill;
(3) 24,700 lin. ft. steel bearing piles;
(4) 6600 lin. ft. steel sheet piling;
(5) 20,000 cu. yds. concrete;
(6) 1,900,000 lbs. steel reinforcement;
(7) 27,200 bbls. portland cement.

Prospective bidders are invited to inspect the site of the work in order to acquaint themselves with local conditions affecting the execution of the proposed work.

2/13/46 • 34

TO ASK BIDS

LOS ANGELES, Calif.—The U. S. District Engineer Office, 751 S. Figueroa St., Los Angeles, will issue a bid call soon for the construction of channel improvements on the Los Angeles River from Aliso St. to Alhambra Ave. (river mile 22.2 to river mile 22.9).

The principal items of work are:

(1) 118,000 cu. yds. excavation;
(2) 34,300 cu. yds. backfill;
(3) 4850 cu. yds. rock excavation;
(4) 22,000 lin. ft. steel bearing piles;
(5) 24,000 cu. yds. concrete;
(6) 2,625,000 lbs. steel reinforcement;
(7) 36,200 bbls. portland cement.

Prospective bidders are invited to inspect the site of the work in order to acquaint themselves with local conditions affecting the execution of the proposed work.

PLANNED

MEDFORD, Ore. — The California-Oregon Power Co., John C. Boyle, general manager, 216 W. Main, Medford, Ore., has made application to the Oregon State Hydroelectric Commission for a license for the construction of a power development program on the North Umpqua River in eastern Douglas County, Oregon; estimated cost, $3,375,000. Plans call for the construction of the following projects:

(1) a 5600-ft. concrete-lined tunnel at Toketee Falls, 75 miles east of Roseberg on the North Umpqua River; estmated cost, $800,000;
(2) an earthfill diversion dam with a 350-ft. long crest and 35 ft. high; estimated cost, $300,000.

A call for bids for the above projects is expected as soon as weather permits. A call for bids will also be issued for the construction of a foundation and superstructure for a new concrete powerhouse approximately two miles below the falls and construction of a 125,000-volt power line, running 47 miles from Toketee Falls to Dixonville. The line is estimated to cost $600,000. The development will also require additional construction, plans for which have not been completed.

2/13/46 34

WORK RECOMMENDED

VENTURA COUNTY, Calif.—The U. S. District and Divisional Engineers have recommended that flood control construction be undertaken on the Santa Clara river and Santa Paula creek, Ventura County. The work would include paved levee on the south side of Santa Clara river from South Mountain to U. S. highway 101 bridge, a distance of about five miles and a concrete channel on lower Santa Paula creek from stream mile 3.1 to the Santa Clara river; estimated cost, $3,110,000.

ADDENDUM ISSUED

DENVER, Colo.—Following addendum issued under Spec. No. 1161 for "Fixed-Wheel Gate Frames for Penstock Structure at Davis Dam, Davis Dam Project., Ariz.-Nev.,", for which bids will be received at the Office of the Bureau of Reclamation, Denver, until 2 P. M., March 12.

1. The material for parts Nos. 22 R/L, 23 R/L, 24 R/L, and 25, shown on drawing No. 351-A-151, is hereby changed from "Steel B55" (structural steel) to "Corrosion Resisting Steel C-136."

2. Corrosion resisting steel C-136 shall conform in all respects to class 3, type A steel in accordance with Federal Spec. QQ-S-763a.

2/13/46 43

ADDENDUM ISSUED

COLUMBIA BASIN PROJ, Wash. —The following addendum has been issued under Spec. No. 1128, for "Pumps for Grand Coulee Pumping Plant, Columbia Basin Proj., Wash.", for which bids will be received at the office of the Bureau of Reclamation, Denver, Colo., under 2 P. M., March 7.

1. Paragraph 20 is hereby deleted and the following paragraph substituted therefor:

"20. Delivery—urgency of. Time of delivery is important, and complete shipment from the shipping point or points is desired within the periods of time stated in the following tabulation after date of receipt by the contractor of notice to proceed with manufacture:

Schedule	Calendar days
First pump	600
Second pump	660
Third pump	720
Fourth pump	780
Fifth pump	840
Sixth pump	900

"Bidders are required to state, in the blanks provided therefor in the schedule, definite periods of time within which shipments will be made. Notice to proceed with manufacture of the pumps will be issued as soon as funds are available therefor, as conclusively determined by the contracting officer. Time of delivery of the report of approved model tests and approved drawings of the pumps is desired within 280 calendar days after date of receipt by the contractor of notice of award of contracts. Delays due to the operation of the National Priorities System made effective subsequent to the date of the bid will be considered to be delays due to unforseeable causes and beyond the control of the contractor."

2. Paragraph 21 "Delays—liquidated damages", is hereby completely deleted.

2/13/46 • 43

The bids were received Dec. 26.

2/13/46 • 43

ADDENDUM ISSUED

CENTRAL VALLEY PROJECT, Calif.—Addendum has been issued as follows to Specifications No. 1163 for "jet pump for fish trap at Keswick Dam, Kennett Division, Central Valley Project, California," for which bids will be received at the office of the Bureau of Reclamation, Denver, Colo., until 2 P. M., March 6, 1946.

1. Paragraph 20 is hereby deleted and the following paragraph is substituted in lieu thereof:

"20. Delivery—urgency of. Time of delivery is important and complete shipment from the shipping point or points is desired within two hundred and eighty (280) calendar days for the articles, materials and supplies under item 1 of schedule No. 1, and one hundred and eighty (180) calendar days for the articles, materials and supplies under item 3 of schedule No. 2, after date of receipt by the contractor of notice of award of contract. Bidders are required to state, in the blanks provided therefor in the schedules, a definite period of time within which shipment will be made."

2. Paragraph 21, "Delays—liquidated damages," is hereby completely deleted.

Senator Downey

(Continued from Page 1)

peal to the appropriation committees in the Congress", Mo. Downey pointed out that central valley development, as a result of the war, is now four years behind the timetable.

"In those four years," he added, "the pressure of population against the resources of California has increased tremendously. Relatively, therefore, we are many years behind schedule in bringing the resources of these river basins into use for the people who want to live by them."

In a letter to Director Smith requesting the budget bureau to make a full investigation of the project's needs, Senator Downey declared that the benefits of the central valley undertaking would immediately be spread widely thru the whole economy of the state.

Among the major items listed in the Downey letters were $16,000,000 for construction of the Delta-Mendota Canal, the Delta Cross Channel and the Contra Costa Canal and lateral systems.

In the Friant Division an appropriation of $9,000,000 was suggested for the Friant-Kern Canal which, it was pointed out, would "bring water to the most seriously deficient area in the whole project."

At Shasta and Keswick dams the installation of new power facilities, including considerable construction work at Keswick Dam, was estimated to require $6,500,000. The largest expenditures for power facilities would go into power distribution—transmission lines, switchyards, and power stations—and would approximate $19,000,000.

The Downey recommendaton is in line with a resolution of the Water Project Authority of California which adopted a resolution on January 8 urging that the Bureau of Reclamation be granted at least $50,000,000 for the project next year.

The Authority, under the chairmanship of C. H. Purcell, director of public works, includes the state treasurer, state controller, director of finance and the attorney general of California.

News Service

Fifty-sixth Year—Vol. 56—No. 32 SAN FRANCISCO, THURSDAY, FEBRUARY 14, 1946 PRICE 15 CENTS PER COPY

PLANS and Speculations

San Francisco: Hale Brothers of California has announced plans to open a large appliance and radio division at 763 Market Street. The building will be completely remodeled and will inclue a 200-seat auditorium. Wm. Gladstone Merchant, 57 Post Street, is the architect for the project. Call for bids is not expected for about two months.

oOo

A toll tunnel through the Tehacaphi Range, a 26-mile, straight shot through the mountain barrier, which cuts California in two, now is in the rough planning stage. The plan is a brain child of Chas. West Jones, of Los Angeles, a senior bridge engineer for the State Division of Highways.

oOo

Fresno: A campaign to raise $60,000 to finance construction of a cathedral house for St. James Episcopal Parish has been launched. The cathedral house is the first unit of a building program, which contemplates the eventual construction of a new cathedral. Preliminary sketches have been prepared by Architect H. Rafael Lake and William Hartrup, Associate.

oOo

Patterson, Stanislaus Co.: Rev. Manuel Rose, pastor of the Sacred Heart Catholic Church, has announced that as soon as conditions permit, a new church will be built costing approximately $30,000. The structure will be of Spanish type with a single bell tower.

oOo

Denair, Stanislaus Co.: An underground 50-line cable from Turlock to Denair was proposed at the annual meeting of the Denair Telephone Association. M. L. Harmon, president of the association, reported the estimated cost of the three and a half mile cable is $11,000.

oOo

Rodeo: The membership of the First Baptist church has voted to incorporate. This is the first step towards purchasing a building site. The church plans to buy and to build just as soon as conditions will permit.

oOo

Willows: A $200,000 contract for the construction of one of the largest bulk storage plants for grain in northern California has been let by the Willows Rice Drier and Storage Company to The Berlinger Company of Orland. Robert Martin, industrial engineer of San Francisco, prepared the plans.

oOo

Engineers And Architects To Hold Joint Meeting

The Structural Engineers Association of Northern California has arranged with the architects of the San Francisco Bay Area to hold a joint meeting on March 5 to discuss "Modern Construction Versus Obsolete Building Codes".

The architects and engineers are often called upon to design and build structures under the provisions of building codes which are not in conformity with their own ideas, and which were prepared by others than themselves.

To the March 5 meeting will be invited building inspectors, contractors, materials men, and others interested in building construction and in building codes.

The public will be welcome at the meeting to be held in the Engineers' Club, 206 Sansome Street, beginning with dinner at 6:00 P. M.

GAGING LABORATORY ESTABLISHED AT L. A.

United States Army Ordnance has established on the Los Angeles campus of the University of California, under the supervision of the department of engineering, a complete gaging laboratory, it was announced today by Dean L. M. K. Boelter.

Nearly all the equipment formerly used at the Los Angeles branch of the San Francisco Ordnance District has been transferred to the campus, as well as several truckloads from the San Francisco laboratory.

"This is one of two such gaging laboratories established on the Pacific Coast, the other being at Stanford University," said Dean Boelter. "In cases where duplicate equipment was not available from this district, items have been transferred from eastern districts."

Among the larger items of equipment are two contour measuring comparators and several super-micrometers. The laboratory will be placed in service as soon as the temporary engineering building soon to be constructed is completed.

GROOVER AND I

WHAT PRICE YALTA?

The American people were repeatedly told, **and wanted to believe, there were no secret territorial agreements made at any of the Big Three Conferences.** This would have been in keeping with the Four Freedoms and the so-called Atlantic Charter.

* * *

When the late President Roosevelt reported (less than one year ago) to the Congress on The Big Three meeting at Yalta, **we were again reassured there had been no secret agreements involving territorial expansion made at Yalta or elsewhere.**

* * *

Joseph Stalin doesn't speak often, but when he does we sometimes have the sensation of sitting down on a chair that isn't there—Joe has always been able to reach in his pocket and pull out a document backing up his statement.

* * *

What is claimed to be the text of ONE Yalta agreement has just been published (there may be others). Among the concessions made to Russia is the following: "The Kurile Islands shall be HANDED OVER to the Soviet Union."

* * *

President Truman has indicated he did not know of this agreement until some months after he had taken office. Secretary Byrnes states that he did not know of it until a still later date.

* * *

A question: WHO was sitting on this secret? WHO and WHAT and WHERE is the super-secret Government of this Nation, which reigns supreme to the President, Secretary of State and the Congress?

* * *

Kick this one around: At the time of the Yalta Conference, Japan was a Sovereign Empire, at peace with Russia. What right had Messrs. Roosevelt and Churchill to agree that a part of Japan should be "handed over to the Soviet Union"?

* * *

If you are troubled with insomnia try this at bedtime: This Yalta Agreement was so super-secret that apparently there were no witnesses—

* * *

Is this "agreement" another phoney, as has been admitted in the case of the "original signed copy" of the so-called Atlantic Charter?

Honsing in the Headlines

The plight of the returning service men who can't find homes to buy, much less rent, has aroused the public, the press, and the politicians. Panaceas, palliatives and pronouncements, plus six-to-sixteen-point programs are offered daily. Emergency measures must be, and are being, taken—most of them makeshift and inadequate, but the best possible in the crisis. Key building materials and equipment just are not available. The task of increasing the production of building materials by increasing wages on one hand, and controlling price rises wth the other, is far from easy. The profit motive can be made to produce both materials and houses, but at what price? Must we choose between houses and inflation? Will houses really be built in quantity under priorties and price controls? The debate goes on.

Amid the confusion of words, ideas and arguments, the finger of scorn is pointed at the "building industry," that inept, backward horse-and-buggy, hidebound, medieval, handicraft industry — that anachronism among the shining examples of industrial efficiency. Can this be the same industry that produced Oak Ridge in record time, that built the camps, the war factories, the naval and air bases, whole new complete towns for war workers?

Is it possible that the critics of this obsolete industry are ready now to get into it themselves and show the waiting world that they are able to bring about the great reformation that is necessary before houses, say, can be produced and erected in sufficient quantities to meet current needs, at low unit costs and at attractive profit to themselves? Does their superficial review of the complications and ramifications, conflicting interests, vested interests—real estate, political, labor, manufacturing, financing, legal interests—intrigue them into becoming the integrating-entrepreneurs who will bring about the changes which they have discovered to be necessary, and which the building industry has itself known for so many years?

Their confidence, enthusiasm, clear-thinking analytical minds, their ingenious and ingenuous ideas plus their influence-where-influence-counts, to say nothing of their abundant venture-capital, would be welcomed by those now within the industry who have been working toward the same ends. For there are those within the industry who are cognizant of the need for change, who know the direction of progress, and who understand from bitter experience the difficulties, obstacles, and limitations that are encountered on every side every day.

Perhaps the critics-turned-constructors will find new means to eliminate ignorance, fear, inertia, greed, short-sightedness, entrenched interests. Then will the industry make rapid progress, building codes will permit any material, equipment or structural system to be used so long as its performance is up to a scientific standard. Then will labor inrcease its productivity and efficiency, train thousands of young workers, eliminate its restrictive practices and jurisdictional disputes, being assured of adequate yearly income and steady, rather than seasonal, work. Then will land costs be related to land use, and financing will protect interests of both mortgagee and mortgagor. Then will come the technical revolution; then will every new invention find a ready sponsor, have a fair trial and meet with no unfair competition. Eventually will come the integrated shelter-service industry so rationally envisioned by Buckminster Fuller.

Or is it the function of the critics to remain on the sidelines writing the headlines to inform and arouse the public? This should help the building industry to make more rapid progress in the direction in which it is already going. The sideline quarterbacks may accomplish most with fewer boos, more lustry cheers, or perhaps by joining the motley team on the field to show just how the game can and should be played.

KENNETH K. STOWELL

New Method For Packing Sheeting Announced

A new way of packing sheeting to protect corners has been announced by the Wirebound Box Manufacturers Association. The new method, which cuts shipping costs by approximately 25 per cent can be adapted for packing wallboard, tin, enameled sheets, quires of paper, propeller shafts or any similar articles.

Packing is done quickly by placing two wirebound mats made of 3/16-inch veneer to 3/8-inch resawn lumber on either side of the sheeting, making a relatively lightweight but sturday crate type package. Wirebound construction makes it possible to reinforce the crate at all points of stress and strain so the shipper can be assured that extra large sheets may be shipped long distances without corner breakage, bending, cracking or wrinkling.

For example, highly finished wallboard being used for the interiors on many new homes is crated by placing ten sheets in a corrugated liner, then in a rigid yet lightweight wood frame which holds the sheets firmly in position. Finally, the entire unit is packaged between the two wire bound flats.

The special wirebound closures can be quickly and securely fastened by one man, and the shipment is ready to travel 10 or 10,000 miles without damage to the highly polished surface of the wallboard and is free from breakage on arrival at destination.

These are some of the advantages:

(1). 50 per cent savings in crating time, because of the ease and speed of packing in wirebound mats as compared to the old-style nailed wooden container.

(2). 25 per cent savings in container weight, because wirebound design scientifically combines wood and steel making it possible to use lighter weight wood slats bound securely with strong steel wires.

(3). A corresponding savings in shipping costs is brought about by wirebound methods of material savings.

Wirebound mats for shipping wallboard have been made in lengths ranging from 48- to 152-inches. Wirebound manufacturing procedures makes it possible to make the mats in almost any length or width for any type of sheeting material. Information can be obtained through the Wirebound Box Manufacturers Association, 105 S. La Salle St., Chicago 3, Ill.

Central Chapter AGC Elects 1946 Directors

At the Annual Meeting of January 30, Central California Chapter of The Associated General Contractors of America, Inc., elected the following Directors for 1946: Messrs. Fred J. Early, Jr. (Fred J. Early, Jr. Co., Inc.), Carl Gellert (Standard Buidling Co.), Robt. McCarthy (Robt. McCarthy Co.), James E. Roberts (Moore and Roberts', Harold W. Smith (Dinwiddie Construction Co.), Carl N. Swenson (Carl N. Swenson Co.), and Geo. W. Williams (G. W. Williams Co.)

Th newly-elected Board convened on February 11 and unanimously elected Robt. McCarthy, President, Harold W. Smith, Vice-Pres., Carl Gellert, Treasurer, and William E. Hague, Manager, to serve as officers of the Chapter during 1946. The new officers are all well known men in the construction industry.

BRIDGE, ONE MILE GRADING, SURFACING, KERN CO.

KERN COUNTY, Calif.—E. W. Elliott Constr. Co., 80 Laidley St., San Francisco, at $79,870 submitted low bid Feb. 13 to State Div. of Highways G. T. McCoy, State Highway Engr., Public Works Bldg., Sacramento, for construction of a steel beam span bridge and about one mile of grading and applying bituminous surface treatment at Freeman Gulch, Kern County.

Work involves:

(1) remove existing bridge;
(2) 2 c.l. remove concrete;
(3) clear and grubb;
(4) 34,300 c.y. rdwy. excav.;
(5) 1,980 c.y. struc. excav.;
(6) 2,600 c.y. ditch and channel excavation.
(7) 5,000 sq. yds. compact original ground;
(8) 4,500 c.y. import borrow;
(9) 280,000 sta. yds. overhaul;
(10) develop water supply and furnish water equipment;
(11) 1,800 M. gals. apply water;
(12) 53 sta. finish rdwy.;
(13) 14,500 sq. yds. prepare, mix and shape surf., bit. surf. treat.;
(14) 136 tons liq. asph. SC-3 or -4. bit. surf. treat.;
(15) 14 M. fbm Douglas fir timber;
(16) 737 c.y. Class A portland cement concrete structs.;
(17) 71,000 lbs. furnish struc. steel:
(18) 71,000 lbs. erect do;
(19) 91,000 lbs. furnish bar reinf. steel
(20) 91,000 lbs. place do:
(21) 246 c.y. sacked conc. riprap;
(22) 292 l.f. tee rail bridge railing:
(23) 6 each monuments;
(24) 22 each culvert markers, project markers and guide posts;
(25) 74 l.f. 24-in. CMP, 14 gage;
(26) 82 l.f. 36-in. CMP, 12 gage;
(27) 1 each remove and reset headwalls;
(28) 103 l.f. salvage exist. pipe culverts;.
(29) 10 c.y. surf. down drains:
(30) misc. items of work.

Total bids were:

(A) E W. Elliott Constr. Co., San Francisco, $79,870.
(B) Norman I. Fadel, North Hollywood, $98,068.
(C) Frank T. Hickey and Spencer Webb, Los Angeles, $99,688.50.
(D) R. R. Hensler, Glendale, $110,007.50.

3.4 MILES GRADING, SURFACING, EL DORADO COUNTY

EL DORADO COUNTY, Calif.—Utah Construction Co., 1 Montgomery St., San Francisco, at $260,925.50, submitted the low bid February 13 to the State Division of Highways, G. T. McCoy, state highway engineer, Public Works Bldg., Sacramento, for about 3.4 miles grading and surfacing with plant mix surfacing on crusher run base between Shingle Springs and 1¼ miles west of El Dorado, El Dorado County.

Work involves:

(1) 35 c.y. remove concrete;
(2) 36 acres clear and grubb;
(3) 183,000 c.y. rdwy. excav.;
(4) 2,050 c.y. struc. excav.;
(5) 2,450 c.y. ditch and channel excavation;
(6) 13,500 sq. yds. compact original ground;
(7) 790,000 sta. yds. overhaul;
(8) 27,000 c.y. imported borrow;
(9) develop water supply and furnish water equipment;
(10) 3800 M. gals. apply water;
(11) 182 sta. finish rdwy.;
(12) 150 c.y. salvage surfacing;
(13) 14,300 tons crusher run base;
(14) 125 tons liq. asph. SC-0 and -2 prime coat and pene. treatment;
(15) 300 tons sand prime coat and pene. treatment;
(16) 36 tons asph. emulsion seal coat
(17) 310 tons screenings, seal coat;
(18) 7,400 tons min. agg. plant mix surfacing;
(19) 410 tons pave. asph., plant mix surfacing;
(20) 370 c.y. Class A portland cement conc. struc.;
(21) 33,000 lbs. bar reinf. steel;
(22) 78 each monuments;
(23) 350 l.f. temporary guard rail;
(24) 500 l.f. metal plate guard rail;
(25) 44 each culvert markers;
(26) 100 each guide posts;
(27) 1.45 miles remove and reconstruct existing property fence;
(28) 810 l.f. 8-in. CMP, 16 gage;
(29) 150 l.f. 12-in. do;
(30) 1,060 l.f. 18-inch do;
(31) 120 l.f. 18-in. CMP siphon, 16 gage;
(32) 370 l.f. 24-in. CMP, 14 gage;
(33) 180 l.f. 24-in. do, 12 gage;
(34) 260 l.f. 36-inch do;
(35) 4 each field joints, siphons;
(36) 4 each cast steel frames and covers for drop inlets;
(37) 660 l.f. 8-in. perf. metal pipe underdrains;
(38) 125 c.y. filter material;
(39) 94 l.f. salvage pipe culverts;
(40) 94 l.f. re-lay salvaged CMP;
(41) 26 each spillway assemblies.

The total bids were:

(A) Utah Construction Co., San Francisco, $260,925.50.
(B) E. W. Elliott Construction Co., San Francisco, $289,798.

PLANS and Speculations

San Francisco State College has been authorized to start construction of a new campus at Nineteenth Avenue and Holloway Street. The $4,000,000 building program includes eleven classroom buildings, two large dormitories, gymnasium, swimming pool and a basketball court with a seating capacity for 2000.

oOo

San Mateo county's highway and bridge program for the present fiscal year calls for an expenditure of $574,401.

oOo

Pittsburg: Michael E. Evola, druggist, has announced plans for a business structure at Cumberland and Sixth Streets to house four stores.

oOo

Niles: Work has been started on the $50,000 refrigeration plant for the Pacific Cold Storage Co. According to C. W. Chrysler, vice president of the firm, 1000 family locker units will be provided.

oOo

El Cerrito: Don Kimball, president of the local Chamber of Commerce, has revealed plans for a bungalow-type motel of at least 70 units of two stories each, together with a coffee shop and recreation center. The site, at San Pablo Avenue and Fink Lane was purchased recently by Kimball for $16,000. Construction will start as soon as materials are available.

oOo

Stockton: Ray N. Cruden has been hired as project engineer to assist in preparation of plans and details of the $1,750,000 city sewer expansion program.

oOo

Millbrae: The Community Church under leadership of its pastor, Dr. B. W. Anderson, has launched a drive for $50,000 for construction of a new edifice at the northwest corner of El Paso and Almenar Sts. Ambrose and Spencer, San Francisco architects, have completed the plans.

Santa Clara: The Pacific Can Company of San Francisco has purchased three acres on the Alviso-Santa Clara Road in the Pasetta Tract for construction of machine shops to cost more than $100,000. The building will be 100 by 240 feet and will feature wood truss construction.

oOo

Walnut Creek: The Bank of America will invest approximately $110,000 in site and building for a new branch office to be erected on the east side of Main Street, one block south of the present location. E. S. Tomasi, branch manager, states that the building will be 52 by 120 feet.

oOo

Factors in Western Industrial Development Discussed Before Management Conference

During the general session of the Northern California Management Conference held at the Palace Hotel—R. M. Alvord, San Francisco Commercial Vice President, General Electric Company, discussed "Factors in Western Industrial Development".

Pointing out that "Managements' New Opportunities" fundamentally mean an opportunity to sustain and even expand full employment ,and hence prosperity, in the West—Alvord covered the efforts of his and other companies toward this end.

Since factory payrolls are basic to our economy, Alvory said that added industrial employment must come from one or a combination of the following actons:

(1) Expand existing plants.

(2) New branch plants of national manufacturers must be attracted to the West, or

(3) Form new companies:

(a) To exploit new inventions or manufacturing techniques, or

(b) To take advantage of such factors as changes in rates in freight or in the price or availability of materials, and

(4) Convert war plants.

Alvord said this: "Our hopes for full employment will not be realized unless Government creates an economic climate, favorable to the continued growth of private industry, and the imperative fact that we all must get back to work is adamant."

"General Electric believes in the West—and wishes to contribute to the continued industrial growth of this area," Alvord continued. "Our plans call for almost doubling the 2,000 California employees we now have on our payrolls—when our new plants at San Jose and Anaheim are built and go into operation. Plant expansions are planned for the Oakland Lamp Works and the flat-iron factory in Ontario, Calif., where all of G.E.'s United States production is done."

Alvord said that "decentralization" might prove to be the magnet which would draw many national manufacturers to the West, where they would set up branch factory operations. Decentralization works both ways. It is good for the worker and is good for the company, for with smaller manufacturing units management can become personally acquainted with employees, and workers tend to become "good citizens", thus espirit-de corps is enhanced, which is reflected in high productive efficiency.

G. E.'s policy towards decentralization has already been put into effect out here—through two Anaheim units. One is the chemical plant already under construction where paint bases will be made and the new plastics unit, soon to be started. Alvord quoted directly from a recent statement made by C. E. Wilson, President of his firm, who said:

"It has been said that in going into smaller towns to expand our business we are looking for cheap labor. General Electric doesn't want and never did want cheap labor. It did not grow that way. G.E. has always paid equal or better rates for a job than any other comparable employer in a given area, and that will continue to be our policy. What we are seeking by establishing factories in less congested areas are these things: proximity to markets and sources of materials; better transportatio. facilities; and desirable and congenial working conditions for employees, where the dollar earned will buy more leisure, better schools, improved health, and greater security. These seem like worthwhile objectives to me."

In summary Alvord said: "We need factories, but only on a sound basis; otherwise, we do harm not only to the West but to the national economy as well. Here are some points to consider:

"(1). Sound business thinking suggests that manufacturers in the West may not find it desirable to compete with plants which can manufacture more cheaply elsewhere.

"(2). After balancing reasons why not against reasons why, if consumer markers, labor supply, raw materials and transportation facilities indicate volume production at competitive prices, then the answer is obvious—go ahead. Any other reason is nebulous for no permanent benefit accrues to labor or to stockholders or to the West.

"(3). Perhaps a straight assembly type of operation is the answer. Our Oakland Lamp Works gives a clue: mass low cost production of component parts is required, parts which must be done on automatic machines costing thousands of dollars which turn out a million parts a day. The market for the finished product dictates an assembly plant a Oakland but only when the component parts are made elsewhere.

"(4). Decentralization indicates added factories for the West.

"(5). Many companies originated here. They started out to take care of a definite local need. They have products peculiar to a specific area. Then through normal expansion of products and markets they increased their operation to one nation-wide in scope. The Food Machinery Corporation is an example.

"(6). When we were talking about industrial development, the creation of jobs lead us to realize that nationally one-half of all gainfully employed people are in trades and services. If you eliminate from industry's one-half, that percentage of people working in agriculture and mining, the total industrial employment represents only about one-fourth of the total gainfully employed.

"It is well established that when the percentage of peoples in trades and services is high, the standard of living is likewise high. For example, California enjoys a very high standard of living—probably the highest in the country on an average. Here is proof: with only 5.2 per cent of the national population in 1939, California had 7.6 per cent of the retail sales. The eleven Western states in 1944 had 12.3 per cent of national population yet made 15.3 of the nation's retail purchases. California has about 65 per cent of all gainfully employed in trades and services. My thought is, therefore, to enjoy a continued and expanding high standard of living, we need expanding industrial activity, soundly planned and operated. It is the people in trades and services in this area who are the market for the products of our manufacturing plants, and who will sell and service the products made here. The more people employed in factories, the more products made, requires more people selling and servicing these products. It, therefore, is good for everyone. The ratio is clear—for every two employed in industry three must be in trades and services. Get this ratio into the 100,000 brackets and you really are on the way to full prosperity in the West.

"(7). The goal of western industry must be more goods for more people, at less cost. No other attitude or program will give us what we must have, ie., full employment and hence full prosperity. The reason is obvious—the consumer—who is the final boss of all industry won't permit it."

Central Valley Chapter AIA Elects Officers

Herbert E. Goodpaster, former captain in the marines, was elected president of the Central Valleys Chapter of the American Institute of Architects at a meeting held in Sacramento.

Goodpaster, released from service last summer, served in the Pacific. He wears the Asiatic-Pacific Ribbon wyith three battle stars.

Other officers are Jas. A. Gillam, Sacramento, vice president; Victor Galbraith, Stockton, treasurer; Frank Mayo, Stockton, secretary; and William Kiblik of the State Division of Schoolhouse Planning, director.

The Central Valley Chapter includes San Joaquin and Sacramento valleys, and Nevada.

GROOVER AND I

ANSWER IS "NO"

In this column my remarks have been restrained regarding the Roosevelt family, trying to limit them to F.D.R. as the elected Chief Executive of this Nation—Mrs. Eleanor Roosevelt as a paid writer in the public press and Mrs. Roosevelt as a paid public servant ($12,000 per year) as a U. S. member of the UNO Assembly.

★ ★ ★

Now, something new has been added and I am going to stand up and file my copy—which is a definite "NO".

★ ★ ★

When President Roosevelt was compaigning for the fourth term, he donned the verbal uniform of Commander-in-Chief of the Armed Forces.

★ ★ ★

The Roosevelt heirs, through their attorneys have asked for a ruling on the point that the late President be granted New York State income tax exemptions on the grounds he was a member of the armed forces when he died. The law grants a year's tax exemption to the servicemen who die while in service.

★ ★ ★

In this day of careless billions, the exemption would not financially embarrass the State. On the other hand, denial of this plea would not cause any of the wealthy Roosevelt family to go hungry.

★ ★ ★

That isn't the point. This would be a dangerous spark in a dry forest. It is the first step toward a military rulership.

★ ★ ★

When our Constitution was framed, the Founding Fathers had enough of rule by gun, sword and scepter. Our Government — Judicial, Legislative and Executive—was to be a PEOPLE'S Government, with all functions, including the military, subservient to the will of the people as expressed through their elected civilian representatives.

★ ★ ★

Granting this request would be a foot-in-the-door to dictatorship. This doesn't refer to Mr. Roosevelt or to President Truman but it is looking toward the future.

★ ★ ★

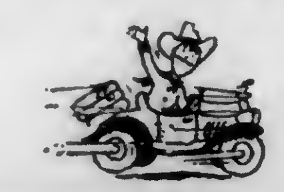
There are just too many "Huey Long's" and little would-be dictators running loose in this country to ever take the chance that our Nation have a Military Government.

★ ★ ★

It would be the first step toward an Argentinian Perone, Spanish Franco, Italian Mussolini or even a German Hitler.

★ ★ ★

The answer must be "NO" —that we maintain a Government of the People—by the People—for the People.



Bureau Makes Changes In Engineering Staff

Two additional engineers have been appointed to the Bureau of Reclamation's Sacramento Valley District office staff, with headquarters at Chico, according to James K. Carr, District Engineer.

Marshall Young, who has been acting as superintendent of the Bureau's Colusa office for the past few months, was transferred this week to the office at Chico, to supervise operation and maintenance problems within the Sacramento Valley District. Young, who has been with the Reclamation Bureau for more than 12 years, has spent the last nine years on the Central Valley Project. He was employed on construction of Friant Dam and other work in the San Joaquin Valley. He is a graduate of the University of Utah, and is married and has two children.

Young will be assisted in Chico by Albert W. Plummer, who has just returned from two years with the United States Navy in the Sea Bees as Chief Petty Officer. Plummer, formerly employed by the Corps of Engineers, U. S. Army, has had experience on Central Valley flood problems, and was for a time located at Edmonton, Canada, while working on the Alcan Highway and other activities of the Corps of Engineers.

Carr stated that the establishment of the District Office Headquarters in Chico will have comparatively little effect at present upon the operation of the Bureau's Colusa office. Operations problems on the Sacramento River require considerable hydrological and other work which can be most economically performed by the field forces stationed at Colusa.

NOTICE

Within a few days the "Builder" will start to publish, as a regular feature, the building permits of $1000 and over that have been granted in the following locations: Unincorporated areas of San Mateo County, Redwood City, Menlo Park and San Carlos.

Even greater coverage will be announced shortly.

Col. George Mayo Host To Brazilian Army Engineers

A distinguished group of Brazilian military engineers headed by Brig. General Francisco Borges Fortes de Oliveira, Chief of Engineers of the Brazilian Army, was honored at a luncheon at the Presidio Officers' Club, Tuesday, given by their Bay Area host, Colonel George Mayo, Acting Pacific Division Engineer.

Among those on hand to greet the South American delegation were Major General Frank D. Merrill, Acting Commanding Officer, Western Defense Command; Brigadier General Philip G. Bruton, Division Engineer, Pacific Division; Colonel H. H. Galliett, Commanding Officer, Presidio of San Francisco, and Colonel Wm. F. LaFrenz, Commanding Officer, San Francisco Harbor Defense.

The Brazilion officers are in the United States at the invitation of the Chief of Engneers, U. S. Army, and will be accompanied throughout their visit by Colonel Wm. C. Bennett, Representative of the Chief of Engineers, Lt. Colonel W. M. Clemens, Member of the Joint Brazil-United States Military Commission, and Lt. Colonel L. G. King, Office, Chief of Engineers.

Pryne & Co., Inc. Re-Opens S. F. Branch Office

Pryne & Co., Inc., manufacturers of Electrical and Hardware Building Specialties, have re-opened a San Francisco Branch Office at 778 Natoma Street (near Howard), San Francisco 3, HEmlock 0886. They are represented by Ray H. McMillen and Lynne Stanley, both well known in the Bay area.

Production of "Pryanco" products is at present limited to three models of the "Blo-Fan" and three types of "Pry-Lites" (flush lighting fixtures). Electrical wholesale suppliers are now receiving these items on an allocated basis; however, full production of "Blo-Fans", "Prylites" and many other pre-war "Pryanco" products is assured as soon as the shortage of steel and component parts has been overcome.

OFFICIAL PROPOSALS

FIRST PUBLISHED TODAY

Highway Improvements—Santa Clara County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 13, 1946,** at which time they will be publicly opened and read in the Assembly Room of said building for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Santa Clara County, on Bayshore Freeway at Santa Clara Street in the City of San Jose (IV-SC1-68,2-SJs), a separation structure to be constructed and approaches about six-tenths (0.6) mile in length to be graded and surfaced with Portland cement concrete and asphalt concrete on crusher run base.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.40
Asphalt paint mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.50
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity or paving type)	1.70
Electrician	1.70
Mechanical tamper and finisher operator (concrete or asphalt)	1.70
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.00
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Pile driver hoistman or operator	1.85
Pile driver man	1.61
Plumber	1.625
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (8 cubic yards water level capacity or more)	1.50
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.25
Intermediate Grade Labor	
Concrete vibrator operator	1.25
Headerboard man	1.375
Jackhammer operator	1.25
Oil distributor bootman	1.00
Oiler, power shovels or cranes	1.40
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.10
Truck driver (less than 4 cubic yards water level capacity)	1.00
Unskilled Labor	
Flagman	1.00
Laborer	1.00

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.25 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.00 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal office or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposal to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (See said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 1200 North Center Street, Stockton, California, until 2 o'clock P.M. on Feb. 19, 1946, at which time and place they will be publicly opened and read, for performing work as follows:

An existing ferry moored on the Sacramento River about 0.5 mile upstream from Rio Vista in Solano County (X-Sol-100-A) to be repaired.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

The rates of wages, including overtime, holiday or Sunday rates, herein specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done at the site where the boat is to be left at the end of the work, to be as follows:

Classification	Rate per hour
Laborer	$1.00
Any classification omitted herein not less than	1.00

Overtime—one and one-half (1½) times the above rates. Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

STATE HIGHWAY ENGINEER'S ESTIMATE

Item 1. Dry-docking and delivering ferry.
Item 2. 4 thousand feet board measure miscellaneous timber.
Item 3. Miscellaneous repairs.
Item 4. 2,600 pounds miscellaneous iron and steel.
Item 5. 2,500 lineal feet caulking seams.
Item 6. Painting hull and superstructure.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS
G. T. McCOY
State Highway Engineer
Dated: February 8, 1946.

Highway Imp.—Solano County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on **February 27, 1946,** at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Solano County, across Napa River at West City Limits of Vallejo (X-Sol-208-A) a bridge fender to be repaired.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Carpenter	$1.75
Electrician	1.70
Flagman	1.00
Laborer	1.00
Oiler power shovels or cranes	1.40
Pile driver hoistman or operator	1.85
Pile driver man	1.61
Tractor driver	1.70
Any classification omitted herein not less than	1.00

Overtime: one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen): one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (See said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvements—Contra Costa County

SECOND ADVERTISEMENT

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **February 27, 1946,** at which time they will be publicly opened and read, in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Contra Costa County, between Concord Avenue and four-tenths (0.4) mile west of Ohmer Station (IV-C.C-75,106-E,Cnd,C), about two and three-tenths (2.3) miles in length, to be graded and paved with Portland cement concrete.

Bids are required for the entire work described herein.

THIS IS A NATIONAL DEFENSE CONTRACT UNDER THE DEFENSE HIGHWAY ACT OF 1941

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant mixer operator	$1.45
Asphalt spreading machine operator	1.75
Carpenter	1.75
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity)	1.70
Mechanical tamper and finisher operator (concrete or asphalt)	1.70
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovl type controls (up to and including one cubic yard)	2.00
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (8 cubic yards water level capacity or more)	1.625
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.3125
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.1875
Intermediate Grade Labor	
Asphalt plant dryerman or fireman	1.40
Concrete vibrator operator	1.25
Headerboard man	1.375
Jackhammer operator	1.25
Oil distributor bootman	1.00
Oiler, power shovels or cranes	1.40
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Unskilled Labor	
Flagman	1.0625
Laborer	1.0625

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.1875 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.0625 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.0625 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable herto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (see said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

HOW MUCH BUILDING?

Construction Revival—Guide Signs to Peacetime Expansion and Prosperity. A Market Study by F. W. Dodge Corp. New York 18 (119 W. 40th St.), F. W. Dodge Corp. 1945. 11 by 8¼ in. 32 pp.

How much actual building will there be in the next decade? That is what everyone connected with the building field—and everyone interested in the national economy—naturally wants to know. Estimates by the carload have appeared, some of them based soundly on statistics, others amounting to little more than personal guesses or wishful thinking. This market study by the F. W. Dodge Corporation ,however, is really more than an estimate: springing from the company's own summary of work actually planned, it is an analysis of the building volume that can reasonably be expected during the next ten years.

"Construction revival has begun," the study states, "ushering in a return to normal peacetime competitive market conditions. As transition problems are surmounted, volume will snowball."

What are these transition problems? For architects and engineers: "securing adequate staffs of designers and draftsmen, adequate information on materials and equipment available for early use in urgent projects, information on new products and services." For builders and sub-contractors: "man-power, material supply, price and wage adjustments, possible transportation shortages. For material and equipment manufacturers: "reestablishment of orderly marketing service to the field; sales and production manpower; and (for an important minority) reconversion of plant facilities."

On May 31, 1945, when the company's statistical tabulation of V-day projects was discontinued, the Dodge records of postwar projects showed a total of 99,638 specific projects located in the 37 states east of the Rocky Mountains, the estimated cost of which totaled $15,746,202,000. Since June 1 "hundreds of millions of dollars in additional preliminary and design-stage projects have been reported and tabulated on a new basis as currently contemplated work."

The Dodge Corporation disagrees with the commonly expressed opinion that the volume of public work in blueprint stage is inadequate to meet the needs of the transition period. On the contrary, "unduly strong pressure to push public building and engineering work in the recovery period would create intense competition for men and materials and add to the inflation threat." As for private building, it is reasonable to assume, the study states, "that most private projects in the design stage are scheduled for sites already selected and either owned or controlled by option. For such projects bids can be taken and decisions made fairly quickly."

ARCHITECT AND AUTHORITY

The Local Housing Authority and the Architect. By Oliver C. Winston. Chicago 37, Ill. (1313 E. 60th St.), Public Administration Service, 1945. 7x10 in., 60 pp. 60c.

Subtitled "A Working Relationship in Planning a Public Housing Program and in Designing a Public Housing Project," this booklet stresses the importance of cooperation between the housing authority and the architect. Considerable emphasis is placed on the responsibilities of the housing authority before the architect starts to design — the establishment of basic requirements. Mr. Winston finds three phases in this working relationship: (1) planning the new over-all housing program; (2) preparing the architectural program; and (3) designing the project. In the first phase the main burden of the work falls logically upon the housing authority, with the architect's principal services of a consulting nature. In the second phase, too, the architect's contribution is chiefly advice — on site planning, dwelling types, community facilities; with the preparation of cost estimates and some technical assistance on the side. The third phase, of course, is almost wholly the architect's baliwick.

"If such an approach to design . . is adopted at the very beginning," Mr. Winston concludes, "it should be possible to avoid the unsatisfactory practice of having to prune, whittle and shave project designs . . Such an approach should lead to a more purposeful selection of planning criteria by the local housing authorities and to more disciplined use of design criteria by architects and engineers."

SHOPPING CENTERS

Planning Neighborhood Shopping Centers. By Marcel Villaneuva, A.I.A. New York 18 (512 Fifth Avenue), National Committee on Housing, Inc., 1945. 8½ by 11 in. 34 pp. illus. $1.00.

Here is a community planning study devoted entirely to the problems of the shopping center—its location, the number of stores required, parking spaces, and so on. Its chief value probably lies in the carefully worked out tables giving area requirements for stores of various types. While these requirements are purely theoretical, they serve as a working basis for planning, and they point up Mr. Villaneuva's conclusion that "most cities and towns are overbuilt with old and unwanted stores, and underbuilt with regard to new and desired shopping centers planned for our modern way of living."

FOR BETTER BUILDING
NEWS OF MATERIALS, EQUIPMENT AND METHODS

KITCHEN UNITS

Flexibility and adaptability are the goals of a new line of 12 steel steel kitchen units which can be bought separately or as a complete package, installed just as the housewife and the size of the kitchen demand. The line includes five types of sinks and sink cabinets, varying in width from 42 to 66 inches; six types of wall cabinets, ranging in width from 24 to 66 inches; and one type of base cabinet, 24 inches wide.

The same company offers a new Shelvador Refrigerator featuring maximum accessibility. Five food shelves are on the inside of the refrigerator door, providing storage space for bottles, eggs, fruits, processed foods. The Crosley Corporation, Cincinnati 25, Ohio.

§§

HEATING
ELECTRIC UNIT HEATERS

Under terms of a license granted by the Wesix Electric Heater Co., San Francisco, the Westinghouse Electric Corp. has acquired the right to use the basic principles involved in the design, construction and control of unit type electric heaters. Models comprising the new line will range from an easily protable 1250-watt, 110-volt floor unit to 4 kw, 220-volt floor and wall models. All of the 220-volt units will have built-in automatic thermostatic control The Westinghouse Electric Corp., Emeryville, Calif.

CIRCULATOR FAN

Designed to prevent cold floors, the new RECO Heat Circulator Fan blows upwards, the air traveling along the ceiling and down the walls, carrying the super-hot air with it and intermixing it with the room air, providing uniform temperature throughout the room. It is especially recommended for hard to heat rooms and rooms which are not constantly heated. Reynolds Electric Co., 2650 W. Congress St., Chicago 12, Ill.

§§

PHOSPHOR POWDER

A new phosphor powder similar to the powder used in present fluorescent lamps except that it changes the energy wavelengths to ultraviolet, makes possible two new types of lamp: a fluorescent type sunlamp and a germicidal lamp for use with poultry and animals.

Not yet available, the F-type Sunlamp will be made in 20- and 40-watt sizes identical in dimensions and electrical operating characteristics to present fluorescent lamps of the same wattages. The difference is in the special ultraviolet-transmitting glass which is coated inside with the phosphor powder. The lamp can be combined with existing fluorescent lamps in some present office, factory, home or store fixtures.

A thin coating of the phosphor powder on hte inside of 15- and 30-watt germicidal lamps combines germ-killing with ultraviolet energy. Not recommended for human use, the lamps are now available in limited quantities. General Electric Co., Bridgeport, Conn.

§§

WALL COVERING

A new wall covering called Congowall consists of a lustrous baked enamel surface in a cameo-like tile design on a special patented, flexible, water-resistant felt backing. According to the manufacturers, Congowall will not warp or shrink, buckle or bulge, crack or craze, chip off or peel; it is easily installed over any firm, smooth, dry surface, and is suitable for both new work and remodeling. Offered at present in five colors—peach, green black, blue and white. Congoleum-Nairn Inc., Kearny, N. J.

§§

ALUMINUM VENETIANS

Laboratory tests of an aluminum slat venetian blind just announced show a heat reduction of 75 per cent, the manufacturers report. One side of the slat is polished to reflect the heat, and the other side is satin finished to prevent the metal from absorbing heat. Dust and grease will not adhere to the treated metal. MacArthur Smith and Associates, 134 S. LaSalle St., Chicago 3, Ill.

§§

FARM QUONSET

A new type Quonset building—a cousin to the round-roofed Quonset of Navy fame—has been designed especially for rural utility purposes and now is in production.

The new, low-cost, packaged, all-steel building differs from the Navy Quonset in that it has a straight side. Designated the Quonset 24, this farm building has an unobstructed interior suited particularly for garage and storage of implements, tools and vehicles, or as an open-front loafing barn for animals.

The basic unit is 24 ft. deep and 12 ft. long. As may 12-ft. extensions as desired can be added to increase length. Sliding doors and section panels are available. Great Lakes Steel Corp., Stran-Steel Division, Penobscot Bldg., Detroit 26, Michigan.

§§

HOUSEHOLD ITEMS
RADIOS

Included in Westinghouse's new line of postwar home radio receivers are nine sets ranging from an ultra - modern 6-tube, 6 by 6 by 9 in. portable table model to a 14-tube radio-phonograph combination set housed in a modified Chippendale console cabinet and equipped to receive standard broadcasts, foreign shortwave broadcasts and frequency modulation programs. Television receivers will be ready for the market early next year.

Fourteen models, ranging from small plastic table models through portables, radio-phonograph combinations in both table models and consoles, and full - sized console furniture model radios, comprise the new Stewart - Warner line. New and exclusive features of all sets include the radair antenna, a built-in loop designed to pick out faintest signals but to repel static nterference, and a signal sentry, a device to eliminate fading and to bar unwanted hum or other noises. An automatic record changer, operated with only one control, is incorporated in the radio-phonograph combinations.

REFRIGERATORS

Three 7-ft. models and one 9-ft. model are on the 1946 Kelvinator production schedule. Topping the line is the new Moist Master, a triple range unit with special provisions for freezing and storing frozen foods, for the safe-keeping of foods of high moisture content, and for general storage of all average foods. In effect a combination refrigerator and frozen food chest, the new unit has a freezer capacity of approximately 9 lbs. of ice cubes, and more than 35 lbs. of packaged frozen foods. Kelvinator Division, Nash - Kelvinator Corp., Detroit 32, Mich.

§§

NEW BUILDINGS
PAPER GOODS PLANT

Construction of a new plant to house The American Paper Goods Company's midwestern operation has been started by The Austin Company in Chicago.

The new building was especially designed by Austin to accommodate new high-speed presses and machinery for the production of ice cream containers, beverage cups, specialty bags and other products. It will be one-story, with welded steel frame, brick exterior and continuous sash in side walls and monitors. Air conditioned offices at one side of the principal facade will be balanced by truck loading docks on the other.

PLASTICS LABORATORY

Plans for a new plastics laboratory at its Parlin, N. J., plant have been announced by Hercules Powder Company. The laboratory will serve as headquarters for the company's development and research work on plastics. It will have facilities for compounding finished plastics for testing, and will be set up in such a way that customers who buy basic materials from the company can see new techniques applicable to their work demonstrated, and can work with the laboratory chemists on their processing problems. Plans include several constant - temperature rooms in which plastics qualities can be tested under conditions specified by customers. Both cold and heat tests will be possible, with the temperatures in the testing rooms ranging from minus 70 degrees to plus 180 degrees F.

The building will be T-shaped, with the head of the T one story high and the leg two stories high. Laboratories will be located on both floors. Offices, a conference room and high-temperature equipment will be on the second floor, while cold - storage rooms, electrical equipment rooms and a machine shop will be on the first floor. Walls will be tile-lined, floors concrete. Air will be filtered to insure freedom from contamination by dust and dirt. All electrical equipment will be explosion-proof.

OFFICES ADDITION

E. I. duPont de Nemoures & Co., Inc., has announced plans for the construction of an 18-story third section to the Nemours Building in Wilmington, Del. The building will be completely air conditioned. Voorhees, Walker, Foley and Smith are the architects, with Frederick A. Godley as associate; the contract has been awarded to the Turner Construction Co.

WEAVING PLANT

The Lumite Division of Chicopee Mfg. Corp. of Georgia has announced plans for a new weaving plant at Cornelia, Ga., for which ground was broken late in October.

A one-story building of modern design, the plant will be devoted exclusively to the weaving of Lumite plastic fabrics, is expected to be in operation early in 1946. L. W. Robert & Co., of Atlanta, are the engineer - designers: Daniel Construction Co., Greenville, S. C., the contractor.

§§

STANDARDS
LIGHT GAGE STEEL

Research which the Committee on Building Codes of American Iron and Steel Institute has been sponsoring since 1939 at Cornell University has provided sufficient data for presentation soon to the engineering profession in a specification for the design of light gage steel structural members, it has been announced. When available, the specification will provide a basis upon which to design with light gage sheet and strip steel. It will include provisions which distinguish between the behavior of stiffened and unstiffened flanges and their relative load carrying capacities.

DIMENSIONAL COORDINATION

The American Standards Association has approved an American Standard on the basis of which building materials and equipment of coordinated sizes and dimensions will be made available to construction operations. and building plans and details can be correlated with such dimensions.

The new standard is A62.1-1945, American Standard Basis for the Coordination of Dimensions of Building Materials and Equipment. Also approved is A62.2 - 1945, American Standard Basis for the Coordination of Masonry.

Project A62 was organized by the A.S.A. in 1939, with The American Institute of Architects and The Producers' Council, Inc., as joint sponsors.

RESIDENTIAL BOILERS

A code for rating and testing oil-fired residential steel boilers and for rating commercial boilers has been issued by Steel Boiler Institute, Inc., requiring oil-fired residential boilers up to 3,000 sq. ft. net rating to show at least 70 per cent over-all efficiency by evaporation test when operating at 150 per cent of net rating.

Even though test results are attained better than the prescribed minimum requirements. net ratings in sq. ft. of steam shall be limited to 17 times the sq. ft. of heating surface in a mechanically-fired residential boiler. A.S.M.E. Boiler Code construction is required.

CLAY SEWER PIPE

Printed copies of Simplified Practice Recommendation R211-45, Clay Sewer Pipe and Fittings, are now available from the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for 10 cents each.

The recommendation lists the variety of standard - strength and extra-strength pipe and fittings to be considered as stock items.

STOCK FIR DOORS

Commercial Standard for Old Growth Douglas Fir Standard Stock Doors (3rd Edition), CS73-45, is now a recorded standard of the industry, effective for new production from Sept. 20, 1945.

§§

WATER COOLER

Pressure bubbler and bottle-type electric water coolers just announced, are powered by Kelvinator and built with one-piece stainless steel cabinets and one-piece stainless steel tops. They are removable without tools, can be operated by foot pedal from sides or front. Said to be the first water cooler to provide sanitary protection against water from the mouth returning to the jet, and the first bottle-type cooler with a fully enclosed and refrigerated bottle. The Coolstream Corp., 55 W. 42nd St., New York 18, N. Y.

Manufacturers' Literature

COPPER CONSTRUCTION

Research Solves Problem of Stress Failures in Sheet Copper Construction. A report on two years of research into the behavior of copper installations, with specific recommendations for design an construction methods directed toward the elimination of stress failures. Includes 30 detail sheets showing methods of installation and some of the basic principles in the use of sheet copper. Diagrammatic drawings of parapet walls, seam roofing, open valleys for slopes, fascia gravel stops, built-in gutters, covers over expansion joints, etc. 96 pp., illus. Revere Copper and Brass, Inc., 230 Park Ave., New York 17, N. Y.*

FIBER BOXES

Vs-Boxes. A report on the weatherproof solid fiber box, including a description of wartime uses and various tests used to insure its quality. 16 pp., illus. Container Testing Laboratories, Inc., 45 E. 22nd St., New York, N. Y.

HANGARS

Low Cost Housing for Small Airplanes. Basic ideas on the layout and construction of individual wood hangars in single and multiple units, wood repair shops and large commercial hangars. Offers 10 reasons why wood hangars are thrifty. 8 pp., illus. Timber Engineering Co., 1319 18th St., N.W., Washington 6, D. C.

HARDWARE

Solid Brass and Bronze Hardware. A description of Mount Vernon and Monticello and their solid brass hardware fixtures; examples of modern brass and bronze hardware. 16 pp., illus. Copper & Brass Research Assn., 420 Lexington Avenue, New York 17, N. Y.

HEATING

A Step Ahead in Hospital Heating (Bulletin No. 633). A description of differential heating and how it works; cost analysis; typical installations in hospitals. 24 pp., illus. C. A. Dunham Co., 450 East Ohio St., Chicago 11, Ill.*

INSULATION

Foamglas Insulation forTanks. The method to be used in installing Foamglas for the insulation of high temperature tanks, towers and ducts. Specifications and details, table of block sizes. 24 pp., illus. Pittsburgh Corning Corp., 632 Duquesne Way, Pittsburgh 22, Pa.*

LIGHTING

Engineered Lighting and Contral Equipment (Catalog No. 945). A condensed catalog, with photographs and detail drawings, specifications and engineering details. Equipment listed includes stage lighting, exit and directional signs, indirect and built-in lighting, fluoescent troffers, stage switchboards. 10 pp., illus. Hub Electric Corp., 2219-22 W. Grand Ave., Chicago 12, Ill.

G-E Slimline and Circline Lamps Seen in Many Roles. The use of the two types of fluorescents in store design. Diagrams and sketches of store interiors, special display units, and store lighting fixtures. 12 pp., illus. General Electric Co., Nela Park, Cleveland 12, Ohio.*

MEMORIAL TABLETS

Bronze Honor Rolls. Descriptive circulars featuring the Willard "Add-a-Name" type of cast bronze honor roll tablet. 6 pp., illus. The Willard Bronze Co., 3608-16 Colerain Ave., Cincinnati 28, Ohio.

PLASTICS

Plexiglas Design Manual. Design methods for arylic plastics. Complete with diagrams and illustrations of various products. 56 pp., illus. Rohm & Haas Co., Washington Square, Philadelphia 5, Pa.*

Forming Articles from Extruded Tenite Sheeting. Nine primary operations in the fabrication of sheet plastic articles, and the equipment which may be used. Includes several diagrams of equipment. 12 pp., illus. Tennessee Eastman Corporation, Kingsport, Tenn.*

SILICONES

Dow Corning Silicones, New Engineering Materials. Catalog listing all of the silicone products now available, and presenting many industrial uses. Contains charts and graphs demonstrating the properties, tables of physical characteristics, etc. 12 pp., illus. Dow Corning Corp., Midland, Mich.

STEEL

In War . . . In Peace, Republic Enduro Stainless and Heat-Resisting Steels (Adv. 430). The war applications of Enduro steels, and suggestions for their translation into peacetime terms. 32 pp., illus. Republic Steel Corp.. Advertising Division, 3100 E. 45th Ave., Cleveland 4, Ohio.*

Know your Steel When You Build or Remodel. The uses of special - purpose sheet steels in building construction, built-in equipment and appliances. 24 pp., illus. The American Rolling Mill Co., 1717 Armco Ave., Middletown, Ohio.*

STEEL BOILERS

Standard Electric-Welded Steel Boilers (Bulletin No. S-67, 5th ed.) Full information including diagrams and specifications and dimension tables. 8 pp., illus. The Brownell Co., 430 N. Findlay St., Dayton 1, Ohio.

High Pressure Heavy Duty Firebox Steel Boilers (Catalog 96). Illustrates and describes with fully detailed tabulations and diagrams three series of steel riveted firebox boilers. 20 pp., illus. Kewanee Boiler Corp., Kewanee, Ill.*

TURBINES

The Gas Turbine Power Plant Now a Reality. History and features of the gas turbine. 20 pp., illus. Elliott Co., Jeannette, Pa.

WATER HEATERS

Nema Standards for Electric Water Heaters. Practical information on performance, rating, testing and manufacture of electric water heaters. Includes schematic diagram showing standard connections and color coding. 8 pp. National Electrical Mfgrs. Assn., 155 E. 44th St., New York 17, N. Y. 25 cents.

Test Specifications, Automatic Electric Storage Water Heaters. Intended to establish a uniform testing procedure to make possible the determination of the performance of electric storage water heaters in terms of safety, effectiveness, durability and convenience. 10 pp. National Electrical Mfgrs. Assn., 155 E. 44th St., New York 17, N. Y. 50 cents.

VENTILATION

Put the Wind to Work. Bulletin on the "Agitair" air exhauster. Typical applications, engineering data selecting the proper size, location principles. 10 pp., illus. Air Devices, Inc., 17 E. 42nd St., New York 17, N. Y.

WINDOWS

The Ultimate in Modern Ventilation and Vision. Descriptive folder on an aluminum package window unit. Gives specifications and installation details. 4 pp., illus. Watco Engineering, Inc., 2200 Scranton Road, Cleveland 13, Ohio.

"... built-in telephone outlets add real value to a home"

EVEN if only one telephone is needed immediately, it's a wise economy to plan ahead for other outlets. Conduit is inexpensive to install during building . . . and built-in telephone facilities add real value to a home. Future telephones can be added without tearing up flooring or bringing wires in along baseboards. Your clients will appreciate your foresight in planning with an eye to future needs. Our Architects' and Builders' Service will help you in every way possible at no cost.
